

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

PREFACE.

FEW subjects have of late years more employed the pens of every class of criticks than the improvement of the English Language. The greatest abilities in the nation have been exerted in cultivating and reforming it; nor have a thousand minor criticks been wanting to add their mite of amendment to their native tongue. Johnson, whose large mind and just taste made him capable of enriching and adorning the Language with original composition, has condescended to the drudgery of disentangling, explaining, and arranging it, and left a lasting monument of his ability, labour, and patience; and Dr. Lowth, the politest scholar of the age, has veiled his superiority in his short Introduction to English Grammar. The ponderous folio has gravely vindicated the rights of analogy; and the light ephemeral sheet of news has corrected errors in Grammar, as well as in Politics, by slyly marking them in italics.

Nor has the improvement stopped here. While Johnson and Lowth have been insensibly operating on the orthography and construction of our Language, its pronunciation has not been neglected. The importance of a consistent and regular pronunciation was too obvious to be overlooked; and the want of this consistency and regularity has induced several ingenious men to endeavour at a reformation; who, by exhibiting the irregularities of pronunciation, and pointing out its analogies, have reclaimed some words that were not irrecoverably fixed in a wrong sound, and prevented others from being perverted by ignorance or caprice.

Among those writers who deserve the first praise on this subject is Mr. Elphinston, who, in his Principles of the English Language, has reduced the chaos to a system; and, by a deep investigation of the analogies of our tongue, has laid the foundation of a just and regular pronunciation.

After him Dr. Kenrick contributed a portion of improvement by his Rhetorical Dictionary; in which the words are divided into syllables as they are pronounced, and figures placed over the vowels, to indicate their different sounds. But this gentleman has rendered his Dictionary extremely imperfect by entirely omitting a great number of words of doubtful and difficult pronunciation—those very words for which a Dictionary of this kind would be most consulted.

To him succeeded Mr. Sheridan, who not only divided the words into syllables, and placed figures over the vowels, as Dr. Kenrick had done; but, by spelling these syllables as they are pronounced, seemed to complete the idea of a Pronouncing Dictionary, and to leave but little expectation of future improvement. It must, indeed, be confessed that Mr. Sheridan's Dictionary is greatly superior to every other that preceded it; and his method of conveying the sound of words, by spelling them as they are pronounced, is highly rational and useful;—but here sincerity obliges me to stop. The numerous instances I have given of impropriety, inconsistency, and want of acquaintance with the analogies of the Language, sufficiently show how imperfect I think his Dictionary is upon the whole, and what ample room was left for attempting another that might better answer the purpose of a Guide to Pronunciation.

* See Principles, Nos. 124, 126, 129, 202, 454, 462, 479, 480, 530; and the words *Assume*, *Collect*, *Custom*, *Denative*, *Ephemera*, *Satisty*, &c. and the inseparable preposition *Dis*.

The last writer on this subject is Mr. Nares, who, in his *Elements of Orthoëpy*, has shown a clearness of method and an extent of observation which deserve the highest encomiums. His Preface alone proves him an elegant writer, as well as a philosophical observer of Language; and his Alphabetical Index, referring near five thousand words to the rules for pronouncing them, is a new and useful method of treating the subject; but he seems, on many occasions, to have mistaken the best usage, and to have paid too little attention to the first principles of pronunciation.

Thus I have ventured to give my opinion of my rivals and competitors, and I hope without envy or self-conceit. Perhaps it would have been policy in me to have been silent on this head, for fear of putting the publick in mind that others have written on the subject as well as myself: but this is a narrow policy, which, under the colour of tenderness to others, is calculated to raise ourselves at their expense. A writer who is conscious he deserves the attention of the publick (and, unless he is thus conscious, he ought not to write) must not only wish to be compared with those who have gone before him, but will promote the comparison by informing his readers what others have done, and on what he founds his pretensions to a preference; and if this be done with fairness, and without acrimony, it can be no more inconsistent with modesty than it is with honesty and plain dealing.

The Work I have to offer on the subject has, I hope, added something to the publick stock: it not only exhibits the principles of pronunciation on a more extensive plan than others have done, divides the words into syllables, and marks the sounds of the vowels like Dr. Kenrick, spells the words as they are pronounced like Mr. Sheridan, and directs the inspector to the rule by the word like Mr. Nares; but, where words are subject to different pronunciations, it shows the reasons from analogy for each, produces authorities for one side and the other, and points out the pronunciation which is preferable. In short, I have endeavoured to unite the science of Mr. Elphinston, the method of Mr. Nares, and the general utility of Mr. Sheridan; and, to add to these advantages, have given critical observations on such words as are subject to a diversity of pronunciation, and have invited the inspector to decide according to analogy and the best usage.

But to all works of this kind there lies a formidable objection; which is, that the pronunciation of a Language is necessarily indefinite and fugitive, and that all endeavours to delineate or settle it are in vain. Dr. Johnson, in his Grammar prefixed to his Dictionary, says, "Most of the writers on English Grammar have given long tables of words pronounced otherwise than they are written; and seem not sufficiently to have considered, that, of English, as of all living tongues, there is a double pronunciation; one cursory and colloquial, the other regular and solemn. The cursory pronunciation is always vague and uncertain, being made different, in different mouths, by negligence, unskilfulness, or affectation. The solemn pronunciation, though by no means immutable and permanent, is yet always less remote from the orthography, and less liable to capricious innovation. They have, however, generally formed their tables according to the cursory speech of those with whom they happened to converse; and, concluding that the whole nation combines to vitiate language in one manner, have often established the jargon of the lowest of the people as the model of speech. For pronunciation the best general rule is, to consider those as the most elegant speakers who deviate least from the written words."

Without any derogation from the character of Dr. Johnson, it may be asserted that in these observations we do not perceive that justness and accuracy of thinking for which he is so remarkable. It would be doing great injustice to him to suppose that he meant to exclude all possibility of conveying the actual pronunciation of many words that depart manifestly from their orthography, or of those that are written alike, and pronounced differently and inversely. He has marked these differences with great propriety himself in many places of his Dictionary; and it is to be regretted that he did not extend these remarks further. It is impossible, therefore, he could suppose, that, because the almost imperceptible glances of colloquial

PREFACE.

pronunciation were not to be caught and described by the pen, that the very perceptible difference between the initial accented syllables of *money* and *monitor*, or the final unaccented syllables of *finite* and *infinite*, could not be sufficiently marked upon paper. Cannot we show that *cellar*, a vault, and *seller*, one who sells, have exactly the same sound; or that the monosyllable *full*, and the first syllable of *fulminate*, are sounded differently, because there are some words in which solemnity will authorize a different shade of pronunciation from familiarity? Besides, that colloquial pronunciation which is perfect is so much the language of solemn speaking, that, perhaps, there is no more difference than between the same picture painted to be viewed near and at a distance. The symmetry in both is exactly the same; and the distinction lies only in the colouring. The English Language, in this respect, seems to have a great superiority over the French, which pronounces many letters in the poetick and solemn style that are wholly silent in the prosaick and familiar. But if a solemn and familiar pronunciation really exists in our Language, is it not the business of a grammarian to mark both? And if he cannot point out the precise sound of unaccented syllables, (for these only are liable to obscurity,) he may, at least, give those sounds which approach the nearest, and by this means become a little more useful than those who so liberally leave every thing to the ear and taste of the speaker.

The truth is, Dr. Johnson seems to have had a confused idea of the distinctness and indistinctness with which, on solemn or familiar occasions, we sometimes pronounce the unaccented vowels; and, with respect to these, it must be owned, that his remarks are not entirely without foundation. The English Language, with respect to its pronunciation, is evidently divisible into accented and unaccented sounds. The accented syllables, by being pronounced with greater force than the unaccented, have their vowels as clearly and distinctly sounded as any given note in musick; while the unaccented vowels, for want of the stress, are apt to slide into an obscurity of sound, which, though sufficiently distinguishable to the ear, cannot be so definitely marked out to the eye by other sounds as those vowels that are under the accent. Thus some of the vowels, when neither under the accent nor closed by a consonant, have a longer or a shorter, an opener or a closer sound, according to the solemnity or familiarity, the deliberation or rapidity, of our delivery. This will be perceived in the sound of the *e* in *emotion*,* of the *o* in *obedience*, and of the *u* in *monument*. In the hasty pronunciation of common speaking, the *e* in *emotion* is often shortened, as if spelt *im-mo-tion*; the *o* in *obedience* shortened and obscured, as if written *ub-be-di-ence*; and the *u* in *monument* changed into *e*, as if written *mon-ne-ment*; while the deliberate and elegant sound of these vowels is the long open sound they have when the accent is on them in *equal*, *over*, and *unit*: but *a*, when unaccented, seems to have no such diversity; it has generally a short obscure sound, whether ending a syllable, or closed by a consonant. Thus the *a* in *able* has its definite and distinct sound; but the same letter in *tolerable*† goes into an obscure indefinite sound, approaching the short *æ*; nor can any solemnity or deliberation give it the long open sound it has in the first word. Thus, by distinguishing vowels into their accented and unaccented sounds, we are enabled to see clearly what Dr. Johnson saw but obscurely; and by this distinction entirely to answer the objection.

Equally indefinite and uncertain is his general rule, that those are to be considered as the most elegant speakers who deviate least from the written words. It is certain, where custom is equal, this ought to take place; and if the whole body of respectable English speakers were equally divided in their pronunciation of the word *busy*, one half pronouncing it *bew-ze*,‡ and the other half *biz-ze*, that the former ought to be accounted the most elegant speakers; but, till this be the case, the latter pronunciation, though a gross deviation from orthography, will still be esteemed the more elegant. Dr. Johnson's general rule, therefore, can only take place where custom has not plainly decided; but, unfortunately for the English Language, its orthography and pronunciation are so

‡ Principles, No. 178.

widely different, that Dr. Watts and Dr. Jones lay it down as a maxim in their Treatises on Spelling, that all words which can be sounded different ways must be written according to that sound which is most distant from the true pronunciation; and consequently, in such a Language, a Pronouncing Dictionary must be of essential use.

But still it may be objected to such an undertaking, that the fluctuation of pronunciation is so great as to render all attempts to settle it useless. What will it avail us, it may be said, to know the pronunciation of the present day, if in a few years it will be altered? And how are we to know even what the present pronunciation is, when the same words are often differently pronounced by different speakers, and those, perhaps, of equal numbers and reputation? To this it may be answered, that the fluctuation of our Language, with respect to its pronunciation, seems to have been greatly exaggerated.* Except a very few single words, which are generally noticed in the following Dictionary, and the words where *e* comes before *r*, followed by another consonant, as *merchant*, *service*, &c. the pronunciation of the Language is probably in the same state in which it was a century ago; and, had the same attention been then paid to it as now, it is not likely even that change would have happened. The same may be observed of those words which are differently pronounced by different speakers: if the analogies of the Language had been better understood, it is scarcely conceivable that so many words in polite usage would have a diversity of pronunciation, which is at once so ridiculous and embarrassing; nay, perhaps it may be with confidence asserted, that if the analogies of the Language were sufficiently known, and so near at hand as to be applicable on inspection to every word, that not only many words which are wavering between contrary usages would be settled in their true sound, but that many words, which are fixed by custom to an improper pronunciation, would by degrees grow regular and analogical; and those which are so already would be secured in their purity, by a knowledge of their regularity and analogy.

* The old and new *Arts*, with all the various dialects, must have occasioned infinite irregularity in the pronunciation of the Greek tongue; and if we may judge of the Latin pronunciation by the ancient inscriptions, it was little less various and irregular than the Greek. Aulus Gellius tells us that Nigidius, a grammarian who lived a little more than a century before him, acuted the first syllable of *Valeri*; but, says he, “*si quis nunc Valerium appellans in casu vocandi secundum id preceptum Nigidii acuerit primam, non aberit quin rideatur.*” Whoever now should place the accent on the first syllable of *Valerius*, when a vocative case, according to the precept of Nigidius, would set every body a laughing. Even that highly polished language, the French, if we may believe a writer in the *Encyclopédie*, is little less irregular in this respect than our own.

“*Il est arrivé,*” says he, “*par les altérations qui se succèdent rapidement dans la manière de prononcer, et les corrections qui s’introduisent lentement dans la manière d’écrire, que la prononciation et l’écriture ne marchent point ensemble, et que quoiqu’il y ait chez les peuples les plus policés de l’Europe, des sociétés d’hommes de lettres chargés des les modérer, des les accorder, et de les rapprocher de la même ligne, elles se trouvent enfin à une distance inconcevable; ensorte que de deux choses dont l’une n’a été imaginée dans son origine, que pour représenter fidèlement l’autre, celle-ci ne diffère guère moins de celle-là, que le portrait de la même personne peinte dans deux ages très-éloignés. Enfin l’inconvénient s’est accru à un tel excès qu’on n’ose plus y remédier. On prononce une langue, on écrit une autre: et l’on s’accoutume tellement pendant le reste de la vie à cette bizarrerie qui a fait verser tant de larmes dans l’enfance, que si l’on renonçoit à sa mauvaise orthographe pour une plus voisine de la prononciation, on ne reconnoitroit plus la langue parlée sous cette nouvelle combinaison de caractères. S’il y en a qui ne pourroient se succéder sans une grande fatigue pour l’organe, ou ils ne se rencontrent point, ou ils ne durent pas. Ils sont échappés de la langue par l’euphonie, cette loi puissante, qui agit continuellement et universellement sans égard pour l’étymologie et ses défenseurs, et qui tend sans intermission à amener des êtres qui ont les mêmes organes, le même idiôme, les mêmes mouvemens prescrits, à-peu-près à la même prononciation. Les causes dont l’action n’est point interrompue, deviennent toujours les plus fortes avec les tems, quelque foibles qu’elles soient en elles-mêmes, et il n’y a presque pas une seule voyelle, une seule diphthongue, une seule consonne, dont la valeur soit tellement constante, que l’euphonie n puisse disposer, soit en altérant le son, soit en le supprimant.*”

I shall not decide upon the justness of these complaints, but must observe that a worse picture could scarcely be drawn of the English, or the most barbarous language of Europe. Indeed a degree of versatility seems involved in the very nature of language, and is one of those evils left by Providence for man to correct: a love of order, and the utility of regularity, will always incline him to confine this versatility within as narrow bounds as possible.

But the utility of a work of this kind is not confined to those parts of language where the impropriety is gross and palpable; besides such imperfections in pronunciation as disgust every ear not accustomed to them, there are a thousand insensible deviations, in the more minute parts of language, as the unaccented syllables may be called, which do not strike the ear so forcibly as to mark any direct impropriety in particular words, but occasion only such a general imperfection as gives a bad impression upon the whole. Speakers with these imperfections pass very well in common conversation; but when they are required to pronounce with emphasis, and for that purpose to be more distinct and definite in their utterance, here their ear fails them; they have been accustomed only to loose cursory speaking, and, for want of firmness of pronunciation, are like those painters who draw the muscular exertions of the human body without any knowledge of anatomy. This is one reason, perhaps, why we find the elocution of so few people agreeable when they read or speak to an assembly, while so few offend us by their utterance in common conversation. A thousand faults lie concealed in a miniature, which a microscope brings to view; and it is only by pronouncing on a larger scale, as public speaking may be called, that we prove the propriety of our elocution. As, therefore, there are certain deviations from analogy which are not at any rate tolerable, there are others which only, as it were, tarnish the pronunciation, and make it less brilliant and agreeable. There are few who have turned their thoughts on this subject, without observing that they sometimes pronounce the same word or syllable in a different manner; and as neither of these manners offend the ear, they are at a loss to which they shall give the preference: but as one must necessarily be more agreeable to the analogy of the language than the other, a display of these analogies, in a Dictionary of this kind, will immediately remove this uncertainty; and in this view of the variety we shall discover a fitness in one mode of speaking, which will give a firmness and security to our pronunciation, from a confidence that it is founded on reason, and the general tendency of the language.—See Principles, Nos. 580, 547, 551, &c.

But, alas! reasoning on language, however well founded, may be all overturned by a single quotation from Horace—

“ ————— usus

“ Quem penes arbitrium est, et jus et norma loquendi.”

This, it must be owned, is a succinct way of ending the controversy; and, by virtue of this argument, we may become criticks in language, without the trouble of studying it: not that I would be thought, in the most distant manner, to deny that custom is the sovereign arbiter of language; far from it. I acknowledge its authority, and know there is no appeal from it. I wish only to dispute where this arbiter has not decided; for, if once custom speak out, however absurdly, I sincerely acquiesce in its sentence.

But what is this custom to which we must so implicitly submit? Is it the usage of the multitude of speakers, whether good or bad? This has never been asserted by the most sanguine abettors of its authority. Is it the usage of the studious in schools and colleges, with those of the learned professions, or that of those who, from their elevated birth or station, give laws to the refinements and elegancies of a court? To confine propriety to the latter, which is too often the case, seems an injury to the former, who, from their very profession, appear to have a natural right to a share, at least, in the legislation of language, if not to an absolute sovereignty. The polished attendants on a throne are as apt to depart from simplicity in language as in dress and manners; and novelty, instead of custom, is too often the *jus et norma loquendi* of a court.

Perhaps an attentive observation will lead us to conclude that the usage which ought to direct us is neither of these we have been enumerating, taken singly, but a sort of compound ratio of all three. Neither a finical pronunciation of the court, nor a pedantick Grecism of the schools, will be denominated respectable usage, till a certain number of the general mass of speakers have acknowledged them; nor will a multitude of common speakers authorize any pronunciation which is reprobated by the learned and polite.

As those sounds, therefore, which are the most generally received among the learned and polite, as well as the bulk of speakers, are the most legitimate, we may conclude that

a majority of two of these states ought always to concur, in order to constitute what is called good usage.

But though custom, when general, is commonly well understood, there are several states and degrees of it which are exceedingly obscure and equivocal; and the only method of knowing the extent of custom in these cases seems to be an inspection of those Dictionaries which professedly treat of pronunciation. We have now so many works of this kind, that the general current of custom, with respect to the sound of words, may be collected from them with almost as much certainty as the general sense of words from Johnson. An exhibition of the opinions of orthoëpists about the sound of words always appeared to me a very rational method of determining what is called custom. This method I have adopted in the following work; and if I have sometimes dissented from the majority, it has been either from a persuasion of being better informed of what was the actual custom of speaking, or from a partiality to the evident analogies of the language.

And here I must entreat the candid reader to make every reasonable allowance for the freedom with which I have criticised other writers on this subject, and particularly Mr. Sheridan. As a man, a gentleman, and a scholar, I knew Mr. Sheridan, and respected him; and think every lover of elocution owes him a tribute of thanks for his unwearied addresses to the public, to rouse them to the study of the delivery of their native tongue. But this tribute, however just, does not exempt him from examination. His credit with the world necessarily subjects him to animadversion, because the errors of such a writer are dangerous in proportion to his reputation: this has made me zealous to remark his inaccuracies, but not without giving my reasons; nor have I ever taken advantage of such faults as may be called inadvertencies.* On the same principles I have ventured to criticise Dr. Johnson,† whose friendship and advice I was honoured with, whose memory I love, and whose intellectual powers impress me with something like religious veneration and awe. I do not pretend to be exempt from faults myself; in a work like the present, it would be a miracle to escape them; nor have I the least idea of deciding as judge in a case of so much delicacy and importance as the pronunciation of a whole people; I have only assumed the part of an advocate to plead the cause of consistency and analogy, and, where custom is either silent or dubious, to tempt the lovers of their language to incline to the side of propriety: so that my design is principally to give a kind of history of pronunciation, and a register of its present state; and, where the authorities of Dictionaries or Speakers are found to differ, to give such a display of the analogies of the language as may enable every inspector to decide for himself.

With respect to the explanation of words, except in very few instances, I have scrupulously followed Dr. Johnson. His Dictionary has been deemed lawful plunder by every subsequent lexicographer; and so servilely has it been copied, that such words as he must have omitted merely by mistake, as *Predilection*, *Respectable*, *Descriptive*, *Sulky*, *Inimical*, *Interference*, and many others, are neither in Mr. Sheridan's, Dr. Kenrick's, nor several other Dictionaries.

* The inspector will be pleased to take notice that my observations on Mr. Sheridan's Dictionary relate to the first edition, published in his life-time, and the second, some time after his death: whatever alterations may have been made by his subsequent editors I am totally unacquainted with.

RULES to be observed by the NATIVES of IRELAND, in order to obtain a just Pronunciation of English.

As Mr. Sheridan was a native of Ireland, and had the best opportunities of understanding those peculiarities of pronunciation which obtain there, I shall extract his observations on that subject as the best general direction, and add a few of my own, by way of supplement, which I hope will render this article of instruction still more complete.

The reader will be pleased to take notice that I have made a different arrangement of the vowels, and have adopted a notation different from Mr. Sheridan, I am obliged to make use of different figures to mark the vowels, but still such as perfectly correspond to his.

"The chief mistakes made by the Irish, in pronouncing English, lie for the most part in the sounds of the two first vowels, *a* and *e*; the former being generally sounded *i* by the Irish, as in the word *bir*, in most words where it is pronounced *i*, as in *day*, by the English. Thus the Irish say *pitron*, *mitron*, the vowel *i* having the same sound as in the word *fither*; whilst the English pronounce them as if written *paytron*, *maytron*. The following rule, strictly attended to, will rectify this mistake through the whole language.

"When the vowel *a* finishes a syllable, and has the accent on it, it is invariably pronounced *i* [day] by the English. To this rule there are but three exceptions in the whole language, to be found in the words *fither*, *papi*, *mami*. The Irish may think also the word *rather* an exception, as well as *father*; and so it would appear to be in their manner of pronouncing it *ri-ther*, laying the accent on the vowel *a*; but in the English pronunciation the consonant *th* is taken into the first syllable, as thus, *rat-her*, which makes the difference.

"Whenever a consonant follows the vowel *a* in the same syllable, and the accent is on the consonant, the vowel *a* has always its fourth sound, as *hit*, *min*; as also the same sound lengthened when it precedes the letter *r*, as *fir*, *bir*, though the accent be on the vowel; as likewise when it precedes *lm*, as *blim*, *psalm*. The Irish, ignorant of this latter exception, pronounce all words of that structure as if they were written *lum*, *psalm*, *quarm*, *carm*, &c. In the third sound of *a*, marked by different combinations of vowels or consonants, such as *aw*, in *Paul*; *aw*, in *law*; *all*, in *call*; *ald*, in *bald*; *alk*, in *talk*, &c. the Irish make no mistake, except in that of *lm*, as before mentioned.

"The second vowel, *e*, is for the most part sounded *ee* by the English, when the accent is upon it; whilst the Irish in most words give it the sound of slender *i*, as in *hate*. This sound of *i* [ee] is marked by different combinations of vowels, such as *ea*, *ei*, *e* final mute, *ee*, and *ie*. In the two last combinations of *ee* and *ie* the Irish never mistake; such as in *meet*, *seem*, *field*, *believe*, &c.; but in all the others they almost universally change the sound of *i* into *ee*. Thus, in the combination *ea*, they pronounce the words *tea*, *see*, *please*, as if they were spelt *tey*, *sey*, *pleys*; instead of *tee*, *see*, *please*. The English constantly give this sound to *ea* whenever the accent is on the vowel *e*, except in the following words, *great*, *a pear*, *a bear*, to *bear*, to *forbear*, to *swear*, to *dear*, to *wear*. In all which the *e* has the sound of *i* in *hate*. For want of knowing these exceptions, the gentlemen of Ireland, after some time of residence in London, are apt to fall into the general rule, and pronounce these words as if spelt *greet*, *beer*, *sweer*, &c.

"*Ei* is also sounded *ee* by the English, and as *i* by the Irish; thus the word *decide*, *receive*, are pronounced by them as if written *desaie*, *resave*. *Ei* is always sounded *ee*, except when a *g* follows it, as in the words *reign*, *feign*, *deign*, &c.; as also in the words *rein* (of a bridle), *rein-deer*, *win*, *drain*, *sell*, *heir*, which are pronounced like *win*, *scin*, *drain*, *vail*, *str*.

"The final mute *e* makes the preceding *e* in the same syllable, when accented, have the sound of *ee*, as in the words *supreme*, *sincere*, *replete*. This rule is almost universally broken through by the Irish, who pronounce all such words as if written *suprime*, *sincere*, *replite*, &c. There are but two exceptions to this rule in the English pronunciation, which are the words *there*, *where*.

"In the way of marking this sound, by a double *e*, as thus, *ee*, as the Irish never make any mistakes, the best method for all who want to acquire the right pronunciation of these several combinations is to suppose that *ea*, *ei*, and *e*, attended by a final mute *e*, are all spelt with a double *e*, or *ee*.

"*Ey* is always sounded like *i* by the English, when the accent is upon it; as in the words *prey*, *convey*, pronounced *pray*, *convey*. To this there are but two exceptions, in the words *key* and *ley*, sounded *kee*, *lee*. The Irish, in attempting to pronounce like the English, often give the same sound to *ey* as usually belongs to *ei*; thus for *prey*, *convey*, they say, *pres*, *conves*.

"A strict observation of these few rules, with a due attention to the very few exceptions enumerated above, will enable the well-educated natives of Ireland to pronounce their words exactly in the same way as the more polished part of the inhabitants of England do, so far as the vowels are concerned. The diphthongs they commit no fault in, except in the sound of *i*, which has been already taken notice of in the Grammar*: where, likewise, the only difference in pronouncing any of the consonants has been pointed out; which is, the thickening the sounds of *d* and *t*, in certain situations; and an easy method proposed of correcting this habit†.

"In order to complete the whole, I shall now give a list of such detached words, that do not come under any of the above rules, as are pro-

* "Vide page 11, where the true manner of pronouncing the diphthong *i* is pointed out; the Irish pronouncing it much in the same manner as the French.

† "The letter *d* has always the same sound by those who pronounce English well; but the provincials, particularly the Irish, Scotch, and Welch, in many words thicken the sound by a mixture of breath. Thus, though they sound the *d* right in the positive *loud* and *broad*, in the comparative degree they thicken it by an aspiration, and sound it as if it were written *loudher*, *broadher*. This vicious pronunciation is produced by pushing the tongue forward so as to touch the teeth in forming that sound: and the way to cure it is easy; for, as they can pronounce the *d* properly in the word *loud*, let them rest a little upon that syllable, keeping the tongue in the position of forming *d*, and then let them separate it from the upper gum without pushing it forward, and the sound *der* will be produced of course: for the organ, being left in the position of sounding *d* at the end of the syllable *loud*, is necessarily in the position of forming the same *d* in uttering the last syllable, unless it makes a new movement, as in the case of protruding it so as to touch the teeth. This letter is sometimes, though not often, quiescent, as in the words *handkerchief*, *handsome*, *handseel*.

"In pronouncing the letter *t*, the Irish and other provincials thicken the sound, as was before mentioned with regard to the *d*: for *better* they say *betther*; for *utter*, *utther*; and so on in all words of that structure. This faulty manner arises from the same cause that was mentioned as affecting the sound of the *d* (I mean the protruding of the tongue so as to touch the teeth,) and is curable only in the same way.

"These, after the closest attention, are all the words, not included in the rules before laid down, that I have been able to collect, in which the well-educated natives of Ireland differ from those of England."

I shall make no observations on the accuracy of this list, but desire my reader to observe, that the strongest characteristics of the pronunciation of Ireland is the rough jarring pronunciation of the letter R, and the aspiration or rough breathing before all the accented vowels. (For the true sound of R, see that letter in the Principles, No. 419.) And for the rough breathing or aspiration of the vowels, the pupil should be told not to bring the voice suddenly from the breast, but to speak, as it were, from the mouth only.

It may be observed, too, that the natives of Ireland pronounce *rm* at the end of a word so distinctly as to form two separate syllables. Thus *storm* and *farm* seem sounded by them as if written *stau-rum*, *fa-rum*; while the English sound the *r* so soft and so close to the *m*, that it seems pronounced nearly as if written *staurm*, *faam*.

Nearly the same observations are applicable to *lm*. When these letters end a word, they are, in Ireland, pronounced at such a distance, that *helm* and *realm* sound as if written *hel-um* and *rel-um*; but in England the *l* and *m* are pronounced as close as possible, and so as to form but one syllable. To remedy this, it will be necessary for the pupil to make a collection of words terminating with these consonants, and to practise them over till a true pronunciation is acquired.

RULES to be observed by the NATIVES of SCOTLAND for attaining a just Pronunciation of English.

THAT pronunciation which distinguishes the inhabitants of Scotland is of a very different kind from that of Ireland, and may be divided into the quantity, quality, and accentuation of the vowels. With respect to quantity, it may be observed that the Scotch pronounce almost all their accented vowels long. Thus, if I am not mistaken, they would pronounce *habit*, *hay-bis*; *tepid*, *tee-pid*; *slaver*, *see-ner*; *conscious*, *con-sheus*; and *subject*, *soob-jert**: it is not pretended, however, that every accented vowel is so pronounced, but that such a pronunciation is very general, and particularly of the *i*. This vowel is short in English pronunciation, where the other vowels are long; thus *evasion*, *adhesion*, *emotion*, *confusion*, have the *a*, *e*, *o*, and *u*, long; and in these instances the Scotch would pronounce them like the English: but in *vision*, *decision*, &c. where the English pronounce the *i* short, the Scotch lengthen this letter by pronouncing it like *ee*, as if the words were written *vee-sion*, *dece-sion*, &c.; and this peculiarity is universal. The best way, therefore, to correct this, will be to make a collection of the most usual words which have the vowel short, and to pronounce them daily till a habit is formed.—See Principles, No. 567.

With respect to the quality of the vowels, it may be observed that the inhabitants of Scotland are apt to pronounce the *a* like *aw*, where the English give it the slender sound: thus *Satan* is pronounced *Sawtan*, and *fatal*, *sawtal*. It may be remarked, too, that the Scotch give this sound to the *a* preceded by *w*, according to the general rule, without attending to the exceptions, Principles, No. 88; and thus, instead of making *war*, *waft*, and *twang*, rhyme with *far*, *shaft*, and *hang*, they pronounce them so as to rhyme with *bar*, *saft*, and *sang*. The short *e* in *bed*, *fed*, *red*, &c. borders too much upon the English sound of *e* in *bed*, *led*, *mad*, &c. and the short *i* in *bid*, *lid*, *rid*, too much on the English sound of *e* in *bed*, *led*, *red*. To correct this error, it would be useful to collect the long and short sounds of these vowels, and to pronounce the long ones first, and to shorten them by degrees till they are perfectly short; at the same time preserving the radical sound of the vowel in both. Thus the correspondent long sounds to the *e* in *bed*, *fed*, *red*, are *bade*, *fade*, *rade*; and that of the short *i* in *bid*, *lid*, *rid*, are *bead*, *lead*, *reed*; and the former of these classes will naturally lead the ear to the true sound of the latter, the only difference ly-

* That this is the general mode of pronouncing these words in Scotland is indisputable; and it is highly probable that the Scotch have preserved the old English pronunciation, from which the English themselves have insensibly departed. Dr. Hicks observed, long ago, that the Scotch *Scotized* in their language much more than the English; and it is scarcely to be doubted that a situation nearer to the Continent, and a greater commercial intercourse with other nations, made the English admit of numberless changes which never extended to Scotland. About the reign of Queen Elizabeth, when the Greek and Latin languages were cultivated, and the pedantry of showing acquaintance with them became fashionable, it is not improbable that an alteration in the quantity of many words took place: for as in Latin almost every vowel before a single consonant is short, so in English almost every vowel in the same situation was supposed to be long. or our ancestors would not have doubled the consonant in the participles of verbs, to prevent the preceding vowel from lengthening. But, when once this affectation of Latinity was adopted, it is no wonder it should extend beyond its principles, and shorten several vowels in English, because they were short in the original Latin; and in this manner, perhaps, might the diversity between the quantity of the English and the Scotch pronunciation arise, 542, 543.—See *Drawn*.

ing in the quantity. The short *o* in *not*, *lodge*, *got*, &c. is apt to slide into the short *u*, as if the words were written *nut*, *ludge*, *gut*, &c. To rectify this, it should be remembered that this *o* is the short sound of *aw*, and ought to have the radical sound of the deep *a* in *ball*. Thus the radical sound corresponding to the *o* in *not*, *cot*, *sof*, is found in *naught*, *caught*, *sought*, &c.; and these long sounds, like the former, should be abbreviated into the short ones. But what will tend greatly to clear the difficulty will be, to remember that only those words which are collected in the Principles, No. 169, have the *o* sounded like short *u* when the accent is upon it: and with respect to *u* in *bull*, *full*, *pull*, &c. it may be observed that the pronunciation peculiar to the English is only found in the words enumerated, Principles, No. 174.

In addition to what has been said, it may be observed that *oo* in *food*, *mood*, *moon*, *soon*, &c. which ought always to have a long sound, is generally shortened in Scotland to that middle sound of the *u* in *bull*: and it must be remembered that *wool*, *wood*, *good*, *hood*, *stood*, *foot*, are the only words where this sound of *oo* ought to take place.

The accentuation, both in Scotland and Ireland, (if by accentuation we mean the stress, and not the kind of stress,) is so much the same as that of England, that I cannot recollect many words in which they differ. Indeed, if it were not so, the versification of each country would be different: for, as English verse is formed by accent or stress, if this accent or stress were upon different syllables in different countries; what is verse in England would not be verse in Scotland or Ireland; and this sufficiently shows how very indefinitely the word Accent is generally used.

Mr. Elphinston, who must be allowed to be a competent judge in this case, tells us that in Scotland they pronounce *silence*, *bias*, *canvass*, *sentence*, *triumph*, *comfort*, *solace*, *construe*, *rescue*, *respite*, *govern*, *hurry*, *ransack*, *cancel*, with the accent on the last syllable instead of the first. To this list may be added the word *menace*, which they pronounce as if written *menass*; and though they place the accent on the last syllable of *canal*, like the English, they broaden the *a* in the last syllable, as if the word were spelt *canawl*. It may be farther observed that they place an accent on the comparative adverb *as*, in the phrases *as much*, *as little*, *as many*, *as great*, &c. while the English, except in some very particular emphatical cases, lay no stress on this word, but pronounce these phrases like words of two or three syllables, without any accent on the first.

But, besides the mispronunciation of single words, there is a tone of voice with which these words are accompanied that distinguishes a native of Ireland or Scotland as much as an improper sound of the letters. This is vulgarly (and, if it does not mean stress only, but the kind of stress, I think not improperly) called the accent*. For though there is an asperity in the Irish dialect, and a drawl in the Scotch, independent of the slides or inflections they make use of, yet it may with confidence be affirmed that much of the peculiarity which distinguishes these dialects may be reduced to a predominant use of one of these slides. Let any one, who has sufficiently studied the speaking voice to distinguish the slides, observe the pronunciation of an Irishman and a Scotchman, who have much of the dialect of their country, and he will find that the former abounds with the falling, and the latter with the rising inflection †; and, if this is the case, a teacher, if he understands these slides, ought to direct

* See this more fully exemplified in *Elements of Elocution*, Vol. II. page 13.

† Or rather the rising circumflex. For an explanation of this inflection, see *Rhetorical Grammar*, third edition, page 79.

his instruction so as to remedy the imperfection. But as avoiding the wrong, and seizing the right at the same instant, is, perhaps, too great a task for human powers, I would advise a native of Ireland, who has much of the accent, to pronounce almost all his words, and end all his sentences, with the rising slide; and a Scotchman, in the same manner, to use the falling inflection: this will, in some measure, counteract the natural propensity, and bids fairer for bringing the pupil to that nearly equal mixture of both slides, which distinguishes the English speaker, than endeavouring at first to catch the agreeable variety. For this purpose the teacher ought to pronounce all the single words in the lesson with the falling inflection to a Scotchman, and with the rising to an Irishman; and should frequently give the pauses in a sentence the same inflections to each of these pupils, where he would vary them to a native of England. But, while the human voice remains unstudied, there is little expectation that this distinction of the slides should be applied to these useful purposes.

Besides a peculiarity of inflection, which I take to be a falling circumflex, directly opposite to that of the Scotch, the Welch pronounce the sharp consonants and aspirations instead of the flat. (See Principles, No. 29, 41.) Thus for *big* they say *pick*; for *blood*, *ploot*; and for *good*, *coot*. Instead of *virtue* and *vice*, they say *virtue* and *fice*; instead of *zeal* and *praise*, they say *seal* and *prace*; instead of *these* and *those*, they say *these* and *thoce*; and instead of *azure* and *esler*, they say *aysher* and *asher*; and for *jail*, *chail*. Thus there are nine distinct consonant sounds, which, to the Welch, are entirely useless. To speak with propriety, therefore, the Welch ought for some time to pronounce the flat consonants and aspirations only; that is, they ought not only to pronounce them where the letters require the flat sound, but even where they require the sharp sound: this will be the best way to acquire a habit; and, when this is once done, a distinction will be easily made, and a just pronunciation more readily acquired.

There is scarcely any part of England remote from the capital where a different system of pronunciation does not prevail. As in Wales they pronounce the sharp consonants for the flat, so in Somersetshire they pronounce many of the flat instead of the sharp: thus for *Somersetshire*, they say *Zomersetshire*; for *father*, *vather*; for *think*, *rnink*; and for *sure*, *shure*.*

There are dialects peculiar to Cornwall, Lancashire, Yorkshire, and every distant county in England; but, as a consideration of these would lead to a detail too minute for the present occasion, I shall conclude these remarks with a few observations on the peculiarities of my countrymen, the Cockneys; who, as they are the models of pronunciation to the distant provinces, ought to be the more scrupulously correct.

FIRST FAULT OF THE LONDONERS.—Pronouncing *s* indistinctly after *st*.

The letter *s*, after *st*, from the very difficulty of its pronunciation, is often sounded inarticulately. The inhabitants of London, of the lower order, cut the knot, and pronounce it in a distinct syllable, as if *e* were before it; but this is to be avoided as the greatest blemish in speaking: the three last letters in *posts*, *ests*, *mists*, &c. must all be distinctly heard in one syllable, and without permitting the letters to coalesce. For the acquiring of this sound, it will be proper to select nouns that end in *st* or *ste*; to form them into plurals, and pronounce them forcibly and distinctly every day. The same may be observed of the third person of verbs ending in *sts* or *stes*, as *persists*, *wastes*, *hastes*, &c.

SECOND FAULT.—Pronouncing *w* for *v*, and inversely.

The pronunciation of *v* for *w*, and more frequently of *w* for *v*, among the inhabitants of London, and those not always of the lower order, is a blemish of the first magnitude. The difficulty of remedying this defect is the greater, as the

cure of one of these mistakes has a tendency to promote the other.

Thus, if you are very careful to make a pupil pronounce *veal* and *vinegar*, not as if written *meat* and *winegar*, you will find him very apt to pronounce *wine* and *wind* as if written *vine* and *vind*. The only method of rectifying this habit seems to be this: Let the pupil select from a Dictionary not only all the words that begin with *v*, but as many as he can of those that have this letter in any other part. Let him be told to bite his under lip while he is sounding the *v* in those words, and to practise this every day till he pronounces the *v* properly at first sight: then, and not till then, let him pursue the same method with the *w*; which he must be directed to pronounce by a pouting out of the lips, without suffering them to touch the teeth. Thus by giving all the attention to only one of these letters at a time, and fixing by habit the true sound of that, we shall at last find both of them reduced to their proper pronunciation in a shorter time than by endeavouring to rectify them both at once.

THIRD FAULT.—Not sounding *h* after *w*.

The aspirate *h* is often sunk, particularly in the capital, where we do not find the least distinction of sound between *while* and *wile*, *whet* and *wet*, *where* and *were*, &c. The best method to rectify this is to collect all the words of this description from a Dictionary, and write them down; and, instead of the *wh*, to begin them with *hoo* in a distinct syllable, and so to pronounce them. Thus let *while* be written and sounded *hoo-ile*; *whet*, *hoo-et*; *where*, *hoo-are*; *whip*, *hoo-ip*, &c. This is no more, as Dr. Lowth observes, than placing the aspirate in its true position before the *w*, as it is in the Saxon, which the words come from; where we may observe that, though we have altered the orthography of our ancestors, we have still preserved their pronunciation.

FOURTH FAULT.—Not sounding *h* where it ought to be sounded, and inversely.

A still worse habit than the last prevails, chiefly among the people of London, that of sinking the *h* at the beginning of words where it ought to be sounded, and of sounding it either where it is not seen, or where it ought to be sunk. Thus we not unfrequently hear, especially among children, *heart* pronounced *art*, and *arm*, *harm*. This is a vice perfectly similar to that of pronouncing the *v* for the *w*, and the *w* for the *v*, and requires a similar method to correct it.

As there are so very few words in the language where the initial *h* is sunk, we may select these from the rest, and, without setting the pupil right when he mispronounces these, or when he prefixes *h* improperly to other words, we may make him pronounce all the words where *h* is sounded, till he has almost forgot there are any words pronounced otherwise: then he may go over those words to which he improperly prefixes the *h*, and those where the *h* is seen, but not sounded, without any danger of an interchange. As these latter words are but few, I shall subjoin a catalogue of them for the use of the learner: *Heir*, *hetress*, *herb*, *herbage*, *honest*, *honesty*, *honestly*, *honour*, *honourable*, *honourably*, *hospital*, *hostler*, *hour*, *hourly*, *humble*, *humbly*, *humbles*, *humour*, *humourist*, *humorous*, *humorously*, *humoursome*: where we may observe, that *humour* and its compounds not only sink the *h*, but sound the *w* like the pronoun *you*, or the noun *yeu*, as if written *yemour*, *yemorous*, &c.

Thus I have endeavoured to correct some of the more glaring errors of my countrymen, who, with all their faults, are still upon the whole the best pronouncers of the English language: for though the pronunciation of London is certainly erroneous in many words, yet, upon being compared with that of any other place, it is undoubtedly the best: that is, not only the best by courtesy, and because it happens to be the pronunciation of the capital, but the best by a better title, that of being more generally received; or, in other words, though the people of London are erroneous in the pronunciation of many words, the inhabitants of every other place are erroneous in many more. Nay, harsh as the sentence may seem, those at a considerable distance from the

* See the word *Change*.

capital do not only mispronounce many words taken separately, but they scarcely pronounce with purity a single word, syllable, or letter. Thus, if the short sound of the letter *s* in *frank*, *snak*, &c. differ from the sound of that letter in the northern parts of England, where they sound it like the *s* in *bull*, and nearly as if the words were written *frænk*, *sænk*, &c. it necessarily follows that every word where the second sound of that letter occurs must by those provincials be mispronounced.

But though the inhabitants of London have this manifest advantage over all the other inhabitants of the island, they have the disadvantage

of being more disgraced by their peculiarities than any other people. The grand difference between the metropolis and the provinces is, that people of education in London are generally free from the vices of the vulgar; but the best educated people in the provinces, if constantly resident there, are sure to be strongly tainted with the dialect of the country in which they live. Hence it is that the vulgar pronunciation of London, though not half so erroneous as that of Scotland, Ireland, or any of the provinces, is, to a person of correct taste, a thousand times more offensive and disgusting.

DIRECTIONS TO FOREIGNERS,

In order to attain a Knowledge of the Marks in this Dictionary, and to acquire a right Pronunciation of every Word in the English Language.

As the sounds of the vowels are different in different languages, it would be endless to bring parallel sounds from the various languages of Europe; but, as the French is so generally understood upon the Continent, if we can reduce the sounds of the English letters to those of the French, we shall render the pronunciation of our language very generally attainable: and this, it is presumed, will be pretty accurately accomplished by observing the following directions:

A	ei	N	en
B	bi	O	o
C	ci	P	pi
D	di	Q	kion
E	i	R	arr
F	ef	S	ess
G	dgi	T	ti
H	etch	U	tu
I	ai	V	vi
J	djé	W	doblion
K	qué	X	ex
L	elli	Y	ouai
M	am	Z	zedd.

The French have all our vowel sounds, and will therefore find the pronunciation of them very easy. The only difficulty they will meet with seems to be *i*, which, though demonstrably composed of two successive sounds, has passed for a simple vowel with a very competent judge of English pronunciation*. The reason is, these two sounds are pronounced so closely together as to require some attention to discover their component parts: this attention Mr. Sheridan† never gave, or he would not have told us that this diphthong is a compound of our fullest and slenderest sounds *i* and *e*; the first made by the largest, and the last by the smallest aperture of the mouth. Now nothing is more certain than the inaccuracy of this definition. The third sound of *e*, which is perfectly equivalent to the third sound of *o*, when combined with the first sound of *e*, must inevitably form the diphthong in *boy*, *joy*, &c. and not the diphthongal sound of the vowel *i* in *idle*, and the personal pronoun *I*; this double sound will, upon a close examination, be found to be composed of the Italian *e* in the last syllable of *papa*, and the first sound of *e*, pronounced as closely together as possible‡; and for

the exactness of this definition I appeal to every just English ear in the kingdom.

The other diphthongal vowel *u* is composed of the French *i*, pronounced as closely as possible to their diphthong *ou*, or the English *it* and *o*, perfectly equivalent to the sound the French would give to the letters *you*, and which is exactly the sound the English give to the plural of the second personal pronoun.

The diphthong *oi* or *oy* is composed of the French *â* and *i*; thus *toy* and *boy* would be exactly expressed to a Frenchman by writing them *tâi* and *bâi*.

The diphthongs *ou* and *ow*, when sounded like *ou*, are composed of the French *â* and the diphthong *ou*; and the English sounds of *thou* and *now* may be expressed to a Frenchman by spelling them *thâou* and *nâou*.

W is no more than the French diphthong *ou* thus *West* is equivalent to *Owest*, and *wall* to *ouâll*.

Y is perfectly equivalent to the French letter of that name, and may be supplied by *i*; thus *yoke*, *you*, &c. is expressed by *loke*, *tu*, &c.

J, or *I* consonant, must be pronounced by prefixing *d* to the French *j*; thus *jay*, *joy*, &c. sound to a Frenchman as if spelled *djé*, *djâi*, &c. If any difficulty be found in forming this combination of sounds, it will be removed by pronouncing the *d*, *ed*, and spelling these words *edjé*, *edjâi*, &c.

Ch, in English words not derived from the Greek, Latin, or French, is pronounced as if *t* were prefixed; thus the sound of *chair*, *cheese*, *chain*, &c. would be understood by a Frenchman if the words were written *tchère*, *tchize*, *tchène*.

Sh in English is expressed by *ch* in French; thus *shame*, *share*, &c. would be spelled by a Frenchman *chême*, *chère*, &c.

The ringing sound *ng* in *long*, *song*, &c. may be perfectly conceived by a pupil who can pronounce the French word *Encore*, as the first syllable of this word is exactly correspondent to the sound in those English words; and for the formation of it see Principles, No. 87; also the word *Encore*.

But the greatest difficulty every foreigner finds in pronouncing English is the hissing consonant *th*. This, it may be observed, has, like the other consonants, a sharp and flat sound; sharp as in *thin*, *bath*; flat as in *that*, *with*. To acquire the true pronunciation of this difficult combination, it may be proper to begin with those words where it is initial: and, first, let the pupil protrude his tongue a little way beyond the teeth, and press it between them as if going to bite the tip of it; while this is doing, if he wishes to pronounce *thin*, let him hiss as if to sound the letter *s*; and after the hiss, let him draw back his tongue within his teeth, and pronounce the preposition *in*, and thus will the word *thin* be perfectly pronounced. If he would pronounce *that*, let him place the tongue between the teeth as before; and while he is hissing as if to sound the letter *s*, let him withdraw his tongue into his mouth, and immediately pronounce the preposition *at*. To pronounce this combination when final in *bath*, let him pronounce *ba*, and protrude the tongue beyond the teeth, pressing the tongue with them, and hissing as if to sound *s*; if he would pre-

‡ Holder, the most philosophical and accurate investigator of the formation and powers of the letters, says: "Our vulgar *i*, as in *stile*, seems to be such a diphthong, (or rather syllable, or part of a syllable,) composed of *a*, *i*, or *e*, *i*, and not a simple original vowel." Elements of Speech, page 88.

Dr. Wallis, speaking of the long English *i*, says it is sounded "eodem serè modo quo Gallorum *ei* in vocibus *main*, *manus*, *pais*, *panis*, &c. Nampe sonum habet compositum ex Gallorum *ei* finalis & *i* vel *y*." Grammatica Lingue Angli-cane, page 48.

nounce *wha*, let him first form *wh*, put the tongue in the same position as before, and hiss as if to sound *z*. It will be proper to make the pupil dwell some time with the tongue beyond the teeth in order to form a habit, and to pronounce daily some words out of a Dictionary beginning and ending with these letters.

These directions, it is presumed, if properly attended to, will be sufficient to give such foreigners as understand French, and have not access to a master, a competent knowledge of English pronunciation; but, to render the sounds of the vowels marked by figures in this Dictionary still more easily to be comprehended—with those English words which exemplify the sounds of the vowels I have associated such French words as have vowels exactly corresponding to them, and which immediately convey the true English pronunciation. These should be committed to memory, or written down and held in his hand while the pupil is inspecting the Dictionary.

Perhaps the greatest advantage to foreigners and provincials will be derived from the classification of words of a similar sound, and drawing the line between the general rule and the exception. This has been an arduous task; but it is hoped the benefit arising from it will amply repay it. When the numerous varieties of sounds annexed to vowels, diphthongs, and consonants, lie scattered without bounds, a learner is bewildered and discouraged from attempting to distinguish them; but when they are all classed, arranged, and enumerated, the variety seems less, the number smaller, and the distinction easier. What an inextricable labyrinth do the diphthongs *ea* and *ow* form as they lie loose in the language! but classed and arranged as we find them, Nos. 226, &c. and 313, &c. the confusion vanishes, they become much less formidable, and a learner has it in his power, by repeating them daily, to become master of them all in a very little time.

The English accent is often an insurmountable obstacle to foreigners, as the rules for it are so various, and the exceptions so numerous; but let the inspector consult the article Accent in the

Principles, particularly Nos 409, 505, 506, &c. and he will soon perceive how much of our language is regularly accented, and how much that which is irregular is facilitated by an enumeration of the greater number of exceptions.

But scarcely any method will be so useful for gaining the English accent as the reading of verse. This will naturally lead the ear to the right accentuation; and, though a different position of the accent is frequently to be met with in the beginning of a verse, there is a sufficient regularity to render the pronouncing of verse a powerful means of obtaining such a distinction of force and feebleness as is commonly called the accent: for it may be observed that a foreigner is no less distinguishable by placing an accent upon certain words to which the English give no stress, than by placing the stress upon a wrong syllable. Thus if a foreigner, when he calls for bread at table, by saying *give me some bread*, lays an equal stress upon every word, though every word should be pronounced with its exact sound, we immediately perceive he is not a native. An Englishman would pronounce these four words like two, with the accent on the first syllable of the first, and on the last syllable of the last, as if written *giveme somebréd*; or rather *gímme sumbréd*; or more commonly, though vulgarly, *gímme somebréd*. Verse may sometimes induce a foreigner, as it does sometimes injudicious natives, to lay the accent on a syllable in long words which ought to have none, as in a couplet of Pope's Essay on Criticism:

"False eloquence, like the prismatic glass,
"Its gaudy colours spreads on ev'ry place."

Here a foreigner would be apt to place an accent on the last syllable of *eloquence* as well as the first, which would be certainly wrong; but this fault is so trifling, when compared with that of laying the accent on the second syllable, that it almost vanishes from observation; and this misaccentuation verse will generally guard him from. The reading of verse, therefore, will, if I am not mistaken, be found a powerful regulator both of accent and emphasis.

Z z	Z z	zed, orizzard. 48s.

2. To these may be added certain combinations of letters sometimes used in printing; as, ff, fi, fl, ml, and &c. or *and per se and*, or rather *et per se and*; ff, A, A, ff, fl, and &c.

3. Our letters, says Dr Johnson, are commonly reckoned twenty-four, because anciently i and j, as well as u and v, were expressed by the same character; but as these letters, which had always different powers, have now different forms, our alphabet may be properly said to consist of twenty-six letters.

4. In considering the sounds of these first principles of language, we find that some are so simple and unmixed, that there is nothing required but the opening of the mouth to make them understood, and to form different sounds. Whence they have the names of *vowels*, or *voices* or *vocal sounds*. On the contrary, we find that there are others, whose pronunciation depends on the particular application and use of every part of the mouth, as the teeth, the lips, the tongue, the palate, &c. which yet cannot make any one perfect sound but by their union with those vocal sounds; and these are called *consonants*, or letters sounding with other letters.

Definition of Vowels and Consonants.

5. Vowels are generally reckoned to be five in number; namely, a, e, i, o, u; y and w are called vowels when they end a syllable or word, and consonants when they begin one.

6. The definition of a vowel, as little liable to exception as any, seems to be the following: a vowel is a simple sound formed by a continued effusion of the breath, and a certain conformation of the mouth, without any alteration in the position, or any motion of the organs of speech, from the moment the vocal sound commences till it ends.

7. A consonant may be defined to be an interruption of the effusion of vocal sound, arising from the application of the organs of speech to each other.

8. Agreeably to this definition, vowels may be divided into two kinds, the simple and compound. The simple a, e, o, are those which are formed by one conformation of the organs only; that is, the organs remain exactly in the same position at the end as at the beginning of the letter; whereas, in the compound vowels i and u, the organs alter their position before the letter is completely sounded: nay, these letters, when commencing a syllable, do not only require a different position of the organs in order to form them perfectly, but demand such an application of the tongue to the roof of the mouth as is inconsistent with the nature of a pure vowel; for the first of these letters, i, when sounded alone, or ending a syllable with the accent upon it, is a real diphthong, composed of the sounds of a in *father*, and of e in *the*, exactly correspondent to the sound of the noun *eye*; and when this letter commences a syllable, as in *min-ion*, *pin-ion*, &c. the sound of e with which it terminates is squeezed into a consonant sound, like the double e heard in *queen*, different from the simple sound of that letter in *queen*, and this squeezed sound in the commencing i makes it exactly similar to y in the same situation; which, by all grammarians, is acknowledged to be a consonant*. The latter of these compound vowels, u, when initial, and not shortened by a consonant, commences with this squeezed sound of e, equivalent to the y, and ends with a sound given to oo in *woo* and *coo*, which makes its name in the alphabet exactly similar to the pronoun *you*†. If, therefore, the common definition of a

* How so accurate a grammarian as Dr. Lowth could pronounce so definitively on the nature of y, and insist on its being always a vowel, can only be accounted for by considering the small attention which is generally paid to this part of grammar. His words are these:

"The same sound which we express by the initial y, our Saxon ancestors in many instances expressed by the vowel e; as *cover*, *your*; and by the vowel i; as *law*, *yew*; *long*, *young*. In the word *yew* the initial y has precisely the same sound with i in the words *view*, *lieu*, *adieu*: the i is acknowledged to be a vowel in these latter; how then can the y, which has the very same sound, possibly be a consonant in the former? Its initial sound is generally like that of i in *shire*, or *es* nearly; it is formed by the opening of the mouth without any motion or contact of the parts: in a word, it has every property of a vowel, and not one of a consonant."—Intro. to Eng. Gram. page 3.

Thus far the learned bishop, who has too fixed a fame to suffer any diminution by a mistake in so trifling a part of literature as this: but it may be asked, if y has every property of a vowel and not one of a consonant, why, when it begins a word, does it not admit of the euphonic article *an* before it?

† An ignorance of the real composition of u, and a want of knowing that it partook of the nature of a consonant, has occasioned a great diversity and uncertainty in prefixing the indefinite article *an* before it. Our ancestors, judging of its nature from its name, never suspected that it was

vowel be just, these two letters are so far from being simple vowels, that they may more properly be called semi-consonant diphthongs.

9. That *y* and *w* are consonants when they begin a word, and vowels when they end one, is generally acknowledged by the best grammarians; and yet Dr. Lowth has told us that *w* is equivalent to *oo*; but, if this were the case, it would always admit of the particle *an* before it: for, though we have no word in the language which commences with these letters, we plainly perceive that, if we had such a word, it would readily admit of *an* before it, and consequently that these letters are not equivalent to *w*. Thus we find that the common opinion, with respect to the double capacity of these letters, is perfectly just.

10. Besides the vowels already mentioned, there is another simple vowel sound found under the *oo* in the words *too* and *coo*; these letters have, in these two words, every property of a pure vowel, but when found in *food*, *mood*, &c. and in the word *too*, pronounced like the adjective *two*: here the *oo* has a squeezed sound, occasioned by contracting the mouth, so as to make the lips nearly touch each other; and this makes it, like the *i* and *e*, not so much a double vowel as a sound between a vowel and a consonant.

Classification of Vowels and Consonants.

11. Vowels and consonants being thus defined, it will be necessary, in the next place, to arrange them into such classes as their similitudes and specific differences seem to require.

12. Letters, therefore, are naturally divisible into vowels and consonants.

13. The vowels are, *a*, *e*, *i*, *o*, *u*, and *y* and *w* when ending a syllable.

14. The consonants are, *b*, *c*, *d*, *f*, *g*, *h*, *j*, *k*, *l*, *m*, *n*, *p*, *q*, *r*, *s*, *t*, *v*, *x*, *z*, and *y* and *w* when beginning a syllable.

15. The vowels may be subdivided into such as are simple and pure, and into such as are compound and impure. The simple or pure vowels are such as require only one conformation of the organs to form them, and no motion in the organs while forming.

16. The compound or impure vowels are such as require more than one conformation of the organs to form them, and a motion in the organs while forming. These observations premised, we may call the following scheme

Diphthongs and Triphthongs enumerated.

17. Two vowels forming but one syllable are generally called a diphthong, and three a triphthong: these are the following:

<i>ae</i> Cnear,	<i>ew</i> jewel,	<i>oy</i> boy,
<i>ai</i> aim,	<i>ey</i> they,	<i>ue</i> mannetude,
<i>ao</i> gaol,	<i>is</i> pontard,	<i>ui</i> languid,

not a pure vowel, and constantly prefixed the article *an* before nouns beginning with this letter; *an union*, *an useful book*. They were confirmed in this opinion by finding the *an* always adapted to the short *u*, as *an empire*, *an umbrella*, without ever dreaming that the short *u* is a pure vowel, and essentially different from the long one. But the moderns, not resting in the name of a letter,

19. The mutes are such as emit no sound without a vowel, as *b*, *p*, *t*, *d*, *k*, and *c* and *g* hard.

20. The semi-vowels are such as emit a sound without the concurrence of a vowel, as *f*, *v*, *s*, *z*, *x*, *g* soft or *j*.

21. The liquids are such as flow into, or unite easily with the mutes, as *l*, *m*, *n*, *r*.

22. But, besides these, there is another classification of the consonants, of great importance to a just idea of the nature of the letters, and that is, into such as are sharp or flat, and simple or aspirated.

23. The sharp consonants are, *p*, *f*, *t*, *s*, *k*, *c* hard.

24. The flat consonants are, *b*, *v*, *d*, *z*, *g* hard.

25. The simple consonants are those which have always the sound of one letter unmixed with others, as *b*, *p*, *f*, *v*, *k*, *g* hard, and *g* soft, or *j*.

26. The mixed or aspirated consonants are those which have sometimes a hiss or aspiration joined with them, which mingles with the letter, and alters its sound, as *t* in *motion*, *d* in *soldier*, *s* in *mission*, and *x* in *asure*.

27. There is another distinction of consonants arising either from the seat of their formation, or from those organs which are chiefly employed in forming them. The best distinction of this kind seems to be that which divides them into labials, dentals, gutturals, and nasals.

28. The labials are, *b*, *p*, *f*, *v*. The dentals are, *t*, *d*, *s*, *z*, and soft *g* or *j*. The gutturals are, *k*, *q*, *c* hard, and *g* hard. The nasals are, *m*, *n*, and *ng*.

29. These several properties of the consonants may be exhibited at one view in the following table, which may be called

An Analogical Table of the Consonants.

Mute labials { sharp <i>p</i> , <i>pomp</i> flat <i>b</i> , <i>bomb</i>	} labio-nasal liquid <i>m</i> .
Hissing labials { sharp <i>f</i> , <i>ff</i> flat <i>v</i> , <i>vf</i>	
Mute dentals { sharp <i>t</i> , <i>ted</i> flat <i>d</i> , <i>ded</i>	} { <i>et</i> <i>ch</i> , edge, or <i>j</i> } dento-nasal liquid <i>n</i> .
Hissing dentals { sharp <i>s</i> , <i>say</i> flat <i>z</i> , <i>az</i>	
Lipping dentals { sharp <i>eth</i> , <i>death</i> flat <i>the</i> , <i>scythe</i>	} { <i>esh</i> , <i>passion</i> } dental liquid <i>l</i> . { <i>ezhe</i> , <i>viction</i> }
Gutturals { sharp <i>k</i> , <i>kick</i> flat <i>g</i> , (hard) <i>gag</i>	
Dento-guttural or nasal <i>ng</i> , <i>hang</i> .	

30. Vowels and consonants being thus defined and arranged, we are the better enabled to enter upon an inquiry into their different powers, as they are differently combined with each other. But previous to this, that nothing may be wanting to form a just idea of the first principles of pronunciation, it may not be improper to show the organic formation of each letter.

Organic Formation of the Letters.

31. Though I think every mechanical account of the organic formation of the letters rather curious than useful, yet, that nothing which can be presented to the eye may be wanting to inform the ear, I shall in this follow those who have been at the pains to trace every letter to its seat, and make us, as it were, touch the sounds we articulate.

Organic Formation of the Vowels.

32. It will be necessary to observe that there are three long sounds of the letter *a*, which are formed by a greater or less expansion of the internal parts of the mouth.

33. The German *a*, heard in *ball*, *wall*, &c. is formed by a strong and grave expression of the breath through the mouth, which is open nearly in a circular form, while the tongue, contracting

and consulting their ears rather than their eyes, have frequently placed the *a* instead of *an* before the long *a*, and we have seen *a union*, *a university*, *a useful book*, from some of the most respectable pens of the present age. Nor can we doubt a moment of the propriety of this orthography, when we reflect that these words actually begin to the ear with *y*, and might be spelled *yunion*, *yuniversity*, *youseful*, and can therefore no more admit of *an* before them than *year* and *youth*. See Remarks on the Word *As* in this Dictionary.

itself to the root, as to make way for the sound, almost rests upon the under jaw.

34. The Italian *a*, heard in *father*, closes the mouth a little more than the German *a*; and by raising the lower jaw, widening the tongue, and advancing it a little nearer to the lips, renders its sound less hollow and deep.

35. The slender *a*, or that heard in *lane*, is formed in the mouth still higher than the last; and in pronouncing it the lips, as if to give it a slender sound, dilate their aperture horizontally; while the tongue, to assist this narrow emission of breath, widens itself to the cheeks, raises itself nearer the palate, and by these means a less hollow sound than either of the former is produced.

36. The *e* in *equal* is formed by dilating the tongue a little more, and advancing it nearer to the palate and the lips, which produces the slenderest vowel in the language; for the tongue is, in the formation of this letter, as close to the palate as possible, without touching it; as the moment the tongue touches the palate, the squeezed sound of *ee* in *thee* and *meet* is formed, which, by its description, must partake of the sound of the consonant *y*.

37. The *i* in *i-dol* is formed by uniting the sound of the Italian *a* in *father* and the *e* in *equal*, and pronouncing them as closely together as possible. See Directions to Foreigners at the beginning of this book, page 13.

38. The *o* in *open* is formed by nearly the same position of the organs as the *a* in *water*; but the tongue is advanced a little more into the middle of the mouth, the lips are protruded, and form a round aperture like the form of the letter, and the voice is not so deep in the mouth as when *a* is formed, but advances to the middle or hollow of the mouth.

39. The *u* in *u-nit* is formed by uniting the squeezed sound *ee* to a simple vowel sound, heard in *u-oo* and *coo*; the *oo* in these words is formed by protruding the lips a little more than in *o*, forming a smaller aperture with them, and, instead of swelling the voice in the middle of the mouth, bringing it as forward as possible to the lips.

40. *Y* final in *try* is formed like *i*: and *w* final in *now* like the *oo*, which has just been described.

In this view of the organic formation of the vowels we find that *a*, *e*, and *o*, are the only simple or pure vowels: that *i* is a diphthong, and that *u* is a semi-consonant. If we were inclined to contrive a scale for measuring the breadth or narrowness, or, as others term it, the openness or closeness of the vowels, we might begin with *e* open, as Mr. Elphinston calls it, and which he announces to be the closest of all the vocal powers. In the pronunciation of this letter we find the aperture of the mouth extended on each side; the lips almost closed, and the sound issuing horizontally. The slender *a* in *waste* opens the mouth a little wider. The *a* in *father* opens the mouth still more without contracting the corners. The German *a*, heard in *wall*, not only opens the mouth wider than the former *a*, but contracts the corners of the mouth so as to make the aperture approach nearer to a circle, while the *o* opens the mouth still more, and contracts the corners so as to make it the *os rotundum*, a picture of the letter it sounds. If therefore the other vowels were, like *o*, to take their forms from the aperture of the mouth in pronouncing them, the German *a* ought necessarily to have a figure as nearly approaching the *o* in form as it does in sound; that is, it ought to have that elliptical form which approaches nearest to the circle; as the *a* of the Italians, and that of the English in *father*, ought to form ovals, in exact proportion to the breadth of their sounds; the English *a* in *waste* ought to have a narrower oval; the *e* in *the* ought to have the curve of a parabola, and the squeezed sound of *ee* in *seen* a right line; or, to reduce these lines to solids, the *o* would be a perfect globe, the German *a* an oblate spheroid like the figure of the earth, the Italian *a* like an egg, the English slender *a* a Dutch skittle, the *e* a rolling-pin, and the double *e* a cylinder.

Organic Formation of the Consonants.

41. The best method of showing the organic formation of the consonants will be to class them into such pairs as they naturally fall into, and

then, by describing one, we shall nearly describe its fellow; by which means the labour will be lessened, and the nature of the consonants better perceived. The consonants that fall into pairs are the following:

<i>p</i>	<i>f</i>	<i>t</i>	<i>s</i>	<i>sh</i>	<i>th</i>	<i>k</i>	<i>ch</i> — <i>chair</i> .
<i>b</i>	<i>v</i>	<i>d</i>	<i>z</i>	<i>zh</i>	<i>dh</i>	<i>g</i>	<i>j</i> — <i>jail</i> .

42. Holder, who wrote the most elaborately and philosophically upon this subject, tells us, in his *Elements of Speech*, that when we only whisper we cannot distinguish the first rank of these letters from the second. It is certain the difference between them is very nice; the upper letters seeming to have only a smarter, brisker, appulse of the organs than the lower; which may not improperly be distinguished by sharp and flat. The most marking distinction between them will be found to be a sort of guttural murmur, which precedes the latter letters when we wish to pronounce them forcibly, but not the former. Thus if we close the lips, and put the fingers on them to keep them shut, and strive to pronounce the *p*, no sound at all will be heard; but in striving to pronounce the *b* we shall find a murmuring sound from the throat, which seems the commencement of the letter; and if we do but stop the breath by the appulse of the organs, in order to pronounce with greater force, the same may be observed of the rest of the letters.

43. This difference in the formation of these consonants may be more distinctly perceived in the *s* and *z* than in any other of the letters; the former is sounded by the simple issue of the breath between the teeth, without any vibration of it in the throat, and may be called a hissing sound; while the latter cannot be formed without generating a sound in the throat, which may be called a vocal sound. The upper rank of letters, therefore, may be called breathing consonants; and the lower vocal ones.

44. These observations premised, we may proceed to describe the organic formation of each letter.

45. *P* and *B* are formed by closing the lips till the breath is collected, and then letting it issue by forming the vowel *e*.

46. *F* and *V* are formed by pressing the upper teeth upon the under lip, and sounding the vowel *e* before the former and after the latter of these letters.

47. *T* and *D* are formed by pressing the tip of the tongue to the gums of the upper teeth, and then separating them, by pronouncing the vowel *e*.

48. *S* and *Z* are formed by placing the tongue in the same position as in *T* and *D*, but not so close to the gums as to stop the breath: a space is left between the tongue and the palate for the breath to issue, which forms the hissing and buzzing sound of these letters.

49. *SH* heard in *mission*, and *zh* in *evasion*, are formed in the same seat of sound as *s* and *z*; but in the former the tongue is drawn a little inwards, and at a somewhat greater distance from the palate, which occasions a fuller effusion of breath from the hollow of the mouth than in the latter, which are formed nearer to the teeth.

50. *TH* in *think*, and the same letters in *that*, are formed by protruding the tongue between the fore teeth, pressing it against the upper teeth, and at the same time endeavouring to sound the *s* or *z*; the former letter to sound *th* in *think*, and the latter to sound *th* in *that*.

51. *K* and *G* hard are formed by pressing the middle of the tongue to the roof of the mouth near the throat, and separating them a little smartly to form the first, and more gently to form the last of these letters.

52. *CH* in *chair*, and *J* in *jail*, are formed by pressing *t* to *sh*, and *d* to *zh*.

53. *M* is formed by closing the lips, as in *P* and *B*, and letting the voice issue by the nose.

54. *N* is formed by resting the tongue in the same position as in *T* or *D*, and breathing through the nose, with the mouth open.

55. *L* is formed by nearly the same position of the organs as *t* and *d*, but more with the tip of the tongue, which is brought a little forwarder to the teeth, while the breath issues from the mouth.

56. *R* is formed by placing the tongue nearly in the position of *t*, but at such a distance from the

point as suffers it to jar against it when the breath is propelled from the throat to the mouth.

7. *NG* in *ring*, *stag*, &c. is formed in the same way of sound as hard *g*; but while the middle of the tongue presses the roof of the mouth, as in *G*, the voice passes principally through the nose, as in *V*.

8. *Y* consonant is formed by placing the organs in the position of *e*, and squeezing the tongue against the roof of the mouth, which produces *ee*, which is equivalent to initial *y*. 36.

9. *W* consonant is formed by placing the organs in the position of *oo*, described under *u*, and closing the lips a little more, in order to propel the breath upon the succeeding vowel which it articulates.

63. In this sketch of the formation and distribution of the consonants, it is curious to observe how few radical principles the almost infinite variety of combination in language depends. It is with some degree of wonder we perceive that the slightest aspiration, the almost insensible inflection of nearly similar sounds, often generate the most different and opposite meanings. In this view of nature, as in every other, we find uniformity and variety very conspicuous. The single *cat*, at first impressed on the chaos, seems to operate on languages; which, from the simplicity and purity of their principles, and the extent and power of their combinations, prove the goodness, wisdom, and omnipotence of their origin.

64. This analogical association of sounds is not only curious, but useful: it gives us a comprehensive view of the powers of the letters; and, from the small number that are radically different, enables us to see the rules on which their varieties depend: it discovers to us the genius and propensities of several languages and dialects, and, when authority is silent, enables us to decide agreeably to analogy.

65. The vowels, diphthongs, and consonants, thus enumerated and defined, before we proceed to ascertain their different powers, as they are differently associated with each other, it may be necessary to give some account of those distinctions of sound in the same vowels which express their quantity as long or short, or their quality as open or close, or slender and broad. This will appear the more necessary, as these distinctions so frequently occur in describing the sounds of the vowels, and as they are not unfrequently used with too little precision by most writers on the subject.

Of the Quantity and Quality of the Vowels.

66. The first distinction of sound that seems to obtrude itself upon us when we utter the vowels is a long and a short sound, according to the greater or less duration of time taken up in pronouncing them. This distinction is so obvious as to have been adopted in all languages, and is that to which we annex clearer ideas than to any other; and though the short sounds of some vowels have not in our language been classed with sufficient accuracy with their parent long ones, yet this has bred but little confusion, as vowels long and short are always sufficiently distinguishable; and the nice appropriation of short sounds to their specific long ones is not necessary to our conveying what sound we mean, when the letter to which we apply these sounds is known, and its power agreed upon.

67. The next distinction of vowels into their specific sounds, which seems to be the most generally adopted, is that which arises from the different apertures of the mouth in forming them. It is certainly very natural, when we have so many more simple sounds than we have characters by which to express them, to distinguish them by that which seems their organic definition; and we accordingly find vowels denominated by the French *ouvert* and *fermé*; by the Italians *aperto* and *chiuso*; and by the English *open* and *shut*.

68. But whatever propriety there may be in the use of these terms in other languages, it is certain they must be used with caution in English, for fear of confounding them with long and short. Dr. Johnson and other grammarians call the *a* in *father* the open *a*: which may, indeed, distinguish it from the slender *a* in *paper*; but not from the broad *a* in *water* which is still more

open. Each of these letters has a short sound, which may be called a shut sound; but the long sounds cannot be so properly denominated open as more or less broad; that is, the *a* in *paper* the slender sound; the *a* in *father* the broadish or middle sound; and the *a* in *water* the broad sound. The same may be observed of the *o*. This letter has three long sounds, heard in *move*, *note*, *nor*; which graduate from slender to broadish, and broad like the *a*. The *i* also in *mine* may be called the broad *i*, and that in *machine* the slender *i*; though each of them is equally long; and though these vowels that are long may be said to be more or less open according to the different apertures of the mouth in forming them, yet the short vowels cannot be said to be more or less shut: for as short always implies shut (except in verse), though long does not always imply open, we must be careful not to confound long and open, and close and shut, when we speak of the quantity and quality of the vowels. The truth of it is, all vowels either terminate a syllable, or are united with a consonant. In the first case, if the accent be on the syllable, the vowel is long, though it may not be open: in the second case, where a syllable is terminated by a consonant, except that consonant be *r*, whether the accent be on the syllable or not, the vowel has its short sound, which, compared with its long one, may be called shut: but as no vowel can be said to be shut that is not joined to a consonant, all vowels that end syllables may be said to be open, whether the accent be on them or not. 550, 551.

69. But though the terms long and short, as applied to vowels, are pretty generally understood, an accurate ear will easily perceive that these terms do not always mean the long and short sounds of the respective vowels to which they are applied; for if we choose to be directed by the ear in denominating vowels long or short, we must certainly give these appellations to those sounds only which have exactly the same radical tone, and differ only in the long or short emission of that tone. Thus measuring the sounds of the vowels by this scale, we shall find that the long *I* and *y* have properly no short sounds but such as seem essentially distinct from their long ones; and that the short sound of these vowels is no other than the short sound of *e*, which is the latter letter in the composition of these diphthongs. 37.

70. The same want of correspondence in classing the long and short vowels we find in *a*, *e*, *o*, and *u*; for as the *e* in *theme* does not find its short sound in the same letter in *them*, but in the *i* in *him*; so the *e* in *them* must descend a step lower into the province of *a* for its long sound in *tame*. The *a* in *carry* is not the short sound of the *a* in *care*, but of that in *car*, *father*, &c. as the short broad sound of the *a* in *want* is the true abbreviation of that in *wall*. The sound of *o* in *don*, *gone*, &c. is exactly correspondent to the *a* in *swan*, and finds its long sound in the *a* in *wall*, or the diphthong *aw* in *dawn*, *lawn*, &c.; while the short sound of the *o* in *tone* is nearly that of the same letter in *ton*, (a weight,) and corresponding with what is generally called the short sound of *u* in *tun*, *gun*, &c. as the long sound of *u* in *puls* must find its short sound in the *u* in *pull*, *bull*, &c.; for this vowel, like the *i* and *y*, being a diphthong, its short sound is formed from the latter part of the letter, equivalent to double *o*; as the word *pule*, if spelled according to the sound, might be written *people*.

71. Another observation preparatory to a consideration of the various sounds of the vowels and consonants seems to be the influence of the accent; as the accent or stress which is laid upon certain syllables has so obvious an effect upon the sounds of the letters, that, unless we take accent into the account, it will be impossible to reason rightly upon the proper pronunciation of the Elements of Speech.

Of the Influence of Accents on the Sounds of the Letters.

72. It may be first observed, that the exertion of the organs of speech necessary to produce the accent, or stress, has an obvious tendency to preserve the letters in their pure and uniform sound, while the relaxation or feebleness which succeeds

the accent as naturally suffers the letters to slide into a somewhat different sound, a little easier to the organs of pronunciation. Thus the first *a* in *cabbage* is pronounced distinctly with the true sound of that letter, while the second *a* goes into an obscure sound bordering on the *i* short, the slenderest of all sounds; so that *cabbage* and *village* have the *a* in the last syllable scarcely distinguishable from the *e* and *i* in the last syllables of *college* and *vestige*.

70. In the same manner the *a*, *e*, *i*, *o*, and *y*, coming before *r* in a final unaccented syllable, go into an obscure sound so nearly approaching to the short *u*, that if the accent were carefully kept upon the first syllables of *liar*, *lier*, *elixir*, *mayor*, *martyr*, &c. these words, without any perceptible change in the sound of their last syllables, might all be written and pronounced *liur*, *liur*, *elixur*, *mayur*, *martyr*, &c.

71. The consonants also are no less altered in their sound by the position of the accent than the vowels. The *k* and *s* in the composition of *x*, when the accent is on them, in *exercise*, *execute*, &c. preserve their strong pure sound; but when the accent is on the second syllable, in *exact*, *exonerate*, &c. these letters slide into the duller and weaker sounds of *g* and *z*, which are easier to the organs of pronunciation. Hence not only the soft *c* and the *s* go into *sh*, but even the *t* before a diphthong slides into the same letters when the stress is on the preceding syllable. Thus in *society* and *satiety* the *c* and *t* preserve their pure sound, because the syllables *ci* and *ti* have the accent on them; but in *social* and *satiolate* these syllables come after the stress, and, from the feebleness of their situation, naturally fall into the shorter and easier sound, as if written *soshial* and *sashiate*. See the word SATIETY.

A.

72. *A* has three long sounds and two short ones.

73. The first sound of the first letter in our alphabet is that which among the English is its name. (See the letter *A* at the beginning of the Dictionary.) This is what is called by most grammarians its slender sound, 35, 65; we find it in the words *lade*, *spade*, *trade*, &c. In the diphthong *ai* we have exactly the same sound of this letter as in *pain*, *gain*, *stain*, &c. and sometimes in the diphthong *ea*, as *bear*, *swear*, *pear*, &c.; nay, twice we find it, contrary to every rule of pronunciation, in the words *where* and *there*, and once in the anomalous diphthong *ao* in *gaol*. It exactly corresponds to the sound of the French *e* in the beginning of the words *être* and *tête*.

74. The long slender *a* is generally produced by a silent *e* at the end of the syllable; which *e* not only keeps one single intervening consonant from shortening the preceding vowel, but sometimes two: thus we find the mute *e* makes of *rag* *rage*, and very improperly keeps the *a* open even in *range*, *change*, &c. (see *Change*); *hat*, with the mute *e*, becomes *hate*, and the *a* continues open, and, perhaps, somewhat longer in *haste*, *waste*, *paste*, &c. though it must be confessed this seems the privilege only of *a*; for the other vowels contract before the consonants *ng* in *revenge*, *cringe*, *plunge*; and the *ste* in our language is preceded by no other vowel but this. Every consonant but *n* shortens every vowel but *a*, when soft *g* and *e* silent succeed; as *bilge*, *badge*, *hinge*, *sponge*, &c.

75. Hence we may establish this general rule: *A* has the long, open, slender sound, when followed by a single consonant and *e* mute, as *lade*, *made*, *fade*, &c. The only exceptions seem to be *have*, *are*, *gape*, and *bade*, the past time of *to bid*.

76. *A* has the same sound, when ending an accented syllable, as *pa-per*, *ta-per*, *spec-ta-tor*. The only exceptions are *fa-ther*, *mas-ter*, *wa-ter*.

77. As the short sound of the long slender *a* is not found under the same character, but in the short *e* (as may be perceived by comparing *mate* and *met*), 67, we proceed to delineate the second sound of this vowel, which is that heard in *father*, and is called by some the open sound 34; but this can never distinguish it from the deeper sound of the *a* in *all*, *ball*, &c. which is still more open: by some it is styled the middle sound of *a*, as between the *a* in *pale*, and that in *wall*: it answers nearly to the Italian *a* in *Tuscano*, *Romano*, &c. or to the dual *a* in the naturalized Greek

words *papa* and *mamma*; and in *bas*, the word adopted in almost all languages to express the cry of sheep. We seldom find the long sound of this letter in our language, except in monosyllables ending with *r*, as *far*, *tar*, *mar*, &c. and in the word *father*. There are certain words from the Latin, Italian, and Spanish languages, such as *lumbago*, *bravado*, *tornado*, *camisado*, *sarrago*, &c. which are sometimes heard with this sound of *a*, but except in *bravo*, heard chiefly at the theatres, the English sound of *a* is preferable in all these words.

78. The long sound of the middle or Italian *a* is always found before *r* in monosyllables, as *cor*, *far*, *mar*, &c. before the liquids *lm*; whether the latter only be pronounced, as in *psalm*, or both, as in *psalmist*; sometimes before *lf*, and *lve*, as *calf*, *half*, *calve*, *halve*, *salve*, &c.; and, lastly, before the sharp aspirated dental *th* in *bath*, *path*, *lath*, &c. and in the word *father*: this sound of the *a* was formerly more than at present found before the nasal liquid *n*, especially when succeeded by *c*, *t* or *d*, as *dance*, *glance*, *lance*, *France*, *chance*, *prance*, *grant*, *plant*, *slant*, *slander*, &c.

79. The hissing consonant *s* was likewise a sign of this sound of the *a*, whether doubled, as in *glass*, *grass*, *lass*, &c. or accompanied by *t*, as in *last*, *fast*, *vast*, &c.; but this pronunciation of *a* seems to have been for some years advancing to the short sound of this letter, as heard in *hand*, *land*, *grand*, &c.; and pronouncing the *a* in *after*, *answer*, *basket*, *plant*, *mast*, &c. as long as in *half*, *calf*, &c. borders very closely on vulgarity. It must be observed, however, that the *a* before *n* in monosyllables, and at the end of words, was anciently written with *u* after it, and so probably pronounced as broad as the German *a*; for Dr. Johnson observes, "Many words pronounced with *a* broad were anciently written with *au*, as *fault*, *mault*; and we still write *fault*, *vault*. This was probably the Saxon sound, for it is yet retained in the northern dialects, and in the rustic pronunciation, as *maun* for *man*, *haund* for *hand*." But since the *u* has vanished the *a* has been gradually pronounced slenderer and shorter, till now almost every vestige of the ancient orthography seems lost; though the termination *mund* in *command*, *demand*, &c. formerly written *command*, *demaund*, still retains the long sound inviolably.

80. As the mute *l* in *calm*, *psalm*, *calf*, *half*, &c. seems to lengthen the sound of this letter, so the abbreviation of some words by apostrophe seems to have the same effect. Thus when, by Impatience, that grand corrupter of manners as well as language, the *no* is cut out of the word *cannot*, and the two syllables reduced to one, we find the *a* lengthened to the Italian or middle *a*, as *can-not*, *can't*; *have not*, *han't*; *shall not*, *sha'n't*, &c. This is no more than what the Latin language is subject to; it being a known rule in that tongue, that when, by composition or otherwise, two short syllables become one, that syllable is almost always long, as *alius* has the penultimate long be-

* Since the first publication of this Dictionary the public have been favoured with some very elaborate and judicious observations on English pronunciation by Mr. Smith, in a Scheme of a French and English Dictionary. In this work he departs frequently from my judgment, and particularly in the pronunciation of the letter *a*, when succeeded by *ss*, *st*, or *n*, and another consonant, as *pass*, *last*, *chance*, &c. to which he annexes the long sound of *a* in *father*. That this was the sound formerly is highly probable from its being still the sound given it by the vulgar, who are generally the last to alter the common pronunciation; but that the short *a* in these words is now the general pronunciation of the polite and learned world seems to be candidly acknowledged by Mr. Smith himself: and as every correct ear would be disgusted at giving the *a* in these words the full long sound of the *a* in *father*, any middle sound ought to be discountenanced, as tending to render the pronunciation of a language obscure and indefinite. 163.

Ben Jonson in his Grammar classes *salt*, *malt*, *balm*, and *calm*, as having the same sound of *a*; and *aunt* as having the same diphthongal sound as *audience*, *author*, *law*, *saw*, *draw*, &c.

case it comes from *allius*, and the two short vowels in *cage* become one long vowel in *cage*, &c.

81. The short sound of the middle or Italian *a*, which is generally confounded with the short sound of the slender *a*, is the sound of this vowel in *man*, *pen*, *ten*, *mat*, *bat*, &c. : we generally find this sound before any two successive consonants (thus excepted in the foregoing remarks), and even when it comes before an *r*, if a vowel follows, or the *r* be doubled; for if this consonant be doubled, in order to produce another syllable, the long sound becomes short, as *mar*, *marry*; *car*, *carry*, &c. where we find the monosyllable has the long, and the dissyllable the short sound; but if *a* come before *r*, followed by another consonant, it has its long sound, as in *part*, *partial*, &c.

82. The only exception to this rule is in adjectives derived from substantives ending in *r*; for in this case the *a* continues long, as in the primitive. Thus the *a* in *starry*, or full of stars, is as long as in *star*; and the *a* in the adjective *tarry*, or besmeared with tar, is as long as in the substantive *tar*, though short in the word *tarry*, to say.

83. The third long sound of *a* is that which we more immediately derive from our maternal language, the Saxon, but which at present we use less than any other: this is the *a* in *fall*, *ball*, *gall*, &c. : we find a correspondent sound to this *a* in the diphthongs *au* and *aw*, as *laud*, *law*, *saw*, &c. ; though it must here be noted that we have improved upon our German parent, by giving a broader sound to this letter in these words than the Germans themselves would do, were they to pronounce them.

84. The long sound of the deep broad German *a* is produced by *ll* after it, as in *all*, *wall*, *call*; *ar*, indeed, by one *l*, and any other consonant, except the mute labials *p*, *b*, *f*, and *v*, as *salt*, *held*, *false*, *salchion*, *salcon*, &c. The exceptions to this rule are generally words from the Arabic and Latin languages, as *Alps*, *Albion*, *asphaltic*, *salced*, *salve*, *calculate*, *amalgamate*, *Alicoran*, and *Alfred*, &c. ; the two last of which may be considered as ancient proper names which have been frequently latinized, and by this means have acquired a slenderer sound of *a*. This rule, however, must be understood of such syllables only as have the accent on them; for when *al*, followed by a consonant, is in the first syllable of a word, having the accent on the second, it is then pronounced as in the first syllables of *alley*, *selley*, &c. as *alternate*, *balsamic*, *salcade*, *salcation*, &c. Our modern orthography, which has done its utmost to perplex pronunciation, has made it necessary to observe, that every word compounded of a monosyllable with *ll*, as *albeit*, *also*, *almost*, *downfall*, &c. must be pronounced as if the two liquids were still remaining, notwithstanding our word-menders have wisely taken one away, to the destruction both of sound and etymology; for, as Mr. Elphinston shrewdly observes, "Every reader, young and old, must now be so sagacious an analyst as to discern at once not only what are compounds and what their simples, but that *al* in composition is equal to *all* out of it; or, in other words, that it is both what it is, and what it is not." *Prim. Eng. Language*, vol. i. page 60. See No. 404.

85. The *w* has a peculiar quality of broadening this letter, even when prepositive: this is always the effect, except when the vowel is closed by the sharp or flat guttural *k* or *g*, *x*, *ng*, *nk*, or the sharp labial *f*, as *war*, *waft*, *thwack*, *twang*, *twank*: thus we pronounce the *a* broad, though short in *rad*, *aran*, *want*, *was*, *what*, &c. ; and though other letters suffer the *a* to alter its sound before *ll*, when one of these letters goes to the formation of the latter syllable, as *tall*, *tal-low*; *hall*, *hal-low*; *call*, *cal-low*, &c. ; yet we see *w* preserve the sound of this vowel before a single consonant, as *wal-low*, *swal-low*, &c.

86. The *q* including the sound of the *w*, and being no more than this letter preceded by *k*, ought, according to analogy, to broaden every *a* it goes before like the *w*; thus *quantity* ought to be pronounced as if written *kquantity*, and *quality* should rhyme with *jollity*; instead of which we frequently hear the *w* robbed of its rights in its proxy; and *quality* so pronounced as to rhyme

with *legality*; while to rhyme *quantity*, according to this affected mode of pronouncing it, we must coin such words as *plantity* and *consonantity*. The *a* in *quaver* and *equator* is an exception to this rule, from the preponderancy of another which requires *a*, ending a syllable under the accent, to have the slender sound of that letter; to which rule *father*, *master*, and *water*, and, perhaps, *quadrant*, are the only exceptions.

87. The short sound of this broad *a* is heard, when it is preceded by *w*, and succeeded by a single consonant in the same syllable, as *wal-low*, *swal-low*, &c. or by two consonants in the same syllable, as *want*, *was!*, *wasp*, &c. but when *l* or *r* is one of the consonants, the *a* becomes long, as *walk*, *swarm*, &c.

Irregular and unaccented Sounds.

88. But, besides the long and short sounds common to all the vowels, there is a certain transient indistinct pronunciation of some of them, when they are not accented, that cannot be so easily settled: when the accent is not upon it, no vowel is more apt to run into this imperfect sound than the *a*; thus the particle *a* before participles, in the phrases *a-going*, *a-walking*, *a-shooting*, &c. seems, says Dr. Lowth, to be the true and genuine preposition *on*, a little disguised by familiar use and quick pronunciation: the same indistinctness, from rapidity and coincidence of sound, has confounded the pronunciation of this mutilated preposition to the ear, in the different questions *what's o'clock?* when we would know the hour, and *what's a clock?* when we would have the description of that horary machine; and if the accent be kept strongly on the first syllable of the word *tolerable*, as it always ought to be, we find scarcely any distinguishable difference to the ear, if we substitute *u* or *o* instead of *a* in the penultimate syllable. Thus *tolerable*, *toleroble*, and *toleruble*, are exactly the same word to the ear, if pronounced without premeditation or transposing the accent, for the real purpose of distinction; and *inwards*, *outwards*, &c. might, with respect to sound, be spelt *inurds*, *outurds*, &c. Thus the word *man*, when not under the accent, might be written *mun* in *nobleman*, *husbandman*, *woman*; and *tertian* and *quartan tertium* and *quartum*, &c. The same observation will hold good in almost every final syllable where *a* is not accented, as *medal*, *dial*, *giant*, *bias*, &c. *defiance*, *temperance*, &c. ; but when the final syllable ends in *age*, *ate*, or *ace*, the *a* goes into a somewhat different sound. See 90 and 91.

89. There is a corrupt, but a received, pronunciation of this letter in the words *any*, *many*, *Thames*, where the *a* sounds like short *e*, as if written *enny*, *menny*, *Tems*. *Catch*, among Londoners, seems to have degenerated into *ketch*; and *says*, the third person of the verb to *say*, has, among all ranks of people, and in every part of the united kingdoms, degenerated into *sez*, rhyming with *Fez*.

90. The *a* goes into a sound approaching the short *i*, in the numerous termination in *age*, when the accent is not on it, as *cabbage*, *village*, *courage*, &c. and are pronounced nearly as if written *cabbige*, *villige*, *courige*, &c. The exceptions to this rule are chiefly among words of three syllables, with the accent on the first; these seem to be the following: *Adage*, *presage*, *scutage*, *hemorrhage*, *vassalage*, *carcilage*, *guidage*, *pucelage*, *mucilage*, *cartilage*, *pupillage*, *orphanage*, *villanage*, *appanage*, *concubinage*, *baronage*, *patronage*, *parsonage*, *personage*, *equipage*, *ossifrage*, *saxifrage*, *umprage*, *embassage*, *hermitage*, *heritage*, *parentage*, *messuage*.

91. The *a* in the numerous termination *ate*, when the accent is not on it, is pronounced somewhat differently in different words. If the word be a substantive, or an adjective, the *a* seems to be shorter than when it is a verb: thus a good ear will discover a difference in the quantity of this letter in *delicate* and *dedicate*; in *climate*, *primate*, and *ultimate*; and the verbs to *calculate*, to *regulate*, and to *speculate*, where we find the nouns and adjectives have the *a* considerably shorter than the verbs. *Innate*, however, preserves the *a* as long as if the accent were on it: but the unaccented terminations in *ace*, whether nouns or verbs, have the *a* so short and obscure as to be nearly similar to the *u* in *us*; thus *po-*

lace, solace, menace, pinnace, populace, might, without any great departure from their common sound, be written *pallus, solus, &c.* while *furnace* almost changes the *a* into *i*, and might be written *furniss*.

92. When the *a* is preceded by the gutturals hard *g* or *c*, it is, in polite pronunciation, softened by the intervention of a sound like *e*, so that *card, cart, guard, regard*, are pronounced like *ke-ard, ke-art, ghe-ard, re-ghe-ard*. When the *a* is pronounced short, as in the first syllables of *candle, gander, &c.* the interposition of the *e* is very perceptible, and indeed unavoidable: for though we can pronounce *guard* and *cart* without interposing the *e*, it is impossible to pronounce *garrison* and *carriage* in the same manner. This sound of the *a* is taken notice of in Steele's Grammar, page 49, which proves it is not the offspring of the present day, 169; and I have the satisfaction to find Mr. Smith, a very accurate inquirer into the subject, entirely of my opinion. But the sound of the *a*, which I have found the most difficult to appreciate, is that where it ends the syllable either immediately before or after the accent. We cannot give it any of its three open sounds without hurting the ear: thus, in pronouncing the words *abound* and *diadem*, *ay-bound, ab-bound, and aw-bound; di-ay-dem, di-ab-dem, and di-aw-dem*, are all improper; but giving the *a* the second or Italian sound, as *ah-bound* and *di-ah-dem*, seems the least so. For which reason I have, like Mr. Sheridan, adopted the short sound of this letter to mark this unaccented *a*: but if the unaccented *a* be final, which is not the case in any word purely English, it then seems to approach still nearer to the Italian *a* in the last syllable of *papa*, and to the *a* in *father*; as may be heard in the deliberate pronunciation of the words *idea, Africa, Delta, &c.* 93. See the letter *A* at the beginning of the Dictionary.

E.

93. The first sound of *e* is that which it has when lengthened by the mute *e* final, as in *glebe, theme, &c.* or when it ends a syllable with the accent upon it, as *se-cre-tion, ad-he-sion, &c.* 94.

94. The exceptions to this rule are the words *where* and *there*; in which the first *e* is pronounced like *a*, as if written *whare, thare*; and the auxiliary verb *were*, where the *e* has its short sound, as if written *werr*, rhyming with the last syllable of *pre-fer* and *ere* (before), which sounds like *air*. When *there* is in composition in the word *therefore*, the *e* is generally shortened, as in *were*, but in my opinion improperly.

95. The short sound of *e* is that heard in *bed, fed, red, wed, &c.*; this sound before *r* is apt to slide into short *u*; and we sometimes hear *mercy* sounded as if written *murcy*: but this, though very near, is not the exact sound.

Irregular and unaccented Sounds.

96. The *e* at the end of the monosyllables *be, he, me, we*, is pronounced *ee*, as if written *bee, hee, &c.* It is silent at the end of words purely English, but is pronounced distinctly at the end of some words from the learned languages, as *epitome, simile, catastrophe, apostrophe, &c.*

97. The first *e* in the poetic contractions, *e'er* and *ne'er*, is pronounced like *a*, as if written *air* and *neir*.

98. The *e* in *her* is pronounced nearly like short *u*; and as we hear it in the unaccented terminations of *writer, reader, &c.* pronounced as if written *writur, readur*, where we may observe that the *r* being only a jar, and not a definite and distinct articulation like the other consonants, instead of stopping the vocal efflux of voice, lets it imperfectly pass, and so corrupts and alters the true sound of the vowel. The same may be observed of the final *e* after *r* in words ending in *ere, gre, tre*, where the *e* is sounded as if it were placed before the *r*, as in *lucres, mangre, theatre, &c.* pronounced *lukur, mangur, theatur, &c.* See No. 418. It may be remarked, that though we ought cautiously to avoid pronouncing the *e* like *u* when under the accent, it would be *nimis Atticé*, and border too much on affectation of accuracy, to preserve this sound of *e* in unaccented syllables before *r*; and though *terrible*, where *e* has the accent, should never be pronounced as if written *turrible*, it is impossible

without pedantry to make any difference in the sound of the last syllable of *splendour* and *tender, sulphur* and *suffer*, or *martyr* and *garter*. But there is a small deviation from rule when this letter begins a word, and is followed by a double consonant with the accent on the second syllable: in this case we find the vowel lengthen as if the consonant were single.—See *Eface, Despatch, Embalm*.

99. This vowel, in a final unaccented syllable, is apt to slide into the short *i*: thus *faces, ranges, praises*, are pronounced as if written *faciz, rangiz, praiiz*; *poet, covet, linen, duel, &c.* as if written *poit, covit, linin, duil, &c.*; where we may observe that, though the *e* goes into the short sound of *i*, it is exactly that sound which corresponds to the long sound of *e*.—See *Port-Royal Grammar, Latin*, page 142.

100. There is a remarkable exception to the common sound of this letter in the words *clerk, sergeant*, and a few others, where we find the *e* pronounced like the *a* in *dark* and *margin*. But this exception, I imagine, was, till within these few years, the general rule of sounding this letter before *r*, followed by another consonant. See *Merchant*. Thirty years ago every one pronounced the first syllable of *merchant* like the monosyllable *march*, and as it was anciently written *marchant*. *Service* and *servant* are still heard among the lower order of speakers as if written *service* and *sarvant*; and even among the better sort we sometimes hear the salutation, *Sir, your sarvant!* though this pronunciation of the word singly would be looked upon as a mark of the lowest vulgarity. The proper names, *Derby* and *Berkeley*, still retain the old sound, as if written *Darby* and *Barkelley*; but even these, in polite usage, are getting into common sound, nearly as if written *Durby* and *Burkeley*. As this modern pronunciation of the *e* has a tendency to simplify the language by lessening the number of exceptions, it ought certainly to be indulged.

101. This letter falls into an irregular sound, but still a sound which is its nearest relation, in the words *England, yes, and pretty*, where the *e* is heard like short *i*. Vulgar speakers are guilty of the same irregularity in *engine*, as if written *ingine*; but this cannot be too carefully avoided.

102. The vowel *e* before *i* and *n* in the final unaccented syllable, by its being sometimes suppressed and sometimes not, forms one of the most puzzling difficulties in pronunciation. When any of the liquids precede these letters, the *e* is heard distinctly, as *woollen, flannel, women, syren*; but when any of the other consonants come before these letters, the *e* is sometimes heard, as in *novel, sudden*; and sometimes not, as in *strivel, raven, &c.* As no other rule can be given for this variety of pronunciation, perhaps the best way will be to draw the line between those words where *e* is pronounced, and those where it is not; and this, by the help of the Rhyming Dictionary, I am luckily enabled to do. In the first place, then, it may be observed, the *e* before *i*, in a final unaccented syllable, must always be pronounced distinctly, except in the following words: *Shekel, weasel, ousel, nousel* (better written *nuzle*), *navel, ravel, snivel, ritel, drivel, shrivel, shovel, grovel, hazel, drazel, nozel*. These words are pronounced as if the *e* were omitted by an apostrophe, as *shek'l, weas'l, ous'l, &c.* or rather as if written *sheckle, weazle, ouzle, &c.*; but as these are the only words of this termination that are so pronounced, great care must be taken that we do not pronounce *travel, gravel, rebel* (the substantive), *parcel, chapel, and vessel*, in the same manner; a fault to which many are very prone.

103. *E* before *n* in a final unaccented syllable and not preceded by a liquid, must always be suppressed in the verbal terminations in *en*, as to *loosen, to hearken*, and in other words, except the following: *Sudden, mynchen, kitchen, hyphen, chicken, ticken* (better written *ticking*), *jerken, aspen, platen, paten, marten, latten, patten, leaven or leven, sloven, mittens*. In these words the *e* is heard distinctly, contrary to the general rule which suppresses the *e* in these syllables, when preceded by a mute, as *harden, heathen, heaven*, as if written *hard'n, heath'n, heav'n, &c.*; nay, even when preceded by a liquid in the words *fallen* and *stolen*, where the *e* is suppressed, as if

they were written *fall'n* and *stoll'n*: *garden* and *burden*, therefore, are very analogically pronounced *gard'n* and *burd'n*; and this pronunciation ought the rather to be indulged, as we always hear the *e* suppressed in *gardener* and *burdenome*, as if written *gard'ner* and *burd'nome*. See No. 472.

101. This diversity in the pronunciation of these terminations ought the more carefully to be attended to, as nothing is so vulgar and childish as to hear *street* and *heaven* pronounced with the *e* distinctly, or *morel* and *chicken* with the *e* suppressed. But the most general suppression of this letter is in the preterits of verbs and in participles ending in *ed*: here, when the *e* is not preceded by *d* or *t*, the *e* is almost universally sunk 282, and the two final consonants are pronounced in one syllable: thus *loved*, *lived*, *barred*, *marred*, are pronounced as if written *lovd*, *livd*, *barrd*, *marrd*. The same may be observed of this letter when silent in the singulars of nouns, or the first persons of verbs, as *theme*, *make*, &c. which form *themes* in the plural, and *makes* in the third person, &c. where the last *e* is silent, and the words are pronounced in one syllable. When the noun or first person of the verb ends in *y*, with the accent on it, the *e* is likewise suppressed, as *a reply*, *two replies*, *he replies*, &c. When words of this form have the accent on the preceding syllables, the *e* is suppressed, and the *y* pronounced like short *i*, as *cherries*, *marries*, *carries*, &c. pronounced *cherriz*, *marriz*, *carriz*, &c. In the same manner, *carried*, *married*, *embodied*, &c. are pronounced as if written *carrid*, *marrid*, *embodid*, &c. 282. But it must be carefully noted that there is a remarkable exception to many of these contractions when we are pronouncing the language of Scripture: here every participial *ed* ought to make a distinct syllable, where it is not preceded by a vowel: thus, "Who hath *believed* our report, and to whom is the arm of the Lord *revealed*?" Here the participles are both pronounced in three syllables; but in the following passage, "Whom he did predestinate, them he also *called*; and whom he called, them he also *justified*; and whom he *justified*, them he also *glorified*," *called* preserves the *e*, and is pronounced in two syllables; and *justified* and *glorified* suppress the *e*, and are pronounced in three.

I.

105. This letter is a perfect diphthong, composed of the sounds of *a* in *father*, and *e* in *he*, pronounced as closely together as possible 37. When these sounds are openly pronounced, they produce the familiar assent *ay*; which, by the old English dramatic writers, was often expressed by *i*: hence we may observe, that unless our ancestors pronounced the vowel *i* like the *e* in *oil*, the present pronunciation of the word *ay* in the House of Commons, in the phrase *the Ayes* here sit, is contrary to ancient as well as to present usage: such a pronunciation of this word is now coarse and rustick. This sound is heard when the letter is lengthened by final *e*, as *time*, *thine*, or ending a syllable with the accent upon it, as *title*, *di-al*; in monosyllables ending with *nd*, as *bind*, *find*, *mind*, &c.; in three words ending with *ld*, as *child*, *mild*, *wild*; and in one very irregularly ending with *st*, as *plust*. 37.

106. There is one instance where this letter, though succeeded by final *e*, does not go into the broad English sound like the noun *eye*, but into the slender foreign sound like *e*. This is in the word *shire*, pronounced as if written *sheer*, both when single, as a *knight of the shire*; or in composition, as in *Nottinghamshire*, *Leicestershire*, &c. This is the sound Dr. Lowth gives it in his Grammar, page 4: and it is highly probable that the simple *shire* acquired this slender sound from its tendency to become slender in the compounds, where it is at a distance from the accent, and where all the vowels have a natural tendency to become short and obscure.—See *Shire*.

107. The short sound of this letter is heard in *him*, *this*, &c. and when ending an unaccented syllable, as *van-i-ty*, *qual-i-ty*, &c. where, though it cannot be properly said to be short, as it is not closed by a consonant, yet it has but half its diphthongal sound. This sound is the sound of

e, the last letter of the diphthong that forms the long *i*; and it is not a little surprising that Dr. Johnson should say that the short *i* was a sound wholly different from the long one. 551.

108. When this letter is succeeded by *r*, and another consonant not in a final syllable, it has exactly the sound of *e* in *vermin*, *vernal*, &c. as *virtue*, *virgin*, &c. which approaches to the sound of short *u*; but when it comes before *r*, followed by another consonant in a final syllable, it acquires the sound of *u* exactly, as *bird*, *dirt*, *shirt*, *squirt*, &c. *Mirth*, *birth*, *gird*, *girl*, *skirt*, *girl*, *whirl*, and *firm*, are the only exceptions to this rule, where *i* is pronounced like *e*, and as if the words were written *merth*, *berth*, and *ferm*.

109. The letter *r*, in this case, seems to have the same influence on this vowel as it evidently has on *a* and *o*. When these vowels come before double *r*, or single *r*, followed by a vowel, as in *arable*, *carry*, *marry*, *orator*, *horrid*, *forage*, &c. they are considerably shorter than when the *r* is the final letter of the word, or when it is succeeded by another consonant, as in *arbour*, *car*, *mar*, *or*, *nor*, *for*. In the same manner, the *i*, coming before either double *r*, or single *r*, followed by a vowel, preserves its pure short sound, as in *irritate*, *spirit*, *conspiracy*, &c.; but when *r* is followed by another consonant, or is the final letter of a word with the accent upon it, the *i* goes into a deeper and broader sound, equivalent to short *e*, as heard in *virgin*, *virtue*, &c. So *fir*, a tree, is perfectly similar to the first syllable of *ferment*, though often corruptly pronounced like *fur*, a skin. *Sir* and *stir* are exactly pronounced as if written *sur* and *stur*. It seems, says Mr. Nares, that our ancestors distinguished these sounds more correctly. Bishop Gardiner, in his first letter to Cheke, mentions a witticism of Nicholas Rowley, a fellow Cantab with him, to this effect: "Let handsome girls be called *virgins*, plain ones *vurgins*."

"Si pulchra est, *virgo*, sin turpis, *vurgo* vocetur."

Which, says Mr. Elphinston, may be modernized by the aid of a far more celebrated line:

"Sweet *virgin* can alone the fair express,
Fine by degrees, and beautifully less:
But let the hoyden, homely, rough-hewn *vurgin*
Engross the homage of a *Major Sturgeon*."

110. The sound of *i*, in this situation, ought to be the more carefully attended to, as letting it fall into the sound of *u*, where it should have the sound of *e*, has a grossness in it approaching to vulgarity. Perhaps the only exception to this rule is when the succeeding vowel is *u*; for this letter, being a semi-consonant, has some influence on the preceding *i*, though not so much as a perfect consonant would have. This makes Mr. Sheridan's pronunciation of the *i* in *virulent*, and its compounds, like that in *virgin*, less exceptionable than I at first thought it; but since we cannot give a semi-sound of short *i* to correspond to the semi-consonant sound of *u*, I have preferred the pure sound, which I think the most agreeable to polite usage. See Mr. Garrick's Epigram upon the sound of this letter, under the word *Virtue*.

Irregular and unaccented Sounds.

111. There is an irregular pronunciation of this letter which has greatly multiplied within these few years, and that is, the slender sound heard in *ee*. This sound is chiefly found in words derived from the French and Italian languages; and we think we show our breeding by a knowledge of those tongues, and an ignorance of our own:

"Report of fashions in proud Italy,
Whose manners still our tardy apish nation
Limps after, in base awkward imitation."
Shakespeare, *Richard II.*

When Lord Chesterfield wrote his letters to his son, the word *oblige* was, by many polite speakers, pronounced as if written *obleege*, to give a hint of their knowledge of the French language; nay, Pope has rhymed it to this sound:

"Dreading ev'n fools, by flatterers besieg'd,
And so obliging that he ne'er oblig'd."

But it was so far from having generally obtained, that Lord Chesterfield strictly enjoins his son to avoid this pronunciation as affected. In a few years, however, it became so general, that none but the lowest vulgar ever pronounced it in the English manner; but upon the publication of this nobleman's letters, which was about twenty years after he wrote them, his authority has had so much influence with the polite world as to bid fair for restoring the *i*, in this word, to its original rights; and we not unfrequently hear it now pronounced with the broad English *i* in those circles where, a few years ago, it would have been an infallible mark of vulgarity. Mr. Sheridan, Mr. Johnston, and Mr. Barclay, give both sounds, but place the sound of *oblige* first. Mr. Scott gives both, but places *obleege* first. Dr. Kenrick and Buchanan give only *oblige*; and Mr. Elphinston, Mr. Perry, and Fenning, give only *obleege*; but though this sound has lost ground so much, yet Mr. Nares, who wrote about eighteen years ago, says, "*oblige* still, I think, retains the sound of long *e*, notwithstanding the proscription of that pronunciation by the late Lord Chesterfield."

112. The words that have preserved the foreign sound of *i*, like *ee*, are the following: *Ambergris, jerdgris, antique, becasico, bombasin, brasil, capivi, capuchin, colbertine, chioppine, or chopin, caprice, chagrin, chevaux-de-frise, critique* (for criticism), *festucine, frise, gabardine, haberdine, sordine, rugine, trefpine, quarantine, routine, fascine, fatigue, intrigue, glaci, invalid, machine, magasins, marine, palanquin, pique, police, profile, recitative, mandarine, tabourine, tambourine, fontine, transmarine, ultramarine*. In all these words, if for the last *i* we substitute *ee*, we shall have the true pronunciation. In *signior* the first *i* is thus pronounced. Mr. Sheridan pronounces *vertigo* and *serpigo* with the accent on the second syllable, and the *i* long, as in *sie* and *pie*. Dr. Kenrick gives these words the same accent, but sounds the *i* as *e* in *tes* and *pea*. The latter is, in my opinion, the general pronunciation; though Mr. Sheridan's is supported by a very general rule, which is, that all words adopted whole from the Latin preserve the Latin accent, 503, *b*. But if the English ear were unbiassed by the long *i* in Latin, which fixes the accent on the second syllable, and could free itself from the slavish imitation of the French and Italians, there is little doubt but these words would have the accent on the first syllable, and that the *i* would be pronounced regularly like the short *e*, as in *Indigo* and *Pertico*.—See *Vertigo*.

113. There is a remarkable alteration in the sound of this vowel, in certain situations, where it changes to a sound equivalent to initial *y*. The situation that occasions this change is when the *i* precedes another vowel in an unaccented syllable, and is not preceded by any of the dentals: thus we hear *iary* in *mil-lary, bil-lary, &c.* pronounced as if written *mil-yary, bil-yary, &c.* *Min-ion* and *pin-ion*, as if written *min-yon* and *pin-yon*. In these words the *i* is so totally altered to *y*, that pronouncing the *ia* and *io* in separate syllables would be an error the most palpable; but where the other liquids or mutes precede the *i* in this situation, the coalition is not so necessary: for though the two latter syllables of *convivial, participial, &c.* are extremely prone to unite into one, they may, however, be separated, provided the separation be not too distant. The same observations hold good of *e*, as *malleable*, pronounced *mal-ya-ble*.

114. But the sound of the *i*, the most difficult to reduce to rule, is when it ends a syllable immediately before the accent. When either the primary or secondary accent is on this letter, it is invariably pronounced either as the long *i* in *title*, the short *i* in *little*, or the French *i* in *magasine*; and when it ends a syllable after the accent, it is always sounded like *e*, as *sen-si-ble, ra-ti-fy, &c.* But when it ends a syllable, immediately before the accent, it is sometimes pronounced long, as in *vi-ta-li-ty*, where the first syllable is exactly like the first of *vi-al*; and sometimes short, as in *di-gest*, where the *i* is pronounced as if the word were written *de-gest*. The sound of the *i*, in this situation, is so little reducible to rule, that none of our writers on the subject have attempted it; and the only method to give some idea of it seems to be the very laborious one of classing

such words together as have the *i* pronounced in the same manner, and observing the different combinations of other letters that may possibly be the cause of the different sounds of this.

115. In the first place, where the *i* is the only letter in the first syllable, and the accent is on the second, beginning with a consonant, the vowel has its long diphthongal sound, as in *idea, identity, idolatry, idoneous, irascible, ironical, isosceles, itinerant, itinerary*. *Imagine* and its compounds seem the only exceptions. But, to give the inspector some idea of general usage, I have subjoined examples of these words as they stand in our different Pronouncing Dictionaries:

idea. Sheridan, Scott, Buchanan, W. Johnston, Kenrick.

idea. Perry.

identity. Sheridan, Scott, Buchanan, W. Johnston, Kenrick.

identity. Perry.

idolatry. Sheridan, Scott, Buchanan, W. Johnston, Kenrick.

idolatry. Perry.

idoneous. Sheridan, Kenrick.

irascible. Sheridan, Scott, W. Johnston, Kenrick.

irascible. Perry.

isosceles. Sheridan, Scott, Perry.

itinerary. Sheridan, Scott, W. Johnston, Kenrick.

itinerary. Perry.

itinerant. Sheridan, Scott, W. Johnston, Nares.

itinerant. Buchanan, Perry.

116. When *i* ends the first syllable, and the accent is on the second, commencing with a vowel, it generally preserves its long open diphthongal sound. Thus in *di-ometer, di-urnal, &c.* the first syllable is equivalent to the verb to *dite*. A corrupt foreign manner of pronouncing these words may sometimes mince the *i* into *e*, as if the words were written *de-ametur, de-urnal, &c.*; but this is disgusting to every just English ear, and contrary to the whole current of analogy. Besides, the vowel that ends and the vowel that begins a syllable are, by pronouncing the *i* long, kept more distinct, and not suffered to coalesce, as they are apt to do if *i* has its slender sound. This proneness of the *e*, which is exactly the slender sound of *i*, to coalesce with the succeeding vowel, has produced such monsters in pronunciation as *jog-graphy* and *jommetry* for *geography* and *geometry*, and *jorgics* for *georgics*. The latter of these words is fixed in this absurd pronunciation without remedy; but the two former seem recovering their right to four syllables; though Mr. Sheridan has endeavoured to deprive them of it, by spelling them with three. Hence we may observe that those who wish to pronounce correctly, and according to analogy, ought to pronounce the first syllable of *bi-ography* as the verb to *bwy*, and not as if written *be-ography*.

117. When *i* ends an initial syllable without the accent, and the succeeding syllable begins with a consonant, the *i* is generally slender, as if written *e*. But the exceptions to this rule are so numerous, that nothing but a catalogue will give a tolerable idea of the state of pronunciation in this point.

118. When the prepositive *bi*, derived from *bis* (twice), ends a syllable immediately before the accent, the *i* is long and broad, in order to convey more precisely the specific meaning of the syllable. Thus *bi-capsular, bi-cipital, bi-cipitous, bi-cornous, bi-corporal, bi-dental, bi-serious, bifurcated, bi-linguous, bi-nocular, bi-pennated, bi-petalous, bi-quadrant*, have the *i* long. But the first syllable of the words *Bitumen* and *Bitumens*, having no such signification, ought to be pronounced with the *i* short. This is the sound Buchanan has given it; but Sheridan, Kenrick, and W. Johnston, make the *i* long, as in *Bible*.

119. The same may be observed of words beginning with *tri*, having the accent on the second syllable. Thus *tri-bunal, tri-corporal, tri-chotomy, tri-gintals*, have the *i* ending the first syllable long, as in *tri-al*. To this class ought to be added *di-petalous* and *di-lemma*, though the *i* in the first syllable of the last word is pronounced like *e*, and as if written *de-lemma*, by Mr. Scott and Mr. Perry, but long by Mr. Sheridan, Dr. Kenrick, and Buchanan; and both ways by W. Johnston but placing the short first. And hence

we may conclude that the verb to *bi-seat*, and the noun *bi-section*, ought to have the *i* at the end of the first syllable pronounced like *buy*, as Mr. Scott and Dr. Kenrick have marked it, though otherwise marked by Mr. Sheridan, Mr. Perry, and Buchanan.

120. When the first syllable is *chi*, with the accent on the second, the *i* is generally long, as *chi-rurgical*, *chi-rurgick*, *chi-rurgeon*, *chi-rographist*, *chi-rographer*, *chi-rography*. *Chi-mers* and *chi-mical* have the *i* most frequently short, as pronounced by Buchanan and Perry; though otherwise marked by Sheridan, Scott, W. Johnston, and Kenrick; and, indeed, the short sound seems now established. *Chicane* and *chicanery*, from the French, have the *i* always short; or more properly slender.

121. *Ci* before the accent has the *i* generally short, as *ci-vilian*, *ci-vility*, and, I think, *ci-licious* and *ci-cerulent*, though otherwise marked by Mr. Sheridan. *Ci-barious* and *ci-tation* have the *i* long.

122. *Cli* before the accent has the *i* long, as *cli-macter*; but when the accent is on the third syllable, as in *cli-macterick*, the *i* is shortened by the secondary accent.—See 530.

123. *Cri* before the accent has the *i* generally long, as *cri-nigerous*, *cri-terion*; though we sometimes hear the latter as if written *cre-terion*, but I think improperly.

124. *Di* before the accented syllable, beginning with a consonant, has the *i* almost always short; as *digest*, *digestion*, *digress*, *digression*, *dilute*, *dilation*, *diluvian*, *dimension*, *dimensive*, *dimidiation*, *diminish*, *diminutive*, *diploma*, *direct*, *direction*, *diversify*, *diversification*, *diversion*, *diversity*, *divert*, *divertisement*, *divertive*, *divest*, *divestiture*, *divide*, *dividable*, *divident*, *divine*, *divinity*, *divisible*, *divisibility*, *divorce*, *divulge*. To these, I think, may be added, *dicacity*, *didactick*, *dilacerate*, *dilaceration*, *dilaniate*, *dilapidation*, *dilate*, *dilatable*, *dilatability*, *dilection*, *dilucid*, *dilucidate*, *dilucidation*, *dialectical*, *dinumeration*, *diverge*, *divergent*, *diagnos*; though Mr. Sheridan has marked the first *i* in all these words long. Some of them may undoubtedly be pronounced either way; but why he should make the *i* in *diploma* long, and W. Johnston should give it both ways, is unaccountable; as Mr. Scott, Buchanan, Dr. Kenrick, Mr. Perry, and the general usage, is against them. *Diereris* and *dioptricks* have the *i* long, according to the general rule, 116, though the last is absurdly made short by Dr. Kenrick, and the diphthong is made long in the first by Mr. Sheridan, contrary to one of the most prevailing idioms in pronunciation; which is, the shortening power of the antepenultimate accent, 503. Let it not be said that the diphthong must be always long, since *Cæsar* and *Dædalus* have the *e* always short.

125. The long *i*, in words of this form, seems confined to the following: *Digladation*, *dijudication*, *dinumeration*, *divaricate*, *direption*, *disruption*. Both Johnson and Sheridan, in my opinion, place the accent of the word *didascalick* improperly upon the second syllable; it should seem more agreeable to analogy to class it with the numerous terminations in *ic*, and place the accent on the penultimate syllable, 509; and, in this case, the *i* in the first will be shortened by the secondary accent, and the syllable pronounced like *did*. 527. The first *i* in *dismissory*, marked long by Mr. Sheridan, and with the accent on the second syllable, contrary to Dr. Johnson, is equally erroneous. The accent ought to be on the first syllable, and the *i* short, as on the adjective *dis-*.—See Possessory.

126. *Pi* before the accent ought always to be short: this is the sound we generally give to the *i* in the first syllable of *pi-delity*; and why we should give the long sound to the *i* in *pi-dual* and *pi-duary*, as marked by Mr. Sheridan, I know not: he is certainly erroneous in marking the first *i* in *frigidity* long, and equally so in placing the accent upon the last syllable of *finite*. *Finance* has the *i* short universally.

127. *Gigantick* has the *i* in the first syllable always long.

128. *Li* has the *i* generally long, as *li-bation*, *li-brarian*, *li-bration*, *li-centious*, *li-pothymy*, *li-quescant*, *li-thography*, *li-thotomy*. *Litigious* has the *i* in the first syllable always short. The same may be observed of *libidinous*, though otherwise marked by Mr. Sheridan.

129. *Mi* has the *i* generally short, as in *minority*, *millitia*, *minographer*, *minacious*, *minactly*, *miraculous*; though the four last are marked with the long *i* by Mr. Sheridan; and, what is still more strange, he marks the *i* which has the accent on it long in *minatory*; though the same word, in the compound *comminatory*, where the *i* is always short, might have shown him his error. The word *minetick*, which, though in very good use, is neither in Johnson nor Sheridan, ought to be pronounced with the first *i* short, as if written *min-et-ick*. The *i* is generally long in *micrometer*, *micrography*, and *migration*.

130. *Ni* has the *i* long in *nigrescent*. The first *i* in *nigrification*, though marked long by Mr. Sheridan, is shortened by the secondary accent, 527, and ought to be pronounced as if divided into *nig-ri-fi-cation*.

131. *Phi* has the *i* generally short, as in *philanthropy*, *philippick*, *philosopher*, *philosophy*, *philosophise*; to which we may certainly add *philologer*, *philologist*, *philology*, *philological*, notwithstanding Mr. Sheridan has marked the *i* in these last words long.

132. *Pi* and *pili* have the *i* generally short, as *pilaster*, *piluitous*, *pilosity*, *plication*. *Plaster* and *piazza*, being Italian words, have the *i* short before the vowel, contrary to the analogy of words of this form, 116, where the *i* is long, as in *pi-acular*, *pri-ority*, &c. *Piratical* has the *i* marked long by Mr. Sheridan, and short by Dr. Kenrick. The former is, in my opinion, more agreeable both to custom and analogy, as the sound of the *i* before the accent is often determined by the sound of that letter in the primitive word.

133. *Pri* has the *i* generally long, as in *primeval*, *primevous*, *primitia*, *primero*, *primordial*, *privado*, *privation*, *privative*, but always short in *primitive* and *primer*.

134. *Ri* has the *i* short, as in *ridiculous*. *Rigidity* is marked with the *i* long by Mr. Sheridan, and short by Dr. Kenrick: the latter is undoubtedly right. *Rivality* has the *i* long in the first syllable, in compliment to *rival*, as *piratical* has the *i* long, because derived from *pirate*. *Rhinoceros* has the *i* long in Sheridan, Scott, Kenrick, W. Johnston, and Buchanan; and short in Perry.

135. *Si* has the *i* generally short, as *similitude*, *striasis*, and ought certainly to be short in *silicious* (better written *cilicious*), though marked long by Mr. Sheridan. *Simultaneous*, having the secondary accent on the first syllable, does not come under this head, but retains the *i* long, notwithstanding the shortening power of the accent it is under, 527.

136. *Ti* has the *i* short, as in *timidity*.

137. *Tri* has the *i* long, for the same reason as *bi*, which see 118, 119.

138. *Vi* has the *i* so unsettled as to puzzle the correctest speakers. The *i* is generally long in *vicarious*, notwithstanding the short *i* in *vicar*. It is long in *vibration*, from its relation to *vibrate*. *Vitality* has the *i* long, like *vital*. In *vivifick*, *vivificate*, and *viviparous*, the first *i* is long, to avoid too great a sameness with the second. *Vivacious* and *vivacity* have the *i* almost as often long as short; Mr. Sheridan, Mr. Scott, and Dr. Kenrick, make the *i* in *vivacious* long, and Mr. Perry and Buchanan short; Mr. Sheridan, Mr. Scott, and W. Johnston, make the *i* in the first of *vivacity* long, and Perry and Buchanan short: but the short sound seems less formal, and most agreeable to polite usage. *Vicinity*, *vicinal*, *vicissitude*, *vituperate*, *vimineous*, and *virago*, seem to prefer the short *i*, though Mr. Sheridan has marked the three last words with the first vowel long. But the diversity will be best seen by giving the authorities for all these words:

<i>Vicinity</i> .	Dr. Kenrick.
<i>Vicinity</i> .	Mr. Sheridan, Mr. Scott, Buchanan, W. Johnston, and Perry.
<i>Vicinal</i> .	Mr. Sheridan.
<i>Vicissitude</i> .	Mr. Sheridan, Dr. Kenrick, W. Johnston, Buchanan, and Perry.
<i>Vituperate</i> .	Mr. Sheridan, Dr. Kenrick, W. Johnston.
<i>Vituperate</i> .	Mr. Perry.
<i>Vimineous</i> .	Mr. Sheridan.
<i>Virago</i> .	Mr. Sheridan and W. Johnston.
<i>Virago</i> .	Dr. Kenrick, Mr. Scott, Buchanan, and Perry.

I have classed *vicinal* here as a word with the

accent on the second syllable, as it stands in Sheridan's Dictionary, but think it ought to have the accent on the first.—See *Medicinal*.

139. The same diversity and uncertainty in the sound of this letter seem to reign in those final unaccented syllables which are terminated with the mute *e*. Perhaps the best way to give some tolerable idea of the analogy of the language in this point will be, to show the general rule, and mark the exceptions; though these are sometimes so numerous as to make us doubt of the rule itself: therefore the best way will be to give a catalogue of both.

140. There is one rule of very great extent, in words of this termination, which have the accent on the penultimate syllable, and that is, that the *i* in the final syllable of these words is short: thus *servile*, *hostile*, *virile*, *respite*, *deposit*, *adamantine*, *amethystine*, &c. are pronounced as if written *servil*, *hostil*, *respit*, *deposit*, &c. The only exceptions in this numerous class of words seem to be the following: *Exile*, *senile*, *edile*, *empire*, *umpire*, *rampire*, *snite*, *feline*, *serine*, *archives*; the substantives *confine* and *supine*: while the adjectives *saline* and *contrite* have sometimes the accent on the first, and sometimes on the last syllable; but in either case the *i* is long. *Quagmire* and *pismire* have the *i* long also; *likewise* has the *i* long, but *otherwise* has it more frequently, though very improperly, short. *Myrrhine*, *vulpine*, and *gentile*, though marked with the *i* long by Mr. Sheridan, ought, in my opinion, to conform to the general rule, and be pronounced with the *i* short. *Fulpine*, with the *i* long, is adopted by Mr. Scott; and W. Johnston, Mr. Scott, and Buchanan, agree with Mr. Sheridan in the last syllable of *gentile*; and this seems agreeable to general usage, though not to analogy. See the word.

141. But when the accent is on the last syllable but two in words of this termination, the length of the vowel is not so easily ascertained.

142. Those ending in *ice* have the *i* short, except *sacrifice* and *cockatrice*.

143. Those ending in *ide* have the *i* long, notwithstanding we sometimes hear *suicide* absurdly pronounced, as if written *swicid*.

144. Those ending in *ife* have the *i* long, except *housewife*, pronounced *huzzwiff*, according to the general rule, notwithstanding the *i* in *wife* is always long. *Midwife* is sometimes shortened in the same manner by the vulgar: and *se'nnight* for *sevensnight* is gone irrecoverably into the same analogy; though *fortnight* for *fourteenthnight* is more frequently pronounced with the *i* long.

145. Those ending in *ile* have the *i* short, except *reconcile*, *chamomile*, *estipile*. *Juvenile*, *mercantile*, and *puerile*, have the *i* long in Sheridan's Dictionary, and short in Kenrick's. In my opinion the latter is the much more prevalent and polite pronunciation; but *infantile*, though pronounceable both ways, seems inclinable to lengthen the *i* in the last syllable.—See *Juvenile*.

146. In the termination *ime*, *pantomime* has the *i* long, rhyming with *time*; and *maritime* has the *i* short, as if written *maritim*.

147. Words in *ine*, that have the accent higher than the penultimate, have the quantity of *i* so uncertain, that the only method to give an idea of it will be to exhibit a catalogue of words where it is pronounced differently.

148. But first it may not be improper to see the different sounds given to this letter in some of the same words by different orthoëpists:

<i>Columbine</i> .	Sheridan, Nares, W. Johnston.
<i>Columbine</i> .	Kenrick, Perry.
<i>Saccharine</i> .	Sheridan, Nares.
<i>Saccharine</i> .	Kenrick, Perry.
<i>Saturnine</i> .	Sheridan, Nares, Buchanan.
<i>Saturnine</i> .	Kenrick, Perry.
<i>Metallicine</i> .	Kenrick.
<i>Metallicine</i> .	Sheridan, W. Johnston, Perry.
<i>Crystalline</i> .	Kenrick.
<i>Crystalline</i> .	Sheridan, Perry.
<i>Uterine</i> .	Sheridan, Buchanan, W. Johnston.
<i>Uterine</i> .	Kenrick, Scott, Perry.

149. In these words I do not hesitate to pronounce that the general rule inclines evidently to the long *i*, which, in doubtful cases, ought always to be followed; and for which reason I shall enumerate those words first where I judge the *i* ought to be pronounced long: *Convalline*,

corabine, *columbine*, *bisantine*, *gelatine*, *legatine*, *oxyrrhodine*, *concupine*, *muscadine*, *incarnadine*, *celandine*, *almandine*, *secundine*, *amygdaline*, *crystalline*, *vituline*, *calamine*, *asinine*, *saturnine*, *saccharine*, *adulterine*, *viperine*, *uterine*, *lamenteine*, *armentine*, *serpentine*, *surpentine*, *vespertine*, *belline*, *porcupine*, *countermine*, *leonine*, *sapphirine*, and *metalline*.

150. The words of this termination, where the *i* is short, are the following: *Jacobine*, *medicine*, *discipline*, *masculine*, *jessamine*, *feminine*, *heroine*, *nectarine*, *libertine*, *genuine*, *hyaline*, *palatine*. To these, I think, ought to be added *alkaline*, *aquiline*, *coralline*, *brigitine*, *eglantine*: and to this pronunciation of the *i* the proper names *Valentine* and *Constantine* seem strongly to incline; and on the stage *Cymbeline* has entirely adopted it. Thus we see how little influence the Latin language has on the quantity of the *i* in the final syllable of these words. It is a rule in that language that adjectives ending in *ilis* or *inus*, derived from animated beings or proper names, to the exception of very few, have this *i* pronounced long. It were to be wished this distinction could be adopted in English words from the Latin, as in that case we might be able in time to regularize this very irregular part of our tongue; but this alteration would be almost impossible in adjectives ending in *ive*, as *relative*, *vocative*, *fugitive*, &c. have the *i* uniformly short in English, and long in the Latin *relativus*, *vocativus*, *fugitivus*, &c.

151. The only word ending in *ire*, with the accent on the antepenultimate syllable, is *acrospire*, with the *i* long, the last syllable sounding like the *spire* of a church.

152. Words ending in *ise* have the *i* short, when the accent is on the last syllable but one, as *franchise*, except the compounds ending in *wise*, as *likewise*, *lengthwise*, &c. as marked by Mr. Scott, Mr. Perry, and Buchanan: but even among these words we sometimes hear *otherwise* pronounced *otherwitz*, as marked by Mr. Sheridan and W. Johnston; but, I think, improperly.

153. When the accent is on the last syllable but two in these words, they are invariably pronounced with the *i* long, as *criticise*, *equalise*.

154. In the termination *ite*, when the accent is on it, the *i* is always long, as *requite*. When the accent is on the last syllable but one, it is always short, as *respite*, 140, pronounced as if written *respit*, except *contrite*; but when the accent is on the last syllable but two, the *i* is generally long: the exceptions, however, are so many, that a catalogue of both will be the best rule.

155. The *i* is long in *expedite*, *recondite*, *incondite*, *hermaphrodite*, *carmelite*, *theodolite*, *cosmopolite*, *chrysolite*, *eremite*, *aconite*, *margarite*, *marcasite*, *parasite*, *appetite*, *bipartite*, *tripartite*, *quadripartite*, *convertite*, *anchorite*, *pluile*, *satellite*. As the word stands in Kenrick's Dictionary, *satellite*, having the *i* short, and the accent on the second syllable, it is doubly wrong. The *i* in the last syllable is shortened also by W. Johnston and Perry, but made long, as it ought to be, by Mr. Sheridan, Mr. Scott, and Mr. Nares.—See *Recondite*.

156. The *i* is short in *cucurbitate*, *ingenite*, *definite*, *indefinite*, *infinite*, *hypocrite*, *favourite*, *requisite*, *pre-requisite*, *perquisite*, *exquisite*, *opposite*, and *opposite*. *Heteroclite* has the *i* long in Sheridan, but short in Kenrick. The former is, in my opinion, the best pronunciation (see the word in the Dictionary); but *ite*, in what may be called a gentile termination, has the *i* always long, as in *Hivite*, *Sannite*, *cosmopolite*, *bedlamite*, &c.

157. The termination *ive*, when the accent is on it, is always long, as in *live*, except in the two verbs, *give*, *live*, and their compounds, *giving*, *living*, &c.; for the adjective *live*, as a *live animal*, has the *i* long, and rhymes with *strive*; so have the adjective and adverb, *lively* and *livelily*: the noun *liveliness* follows the same analogy; but the adjective *live-long*, as the *live-long day*, has the *i* short, as in the verb. When the accent is not on the *i* in this termination it is always short, as *sportive*, *plaintive*, &c. rhyming with *give*, 150, except the word be a gentile, as *Argive*.

158. All the other adjectives and substantives of this termination, when the accent is not on it, have the *i* invariably short, as *offensive*, *defensive*,

148. The *o* in *salique* is short, as if written *sallick*, but long in *oblique*, rhyming with *pique*, *strike*, &c. while *antique* has the *i* long and slender, and rhymes with *spoke*. Dr. Kenrick, Mr. Elphinston, Mr. Perry, Buchanan, and Barclay, have *oblect* for *oblique*; Mr. Scott has it both ways, but gives the slender sound first; and Mr. Sheridan, Mr. Nares, and W. Johnston, *oblite*. The latter is, in my opinion, more agreeable to polite usage, but the former more analogical; for as it comes from the French *oblique*, we cannot write it *oblite*, as Mr. Nares wishes, any more than *antique*, *entike*, for fear of departing too far from the Latin *antiquus* and *obliquus*. *Opaque*, Mr. Nares observes, has become *opake*; but then it must be remembered that the Latin is *opacus*, and not *opagus*.

159. All the terminations in *ize* have the *i* long, except to *eudelize*; which, having the accent on the second syllable, follows the general rule, and has the *i* short, pronounced as in the verb *is*, 140. To these observations we may add, that though *evil* and *devil* suppress the *i*, as if written *evl* and *devl*, yet that *cavil* and *pencil* preserve its sound distinctly; and that *Latin* ought never to be pronounced as it is generally at schools, as if written *Lat'n*. *Cousin* and *cozen* both drop the last vowels, as if spelled *cozn*, and are only distinguishable to the eye.

Thus we see how little regularity there is in the sound of this letter when it is not under the accent, and, when custom will permit, how careful we ought to be to preserve the least trace of analogy, that "confusion may not be worse confounded." The sketch that has been just given may, perhaps, afford something like a clue to direct us in this labyrinth, and it is hoped it will enable the judicious speaker to pronounce with more certainty and decision.

160. It was remarked, under the vowel *A*, that when a hard *g* or *c* preceded that vowel, a sound like *e* interposed, the better to unite the letters, and soften the sound of the consonant. The same may be observed of the letter *I*. When this vowel is preceded by hard *g* or *k*, which is but another form for hard *c*, it is pronounced as if an *e* were inserted between the consonant and the vowel: thus *sky*, *kind*, *guide*, *guise*, *disguise*, *catechise*, *guile*, *beguile*, *mankind*, are pronounced as if written *sk-e-g*, *ke-ind*, *gue-ise*, *dis-gue-ise*, *cat-e-chise*, *gue-ile*, *begue-ile*, *manke-ind*. At first sight we are surprised that two such different letters as *e* and *i* should be affected in the same manner by the hard gutturals, *g*, *c*, and *k*; but when we reflect that *i* is really composed of *e* and *e*, 37, our surprise ceases; and we are pleased to find the ear perfectly uniform in its procedure, and entirely unbiassed by the eye. From this view of the analogy we may see how greatly mistaken is a very solid and ingenious writer on this subject, who says, that "*ky-ind* for *kind* is a monster of pronunciation, heard only on our stage."—Nares' *English Orthoëpy*, page 28.—See No. 92.

It may not, perhaps, seem unworthy of notice, that when this letter is unaccented in the numerous terminations *ity*, *ible*, &c. it is frequently pronounced like short *u*, as if the words *sensible*, *visible*, &c. were written *sensubble*, *visubble*, &c.; and *charlity*, *chastity*, &c. like *charutty*, *chastutty*, &c.; but it may be observed, that the pure sound of *i* like *e* in these words is as much the mark of an elegant speaker as that of the *u* in *singular*, *educate*, &c.—See No. 179.

O.

161. Grammarians have generally allowed this letter but three sounds. Mr. Sheridan instances them in *not*, *note*, *prove*. For a fourth, I have added the *o* in *love*, *dove*, &c.; for the fifth, that in *or*, *war*, *for*; and a sixth, that in *woman*, *wolf*, &c.

162. The first and only peculiar sound of this letter is that by which it is named in the alphabet: it requires the mouth to be formed, in some degree, like the letter, in order to pronounce it. It may be called its long open sound, as the *o* in *prose* may be called its long slender sound, 65. This sound we find in words ending with silent *e*, as *tone*, *bone*, *alone*; or when ending a syllable with the accent upon it, as *mo-tion*, *po-tent*, &c.; likewise in the monosyllables, *go*, *so*, *no*. This sound is found under several combinations of other vowels with this letter, as in *mean*, *groan*,

bow (to shoot with), *low* (not high), and before *st* in the words *host*, *ghost*, *post*, *most*, and before *ss* in *gross*.

163. The second sound of this letter is called its short sound, and is found in *not*, *got*, *lot*, &c.; though this, as in the other short vowels, is by no means the short sound of the former long one, but corresponds exactly to that of *a* in *what*, with which the words *not*, *got*, *lot*, are perfect rhymes. The long sound, to which the *o* in *not* and *got* are short ones, is found under the diphthong *au* in *naught*, and the *ou* in *sought*; corresponding exactly to the *a* in *hall*, *ball*, &c. The short sound of this letter, like the short sound of *a* in *father*, 78, 79, is frequently, by inaccurate speakers, and chiefly those among the vulgar, lengthened to a middle sound approaching to its long sound, the *o* in *or*. This sound is generally heard, as in the case of *a*, when it is succeeded by two consonants: thus Mr. Smith pronounces *broth*, *froth*, and *moth*, as if written *brawth*, *frawth*, and *mawth*. Of the propriety or impropriety of this a well-educated ear is the best judge; but, as was observed under the article *A*, 79, if this be not the sound heard among the best speakers, no middle sound ought to be admitted, as good orators will ever incline to definite and absolute sounds, rather than such as may be called *non-descripts* in language.

164. The third sound of this letter, as was marked in the first observation, may be called its long slender sound, corresponding to the double *o*. The words where this sound of *o* occurs are so few, that it will be easy to give a catalogue of them: *Prove*, *move*, *behave*, and their compounds, *lose*, *do*, *ado*, *Rome*, *poltron*, *ponton*, *sponton*, *who*, *whom*, *womb*, *tomb*. *Sponton* is not in Johnson; and this and the two preceding words ought rather to be written with *oo* in the last syllable. *Gold* is pronounced like *gould* in familiar conversation; but in verse and solemn language, especially that of the Scripture, ought always to rhyme with *old*, *fold*, &c.—See *Encore*, *Gold*, and *Wind*.

165. The fourth sound of this vowel is that which is found in *love*, *dove*, &c.; and the long sound, which seems the nearest relation to it, is the first sound of *o* in *note*, *tone*, *rove*, &c. This sound of *o* is generally heard when it is shortened by the succeeding liquids *n*, *m*, *r*, and the semi-vowels *v*, *x*, *th*: and, as Mr. Nares has given a catalogue of those words, I shall avail myself of his labour. *Above*, *affront*, *allonge*, *among*, *amongst*, *attorney*, *bomb*, *bombard*, *borage*, *borough*, *brother*, *cockatrice*, *colour*, *come*, *comely*, *comfit*, *comfort*, *company*, *compass*, *comrade*, *combat*, *conduit*, *coney*, *conjure*, *constable*, *covenant*, *cover*, *covert*, *covel*, *covey*, *cozen*, *discomfit*, *done*, *doth*, *dost*, *dove*, *dosen*, *dromedary*, *front*, *glove*, *govern*, *honey*, *hover*, *love*, *Monday*, *money*, *mongrel*, *monk*, *monkey*, *month*, *mother*, *none*, *nothing*, *one*, *onion*, *other*, *oven*, *plover*, *pomegranate*, *pommel*, *pother*, *romage*, *shove*, *shovel*, *sloven*, *smother*, *some*, *Somerset*, *son*, *sovereign*, *sponge*, *stomach*, *thorough*, *ton*, *tongue*, *word*, *work*, *wonder*, *world*, *worry*, *worse*, *worship*, *wort*, *worth*: to which we may add, *rhomb*, *once comfrey*, and *colander*.

166. In these words the accent is on the *o* in every word, except *pomegranate*: but, with very few exceptions, this letter has the same sound in the unaccented terminations, *oc*, *ock*, *od*, *ol*, *om*, *on*, *op*, *or*, *ot*, and some, as *mammoth*, *cassock*, *method*, *carol*, *kingdom*, *union*, *amazon*, *gallop*, *tutor*, *turbot*, *troublesome*, &c.; all which are pronounced as if written *mammuck*, *cassuck*, *methud*, &c. The *o* in the adjunct *monger*, as *cheesemonger*, &c. has always this sound. The exceptions to this rule are technical terms from the Greek or Latin, as *Achor*, a species of the herpes; and proper names, as *Calor*, a river in Italy.

167. The fifth sound of *o* is the long sound produced by *r* final, or followed by another consonant, as *for*, *former*. This sound is perfectly equivalent to the diphthong *au*; and *for* and *former* might, on account of sound only, be written *faur* and *faurmer*. There are many exceptions to this rule, as *borne*, *corps*, *corse*, *force*, *forge*, *form* (a seat), *fort*, *horde*, *porch*, *port*, *sport*, &c. which have the first sound of this letter.

168. *O*, like *A*, is lengthened before *r*, when terminating a monosyllable, or followed by another consonant; and, like *a* too, is shortened by a duplication of the liquid, as we may hear by

comparing the conjunction *or* with the same letters in *torrid*, *florid*, &c. ; for though the *r* is not doubled to the eye in *florid*, yet, as the accent is on it, it is as effectually doubled to the ear as if written *florrid* ; so if a consonant of another kind succeed the *r* in this situation, we find the *o* as long as in a monosyllable : thus the *o* in *orchard* is as long as in the conjunction *or*, and that in *formal* as in the word *for* : but the *o* in *orifice* and *forage*, where the *r* is followed by a vowel, the *o* is as short as if the *r* were double, and the words written *orriffice* and *forrage*.—See No. 81.

169. There is a sixth sound of *o* exactly corresponding to the *u* in *bull*, *full*, *pull*, &c. which, from its existing only in the following words, may be called its irregular sound. These words are, *woman*, *bosom*, *worsted*, *wolf*, and the proper names, *Wolsey*, *Worcester*, and *Wolverhampton*.

Irregular and unaccented Sounds.

170. What was observed of the *a*, when followed by a liquid and a mute, may be observed of the *o* with equal justness. This letter, like *a*, has a tendency to lengthen, when followed by a liquid and another consonant, or by *s*, *ss*, or *s* and a mute. But this length of *o*, in this situation, seems every day growing more and more vulgar : and, as it would be gross to a degree to sound the *a* in *castle*, *mask*, and *plant*, like the *a* in *palm*, *plalm*, &c. so it would be equally exceptionable to pronounce the *o* in *moss*, *dross*, and *frost*, as if written *mausse*, *drawse*, and *frawst*, 78, 79. The *o* in the compounds of *solve*, as *dissolve*, *absolve*, *resolve*, seem the only words where a somewhat longer sound of the *o* is agreeable to polite pronunciation : on the contrary, when the *o* ends a syllable, immediately before or after the accent, as in *po-lite*, *im-po-tent*, &c. there is an elegance in giving it the open sound nearly as long as in *po-lar* and *po-tent*, &c. See *Domestick*, *Collect*, and *Command*. It may likewise be observed, that the *o*, like the *e*, 102, is suppressed in a final unaccented syllable when preceded by *c* or *k*, and followed by *n*, as *bacon*, *beacon*, *deacon*, *beckon*, *reckon*, pronounced *bak'n*, *beak'n*, *deak'n*, *beck'n*, *reck'n* ; and when *c* is preceded by another consonant, as *falcon*, pronounced *fawk'n*. The *o* is likewise mute in the same situation, when preceded by *d* in *pardon*, pronounced *pard'n*, but not in *guerdon* : it is mute when preceded by *p* in *weapon*, *capon*, &c. pronounced *weap'n*, *cap'n*, &c. ; and when preceded by *s* in *reason*, *season*, *treason*, *oraison*, *benison*, *denison*, *unison*, *foison*, *poison*, *prison*, *damson*, *crimson*, *advowson*, pronounced *reaz'n*, *treaz'n*, &c. ; and *mason*, *bason*, *garrison*, *lesson*, *caparison*, *comparison*, *disinherison*, *parson*, and *person*, pronounced *mas'n*, *bas'n*, &c. *Unison*, *diapason*, and *cargason*, seem, particularly in solemn speaking, to preserve the sound of *o* like *u*, as if written *unisun*, *diapaxun*, &c. The same letter is suppressed in a final unaccented syllable beginning with *t*, as *Seton*, *cotton*, *button*, *mutton*, *glutton*, pronounced as if written *Set'n*, *cott'n*, &c. When *x* precedes the *t*, the *o* is pronounced distinctly, as in *Sexton*. When *l* is the preceding letter, the *o* is generally suppressed as in the proper names *Stilton cheese*, *Willon carpets*, and *Melton Mowbray*, &c. Accurate speakers sometimes struggle to preserve it in the name of our great epic poet, *Milton* ; but the former examples sufficiently show the tendency of the language ; and this tendency cannot be easily counteracted. This letter is likewise suppressed in the last syllable of *blazon*, pronounced *blaz'n* ; but is always to be preserved in the same syllable of *horison*. This suppression of the *o* must not be ranked among those careless abbreviations found only among the vulgar, but must be considered as one of those devious tendencies to brevity, which has worn itself a currency in the language, and has at last become a part of it. To pronounce the *o* in those cases where it is suppressed, would give a singularity to the speaker bordering nearly on the pedantick ; and the attention given to this singularity by the hearer would necessarily diminish his attention to the subject, and consequently deprive the speaker of something much more desirable.

U.

171. The first sound of *u*, heard in *tube*, or ending an unaccented syllable, as in *cu-bick*, is a diph-

thongal sound, as if *e* were prefixed, and these words were spelt *teube* and *kewbic*. The letter *u* is exactly the pronoun *you*.

172. The second sound of *u* is the short sound, which tallies exactly with the *o* in *done*, *son*, &c. which every ear perceives might, as well for the sound's sake, be spelt *dun*, *sun*, &c.—See all the words where the *o* has this sound, No. 165.

173. The third sound of this letter, and that in which the English more particularly depart from analogy, is the *u* in *bull*, *full*, *pull*, &c. The first, or diphthongal *u* in *tube*, seems almost as peculiar to the English as the long sound of the *i* in *thine*, *mine*, &c. ; but here, as if they chose to imitate the Latin, Italian, and French *u*, they leave out the *e* before the *u*, which is heard in *tube*, *mule*, &c. and do not pronounce the latter part of *u* quite so long as the *oo* in *pool*, nor so short as the *u* in *dull*, but with a middle sound between both, which is the true short sound of the *oo* in *coo* and *woo*, as may be heard by comparing *woo* and *wool* ; the latter of which is a perfect rhyme to *bull*.

174. This middle sound of *u*, so unlike the general sound of that letter, exists only in the following words : *bull*, *full*, *pull* ; words compounded of *full*, as *wonderful*, *dreadful*, &c. *bullock*, *bully*, *bullet*, *bulwark*, *fuller*, *fullingmill*, *pulley*, *pullet*, *push*, *bush*, *bushel*, *pulpit*, *puss*, *bullion*, *butcher*, *cushion*, *cuckoo*, *pudding*, *sugar*, *hussar*, *hussa*, and *put* when a verb : but few as they are, except *full*, which is a very copious termination, they are sufficient to puzzle Englishmen who reside at any distance from the capital, and to make the inhabitants of Scotland and Ireland (who, it is highly probable, received a much more regular pronunciation from our ancestors) not unfrequently the jest of fools.

175. But, vague and desultory as this sound of the *u* may at first seem, on a closer view we find it chiefly confined to words which begin with the mute labials *b*, *p*, *f*, and end with the liquid labial *l*, or the dentals *s*, *t*, and *d*, as in *bull*, *full*, *pull*, *bush*, *push*, *pudding*, *puss*, *put*, &c. What, ever, therefore, was the cause of this whimsical deviation, we see its primitives are confined to a very narrow compass : *put* has this sound only when it is a verb ; for *putty*, a paste for glass, has the common sound of *u*, and rhymes exactly with *nutty* (having the qualities of a nut) ; so *put*, the game at cards, and the vulgar appellation of *country put*, follow the same analogy. All *Bull*'s compounds regularly follow their primitive. But though *fuller*, a whitener of cloth, and *Fulham*, a proper name, are not compounded of *full*, they are sounded as if they were ; while *Putney* follows the general rule, and has its first syllable pronounced like the noun *put*. *Pulpit* and *pullet* comply with the peculiarity on account of their resemblance to *pull*, though nothing related to it ; and *butcher* and *puss* adopt this sound of *u* for no reason but the nearness of their form to the other words : and when to these we have added *cushion*, *sugar*, *cuckoo*, *hussar*, and the interjection *hussa*, we have every word in the whole language where the *u* is thus pronounced.

176. Some speakers, indeed, have attempted to give *bulk* and *punish* this obtuse sound of *u*, but luckily have not been followed. The words which have already adopted it are sufficiently numerous ; and we cannot be too careful to check the growth of so unmeaning an irregularity. When this vowel is preceded by *r* in the same syllable, it has a sound somewhat longer than this middle sound, and exactly as if written *oo* : thus *rue*, *true*, &c. are pronounced nearly as if written *roo*, *troo*, &c. 239.

177. It must be remarked, that this sound of *u*, except in the word *fuller*, never extends to words from the learned languages ; for *fulminant*, *fulmination*, *ebullition*, *repulsion*, *sepulchre*, &c. sound the *u* as in *dull*, *gull*, &c. and the *u* in *pus* and *pustule* is exactly like the same letter in *thine*. So the pure English words, *fulsome*, *buss*, *bulge*, *bustle*, *bustard*, *buzzard*, preserve the *u* in its second sound, as in *us*, *hull*, and *custard*. It may likewise not be unworthy of remark, that the letter *u* is never subject to the shortening power of either the primary or secondary accent ; but when accented, is always long, unless shortened by a double consonant.—See the words *Drum* and *Muculent*, and Nos. 503, 534.

Irregular and Unaccented Sounds.

176. But the strangest deviation of this letter from its regular sound is in the words *busy*, *business*, and *bury*. We laugh at the Scotch for pronouncing these words as if written *bewsy*, *bewsi-ness*, and *bewry*; but we ought rather to blush for ourselves in departing so wantonly from the general rule as to pronounce them *bixsy*, *bizness*, and *berry*.

177. There is an incorrect pronunciation of this letter when it ends a syllable not under the accent, which prevails not only among the vulgar, but is sometimes found in better company; and that is, giving the *u* an obscure sound, which confounds it with vowels of a very different kind: thus we not unfrequently hear *singular*, *regular*, and *particular*, pronounced as if written *sing-e-lar*, *reg-e-lar*, and *par-tick-e-lar*; but nothing tends more to tarnish and vulgarize the pronunciation than this short and obscure sound of the unaccented *u*. It may, indeed, be observed, that there is scarcely any thing more distinguishes a person of mean and good education than the pronunciation of the unaccented vowels, 547, 558. When vowels are under the accent, the prince, and the lowest of the people in the metropolis, with very few exceptions, pronounce them in the same manner; but the unaccented vowels in the mouth of the former have a distinct, open, and specific sound, while the latter often totally sink them, or change them into some other sound. Those, therefore, who wish to pronounce elegantly, must be particularly attentive to the unaccented vowels; as a neat pronunciation of these forms one of the greatest beauties of speaking.

Y final.

180. *Y* final, either in a word or syllable, is a pure vowel, and has exactly the same sound as *i* would have in the same situation. For this reason, printers, who have been the great correctors of our orthography, have substituted the *i* in its stead, on account of the too great frequency of this letter in the English language. That *y* final is a vowel is universally acknowledged; nor need we any other proof of it than its long sound, when followed by a mute, as in *thyme*, *rhyme*, &c. or ending a syllable with the accent upon it, as *buying*, *cyder*, &c.: this may be called its first vowel sound.

181. The second sound of the vowel *y* is its short sound, heard in *system*, *syntax*, &c.

Irregular and Unaccented Sounds.

182. The unaccented sound of this letter at the end of a syllable, like that of *i* in the same situation, is always like the first sound of *e*: thus *vanity*, *pleurisy*, &c. if sound alone were considered, might be written *vanites*, *pleurisee*, &c.

183. The exception to this rule is, when *f* precedes the *y* in a final syllable, the *y* is then pronounced as long and open as if the accent were on it: thus *justify*, *qualify*, &c. have the last syllable sounded like that in *defy*. This long sound continues when the *y* is changed into *i*, in *justifiable*, *qualifiable*, &c. The same may be observed of *multiply* and *multipliable*, &c.; *occupy* and *occupiable*, &c. 512.

184. There is an irregular sound of this letter when the accent is on it in *panegyrick*, when it is frequently pronounced like the second sound of *e*, which would be more correct if its true sound were preserved, and it were to rhyme with *Pyrrick*; or as Swift does with *Satirick*:

"On me when dunces are satirick,
"I take it for a panegyrick."

Thus we see the same irregularity attends this letter before double *r*, or before single *r*, followed by a vowel, as we find attends the vowel *i* in the same situation. So the word *Syrinx* ought to preserve the *y* like *i* pure, and the word *Syrils* should sound the *y* like *e* short, though the first is often heard improperly like the last.

185. But the most uncertain sound of this letter is when it ends a syllable immediately preceding the accent. In this case it is subject to the same variety as the letter *i* in the same situation, and nothing but a catalogue will give us any idea of the analogy of the language in this point.

186. The *y* is long in *chylaceous*, but shortened by the secondary accent in *chylification* and *chylifactive*, 530: though, without the least reason from analogy, Mr. Sheridan has marked them both long.

187. Words composed of *hydro*, from the Greek *h2o*, *water*, have the *y* before the accent generally long, as *hydrography*, *hydrographer*, *hydro-metry*, *hydropick*; all which have the *y* long in Mr. Sheridan but *hydrography*, which must be a mistake of the press; and this long sound of *y* continues in *hydrostatick*, in spite of the shortening power of the secondary accent, 530. The same sound of *y* prevails in *hydraulicks* and *hydrides*. *Hygrometer* and *hygrometry* seem to follow the same analogy, as well as *hyperbola* and *hyperbole*; which are generally heard with the *y* long; though Kenrick has marked the latter short. *Hypostasis* and *hypotenuse* ought to have the *y* long likewise. In *hypothesis* the *y* is more frequently short than long; and in *hypothetical* it is more frequently long than short; but *hypocrisy* has the first *y* always short. *Myrabolon* and *myrabilist* may have the *y* either long or short. *Mythology* has the first *y* generally short, and *mythological*, from the shortening power of the secondary accent, 530, almost always. *Phytivorous*, *phytography*, *phytology*, have the first *y* always long. In *phylactery* the first *y* is generally short, and in *physician* always. *Pylorus* has the *y* long in Mr. Sheridan, but, I think, improperly. In *pyramidal* he marks the *y* long, though, in my opinion, it is generally heard short, as in *pyramid*. In *pyrites*, with the accent on the second syllable, he marks the *y* short, much more correctly than Kenrick, who places the accent on the first syllable, and marks the *y* long (see the word.) *Synodick*, *synodical*, *synonima*, and *synopsis*, have the *y* always short: *synechdoche* ought likewise to have the same letter short, as we find it in Perry's and Kenrick's Dictionaries; though in Sheridan's we find it long. *Typography* and *typographer* ought to have the first *y* long, as we find it in Sheridan, Scott, Buchanan, W. Johnston, Kenrick, and Perry, though frequently heard short; and, though *tyrannical* has the *y* marked short by Mr. Perry, it ought rather to have the long sound, as we see it marked by Mr. Sheridan, Mr. Scott, Buchanan, W. Johnston, and Kenrick.

188. From the view that has been taken of the sound of the *i* and *y* immediately before the accent, it may justly be called the most uncertain part of pronunciation. Scarcely any reason can be given why custom prefers one sound to the other in some words; and why, in others, we may use either one or the other indiscriminately. It is strongly to be presumed that the *i* and *y*, in this situation, particularly the last, were generally pronounced long by our ancestors, but that custom has gradually inclined to the shorter sound, as more readily pronounced, and as more like the sound of these letters when they end a syllable after the accent; and perhaps we should contribute to the regularity of the language, if, when we are in doubt, we should rather incline to the short than the long sound of these letters.

W final.

189. That *w* final is a vowel is not disputed, 9; when it is in this situation it is equivalent to *oo*; as may be perceived in the sound of *vow*, *low-el*, &c. where it forms a real diphthong, composed of the *a* in *wa-ter*, and the *oo* in *woo* and *coo*. It is often joined to *o* at the end of a syllable, without affecting the sound of that vowel; and in this situation it may be called servile, as in *bow*, to shoot with; *crow*, *low* (not high,) &c.

DIPHTHONGS.

190. A diphthong is a double vowel, or the union or mixture of two vowels pronounced together, so as only to make one syllable; as the Latin *ae* or *æ*, *oe* or *œ*, the Greek *æ*, the English *ai*, *au*, &c.

191. This is the general definition of a diphthong; but if we examine it closely we shall find in it a want of precision and accuracy*. If a

* We see how many disputes the simple and ambiguous nature of vowels created among gram-

diphthong be two vowel sounds in succession, they must necessarily form two syllables, and therefore, by its very definition, cannot be a diphthong: if it be such a mixture of two vowels as to form but one simple sound, it is very improperly called a diphthong; nor can any such simple mixture exist.

192. The only way to reconcile this seeming contradiction is to suppose that two vocal sounds in succession were sometimes pronounced so closely together as to form only the time of one syllable in Greek and Latin verse. Some of these diphthongal syllables we have in our own language, which only pass for monosyllables in poetry: thus *hire* (wages) is no more than one syllable in verse, though perfectly equivalent to *higher* (more high), which generally passes for a dissyllable: the same may be observed of *dire* or *dyer*, *hour* and *power*, &c. This is not uniting two vocal sounds into one simple sound, which is impossible, but pronouncing two vocal sounds in succession so rapidly and so closely as to go for only one syllable in poetry.

193. Thus the best definition I have found of a diphthong is that given us by Mr. Smith, in his Scheme for a French and English Dictionary. "A diphthong (says this gentleman) I would define to be two simple vocal sounds uttered by one and the same emission of breath, and joined in such a manner that each loses a portion of its natural length; but from the junction produceth a compound sound, equal in the time of pronouncing to either of them taken separately, and so making still but one syllable."

194. "Now if we apply this definition (says Mr. Smith) to the several combinations that may have been laid down and denominated diphthongs by former orthoëpists, I believe we shall find only a small number of them meriting this name." As a proof of the truth of this observation, we find that most of those vocal assemblages that go under the name of diphthongs emit but a simple sound, and that not compounded of the two vowels, but one of them only, sounded long: thus *puin* and *pane*, *pail* and *pale*, *hear* and *here*, are perfectly the same sounds.

195. These observations naturally lead us to a distinction of diphthongs into proper and improper: the proper are such as have two distinct vocal sounds, and the improper such as have but one.

196. The proper diphthongs are,

<i>ea</i> ocean	<i>io</i> question	<i>oy</i> boy
<i>ew</i> feud	<i>oi</i> voice	<i>ea</i> assuage
<i>ew</i> jewel	<i>ou</i> pound	<i>us</i> mansuetude
<i>ia</i> poniard	<i>ow</i> now	<i>us</i> languid.
<i>ie</i> spaniel		

In this assemblage it is impossible not to see a manifest distinction between those which begin with *e* or *i* and the rest. In those beginning with either of these vowels we find a squeezed sound like the commencing or consonant *y* interpose, as it were, to articulate the latter vowel, and that the words where these diphthongs are found might, agreeably to the sound, be spelt *oshe-yan*, *f-yude*, *j-yewel*, *pon-yard*, *span-yel*, *pash-yon*, &c.; and as these diphthongs (which, from their commencing with the sound of *y* consonant, may not improperly be called *semi-consonant diphthongs*) begin in that part of the mouth where *s*, *c* soft, and *t* are formed, we find that coalescence ensue which forms the aspirated hiss in the numerous terminations *sion*, *tion*, *liat*, &c. and by direct consequence in those ending in *ure*, *une*, as *future*, *fortune*, &c. for the letter *u*, when long, is exactly one of these semi-consonant diphthongs, *u*; and when immediately after the accent it coalesces with the preceding *s*, *c*, or *t*, and draws them into the aspirated hiss of *sh* or *tsh*, 459. Those found in the termination *iens* may be called semi-consonant diphthongs also, as the *o* and *u* have but the sound of one vowel. It may be observed too, in passing, that the reason why in *mansuetude* the *s* does not go into *sh* is because,

marians, and how it has begot the mistake concerning diphthongs: all that are properly so are syllables, and not diphthongs, as intended to be signified by that word.—*Holder*.

when *u* is followed by another vowel in the same syllable, it drops its consonant sound at the beginning, and becomes merely double *u*.

197. The improper diphthongs are,

<i>ae</i> Caesar	<i>ea</i> clean	<i>ie</i> friend
<i>ai</i> aim	<i>ee</i> reed	<i>oa</i> coat
<i>ao</i> gaol	<i>ei</i> ceiling	<i>oe</i> economy
<i>au</i> taught	<i>eo</i> people	<i>oo</i> moon
<i>aw</i> law	<i>ey</i> they	<i>ow</i> crow.

198. The triphthongs having but two sounds are merely ocular, and must therefore be classed with the proper diphthongs:

<i>aye</i> (for ever)	<i>ew</i> plenteous	<i>iew</i> v'ew
<i>ean</i> beauty	<i>ieu</i> adieu	<i>oew</i> manœuvre.

Of all these combinations of vowels we shall treat in their alphabetical order.

AE.

199. *ae* or *a* is a diphthong, says Dr. Johnson of very frequent use in the Latin language, which seems not properly to have any place in the English; since the *a* of the Saxons has been long out of use, being changed to *e* simple; to which, in words frequently occurring, the *a* of the Romans is, in the same manner, altered, as in *equator*, *equinoctial*, and even in *Eneas*.

200. But though the diphthong *a* is perfectly useless in our language, and the substitution of *e* in its stead, in *Cesar* and *Eneas*, is recommended by Dr. Johnson, we do not find his authority has totally annihilated it, especially in proper names and technical terms derived from the learned languages. *Cesar*, *Eneas*, *Esop*, *paan*, *ether*, *athlops* mineral, *amphisbana*, *anacephaleosis*, *apharests*, *agilops*, *oxena*, &c. seem to preserve the diphthong, as well as certain words which are either plurals or genitives, in Latin words not naturalized, as *cornucopia*, *exuvie*, *aqua vite*, *manutia*, *stria*, &c.

201. This diphthong, when not under the accent, in *Michaelmas*, and when accented in *Dadalus*, is pronounced like short *e*: it is, like *e*, subject to the short sound when under the secondary accent, as in *Enobarbus*, where *en*, in the first syllable, is pronounced exactly like the letter *n*, 530.

AI.

202. The sound of this diphthong is exactly like the long slender sound of *a*; thus *pail*, a vessel, and *pale*, a colour, are perfectly the same sound. The exceptions are but few.

203. When *said* is the third person, preterimperfect tense, of the verb to *say*, *ai* has the sound of short *e*, and *said* rhymes with *bed*; the same sound of *ai* may be observed in the third person of the present tense *saieth* and the participle *said*: but when this word is an adjective, as the *said* man, it is regular, and rhymes with *trade*.

204. *Plaid*, a striped garment, rhymes with *mad*.

205. *Raillery* is a perfect rhyme to *salary*; and *raisin*, a fruit, is pronounced exactly like *reason*, the distinctive faculty of man.—See both these words in the Dictionary.

206. *Again* and *against* sound as if written *agen* and *agenst*.

207. The *aisle* of a church is pronounced exactly like *isle*, an island; and is sometimes written *ile*.

208. When this diphthong is in a final unaccented syllable the *a* is sunk, and the *i* pronounced short: thus *mountain*, *fountain*, *captain*, *curtain*, *villain*, are all pronounced as if written *mountin*, *fountin*, *captin*, *curtin*, *villin*; but when the last word takes an additional syllable the *i* is dropped, and the *a* has its short sound, as *villanous*, *villany*.—See the words in the Dictionary.

209. The *ai* in *Britain* has the short sound approaching to *u*, so common with all the vowels in final unaccented syllables, and is pronounced exactly like *Briton*.

210. *Plait*, a fold of cloth, is regular, and ought to be pronounced like *plate*, a dish; pronouncing it so as to rhyme with *meat* is a vulgarism, and ought to be avoided.

21. *Plaster* belongs no longer to this class of words, being now more properly written *plaster*, rhyming with *caster*.

AO.

212. This combination of vowels in a diphthong is only to be met with in the word *gaol*, now more properly written, as it is pronounced, *jail*.

AU.

213. The general sound of this diphthong is that of the noun *are*, as *taught*, *caught*, &c. or of the *a* in *hall*, *ball*, &c.

214. When these letters are followed by *n* and another consonant, they change to the second sound of *a*, heard in *far*, *farther*, &c.: thus *aunt*, *haunt*, *daunt*, *askance*, *askant*, *flaunt*, *haunt*, *gauntlet*, *jaunt*, *haunch*, *launch*, *craunch*, *jaundice*, *laundry*, have the Italian sound of the *a* in the last syllable of *papa* and *memma*. To these I think ought to be added *daunt*, *paunch*, *gaunt*, and *saunter*, as Dr. Kenrick has marked them with the Italian *a*, and not as if written *dawnt*, *paunch*, &c. as Mr. Sheridan sounds them. *Maund*, a basket, is always pronounced with the Italian *a*, and nearly as if written *maund*: for which reason *Maundy Thursday*, which is derived from it, ought, with Mr. Nares, to be pronounced in the same manner, though generally heard with the sound of *ar*. To *maunder*, to grumble, though generally heard as if written *maunder*, ought certainly to be pronounced, as Mr. Nares has classed it, with the Italian *a*. The same may be observed of *taunt*, which ought to rhyme with *aunt*, though sounded *taunt* by Mr. Sheridan; and, being left out of the above list, supposed to be so pronounced by Mr. Nares. But Mr. Biphinston has placed the analogy of these words in so strong and curious a light that I cannot help presenting them to the reader in his own words, though a different orthography: "U meritoriously distinguishes *aunt*, the parent's sister, from *ant* the ennet, and gives a slender shut, the servile of a broad open, yet without pretence of so dangerous or any coincidence; in defiance of both sisters, his *aunt* had power to retain the company of *jaunt*, *haunt*, *vaunt*, *taunt*, *daunt*, *gaunt*, *gauntlet*; in all of which the *u* does precisely the same duty it formerly did in *chaunt*, *graunt*, *maund*, and *command*; in *saunter* and *saunder*; as well as in *branch*, *haunch*, *paunch*, *launch*, *staunch*; all now, justly as genealogically, *chant*, *grant*, *maud* (the old basket), *command*, *saunter*, *sander*; *branch*, *haunch*, *paunch*, *launch*, *staunch*. *Jaundice* alone pleaded a radical; and yet was found mere *jaundice*. So, with *aunt*, must return to truth and etymology (who do not always join issue) *jaunt*, *haunt*, *vaunt*, *taunt*, *daunt*, *gaunt*, *gauntlet*; and even the venerable *Maundy Thursday*, with her *maund* or basket in her hand. She had, indeed, almost left the language, though *Astrea* had not left the land, when analogy (or harmony) enacted: a broad (*au*) shall not in English precede *n*, followed either by a dry dental, or by a sibilant; that is, *au* shall not be followed by *nt*, *nd*, *nce*, *nch*, or *ng*. No such sounds being sufferable in the English system as *aunt*, *aund*, *aunch*, *aunce*, or *aunge*, there shall be no such semblances. Alike are therefore indispensable *chant* and *jaunt*, *haunt* and *maund*, *chance* and *lance*, *branch* and *launch*, *saunter* and *saunter*; *Sander* and his full self *Alexander*. In all such, *a*, far from broad or open, is slender and shut; yet hardly shorter than if the silent aspiration interposed in *ahant*, *saunter*, *launt*, *launch*, and the rest. Before *ng*, indeed, *a* is also slender, but open; not *ah*, but *a*; guarded therefore by its own (*i*) servile (as we saw in its place) against every danger of change. *Faun* and *fawn* remain doubtless in *fawns* and *fawns*, unaltered by the adscititious depressive *shilant*."—*Propriety Ascertained in her Picture*, vol. I. page 171.

215. *Laugh* and *drought*, which are very properly classed by Mr. Nares among these words which have the long Italian *a* in *father*, are marked by Mr. Sheridan with his first sound of *a* in *hat*, lengthened into the sound of *a* in *father*, by placing the accent on it. *Staunch* is spelled without the *u* by Johnson, and therefore improperly classed by Mr. Nares in the above list.

216. *Vaunt* and *avaunt* seem to be the only real exceptions to this sound of *a* in the whole list; and, as these words are chiefly confined to tragedy, they may be allowed to "fret and strut their hour upon the stage" in the old traditional sound of *awe*.

217. This diphthong is pronounced like long *o* in *haunt-boy*, as if written *ho-boy*; and like *o* short in *cauliflower*, *laurel*, and *laudanum*; as if written *colliflower*, *larrel*, and *loddanum*. In *gauge* *au* has the sound of slender *a*, and rhymes with *page*.

218. There is a corrupt pronunciation of this diphthong among the vulgar, which is, giving the *au* in *daughter*, *sauce*, *saucer*, and *saucy*, the sound of the Italian *a*, and nearly as if written *darler*, *sorce*, *sarcer*, and *sarcy*; but this pronunciation cannot be too carefully avoided. *Au* in *sausage*, also, is sounded by the vulgar with short *a*, as if written *sassage*; but in this, as in the other words, *au* ought to sound *awe*.—See the words in the Dictionary.

AW.

219. Has the long broad sound of *a* in *ball*, with which the word *bawl* is perfectly identical. It is always regular.

AY.

220. This diphthong, like its near relation *ai*, has the sound of slender *a* in *pay*, *day*, &c. and is pronounced like long *e* in the word *quay*, which is now sometimes seen written *key*; for, if we cannot bring the pronunciation to the spelling, it is looked upon as some improvement to bring the spelling to the pronunciation: a most pernicious practice in language.—See *Bowl*.

221. To *flay*, to strip off the skin, also, is corruptly pronounced *flea*; but the diphthong in this word seems to be recovering its rights.

222. There is a wanton departure from analogy in orthography by changing the *y* in this diphthong to *i* in the words *paid*, *said*, *laid*, for *payed*, *sayed*, and *layed*. Why these words should be written with *i* and thus contracted, and *played*, *prayed*, and *delayed*, remain at large, let our wise correctors of orthography determine. *Stayed*, also, a participial adjective, signifying *steady*, is almost always written *stead*.

223. When *ay* comes immediately after the accent in a final syllable, like *ai*, it drops the former vowel, in the colloquial pronunciation of the days of the week. Thus as we pronounce *captain*, *curtain*, &c. as if written *captin*, *curtin*, &c. so we hear *Sunday*, *Monday*, &c. as if written *Sundy*, *Mundy*, &c. A more distinct pronunciation of *day*, in these words, is a mark of the northern dialect, 206.

224. The familiar assent *ay* for *yes* is a combination of the long Italian *a* in the last syllable of *papa*, and the first sound of *e*. If we give the *a* the sound of that letter in *ball*, the word degenerates into a coarse rustick pronunciation. Though in the House of Commons, where this word is made a noun, we frequently, but not correctly, hear it so pronounced, in the phrase *the Ayes have it*.

AYE.

225. This triphthong is a combination of the slender sound of *a*, heard in *pa-per*, and the *e* in *me-tre*. The word which it composes, signifying *ever*, is almost obsolete.

EA.

226. The regular sound of this diphthong is that of the first sound of *e* in *here*; but its irregular sound of short *e* is so frequent as to make a catalogue of both necessary; especially for those who are unsettled in the pronunciation of the capital, and wish to practise in order to form a habit.

227. The first sound of *ea* is like open *e*, and is heard in the following words: *Afear*, *affear*, *anneal*, *appeal*, *appear*, *appease*, *aread*, *arrear*, *beacon*, *beadle*, *beadroll*, *beads*, *beadsman*, *beagle*, *beak*, *beaker*, *beam*, *bean*, *beard*, *bearded*, *beast*, *beat*, *beaten*, *beaver*, *beleaguer*, *beneath*, *bequeath*, *bereave*, *besmear*, *bespeak*, *bleach*, *bleak*, *blear*, *bleat*, *bohea*, *breach*, *breem*, to *breathe*, *cease*, *cheap*,

cheat, clean, cleanly (adverb), *clear, clearance, cleave, cochineal, colleague, conceal, congeal, cream, creak, crease, creature, deacon, deal, dean, deanery, dear, decease, defeasance, defeasible, defeat, demean, demeanor, decrease, dream, drear, dreary, each, eager, eagle, eagre, ear, east, easter, easy, to eat, eaten, eaves, entreat, endear, escheat, fear, fearful, feasible, feasibility, feast, feat, feature, flea, steam, freak, gear, gleam, glean, to grease, grease, greaves, heal, heap, hear, heat, heath, heathen, heave, impeach, increase, in seam, interleave, knead, lea, to lead, leaf, league, leak, lean, lease, leash, leasing, least, leave, leaves, mead, meagre, meal, mean, meat, measles, meathe, neat, neap, near, neat, pea, peace, peak, peal, pease, peat, plea, plead, please, reach, to read, ream, reap, rear, rearward, reason, recheat, redstreak, release, repeat, repeat, retreat, reveal, scream, seal, sea, seam, seamy, sear, searchcloth, season, seat, shear, shears, sheath, sheathe, sheaf, sleazy, sneak, sneaker, sneakup, speak, spear, steal, steam, streak, stream, streamer, streamy, surcease, tea, teach, tead, teague, teal, team, tear, tease, teal, treacle, treason, treat, treatise, treatment, treaty, tweag, tweak, tweague, veal, underneath, uneasy, uncrease, up-rear, weak, weaken, weal, weald, wean, weanling, weariness, wearisome, weary, weasand, weasel, weave, wheal, wheat, wheaten, wreak, wreath, wreaths, wreathy, yea, year, yearling, yearling, yearly, zeal.*

228. In this catalogue we find *beard* and *bearded* sometimes pronounced as if written *berd* and *berded*; but this corruption of the diphthong, which Mr. Sheridan has adopted, seems confined to the stage.—See the word.

229. The preterimperfect tense of *eat* is sometimes written *ate*, particularly by Lord Bolingbroke, and frequently, and, perhaps, more correctly, pronounced *et*, especially in Ireland; but *eaten* always preserves the *ea* long.

230. *Ea* in *fearful* is long when it signifies *timorous*, and short when it signifies *terrible*, as if written *ferful*.—See the word.

231. To *read* is long in the present tense, and short in the past and participle, which are sometimes written *red*.

232. *Teat*, a dug, is marked by Dr. Kenrick, Mr. Elphinston, and Mr. Nares, with short *e*, like *tif*; but more properly, by Mr. Sheridan, Mr. Scott, W. Johnston, Mr. Perry, and Mr. Smith, with the long *e*, rhyming with *meat*.

233. *Beat*, the preterimperfect tense, and participle of *to beat*, is frequently pronounced in Ireland like *bet* (a wager): and, if utility were the only object of language, this would certainly be the preferable pronunciation, as nothing tends more to obscurity than verbs which have no different form for their present and past times; but fashion in this, as in many other cases, triumphs over use and propriety; and *bet*, for the past time and participle of *beat*, must be religiously avoided.

234. *Ea* is pronounced like the short *e* in the following words: *Abreast, ahead, already, bedstead, behead, bespread, bestead, bread, breadth, breakfast, breast, breath, cleanse, cleanly* (adjective), *cleanlily, dead, deadly, deaf, deafen, dearth, death, earl, earldom, early, earn, earnest, earth, earthen, earthly, endeavour, feather, head, heady, health, heard, hearse, heaven, heavy, jealous, impearl, instead, lead, leaden, leant* (the past time and participle of *to lean*), *learn, learning, leather, leaven, meadow, meant, measure, pearl, peasant, pheasant, pleasant, pleasantry, pleasure, read* (past time and participle), *readily, readiness, ready, realm, rehearsal, rehearse, research, seamstress, scarce, search, spread, stead, steadfast, steady, stealth, stealthy, sweat, sweaty, thread, threaten, threat, threaten, treachery, tread, treadle, treasure, uncleanly, wealth, wealthy, weapon, weather, yearn, zealot, zealous, zealously.*

235. I have given the last three words, compounded of *zeal*, as instances of the short sound of the diphthong, because it is certainly the more usual sound; but some attempts have lately been made in the House of Commons to pronounce them long, as in the noun. It is a commendable zeal to endeavour to reform the language as well as the constitution; but whether, if these words were altered, it would be a real reformation, may admit of some dispute.—See *Enclitical Termination*, No. 515, and the word *Zealot*.

236. *Heard*, the past time and participle of *hear*, is sometimes corruptly pronounced with the diphthong long, so as to rhyme with *rear'd*; but this is supposing the verb to be regular; which, from the spelling, is evidently not the case.

237. It is, perhaps, worth observation, that, when this diphthong comes before *r*, it is apt to slide into the short *u*, which is undoubtedly very near the true sound, but not exactly: thus pronouncing *earl, earth, dearth*, as if written *urł, urth, durth*, is a slight deviation from the true sound, which is exactly that of *i* before *r*, followed by another consonant, in *virtue, virgin*; and that is the true sound of short *e* in *vermin, vernal*, &c. 100.

238. *Leant*, the past time and participle of *to lean*, is grown vulgar: the regular form, *leaned*, is preferable.

239. The past time and participle of the verb *to leap* seems to prefer the irregular form; therefore, though we almost always hear *to leap* rhyming with *reap*, we generally hear *leaped* written and pronounced *leapt*, rhyming with *wept*.

240. *Ea* is pronounced like long slender *a* in *bare*, in the following words: *Bear, bearer, break, forbear, forswear, great, pear, steak, swear, to tear, wear.*

241. The word *great* is sometimes pronounced as if written *greet*, generally by people of education, and almost universally in Ireland; but this is contrary to the fixed and settled practice in England. That this is an affected pronunciation will be perceived in a moment by pronouncing this word in the phrase *Alexander the Great*; for those who pronounce the word *greet* in other cases will generally in this rhyme it with *fate*. It is true the *æ* is the regular sound of this diphthong; but this slender sound of *e* has, in all probability, given way to that of *a*, as deeper and more expressive of the epithet *great*.

242. The same observations are applicable to the word *break*; which is much more expressive of the action when pronounced *brake* than *breek*, as it is sometimes affectedly pronounced.

243. *Ea* is pronounced like the long Italian *a* in *father*, in the following words: *heart, hearty, hearten, hearth, harken.*

244. *Ea*, unaccented, has an obscure sound, approaching to short *u* in *vengeance, sergeant, pageant, and pageantry.*

EAU.

245. This is a French rather than an English triphthong, being found only in words derived from that language. Its sound is that of long open *o*, as *beau, bureau, flambeau, portmanteau*. In *beauty* and its compounds it has the first sound of *u*, as if written *bewty*.

EE.

246. This diphthong, in all words except those that end in *r*, has a squeezed sound of long open *e*, formed by a closer application of the tongue to the roof of the mouth than in that vowel singly, which is distinguishable to a nice ear in the different sounds of the verbs *to flee* and *to meet*, and the nouns *flee* and *meet*. This has always been my opinion; but, upon consulting some good speakers on the occasion, and in particular Mr. Garrick, who could find no difference in the sound of these words, I am less confident in giving it to the public. At any rate the difference is but very trifling, and I shall therefore consider *ee* as equivalent to the long open *e*.

247. This diphthong is irregular only in the word *breeches*, pronounced as if written *britches*. *Cheese-cake*, sometimes pronounced *chizcake*, and *breech, britch*, I look upon as vulgarisms. *Beelzebub*, indeed, in prose, has generally the short sound of *e*, as in *bell*: and when these two letters form but one syllable, in the poetical contraction of *e'er* and *ne'er* for *ever* and *never*, they are pronounced as if written *air* and *nair*.

EI.

248. The general sound of this diphthong seems to be the same as *ey*, when under the accent, which is like long slender *a*; but the other sounds are so numerous as to require a catalogue of them all.

248. *Ei* has the sound of long slender *a* in *deign*, *rein*, *reign*, *feign*, *feist*, *veil*, *helious*, *hair*, *harass*, *isreigh*, *weigh*, *neigh*, *skein*, *reins*, *their*, *thrive*, *right*, *freight*, *weight*, *neighbour*, and their compounds. When *gh* comes after this diphthong, though there is not the least remnant of the Saxon guttural sound, yet it has not exactly the same simple vowel sound as when followed by other consonants; *ei*, followed by *gh*, sounds both vowels like *a* *e*; or if we could interpose the *y* consonant between the *a* and *t* in *eight*, *weight*, &c. it might, perhaps, convey the sound better. The difference, however, is so delicate as to render this distinction of no great importance. The same observations are applicable to the words *straight*, *straighten*, &c.—See the word *Eight*.

249. *Ei* has the sound of long open *e* in *here*, in the following words and their compounds: *To cet*, *criling*, *conceit*, *deceit*, *receipt*, *conceive*, *perceiv*, *deceise*, *receive*, *inveigle*, *seize*, *seisin*, *seignior*, *seignory*, *seine*, *plebeian*. *Obedience* ought to be in the preceding class.—See the word.

251. *Leisure* is sometimes pronounced as rhyming with *pleasure*; but, in my opinion, very improperly: for if it be allowed that custom is equally divided, we ought, in this case, to pronounce the diphthong long, as more expressive of the idea annexed to it, 241.

252. *Either* and *neither* are so often pronounced *eye-ther* and *nigh-ther*, that it is hard to say to which class they belong. Analogy, however, without hesitation, gives the diphthong the sound of long open *e*, rather than that of *i*, and rhymes them with *breather*, one who breathes. This is the pronunciation Mr. Garrick always gave to these words; but the true analogical sound of the diphthong in these words is that of the slender *a*, as if written *ay-ther* and *nay-ther*. This pronunciation is adopted in Ireland, but is not favoured by one of our orthoëpists; for Mr. Sheridan, Mr. Scott, Mr. Elphinston, Mr. Perry, Mr. Smith, Steele's Grammar, and Dr. Jones, all pronounce these words with the diphthong like long *e*. W. Johnston alone adopts the sound of long *i* exclusively; Dr. Kenrick gives both *ether* and *ither*, but prefers the first, but gives *neither* the sound of long *e* exclusively: Mr. Coote says these words are generally pronounced with the *ei* like the *i* in *maize*. Mr. Barclay gives no description of the sound of *ei* in *either*, but says *neither* is sometimes pronounced *nither*, and by others *nether*; and Mr. Nares says, "*either* and *neither* are spoken by some with the sound of long *i*; I have heard even that of long *a* given to them; but as the regular way is also in use, I think it is preferable. These differences seem to have arisen from ignorance of the regular sound of *ei*." If by the regular way and the regular sound of this diphthong Mr. Nares means the long sound of *e*, we need only inspect Nos. 249 and 250, to see that the sound of *a* is the more general sound, and therefore ought to be called the regular; but where there are so many instances of words where this diphthong has the long sound of *e*, and custom is so uniform in these words, there can be no doubt which is the true sound.

253. *Ei* has the sound of long open *i*, in *height* and *sleight*, rhyming with *white* and *right*. *Height* is, indeed, often heard rhyming with *eight* and *weight*, and that among very respectable speakers; but custom seems to decide in favour of the other pronunciation, that it may better tally with the adjective *high*, of which it is the abstract.

254. *Ei* has the sound of short *e* in the two words *heifer* and *nonpareil*, pronounced *heffer* and *nonparill*.

255. This diphthong, when unaccented, like *ai*, 238, drops the former vowel, and is pronounced like short *i*, in *foreign*, *foreigner*, *forfeit*, *forfeiture*, *sovereign*, *sovereignty*, *surfeit*, *counterfeit*.

EO.

256. This diphthong is pronounced like *e* long *a* people, as if written *people*; and like *e* short in *leopard* and *jeopardy*, as if written *leppard* and *jeppady*; and in the law terms *seoffee*, *seoffer*, and *seffment*, as if written *seffee*, *seffer*, and *seffment*.

257. We frequently hear these vowels contracted into short *o* in *geography* and *geometry*, as if written *jogography* and *jometry*; but this gross

pronunciation seems daily wearing away, and giving place to that which separates the vowels into two distinct syllables, as it is always heard in *geographical*, *giometer*, *geometrical*, and *geometrician*. *Georgick* is always heard as if written *jorgick*, and must be given up as incorrigible, 116.

258. *Eo* is heard like long *u* in *feud*, *feodal*, *feodatory*, which are sometimes written as they are pronounced, *feud*, *feudal*, *feudatory*.

259. *Eo*, when unaccented, has the sound of *u* short in *surgeon*, *sturgeon*, *dudgeon*, *gudgeon*, *bludgeon*, *curmudgeon*, *dungeon*, *luncheon*, *punchion*, *truncheon*, *burgion*, *hubergion*; but in *scutcheon*, *escutcheon*, *pigeon*, and *ridgeon*, the *eo* sounds like short *i*.

260. *Eo* sounds like long *o* in *yeoman* and *yeomanry*; the first syllable of which words rhymes with *go*, *no*, *so*.—See the words.

261. *Eo* in *galloon*, a Spanish ship, sounds as if written *galloon*, rhyming with *moon*.

EOU

262. This assemblage of vowels, for they cannot be properly called a triphthong, is often contracted into one syllable in prose, and poets never make it go for two. In *cutaneous* and *vitreous* two syllables are palpable; but in *gorgeous* and *outrageous* the soft *g* coalescing with *e* seems to drop a syllable, though polite pronunciation will always preserve it.

263. This assemblage is never found but in an unaccented syllable, and generally a final one; and when it is immediately preceded by the dentals *d* or *t*, it melts them into the sounds of *j* and *ch*: thus *hideous* and *piteous* are pronounced as if written *hijeous* and *pitcheous*. The same may be observed of *righteous*, *plenteous*, *bounteous*, *courteous*, *beauteous*, and *duteous*, 203, 204.

EU.

264. This diphthong is always sounded like long *u* or *ew*, and is scarcely ever irregular: thus *feud*, *deuce*, &c. are pronounced as if written *fewd*, *deuce*, &c.

EW.

265. This diphthong is pronounced like long *a*, and is almost always regular. There is a corrupt pronunciation of it like *oo* chiefly in London, where we sometimes hear *dew* and *new* pronounced as if written *doo* and *noo*; but when *r* precedes this diphthong, as in *brew*, *crew*, *drew*, &c. pronouncing it like *oo* is scarcely improper.—See 176, 330.

266. *Shew* and *strew* have almost left this class, and by Johnson's recommendation are become *show* and *strow*, as they are pronounced. The proper name *Shrewsbury*, however, still retains the *e*, though always pronounced *Shrowsbury*. *Sew*, with a needle, always rhymes with *no*; and *sewer*, signifying a drain, is generally pronounced *shore*: but *sewer*, an officer, rhymes with *fewer*.—See *Sewer*.

267. *Ew* is sometimes pronounced like *aw* in the verb to *chew*; but this is gross and vulgar. To *chew* ought always to rhyme with *new*, *view*, &c.

EWE.

268. This triphthong exists only in the word *ewe*, a female sheep; which is pronounced exactly like *yew*, a tree, or the plural personal pronoun *you*. There is a vulgar pronunciation of this word as if written *yoe*, rhyming with *doe*, which must be carefully avoided.—See the word.

EY.

269. When the accent is on this diphthong, it is always pronounced like *ay*, or like its kindred diphthong *ei*, in *vein*, *reign*, &c.: thus *bey*, *dey*, *grey*, *prey*, *they*, *trex*, *wey*, *obey*, *convey*, *purvey*, *survey*, *key*, *eyre*, and *eyrey*, are always heard as if written *bay*, *day*, &c. *Key* and *ley* are the only exceptions, which always rhyme with *sea*, 220.

270. *Ey*, when unaccented, is pronounced like *ee*: thus *galley*, *valley*, *alley*, *barley*, &c. are pronounced as if written *gallee*, *vallee*, &c. The noun *survey* therefore, if we place the accent on the first syllable, is anomalous.—See the word.

EYE.

271. This triphthong is only found in the word *eye*, which is always pronounced like the letter *I*.

IA.

272. This diphthong, in the terminations *ian*, *ial*, *iard*, and *iute*, forms but one syllable, though the *i* in this situation, having the squeezed sound of *ee*, perfectly similar to *y*, gives the syllable a double sound, very distinguishable in its nature from a syllable formed without the *i*: thus *Christian*, *filial*, *poniard*, *conciliate*, sound as if written *Crist-yan*, *fil-yal*, *pon-yard*, *concil-yute*, and have in the last syllable an evident mixture of the sound of *y* consonant, 113.

273. In *diamond* these vowels are properly no diphthong; and in prose the word ought to have three distinct syllables; but we frequently hear it so pronounced as to drop the *a* entirely, and as if written *diwand*. This, however, is a corruption that ought to be avoided.

274. In *carriage*, *marriage*, *parliament*, and *minutary*, the *a* is dropped, and the *i* has its short sound, as if written *carridge*, *marridge*, *parliment*, *minutire*, 90.

IE.

275. The regular sound of this diphthong is that of *ee*, as in *grieve*, *thieve*, *fiend*, *lief*, *chief*, *kerchief*, *handkerchief*, *auctionier*, *grenadier*, &c. as if written *greeve*, *theeve*, *feend*, &c.

276. It has the sound of long *i* in *die*, *hie*, *lie*, *pie*, *lie*, *vie*, as if written *dy*, *hy*, &c.

277. The short sound of *e* is heard in *friend*, *fierce*, and the long sound of the same letter in *tier*, *frisee*.

278. In *variegate* the best pronunciation is to sound both vowels distinctly like *e*, as if written *vary-e-gate*.

279. In the numeral terminations in *teth*, as *twentieth*, *thirtieth*, &c. the vowels ought also to be kept distinct; the first like open *e*, as heard in the *y* in *twenty*, *thirty*, &c. and the second like short *e*, heard in *breath*, *death*, &c.

280. In *fiery*, too, the vowels are heard distinctly.

281. In *orient* and *spaniel*, where these letters come after a liquid, they are pronounced distinctly; and great care should be taken not to let the last word degenerate into *spannel*, 113.

282. When these letters meet, in consequence of forming the plurals of nouns, they retain either the long or short sound they had in the singular, without increasing the number of syllables: thus *a fly* makes *flies*, *a lie* makes *lies*, *company* makes *companies*, and *dignity*, *dignities*. The same may be observed of the third persons and past participles of verbs, as *I fly*, *he flies*, *I deny*, *he denies*, *he denied*, *I sully*, *he sullied*, &c. which may be pronounced as if written *denize*, *denide*, *sullid*, &c. 104.

283. When *ie* is in a termination without the accent, it is pronounced like *e*, only, in the same situation; thus *brasier*, *grasler*, and *glasier*, have the last syllable sounded as if written *brazhur*, *grazhur*, and *glazhur*, or rather as *braze-yur*, *graze-yur*, &c. 98, 418.

IEU.

284. These vowels occur in *adieu*, *lieu*, *purlieu*, where they have the sound of long *u*, as if written *adeu*, *leu*, *purleu*.

285. In one word, *lieutenant*, these letters are pronounced like short *e*, as if written *lev-tenant*.—See the word.

IEW.

286. These letters occur only in the word *view*, where they sound like *ew* rhyming with *few*, *sew*.

IO.

287. When the accent is upon the first of these vowels they form two distinct syllables, as *violent*, *stilet*; the last of which is sometimes corruptly pronounced *et-let*.

288. In *marchioness* the *i* is entirely sunk, and

the unaccented *e* pronounced, as it usually is in this situation, like short *u*, as if written *mar-shuness*, 392.

289. In *cushion* the *e* is sunk, and the word pronounced *cushia*.—See the word.

290. In the very numerous termination *son* these vowels are pronounced in one syllable like short *u*; but when they are preceded by a liquid, as in *million*, *million*, *clarion*, &c. 113, the two vowels, though they make but one syllable, are heard distinctly: the same may be observed when they are preceded by any of the other consonants, except *s* and *t*, as *champion*, *scorpion*, &c. where the vowels are heard separately: but the terminations *tion* and *sion* are pronounced in one syllable, like the verb *shun*.

291. The only exception to this rule is when the *t* is preceded by *s*: in this case the *t* goes into *tch*, and the *i* is in a small degree audible like short *e*. This may be heard in *question*, *mixture*, *digestion*, *combustion*, and what is an instance of the same kind in *Christian*, as if written *ques-chun*, *mix-chun*, &c. *quest-yun*, *mixt-yun*, &c. 464, 272.

IOU.

292. This triphthong, when preceded by a liquid, or any mute but a dental, is heard distinctly in two syllables, as in *billous*, *various*, *glorious*, *abstemious*, *ingenious*, *copious*; but when preceded by the dentals *t*, soft *c*, and *s*, these vowels coalesce into one syllable, pronounced like *shus*: thus *precious*, *factionous*, *noxious*, *anxious*, are sounded as if written *presch-us*, *fac-shus*, *noch-shus*, *ang-shus*, 459.

293. The same tendency of these vowels to coalesce after a dental, and draw it to aspiration, makes us hear *tedious*, *odious*, and *insidious*, pronounced as if written *te-je-us*, *o-je-us*, and *in-sid-je-us*; for, as *d* is but flat *t*, it is no wonder it should be subject to the same aspiration, when the same vowels follow: nay, it may be affirmed, that so agreeable is this sound of the *d* to the analogy of English pronunciation, that, unless we are upon our guard, the organs naturally slide into it. It is not, however, pretended that this is the politest pronunciation; for the sake of analogy it were to be wished it were: but an ignorance of the real powers of the letters, joined with a laudable desire of keeping as near as possible to the orthography, is apt to prevent the *d* from going into *j*, and to make us hear *o-de-us*, *te-de-ous*, &c. On the other hand, the vulgar, who in this case are right by instinct, not only indulge the aspiration of the *d*, which the language is so prone to, but are apt to unite the succeeding syllables too closely, and to say *o-jus* and *te-jus*, instead of *o-je-us* and *te-je-us*, or rather *ode-yus* and *tede-yus*.

294. If the *y* be distinctly pronounced, it sufficiently expresses the aspiration of the *d*, and is, in my opinion, the preferable mode of delineating the sound, as it keeps the two last syllables from uniting too closely. Where analogy, therefore, is so clear, and custom so dubious, we ought not to hesitate a moment at pronouncing *odious*, *tedious*, *perfidious*, *fastidious*, *insidious*, *invidious*, *compendious*, *melodious*, *commodious*, *preludious*, and *studious*, as if written *o-je-ous*, *te-je-ous*, &c. or rather *ode-yus*, *tede-yus*, &c.; nor should we forget that *Indian* comes under the same analogy, and ought, though contrary to respectable usage, to be pronounced as if written *Ind-yan*, and nearly as *In-je-an*, 376.

OA.

295. This diphthong is regularly pronounced as the long open sound of *o*, as in *boat*, *coat*, *oat*, *coal*, *loaf*, &c. The only exceptions are, *broad*, *abroad*, *great*, which sound as if written *brawd*, *abrawd*, *grawt*. *Outmeal* is sometimes pronounced *ot-meal*, but seems to be recovering the long sound of *o*, as in *oat*.

OE.

296. Whether it be proper to retain the *e* in this diphthong, or to banish it from our orthography, as Dr. Johnson advises, certain it is that in words from the learned languages it is alway

pronounced like single *e*, and comes entirely under the same laws as that vowel: thus, when it was a syllable, with the accent upon it, it is long, as in *As-tre-ci*, *Per-te-ci*: when under the secondary accent, in *ec-cumenical*, *ec-onomicks*, it is like *e* short: it is long *e* in *for-tis*, and short *e* in *fu-tid* and *assa-for-tida*: In *dee*, *foe*, *sloe*, *foe*, *for*, *for* (to dig), and *bilboes*, it is sounded exactly like long open *o*: in *conce* and *shoe*, like *oo*, as if written *conce* and *shoo*: and in the verb *dux* like short *u*, as if written *dus*.

OEI.

297. There is but one word where this triphthong occurs, and that is in Shakespeare's *King Lear*, in the word *ocillads* (glances), and, in my opinion, it ought to be sounded as if written *oillads*.

OEU.

298. This diphthong is from the French, in the word *manoeuvre*; a word, within these few years, of very general use in our language. It is not in Johnson, and the *oeu* is generally pronounced, by those who can pronounce French, in the French manner; but this is such a sound of the *u* as does not exist in English, and therefore it cannot be described. The nearest sound is *oo*; with which, if this word is pronounced by an English speaker, as if written *manoeuvre*, it may, except with very nice French ears, escape criticism.

OI.

299. The general and almost universal sound of this diphthong, is that of *a* in *water*, and the first *e* in *me-tre*. This double sound is very distinguishable in *bell*, *tell*, *spell*, *joint*, *point*, *anoint*, &c. which sound ought to be carefully preserved, as there is a very prevalent practice among the vulgar of dropping the *e*, and pronouncing these words as if written *bile*, *file*, *spile*, &c.

300. The only instance which admits of a doubt in the sound of this diphthong, when under the accent, is in the word *choir*; but this word is now so much more frequently written *quire*, that uniformly strongly inclines us to pronounce the *oi* in *choir* like long *i*, and which, by the common orthography, seems fixed beyond recovery. But it may be observed that either the spelling or the pronunciation of *Chorister*, commonly pronounced *Choirister*, ought to be altered.—See the words.

301. When this diphthong is not under the accent, it is variously pronounced. Dr. Kenrick places the accent on the first syllable of *turcois*, and, for I know not what reason, pronounces it as if written *turkis*; and *turkols* with the *oi* broad, as in *boys*. Mr. Sheridan places the accent on the second syllable, and gives the diphthong the French sound, as if the word was written *turkase*. In my opinion the best orthography is *turquois*, and the best pronunciation with the accent on the last syllable, and the *oi* sounded like long *e*, as if written *turtrees*; as we pronounce *tristis* with the accent on the first syllable, and the *oi* like short *i*, as if written *fortiz*.

302. In *avardupois* the first diphthong is pronounced like short *e*, as if written *avardupoise*.

303. In *connaisseur* the same sound of *e* is substituted, as if written *connesseur*.

304. In *chamails*, or *chamels*, a species of leather, the *oi* is pronounced like long *e*, as if written *chammer*.

305. *Adroit* and *dereir*, two scarcely naturalized French words, have the *oi* regular, though the latter word, in polite pronunciation, retains its French sound, as if written *dewer*.

OO.

306. The sound of this diphthong is regular, except in a few words: It is pronounced long in *noon*, *soon*, *fool*, *rood*, *food*, *mood*, &c. This is its regular sound.

307. It has a shorter sound corresponding to the *u* in *bull*, in the words *wool*, *wood*, *good*, *hood*, *fool*, *stood*, *understood*, *withstood*; and these are the only words where this diphthong has this *u* sound.

308. It has the sound of short *u* in the two words *blood* and *food*, rhyming with *good*.

309. *Foot* is vulgarly pronounced so as to rhyme with *but*, *hut*, &c. but ought to have its long regular sound, rhyming with *boot*, as we always hear it in the compound *sooty*.—See the word.

310. *Door* and *floor* are universally pronounced by the English as if written *dore* and *flor*; but in Ireland they preserve the regular sound of *oo*.

311. *Moor*, a black man, is regular in polite pronunciation, and like *more* in vulgar. *Meer*, a marsh, is sometimes heard rhyming with *store*; but more correct speakers pronounce it regularly, rhyming with *poor*.

OU.

312. This is the most irregular assemblage of vowels in our language: its most common sound is that heard in *bound*, *found*, *ground*, &c. and this may be called its proper sound; but its deviations are so many and so various, that the best idea of it will be conveyed by giving the simples of all its different sounds.

313. The first or proper sound of this diphthong is composed of the *a* in *bull*, and the *oo* in *ewe*, or rather the *u* in *bull*, and is equivalent to the *ow* in *down*, *frown*, &c. This sound is heard in *abound*, *about*, *account*, *acousticks*, *aground*, *aloud*, *amount*, *around*, *arouse*, *astound*, *avouch*, *bough*, *bounce*, *bound*, *bounty*, *bounteous*, *bout*, *carouse*, *chouse*, *cloud*, *clough*, *clout*, *clouterly*, *compound*, *couch*, *conchant*, *crouch*, *grouse*, *deflour*, *devour*, *devout*, *doubt*, *doubtful*, *drought*, *doughty*, *douse*, *encounter*, *espouse*, *expound*, *flout*, *foul*, *flounder*, *found*, *foundling*, *fountain*, *frousy*, *glout*, *gout* (a disease), *ground*, *grout*, *hound*, *hour*, *house*, *impound*, *loud*, *lounge*, *louse*, *lout*, *mound*, *mountain*, *mountebank*, *moust*, *mouth*, *noun*, *ounce*, *our*, *oust*, *out*, *outer*, *outermost*, *paramount*, *plough*, *pouch*, *pounce*, *pound*, *pout*, *profound*, *pronoun*, *pronounce*, *propound*, *proud*, *rebound*, *recount*, *redoubt*, *redoubled*, *redound*, *rencounter*, *round*, *roundelay*, *rouse*, *roust*, *scoundrel*, *scour*, *scout*, *shout*, *shroud*, *slouch*, *spouse*, *spout*, *sprout*, *stout*, *surround*, *south*, *thou*, *thousand*, *touse*, *trounce*, *trousers*, *trout*, *wound* (did wind), *slough* (a miry place), *vouch*, *vouchsafe*, *without*, *scaramouch*.

314. The second sound is that of short *u* in *bug*, and is heard in the following words and their compounds: *Adjourn*, *journey*, *journal*, *bourgeois*, *country*, *cousin*, *couple*, *accouple*, *double*, *trouble*, *courteous*, *courtesy*, *courage*, *encourage*, *joust*, *gourmet*, *housewife*, *flourish*, *mouch*, *nourish*, *enough*, *chough*, *rough*, *tough*, *slough* (a cast skin), *scourge*, *southerly*, *southern*, *southernwood*, *southward*, *touch*, *touchy*, *young*, *younker*, and *youngster*; but *southern*, *southerly*, and *southward*, are sometimes pronounced regularly like *south*: this however, is far from the prevailing pronunciation. This is the sound this diphthong always has when the accent is not on it, unless in very few instances, where the compound retains the sound of the simple, as in *pronoun*; but in *sojourn* and *sojourner*, with the accent on the first syllable, and in every unaccented termination in *our* and *ous*, this diphthong has exactly the sound of short *u*: thus *favour*, *honour*, *odour*, and *famous*, are pronounced as if written *favur*, *honnur*, *odur*, and *famus*.

315. The third sound given to these vowels is that of *oo* in *coo* and *weo*, 39, and is found in the following words: *Bouge*, *croup*, *group*, *aggroup*, *amour*, *paramour*, *bouse*, *housy*, *boutefeu*, *capouch*, *cartouch*, *fourbe*, *gout* (taste), and *ragout* (pronounced *goo* and *ragoo*), *rendezvous*, *rouge*, *soup*, *sous* (pronounced *soo*), *surtout*, *through*, *thoroughly*, *toupet* or *toupet*, *you*, *your*, *youth*, *tour*, *contour*, *journey*, *lournay*, *lournamant*, *pour*, and *route* (a road), *accoutre*, *billet-doux*, *agouti*, *uncouth*, *wound* (a hurt), and *routine* (a beaten road).—See *Tourney*.

316. The verb to *pour* is sometimes pronounced to *pore*, and sometimes to *poor*; in each case it interferes with a word of a different signification, and the best pronunciation, which is that similar to *power*, is as little liable to that exception as either of the others.—See the word.

317. To *wound* is sometimes pronounced so as to rhyme with *found*; but this is directly contrary to the best usage; but *route* (a road, as, to take a different route) is often pronounced so as to rhyme with *doubt*, by respectable speakers.

318. The fourth sound of this diphthong is that of long open *o*, and is heard in the following words: *though, al'though, coultter, court, account, gourd, courtier, course, discourse, source, recourse, resource, bourn, dough, doughy, four, mould, mouldy, moult, mourn, shoulder, smoulder, soul, poultice, poult, poulterer, poultry, troubl* (to roll smoothly, marked by Mr. Sheridan as rhyming with *doll*, but more properly by Dr. Kenrick with *rot*'), and *borough, thorough, furlough, fourteen, concourse*, and *intercourse*, preserve the diphthong in the sound of long *o*, though not under the accent.

319. The fifth sound of *ou* is like the noun *awe*, and is heard only in *ought, bought, brought, sought, besought, fought, nought, thought, mought, wrought*.

320. The sixth sound is that of short *oo*, or the *u* in *bull*, and is heard only in the auxiliary verbs *would, could, should*, rhyming with *good, hood, stood, &c.*

321. The seventh sound is that of short *o*, and heard only in *cough* and *trough*, rhyming with *off* and *scoff*; and in *lough*, and *shough*, pronounced *lock* and *shock*.

OW.

322. The elementary sound of this diphthong is the same as the first sound of *ou*, and is heard in *how, now, &c.* but the sound of long *o* obtains in so many instances, that it will be necessary to give a catalogue of both.

323. The general sound, as the elementary sound may be called, is heard in *now, how, bow* (a mark of respect), *mow* (a heap of barley, &c.), *cow, brow, brown, brouse, plow, sow, row, avow, allow, disallow, endow, down, clown, frown, town, crown, drown, gown, renown, dowager, dowdy, dower, dower, dowry, dowery, dowlas, drowse, drowsy, flower, bower, lower* (to look gloomy), *power, powder, prowess, prow, proud, vowel, towel, bower, rowel, cowl, scowl, crowd, shower, tower, sow* (a swine), *sowins, soul, thowl, low* (to bellow as a cow). This word is generally pronounced as *low*, not *high*; but if custom, in this case, has not absolutely decided, it ought, in my opinion, to have the first sound of this diphthong, rhyming with *how*, as much more expressive of the noise it signifies; which, where sounds are the ideas to be expressed, ought to have great weight in pronunciation, 241, 251.—See the word.

324. The second sound of this diphthong is heard in *blow, slow, crow, grow, flow, glow, bow* (to shoot with), *know, low* (not high), *mow* (to cut grass), *row, show, sow* (to scatter grain), *strow, slow, snow, trow, below, slow, bestow, owe, own, owner, flown, grown, growth, know, known, sown, lower* (to bring low), *throw, thrown*; in all these words the *ow* sounds like long *o* in *go, no, so, &c.*

325. The noun *prow*, signifying the forepart of a ship, rhymes with *go* in Mr. Sheridan, and with *now* in Dr. Kenrick. The latter is, in my opinion, the preferable sound; while the verb to *prowl* (to seek for prey) rhymes with *owl* according to Mr. Sheridan, and with *soul* according to Dr. Kenrick: the latter has the old spelling *prole* to plead, but the former has, in my opinion, both analogy and the best usage on its side. Both these writers unite in giving the first sound of this diphthong to *prowess*; which is unquestionably the true pronunciation.—See *To Prowl*.

326. The proper names *How, Howel, Howard, and Pouel*, generally are heard with the first sound of this diphthong, as in *how, now, &c.* but *Howes* and *Stow* (the historian) commonly rhyme with *knows* and *know*. *Howard*, among people of rank, is generally pronounced with the second sound, rhyming with *froward*; and *Grosvenor* as if written *Erosvenor*. *Snowdon* is frequently pronounced with the first sound of *ow*; but the second sound seems preferable; as it is not improbable that these mountains had their name, like the Alps, from the snow on their tops.

327. When this diphthong is in a final unaccented syllable, it has always the second sound, like long *o*, in *borrow, sorrow, fellow, willow, &c.* The vulgar shorten this sound, and pronounce the *o* obscurely, and sometimes as if followed by *r*, as *winder* and *feller*, for *window* and *fellow*; but this is almost too despicable for notice. Good speakers preserve the diphthong in this situation,

and give it the full sound of open *o*, rhyming with *no, so, &c.*

328. This diphthong, in the word *knowledge*, has of late years undergone a considerable revolution. Some speakers, who had the regularity of their language at heart, were grieved to see the compound depart so far from the sound of the simple, and with heroic fortitude have opposed the multitude by pronouncing the first syllable of this word as it is heard in the verb to *know*. The pulpit and the bar have for some years given a sanction to this pronunciation; but the senate and the stage hold out inflexibly against it; and the nation at large seem insensible of the improvement. They still continue to pronounce, as in the old ludicrous rhymes—

“Among the mighty men of *knowledge*,
“That are professors at Gresham College.”

But if ever this word should have the good fortune to be restored to its rights, it would be but charity to endeavour the restoration of a great number of words in a similar situation, such as *breakfast, vineyard, bewilder, meadow, hearken, pleasure, whistler, shepherd, windward*, and a long catalogue of fellow-sufferers, 515. But, before we endeavour this restoration, we should consider that contracting the sound of the simple, when it acquires an additional syllable, is an idiom of pronunciation to which our language is extremely prone; nor is it certain that crossing this tendency would produce any real advantage; at least, not sufficient to counterbalance the diversity of pronunciation which must for a long time prevail, and which must necessarily call off our attention from things to words.—See *Enclitical Termination*, No. 514.

OY.

329. This diphthong is but another form for *oi*, and is pronounced exactly like it. When *alloy* is written with this diphthong, it ought never to be pronounced *allay*. Custom seems to have appropriated the former word to the noun, and the latter to the verb; for the sake of consistency, it were to be wished it were always written *allay*; but it is not to be expected that poets will give up so good a rhyme to *joy, cloy, and destroy*.

330. The only word in which this diphthong is not under the accent is the proper name *Savoy*; for *savoy*, a plant, has the accent on the second syllable; but the diphthong in both is pronounced in the same manner.

UA.

331. When the *a* in this diphthong is pronounced, the *u* has the power of *w*, which unites both into one syllable: thus *antiquate, antiquary, assuage, persuade, equal, language, &c.* are pronounced *antikwate, antikwary, assuage, &c.*

332. The *u* in this diphthong is silent in *guard, guardian, guarantee, and piquant*; pronounced *gard, gardian, guarantee, and pickant*, 92.

333. In *Mantua*, the town of Italy, both vowels are heard distinctly. The same may be observed of the habit so called: but in *mantuamaker* vulgarity has sunk the *a*, and made it *mantumaker*. The same vulgarity at first, but now sanctioned by universal custom, has sunk both letters in *victuals*, and its compounds *victualling* and *victualler*, pronounced *vittles, vittling, and vittler*.—See *Mantua*.

UE.

334. This diphthong, like *ua*, when it forms only one syllable, and both letters are pronounced, has the *u* sounded like *w*; as *consuetude, desuetude, and mansuetude*, which are pronounced *consuwetude, desuwetude, and mansuwetude*. Thus *conquest* is pronounced according to the general rule, as if written *conkwest*; but the verb to *conquer* has unaccountably deviated into *conker*, particularly upon the stage. This error, however, seems not to be so rooted in the general ear as to be above correction; and analogy undoubtedly demands *conquer*.

335. This diphthong, when in a final syllable, sinks the *e*, as *cine, cue, due, blue, glue, hue, sur-rue*.

me, sue, muse, accrue, issue, undue, imbue, imbrue, pursue, subdue, perdue, argue, residue, issue, revenue, continue, retinue, construe, statue, tissue, virtue, value, ague; in all these words, whether the accent be on the diphthong *u* or not, it is pronounced like long open *u*, except in words where the *r* comes before *u*; in this case it is sounded like *oo*. When the accent is not on this diphthong, as in the latter portion of these words from *argue*, it is apt to be feebly and indistinctly pronounced, and therefore care ought to be taken to sound it as if these words were written *argew, residew, &c.* In *Tuesday, ue*, the diphthong, is pronounced in the same manner.

336. In some words the *u* is silent, and the *e* pronounced short, as in *guess, guest, guerkin, garden*, where the *u* acts as a servile to preserve the *g* hard.—See *Appendix*.

337. In some words both the vowels are sunk, as in *antique, oblique, league, seague, teague, colleague, plague, vague, intrigue, fatigue, harangue, tongue, disemboque, colloque, roque, prorogue, bogue, fugue*; in all which the *ue* is silent, and the *g* pronounced hard. The *q* in *antique* and *oblique* is pronounced like *k*, as if the words were written *antseek* and *oblike*, 158.

338. The terminations in *ogue*, from the Greek, are pronounced in the same manner. Thus *pedagogue, demagogue, physmagogue, menagogue, emmenagogue, synagogue, mystagogue, decalogue, dialogue, trialogue, catalogue, theologue, eclogue, monologue, prologue, and epilogue*, are all pronounced as if written *pedagog, demagog, &c.* with the *o* short.

339. This diphthong after *r* becomes *oo*: thus *true* is pronounced *troo*. 176.

UL

340. The *u* in this diphthong, as in *ua* and *ue*, when both vowels are pronounced without forming two syllables, is pronounced like *w*: thus *languid, anguish, languish, extinguish, distinguish, relinquish, vanquish, linguist, penguin, pursuit, gulacum*, are pronounced as if written *languid, anguish, &c.* and *cuisse* and *cuissees* as if written *kwiss* and *kwisses*, and *cuirass* as if written *kwirass*.

341. The *u* is silent, and the *i* pronounced long, in *guide, disguise, gulle, and beguile*; but the *u* is silent, and the *i* short, in *guild, build, guilt, guinea, guitar*. *Guild*, in *Guildhall*, is, by the lower people of London, pronounced so as to rhyme with *child*; but this is directly opposite to the best usage, and contrary to its etymology, as it is a compound of *guild* (a corporation, always pronounced like the verb to *gild*), and *hall*. Dr. Jones, who wrote in Queen Anne's time, tells us it was then pronounced as if written *Gildhall*. In *circuit* and *biscuit* the *u* is merely servile; in both the *c* is hard, and the *i* short, as if written *cirkit* and *biskit*. *Conduit* is pronounced *cundit*.

342. In *juice, slice, suit, and pursuit*, the *i* is silent, and the *u* has its diphthongal sound, as if preceded by *e*, and the words were written *slauce, jauce, seuit, pursuit*.

343. When this diphthong is preceded by *r*, it is pronounced like *oo*; thus *bruise, cruise, fruit, bruit, recruit*, are pronounced as if written *broose, croose, broof, 230*.

UO.

344. The *u* in this diphthong is pronounced like *w* in *quote, quota, quotation, quotient, quotidian, quorum, quondam, siliquose, quoth*, as if written *kwote, kwota, kwotation, &c.* *Coif*, and *coit*, commonly pronounced *kwoif* and *kwolt*, do not come under this class.—See the words.

UY.

345. This diphthong, with the accent on it, makes the *u*, and pronounces the *y* like long *i*: thus *buy*, the only word where *uy* has the accent, rhymes with *dry, fly, &c.*: when the accent is not on this diphthong it is sounded like long *e*, as *plague, reguy, gluy*, pronounced *plag-ee, ro-gee* (with the *g* hard, as in *get*), *glu-ee*. The same may be observed of *obloquy, ambiloquy, pauciloquy, spilloquy, ventriloquy, alloquy, colloquy*, pronounced *oblo-quee, ambilo-quee, &c.*

UOY.

346. This diphthong is found only in the word *buoy*, pronounced as if written *bwoy*, but too often exactly like *boy*. But this ought to be avoided by correct speakers.

OF THE CONSONANTS

B.

347. When *b* follows *m* in the same syllable it is generally silent, as in *lamb, kemb, limb, comb, dumb, &c.* except *accumb* and *succumb*: it is silent also before *t* in the same syllable, as in *debt, doubt, redoubt, redoubted*, and their compounds: it is silent before *t*, when not in the same syllable, in the word *subtle* (cunning), often inaccurately used for *subtile* (fine), where the *b* is always pronounced. In the mathematical term *rhom* the *b* is always heard, and the word pronounced as if written *rhumb*. *Ambis-ace* is pronounced *Aims-ace*.—See *Appendix*.

C.

348. *C* is always heard like *k* before *a, o, and u*; as *card, cord, curd*; and soft, like *s*, before *e, i, and y*; as *cement, city, cynic*.

349. When *c* ends a word, or syllable, it is always hard, as in *music, flaccid, siccit*, pronounced *musick, flack-sid, sick-sity*.—See *Exaggerate*.

350. In the word *sceptic*, where the first *c*, according to analogy, ought to be pronounced like *s*, Dr. Johnson has not only given his approbation to the sound of *k*, but has, contrary to general practice, spelt the word *skeptick*. It may be observed, perhaps, in this, as on other occasions, of that truly great man, that he is but seldom wrong; but, when he is so, that he is generally wrong to absurdity. What a monster does this word *skeptick* appear to an eye the least classical or correct! And if this alteration be right, why should we hesitate to write and pronounce *scene, scepter, and Lacedamon, skene, skeptor, and Lakedamon*, as there is the same reason for *k* in all? It is not, however, my intention to cross the general current of polite and classical pronunciation, which I know is that of sounding the *c* like *k*; my objection is only to writing it with the *k*; and in this I think I am supported by the best authorities since the publication of Johnson's Dictionary.

351. *C* is mute in *Czar, Czarina, victuals, indict, arbuscle, and muscle*; it sounds like *tch* in the Italian words *vermicelli* and *violincello*; and like *s* in *suffic, sacrifice, sice* (the number six at dice), and *discern*.

352. This letter, when connected with *h*, has two sounds; the one like *tch*, in *child, chair, rich, which, &c.* pronounced as if written *tchild, tchair, ritich, whitich, &c.*; the other like *sh*, after *l* or *n*, as in *belch, bench, filch, &c.* pronounced *belsh, bensch, filsh, &c.* This latter sound is generally given to words from the French, as *chaise, chagrin, chamade, champagne, champignon, chandelier, chaperon, charlatan, chevalier, chevron, chicane, capuchin, cartouch, machine, machinist, chuncre, marchioness*.

353. *Ch*, in words from the learned languages, are generally pronounced like *k*, as *chalcography, chulybeate, chameleon, chamomile, chaos, character, chart, chasm, chely, chemist* (if derived from the Arabic, and *chymist* if from the Greek), *chersonese, chimera, chirography, chitromancy, chlorosis, choler, chorus, chord, chorography, chyle* and its compounds; *anchor, anchoret, cachezy, catechism, catechise, catechetical, catechumen, echo, echinus, epoch, epocha, ichor, machination, machinal, mechanic, mechanical, orchestra, orchestre, technical, anarch, anarchy, conch, cochleary, distich, hemistich, monostich, eunuch, monarch, monarchical, hierarch, heresiarch, pentateuch, stomach, stomachic, schime, school, scholar, schesis, mustich, seneschal*, and in all words where it is followed by *r*, as *Christ, Christian, chronology, chronicle, &c.* To these may be added the Celtic word *loch* (a lake). The exceptions are, *charity, archer, and archery*.

354. When *arch*, signifying chief, begins a word from the Greek language, and is followed by a vowel, it is always pronounced *ark*, as in *archangel*, *archipelago*, *architect*, *archives*, *archetype*, *archaism*, *archiepiscopal*, *archidiaconal*, *architrave*, *archaology*. But when we prefix *arch* to a word of our own, and this word begins with a consonant, we pronounce it so as to rhyme with *march*, as *archduke*, *archdeacon*, *archbishop*; and sometimes, when the following word begins with a vowel, if it is a composition of our own, and the word does not come to us compounded from the Greek or Latin, as *arch-enemy*.

355. The word *ache* (a pain), pronounced *ake*, comes from the Greek, and was by Shakespeare extended to two syllables, *aches* with *ch*, as in *atches*; but this is obsolete. It is now almost universally written *ake* and *akes*, except where it is compounded with another word, as *head-ach*, *heart-ach*, &c. and by thus absurdly retaining the *ch* in the compound, we are puzzled how to form the plural, without pronouncing *aches* in two syllables.

356. In *choir* and *chorister* the *ch* is almost universally pronounced like *qu*, 360: in *ostrich*, like *dge*, as if spelled *ostridge*. It is silent in *schedule*, *schism*, and *yacht*; pronounced *seddule*, *sizm*, and *yot*. It is sunk in *drachm*, but heard in *drachma*; pronounced *dram* and *drackma*.

357. When *c* comes after the accent, either primary or secondary, and is followed by *ea*, *ia*, *ie*, *io*, or *eous*, it takes the sound of *sh*; thus *ocean*, *social*, *Phocion*, *saponaceous*, are pronounced as if written *oshcan*, *oshial*, *Phoshian*, *saponasheous*, *fasciation*, *negociation*, &c. 196. *Financier* has the accent after the *c*, which on that account does not go into *sh*.

D.

358. In order to have a just idea of the alterations of sound this letter undergoes, it will be necessary to consider its near relation to *T*, 41. These consonants, like *p*, and *b*, *f*, and *v*, *k*, and *hard g*, and *s*, and *z*, are letters of the same organ; they differ by the nicest shades of sound, and are easily convertible into each other; *t*, *p*, *f*, *k*, and *s*, may, for the sake of distinction, be called sharp, and *d*, *b*, *v*, *g*, and *z*, may be called flat. For this reason, when a singular ends in a sharp consonant, the *s*, which forms the plural, preserves its sharp sound, as in *cuffs*, *packs*, *lips*, *hats*, *deaths*; and when the singular ends with a flat consonant, the plural *s* has the sound of *z*, as *drabs*, *bags*, *beads*, *lives*, &c. pronounced *drabz*, *bagz*, &c.

359. In the same manner, when a verb ends with a sharp consonant, the *d*, in the termination *ed*, assumed by the preterit and participle, becomes sharp, and is sounded like *t*; thus *stuffed*, *tripped*, *cracked*, *passed*, *rouched*, *faced* (where the *e* is suppressed, as it always ought to be, except when we are pronouncing the language of Scripture), 104, change the *d* into *t*, as if written *stust*, *tript*, *crackt*, *past*, *roucht*, *faste*. So when the verb ends in a flat consonant, the *d* preserves its true flat sound, as *drubbed*, *pegged*, *lived*, *buzzed*, where the *e* is suppressed, and the words pronounced in one syllable, as if written *drubb'd*, *pegg'd*, *liv'd*, *buzz'd*. It may be observed, too, that when the verb ends in a liquid, or a liquid and mute *e*, the participle *d* always preserves its pure sound; as *blamed*, *joined*, *filled*, *barred*, pronounced *blam'd*, *join'd*, *fill'd*, *barr'd*. This contraction of the participial *ed*, and the verbal *en*, 103, is so fixed an idiom of our pronunciation, that to alter it would be to alter the sound of the whole language. It must, however, be regretted, that it subjects our tongue to some of the most hissing, snapping, clashing, grinding, sounds that ever grated the ears of a Vandal: thus *rased*, *scratched*, *wrenched*, *bridled*, *fangled*, *birchen*, *hardened*, *strengthened*, *quickened*, &c. almost frighten us when written as they are actually pronounced, as *raspt*, *scratcht*, *wrencht*, *bridl'd*, *fangl'd*, *birch'n*, *strengthen'd*, *quick'n'd*, &c.; they become still more formidable when used contractedly in the solemn style, which never ought to be the case; for here, instead of *thou strength'n'st* or *strength'n'd'st*, *thou quick'n'st* or *quick'n'd'st*, we ought to pronounce, *thou strength'nest* or *strength'nest*, *thou quick'nest* or

quick'nest, which are sufficiently harsh of our conscience.—See No. 405. But to compensate for these Gothick sounds, which, however, are not without their use, our language is full of the smoothest and most sonorous terminations of the Greeks and Romans.

360. By the foregoing rule of contraction, arising from the very nature of the letters, we see the absurdity of substituting the *s* for *ed*, when the verb ends in a sharp consonant; for, when the pronunciation cannot be mistaken, it is folly to alter the orthography: thus the *Distressed Mother*, the title of a tragedy, needs not to be written *Distress Mother*, as we generally find it, because, though we write it in the former manner, it must necessarily be pronounced in the latter.

361. By this rule, too, we may see the impropriety of writing *blest* for *blessed*, when a participle.

"Blest in thy genius, in thy love too blest."

Pope.

But, when the word *blessed* is an adjective, it ought always to be pronounced, even in the most familiar conversation, in two syllables, as, this is a *blessed* day, the *blessed* thistle, &c.

362. This word, with *learned*, *curled*, and *winged*, are the only participial adjectives which are constantly pronounced in two syllables, where the participles are pronounced in one: thus a *learned* man, a *curled* thing, a *winged* horse, preserve the *ed* in a distinct syllable; while the same words, when verbs, as, *he learned* to write, *he curled* the day, *they winged* their flight, are heard in one syllable, as if written *learn'd*, *curl'd*, and *wing'd*; the *d* in *curled* changing to *t*, from its following the sharp consonant *s*, 358.

363. Poetry, however (which has been one great cause of improper orthography), assumes the privilege of using these words, when adjectives, either as monosyllables or dissyllables; but correct prose rigidly exacts the pronunciation of *ed* in these words, when adjectives, as a distinct syllable. The *ed* in *aged* and *winged* always make a distinct syllable, as, an *aged* man; the *winged* courser: but when this word is compounded with another the *ed* does not form a syllable, as a *full-ag'd* horse, a *sheath-wing'd* foal.

364. It is, perhaps, worthy of notice, that when adjectives are changed into adverbs, by the addition of the termination *ly*, we often find the participial termination *ed* preserved long and distinct, even in those very words where it was contracted when used adjectively: thus though we always hear *confess'd*, *profess'd*, *design'd*, &c. we as constantly hear *con-fess-ed-ly*, *pro-fess-ed-ly*, *de-sign-ed-ly*, &c. The same may be observed of the following list of words, which, by the assistance of the Rhyming Dictionary, I am enabled to give, as, perhaps, the only words in the language in which the *ed* is pronounced as a distinct syllable in the adverb, where it is contracted in the participial adjective: *Forcedly*, *enforcedly*, *travelledly*, *deformedly*, *feignedly*, *unfeignedly*, *discernedly*, *resignedly*, *refusedly*, *restrainedly*, *concernedly*, *unconcernedly*, *discernedly*, *undiscernedly*, *preparedly*, *assuredly*, *advisedly*, *dispersedly*, *diffusedly*, *confusedly*, *unperceivedly*, *resolvedly*, *deservedly*, *undeservedly*, *reservedly*, *unreservedly*, *avowedly*, *perplexedly*, *fixedly*, *amazedly*.

365. To this catalogue may be added several abstract substantives formed from participles in *ed*; which *ed* makes a distinct syllable in the former, though not in the latter: thus *numbedness*, *blearedness*, *preparedness*, *assuredness*, *diseasedness*, *advisedness*, *reposedness*, *composedness*, *indisposedness*, *diffusedness*, *confusedness*, *distressedness*, *resolvedness*, *reservedness*, *perplexedness*, *fixedness*, *amazedness*, have *ed* pronounced distinctly.

366. The adjectives *naked*, *wicked*, *picked* (pair ed), *hooked*, *crooked*, *forked*, *tusked*, *tressed*, and *wretched*, are not derived from verbs, and are therefore pronounced in two syllables. The same may be observed of *scabbed*, *crabbed*, *chubbed*, *stubb'd*, *shagged*, *snagged*, *rugged*, *scrubbed*, *wagg'd*, *rugged*, *scrugg'd*, *haired*, *jagg'd*; to which we may add the solemn pronunciation of *adorned*; and these, when formed into nouns by the addition of *ness*, preserve the *ed* in a distinct

syllable, as *unpleasantness, snatchedness, raggedness, &c.*

327. *Passed*, in the sense of beyond, becomes a preposition, and may allowably be written *past*, as *past twelve o'clock*; but when an adjective, though it is pronounced in one syllable, it ought to be written with two, as *passed pleasures are present pain*: this I know is contrary to usage; but usage is, in this case, contrary to good sense, and the settled analogy of the language.

328. It needs scarcely be observed, that, when the verb ends in *t* or *d*, the *ed* in the past time and participle has the *d* pronounced with its own sound, and always forms an additional syllable, as *landed, matted, &c.* otherwise the final *d* could not be pronounced at all.

329. And here, perhaps, it may not be useless to take notice of the very imperfect and confused idea that is given in our best grammar of what are called contracted verbs, such as *snatched, checked, snapt, mixt, dwelt, and past*, for *snatched, checked, snapped, mixed, dwelled, and passed*. To these are added those that end in *t*, *m*, and *n*, or *g*, after a diphthong; which either shorten the diphthong, or change it into a single vowel; and instead of *ed*, take *t* only for the preterit, as *dozt, dreamt, meant, felt, slept, crept*; and these are said to be considered not as irregular, but contracted only. Now nothing can be clearer than that verbs of a very different kind are here huddled together as of the same. *Snatched, checked, snapped, mixed, and passed*, are not irregular at all; if they are ever written *snacht, chackt, snapt, mixt, and past*, it is from pure ignorance of analogy, and not considering that if they were written with *ed*, unless we were to pronounce it as a distinct syllable, contrary to the most settled usage of the language, the pronunciation, from the very nature of the letters, must be the same. It is very different with *dwelt*; here, as a liquid, and not a sharp mute, ends the verb, *d* might be pronounced without going into *t* just as well as in *feld*, the participle of *to fell* (to cut down trees). Here then we find custom has determined an irregularity, which cannot be altered without violence to the language; *dwelt* may be truly called an irregular verb, and *dwelt* the preterit and participle.

330. The same may be observed of *dealt, dream, mean, feel, weep, sleep, and creep*. It is certain we can pronounce *d* after the four first of these words, as well as in *sealed, screamed, cleaned, and reeled*; but custom has not only annexed *t* to the preterit of these verbs, but has changed the long diphthongal sound into a short one; they are therefore doubly irregular. *Weep, sleep, and creep*, would not have required *t* to form their preterits, any more than *peeped* and *steeped*; but custom, which has shortened the diphthong in the former words, very naturally annexed *t* as the simplest method of conveying the sound.

331. The only two words which occasion some doubt about classing them are, *to learn* and *to spell*. The vulgar (who are no contemptible guides on this occasion) pronounce them in the preterit *learned* and *spelt*; but as *n* and *l* will readily admit of *d* after them, it seems more correct to favour a tendency to regularity, both in writing and speaking, which the literary world has given into, by spelling them *learned* and *spelled*, and pronouncing them *learn'd* and *spell'd*: thus *earned*, the preterit of *to earn*, has been recovered from the vulgar *earn'd* and made a perfect rhyme to *discerned*.

332. To these observations may be added, that, in such irregular verbs as have the present, the preterit, and participle the same, as, *cast, cost, cut, &c.* the second person singular of the preterit of these verbs takes *ed* before the *st*, as *I cast, or did cast; Thou castedst, or didst cast, &c.* for, if this were not the case, the second person of the preterit might be mistaken for the second person of the present tense.

333. I have been led insensibly to these observations by their connexion with pronunciation; and if the reader should think them too remote from the subject, I must beg his pardon, and resume my remarks on the sound of the letter *d*.

334. The vulgar drop this letter in *ordinary* and *extraordinary*, and make them *or'nary* and *extr'ordinary*; but this is a gross abbreviation; the best pronunciation is sufficiently short, which is

ord'nary and *extr'ord'nary*: the first in three, and the last in four syllables: but solemn speaking preserves the *i*, and makes the latter word consist of five syllables, as if written *extr'ordinary*.

375. Our ancestors, feeling the necessity of showing the quantity of a vowel followed by *ge*, when it was to be short, inserted *d*, as *wedge, ridge, badge, &c.* The same reason induced them to write *colledge* and *alledge* with the *d*; but modern reformers, to the great injury of the language, have expelled the *d*, and left the vowel to shift for itself; because there is no *d* in the Latin words from which these are derived.

376. *D*, like *t*, to which it is so nearly related, when it comes after the accent, and is followed by the diphthong *ie*, *io*, *ia* or *eo*, slides into *gh*, or the consonant *j*; thus *soldier* is universally and justly pronounced as if written *sol-je*; *grandeur*, *gran-jeur*; and *verdure* (where it must be remembered that *u* is a diphthong), *ver-jure*; and, for the same reason, *education* is elegantly pronounced *ed-jucation*. But *duke* and *reduce*, pronounced *juké* and *re-juce*, where the accent is after the *d*, cannot be too much reprobated.

F.

377. *F* has its pure sound in *often, off, &c.* but, in the preposition *of*, slides into its near relation *v*, as if written *ov*. But when this preposition is in composition at the end of a word, the *f* becomes pure; thus, though we sound *of* singly *ov*, we pronounce it as if the *f* were double in *whereof*.

378. There is a strong tendency to change the *f* into *v* in some words, which confounds the plural number and the genitive case: thus we often hear of a *wive's jointure*, a *calve's head*, and *houze rent*, for *wife's jointure*, a *calf's head* and *house rent*.

G.

379. *G*, like *C*, has two sounds, a hard and a soft one: it is hard before *a*, *o*, *u*, *i*, and *r*, as *game, gone, gull, glory, grandeur*. *Gaol* is the only exception; now more commonly written *jail*, 212.

380. *G* before *e* and *i* is sometimes hard and sometimes soft: it is generally soft before words of Greek, Latin, or French original, and hard before words from the Saxon. These latter, forming by far the smaller number, may be considered as exceptions.

381. *G* is hard before *e*, in *gear, geck, geese, geld, gelt, gelding, get, gew-gaw, shagged, snagged, ragged, crugged, scragged, dogged, rugged, dagger, swagger, stagger, trigger, dogger, pettyfogger, tiger, auger, eager, meager, anger, finger, linger, conger, longer, stronger, younger, longest, strongest, youngest*. The last six of these words are generally pronounced in Ireland, so as to let the *g* remain in its nasal sound, without articulating the succeeding vowel; thus *longer* (more long) is so pronounced as to sound exactly like the noun a *long-er* (one who longs or wishes for a thing); the same may be observed of the rest. That the pronunciation of Ireland is analogical, appears from the same pronunciation of *g* in *string-y spring-y*, full of strings and springs; and *wronger* and *wrongest*, for more and most wrong. But though resting the *g* in the nasal sound, without articulating the succeeding vowel, is absolutely necessary in verbal nouns derived from verbs ending in *ing*, as *singer, bringer, slinger, &c.* pronounced *sing-er, bring-er, sling-er, &c.* and not *sing-ger, bring-ger, sling-ger, &c.*; yet in *longer, stronger, and younger; longest, strongest, and youngest*, the *g* ought always to articulate the *e*; thus *younger* ought always to rhyme with the termination *monger*, which has always the *g* hard, and articulating the vowel; and this pronunciation is approved by Mr. Nares. *Forget, target, and together*, fall into this class.—See No. 409.

382. *G* is hard before *i*, in *gibbe, gibbet, gibber, gibberish, gibbous, giddy, gift, gig, riggle, riglet* (properly *gigglet*), *gild, gill* (of a fish), *gimlet, gimp, gird, girdle, girl, girth, gizzard, begin, give, forgive, biggin, piggin, noggin*: also derivatives from nouns or verbs ending in hard *g*, as *druggist, wuggish, riggish, hoggish, doggish, sluggish, rigging, digging, &c.*

383. *G* before *y* is generally soft, as in *clogg,*

apology, &c. and almost in all words from the learned languages; but hard in words from the Saxon, which are formed from nouns or verbs ending in *g* hard, as *shaggy*, *jaggy*, *knaggy*, *snaggy*, *craggy*, *scraggy*, *quaggy*, *swaggy*, *dreggy*, *spriggy*, *twiggy*, *boggy*, *foggy*, *cloggy*, *buggy*, *muggy*. *Gyre*, from its Celtic original, ought to have the *g* hard, but has decidedly adopted the soft *g*.

GN in the same Syllable at the Beginning of a Word.

384. The *g* in this situation is always silent, as *gnaw*, *gnash*, *gnat*, *gnarl*, *gnomon*, *gnomonicks*; pronounced *naw*, *nash*, *nat*, *narl*, *nomon*, *nomonicks*.

GN in the same Syllable at the End of a Word.

385. No combination of letters has more puzzled the critics than this. Two actresses of distinguished merit in *Portia*, in the *Merchant of Venice*, pronounced the word *impugn* differently, and each found her advocate in the newspapers. One critic affirmed that Miss Young, by preserving the sound of *g*, pronounced the word properly; and the other contended that Mrs. Yates was more judicious in leaving it out. The former was charged with harshness; the latter with mutilating the word, and weakening its sound; but, if analogy may decide, it is clearly in favour of the latter; for there is no axiom in our pronunciation more indisputable than that which makes *g* silent before *n* in the same syllable. This is constantly the case in *sign*, and all its compounds, as *resign*, *design*, *consign*, *assign*; and in *indign*, *condign*, *malign*, *benign*; all pronounced as if written *sine*, *resine*, &c. In which words we find the vowel *i* long and open, to compensate, as it were, for the suppression of *g*, as every other word ending in *gn*, when the accent is on the syllable, has a diphthong pronounced like a long open vowel, as *arraign*, *campaign*, *feign*, *reign*, *delgn*; and consequently, unless the vowel *a* can produce some special privilege which the other vowels have not, we must, if we pronounce according to analogy, make the *n* in this situation long, and sound *impugn* as if written *impune*.

386. The same analogy will oblige us to pronounce *impregn*, *oppugn*, *expugn*, *propugn*, as if written *imprene*, *oppune*, *expunc*, *propune*, not only when these verbs are in the infinitive mood, but in the preterits, participles, and verbal nouns formed from them, as *impugned*, *impugning*, and *impugner*, must be pronounced *impuned*, *impuning*, and *impunner*. The same may be observed of the rest. Perhaps it will gratify a curious observer of pronunciation to see the diversity and uncertainty of our orthoëpists in their notation of the words before us:

<i>impüne.</i>	Sheridan, Scott, Nares, Murray. Barclay says the <i>g</i> in this word and its derivatives is mute, but takes no notice of the quantity of the <i>u</i> .
<i>impñn.</i>	Buchanan, Kenrick, Perry.
<i>impñng.</i>	W. Johnston.
<i>oppñne.</i>	Sheridan, Scott, Nares, Murray.
<i>oppñn.</i>	Kenrick, Perry, Barclay.
<i>oppñng.</i>	W. Johnston.
<i>propñne.</i>	Sheridan, Scott, Perry, Nares.
<i>propñng.</i>	Barclay.
<i>imprène.</i>	Nares, Murray.
<i>imprèn.</i>	Sheridan, Kenrick, Perry. Barclay says the <i>g</i> is mute, but says nothing of the quantity of the <i>e</i> .
<i>expñne.</i>	Sheridan, Scott, Nares.
<i>expñn.</i>	Perry, Barclay.
<i>impñner.</i>	Sheridan.
<i>impñned.</i>	Murray.
<i>impñnner.</i>	Perry, Barclay.
<i>oppñgner.</i>	Sheridan.
<i>propñgner.</i>	Sheridan.
<i>propñner.</i>	Scott.
<i>p. opñnner.</i>	Perry.

Nothing is clearer than that all these words ought to follow the same fortune, and should be pronounced alike. How then shall be reconciled Mr. Sheridan's pronouncing *impugn*, *oppugn*, *expugn*, and *propugn*, with the *u* long, and *impregn* with the *e* short? Kenrick, who has not the word *propugn*, is consistent in pronouncing the rest with the vowel short. The same may be observed

of Scott, who adopts the long sound, but has not the word *impregn*. Mr. Perry gives the short sound to all but *propugn*, where he makes the *u* long, but absurdly makes the verbal noun *propunner*; and W. Johnston, who has only *impugn* and *oppugn*, pronounces the vowel short, and spells them *impung* and *oppung*. Barclay, under the word *impugn*, says the *g* in this word and its derivatives is mute, without noticing the quantity of the vowels, but spells *oppugn*, *oppùn*; and of *impregn* only says the *g* is mute; but writes *propugn*, *propung*, in the manner that W. Johnson does *impugn* and *oppugn*: but Mr. Nares observes that analogy seems to require a similar pronunciation in all these words, and that the vowel should be long. The same inconsistency is observable in Mr. Sheridan's pronunciation of the verbal nouns; for he expunges the *g* in *impugner*, and writes it *impuner*, but preserves it in *oppugner* and *propugner*. Mr. Scott has only the word *propugner*, which he very properly, as well as consistently, spells *propunner*. Mr. Perry has *propunner* and *impunner*, and Barclay *impunner* only.—The inconsistency here remarked arises from not attending to the analogy of pronunciation, which requires every verbal noun to be pronounced exactly like the verb, with the mere addition of the termination: thus *singer* is only adding *er* to the verb *sing*, without suffering the *g* to articulate the *e* as it does in *finger* and *linger*, &c. The same may be observed of a *signer*, one who *signs*: and, as a corroboration of this doctrine, we may take notice that the additional *er* and *est*, in the comparatives and superlatives of adjectives, make no alteration in the sound of the radical word; this is obvious in the words *benigner*, *benignest*, &c. except *younger*, *longer*, and *stronger*.—See No. 381.

387. But, in every other compound where these letters occur, the *n* articulates the latter syllable, and *g* is heard distinctly in the former, as *signify*, *malignity*, *assignation*, &c. Some affected speakers, either ignorant of the rules for pronouncing English, or over-complaisant to the French, pronounce *physiognomy*, *cognizance*, and *recognizance*, without the *g*; but this is a gross violation of the first principles of spelling. The only words to keep these speakers in countenance are *poignant* and *champignon*, not long ago imported from France, and pronounced *pointiant*, *championion*. The first of these words will be probably hereafter written without the *g*; while the latter, confined to the kitchen, may be looked upon as technical, and allowed an exclusive privilege.—See *Cognizance*.

388. *Bagnio*, *seignior*, *seraglio*, *intaglio*, and *oglio*, pronounced *ban-yo*, *seen-yar*, *seral-yo*, *intal-yo*, and *ole-yo*, may be considered as foreign combs, and treated with civility, by omitting the *g*, while they do not pervert the pronunciation of our native English words.

GM in the same Syllable.

389. What has been said of *gn* is applicable to *gm*. We have but one word in the language where these letters end a word with the accent on it, and that is *phlegm*; in this the *g* is always mute, and the *e*, according to analogy, ought to be pronounced long, as if the word were written *fleme*; but a short pronunciation of the *e* has generally obtained, and we commonly hear it *flem*: it is highly probable Pope pronounced it properly, where he says,

"Our critics take a contrary extreme;
"They judge with fury, but they write with
phlegm."

Essay on Criticism.

Perhaps it would not be difficult to reduce this word to analogy, as some speakers still pronounce the *e* long: but in the compounds of this word, as in those where *gm* occur, the vowel is shortened, and the *g* pronounced as in *phleg-mon*, *phleg-monous*, *phleg-matick*, and *phleg-magiques*; though Mr. Sheridan, for no reason I can conceive, sinks the *g* in the last word. When these letters end a syllable not under the accent the *g* is silent, but the preceding vowel is shortened: thus *paradigm*, *parapegm*, *diaphragm*, *apophthegm*, are pronounced *paradím*, *parapem*, *diaphram*, *epothem*.

GH.

398. This combination, at the beginning of a word, drops the *h*, as in *ghost*, *ghastly*, *aghost*, *gherkin*, pronounced *gost*, rhyming with *most*; *ghills*, *agist*, *gherkin*: but when these letters come at the end of a word, they form some of the greatest anomalies in our language: *gh*, at the end of words, is generally silent, and consequently the preceding vowel or diphthong is long, as *high*, *nigh*, *thigh*, *neigh*, *weigh*, *inveigh*, *cugh* (the obsolete way of spelling *yeu*, a tree), *lough*, *drugh*, *though*, *although*, *clough* (a cliff), *plough*, *furlough*, *slough* (a miry place), *through*, *throughout*, *thorough*, *borough*, *usquebaugh*, *pugh*!

399. *Gh* is frequently pronounced like *f*, as *lough*, *laughter*, *cough*, *chough*, *clough* (an allowance in weight), *slough* (the cast skin of a snake or more), *enough*, *rough*, *tough*, *trough*.

400. *Gh* is sometimes changed into *ck*, as *hough*, *chough*, *lough*, pronounced *hock*, *shock*, *lock*; sometimes we hear only the *g* sounded, as in *burgh*, *burgher*, and *burghership*.

GHT.

401. *Gh* in this termination is always silent, as *fight*, *night*, *bought*, *fought*, &c. The only exception is *draught*; which, in poetry, is most frequently rhymed with *caught*, *taught*, &c.; but, in prose, is so universally pronounced as if written *draft*, that the poetical sound of it grows uncouth, and is becoming obsolete. *Draughts*, the game, is also pronounced *drafts*. *Drought* (dryness) is vulgarly pronounced *drowth*: it is even written so by Milton; but in this he is not to be imitated, having mistaken the analogy of this word, as well as that of *height*, which he spells *hight*, and which is frequently so pronounced by the vulgar.—See the words *Height* and *Drought*.

H.

402. This letter is no more than breathing forcibly before the succeeding vowel is pronounced. At the beginning of words it is always sounded, except in *heir*, *hetress*, *honest*, *honesty*, *honour*, *honourable*, *herb*, *herbage*, *hospital*, *hostler*, *hour*, *humble*, *humour*, *humourous*, *humoursome*. Ben Jonson leaves out the *h* in *host*, and classes it in this respect with *honest*.

403. *H* is always silent after *r*, as *rhetorick*, *rheoparty*, *rheum*, *rheumatism*, *rhinoceros*, *rhom*, *rhinob*, *myrrh*, *catarrh*, and their compounds.

404. *H* final, preceded by a vowel, is always silent, as *ah*! *hak*! *oh*! *foh*! *strrah*, *hallelujah*, *Messiah*.

405. This letter is often sunk after *w*, particularly in the capital, where we do not find the least distinction of sound between *while* and *wile*, *whet* and *wet*, *where* and *wear*. Trifling as this difference may appear at first sight, it tends greatly to weaken and impoverish the pronunciation, as well as sometimes to confound words of a very different meaning. The Saxons, as Dr. Lowth observes, placed the *h* before the *w*, as *hwæt*; and this is certainly its true place; for, in the pronunciation of all words beginning with *wh*, we ought to breathe forcibly before we pronounce the *w*, as if the words were written *hwæt* *hwile*, &c. and then we shall avoid that feeble, cockney pronunciation, which is so disagreeable to a correct ear.

J.

406. *J* is pronounced exactly like soft *g*, and is perfectly uniform in its sound, except in the word *hallelujah*, where it is pronounced like *y*.

K.

407. *K* has exactly the sound of hard *c*: it is always silent before *n* in the same syllable, as *knee*, *kneel*, *knack*, *knight*, *know*, *knuckle*, *knab*, *knag*, *knop*, *knave*, *knave*, *knit*, *knock*, *knot*, *knoll*.

408. It has been a custom within these twenty years to omit the *k* at the end of words when preceded by *c*. This has introduced a novelty into the language, which is that of ending a word with an unusual letter, and is not only a blemish

in the face of it, but may possibly produce some irregularity in future formatives; for *mimicking* must be written with the *k*, though to *mimic* is without it. If we use *colic* as a verb, which is not uncommon, we must write *collicking* and *collicked*; and though *physicking* and *physicked* are not the most elegant words, they are not quite out of the line of formation. This omission of *k* is, however, too general to be counteracted, even by the authority of Johnson; but it is to be hoped it will be confined to words from the learned languages: and indeed, as there is not the same vanity of appearing learned in the Saxon as in the Latin and Greek, there is no great fear that *thick* and *stick* will lose their *k*, though they never had it in the original.

L.

409. Ben Jonson says *L* melteth in the sounding, and is therefore called a liquid. This, however, cannot be the reason that *r* is called a liquid; for no two letters can, in this respect, be more opposite.—See No. 21.

L is mute in *almond*, *calf*, *half*, *calve*, *halve*, *chaldron*, *fulcon*, *jolk*, *yolk* (better written *yelk*, with the *l* sounded), *fusil*, *halser*, *malmsey*, *salmon*, *salve*, *talbot* (a species of dog).—See *Salve*.

410. *L* is mute also between *a* and *k* in the same syllable, as *balk*, *chalk*, *talk*, *stalk*, *walk*.

411. *L* is silent likewise between *a* and *m* in the same syllable, as *alms*, *balm*, *calm*, *palm*, *psalm*, *qualm*, *shalm*; but when the *m* is detached from the *l*, by commencing another syllable, the *l* becomes audible. Thus, though the *l* is mute in *psalm*, it is always heard in *psalmist*, *psalmody*, and *pal-mistry*; but in *balmy* and *palmy*, where the *y* is an adjective termination of our own, no alteration is made in the sound of the substantive which sinks the *l*, 356. *Calmer* and *calmest* ought to have the *l* mute, as they are only degrees of comparison; and *palmer* and *palmerworm* (except in the language of Scripture, where the *l* in *palmerworm* ought to be heard) are only a sort of verbal nouns, which never alter the sound of the original word, and therefore ought to have the *l* mute. But though *l* is sometimes mute in the noun *salve*, and in the verb *to salve*, it is always heard in *salver* (a kind of plate). See *Salve*.

412. *L* ought always to be suppressed in the auxiliary verbs *would*, *could*, *should*: it is sometimes suppressed in *fault*; but this suppression is become vulgar (see the word). In *soldier*, likewise, the *l* is sometimes suppressed, and the word pronounced *so-fer*; but this is far from being the most correct pronunciation: *l* ought always to be heard in this word, and its compounds *soldierly*, *soldiership*, &c.

413. *L*, preceded by a mute, and followed by *e*, in a final syllable, has an imperfect sound, which does not do much honour to our language. The *l*, in this situation, is neither sounded like *el* nor *le*, but the *e* final is suppressed, and the preceding mute articulates the *l*, without either a preceding or a succeeding vowel; so that this sound may be called a monster in grammar—a syllable without a vowel! This will easily be perceived in the words *able*, *table*, *circle*, &c. which are pronounced as if written *abl*, *tabl*, *ctrl*, &c. and in those still more Gothick and uncouth abbreviated participial terminations, *peopled*, *bridled*, *saddled*, *trifles*, *gaffes*, &c. pronounced *pee-pl'd*, *bri-dl'd*, *sad-dl'd*, *tri-flz*, *gaf-flz*, &c. 359, 472.

414. This letter has not only, like *f* and *s*, the privilege of doubling itself at the end of a word, but it has an exclusive privilege of being double where they remain single; though by what right cannot well be conceived. Thus, according to the general rule, when a verb ends in a single consonant, preceded by a single vowel, and the accent is on the last syllable, the consonant is doubled when a participial termination is added, as, *abet*, *abetting*, *beg*, *begging*, *begin*, *beginning*, &c. but when the accent is not on the last syllable of the verb, the consonant remains single, as *suffered*, *suffering*, *benefiting*, &c. but the *l* is doubled, whether the accent be on the last syllable or not, as *duelling*, *levelling*, *victualling*, *travelling*, *traveller*, &c. This gross irregularity,

however, would not have been taken notice of in this place, if it had not suggested an absurdity in pronunciation, occasioned by the omission of *l*. Though the latter *l* is useless in *traveller*, *victualler*, &c. it is not so in *controller*: for as *ll* is a mark of the deep broad sound of *a* in *bull*, *tull*, *all*, &c. 84; so the same letters are the sign of the long open sound of *o* in *boll* (a round stalk of a plant), *joll*, *noll* (the head), *knoll* (a little hill), *poll*, *clod-poll*, *roll*, *scroll*, *droll*, *troll*, *stroll*, *toll*: for which reason, leaving out one *l* in *bethral*, *catcal*, *miscal*, *oversul*, *forestal*, *reinstal*, *downfal*, *withul*, *control*, and *unrol*, as we find them in Johnson's Dictionary, is an omission of the utmost importance to the sound of the words; for, as the pronunciation sometimes alters the spelling, so the spelling sometimes alters the pronunciation*. Accordingly we find some speakers, chiefly the natives of Ireland, inclined to give the *a* its middle sound to words commencing with *al*, followed by another consonant, because they do not see the *ll* in the *all* with which these words are compounded: thus we sometimes hear *Almighty*, *albeit*, so pronounced as to make their first syllable rhyme with the first of *al-ley*, *val-ley*; and *extol* is pronounced by the Scotch so as to rhyme with *coal*; and with just as much reason as we pronounce *control* in the same manner. For though compounds may, in some cases, be allowed to drop such letters of their simples as either are not necessary to the sound, as in *Christmas*; or might possibly lead to a wrong one, as in *Reconcilable* (which see); yet where, by omitting a letter, the sound may be altered, the omission is pernicious and absurd, 84. The same observations might be extended to the numerous termination *full*, where, in compounds, one *l* is omitted, though nothing can be more certain than that *ful*, with a single *l*, has not the same sound as when this letter is doubled; for who could suppose, without being used to the absurdity, that *fulfil* should stand for *fulfill*? but this abbreviation is too inveterate and extensive to afford any hope that the great arbiters of orthography, the printers, will ever submit to the additional trouble of putting another *l*.

M.

407. *M* preserves its sound in every word, except *comptroller*; *compt* and *account* are now universally written as they are pronounced *count* and *account*; and though *m* and *p* are preserved to the eye in the officer called a *comptroller*, the word is pronounced exactly like the noun *controller*, one who controls.

N.

408. *N* has two sounds; the one simple and pure, as in *man*, *net*, &c.; the other compounded and mixed, as in *hang*, *thank*, &c. The latter sound is heard when it is followed by the sharp or flat guttural mutes, *g* hard, or *k*; or its representatives, *c* hard, *qu*, or *x*: but it may be observed, that so prone is our language to the flat mutes, that when *n* is followed by *k*, or its representatives, the flat mute *g* seems interposed between them: thus *thank*, *banquet*, *anxious*, are pronounced as if written, not *than-k*, *banquet*, *an-xious*, but, *thang-k*, *bangquet*, *angksus*. But this coalition of the sound of *n* and *g*, or hard *c*, is only when the accent is on them; for when the *g* or hard *c* articulates the accented syllable, the *n* becomes pure: thus, though *congress* and *congregate* are pronounced as if written *cong-gre-s* and *cong-gre-gate*, yet the first syllable of *congratulate* and *congressive* ought to be pronounced without the ringing sound of *n*, and exactly like the same syllable in *contrary*. The same difference may be observed in the words *concourse* and *concur*; the first word, which has the accent on the first syllable, is pronounced as if written *cong-course*;

and the last, which has the accent on the second syllable, with *n* pure. It must, however, be carefully observed, that the secondary accent has the same power of melting the *n* into the succeeding hard *g* or *c* as the primary, 382: thus *congregation* and *concremation* have the first syllable pronounced as if written *cong*.

409. It may, perhaps, be worthy of notice, that when *n* is followed by *k*, the *k* has a finished or complete sound, as in *link*, *think*, &c.; but when *n* is followed by hard *g*, the *g* has an unfinished or imperfect sound, as in *hang*, *bang*, &c. where we may observe the tongue to rest upon the palate in the sound of *g*; but when this letter is carried off to articulate another syllable, its sound is completed, as in *anger* and *Bangor* (the name of a town), where the sound of *g* may be perceived to be very different from the noun *hanger* (a sword), and *banger* (one who beats or bangs). This perfect sound of *g* is heard in all simples, as *anger*, *angle*, *finger*, *linger*, *conger*, *anguish*, *language*, *distinguish*, *extinguish*, *unguent*: but in words derived from verbs or adjectives, ending in *ng*, the *g* continues imperfect, as it was in the theme. Thus a *singer* (one who sings), does not finish the *g* like *finger*, but is merely *er* added to *sing*: the same may be observed of *sing-ing*, *bring-ing*, and *hang-ing*. So adjectives formed by the addition of *y* have the imperfect sound of *g*, as in the original word: thus *springy*, *stringy*, *dungy*, and *wingy*, are only the sound of *e* added to *spring*, *string*, *dung*, and *wing*; but the comparative and superlative adjectives, *longer*, *stronger*, and *younger*; *longest*, *strongest*, and *youngest*; have the *g* hard and perfectly sounded, as if written *long-ger*, *strong-ger*, *young-ger*, &c. where the *g* is hard, as in *finger*, *linger*, &c. And it may be looked upon as a general rule, that nouns, adjectives, or verbs, do not alter their original sound upon taking an additional syllable. In these three words, therefore, the Irish pronounce more agreeably to analogy than the English; for, if I mistake not, they do not articulate the *g*, 381.

410. Hitherto we have considered these letters as they are heard under the accent; but when they are unaccented in the participial termination *ing*, they are frequently a cause of embarrassment to speakers who desire to pronounce correctly. We are told, even by teachers of English, that *ing*, in the word *singing*, *bringing*, and *swinging*, must be pronounced with the ringing sound, which is heard when the accent is on these letters, in *king*, *sing*, and *ring*, and not as if written without the *g*, as *singin*, *bringin*, *swingin*. No one can be a greater advocate than I am for the strictest adherence to orthography, as long as the publick pronunciation pays the least attention to it; but when I find letters given up by the publick, with respect to sound, I then consider them as ciphers; and, if my observation does not greatly fail me, I can assert that our best speakers do not invariably pronounce the participial *ing*, so as to rhyme with *sing*, *king*, and *ring*. Indeed, a very obvious exception seems to offer itself in those verbs that end in these letters, as a repetition of the ringing sound in successive syllables would produce a *Tautophony*, (see the word,) and have a very bad effect on the ear; and therefore, instead of *singing*, *bringing*, and *swinging*, our best speakers are heard to pronounce *sing-in*, *bring-in*, and *swing-in*; and for the very same reason that we exclude the ringing sound in these words, we ought to admit it when the verb ends with *in*; for if, instead of *singing*, *pinning*, and *beginning*, we should pronounce *sin-nin*, *pin-nin*, and *begin-nin*, we should fall into the same disgusting repetition as in the former case. The participial *ing*, therefore, ought always to have its ringing sound, except in those words formed from verbs in this termination; for *writing*, *reading*, and *speaking*, are certainly preferable to *writin*, *readin*, and *speakin*, wherever the pronunciation has the least degree of precision or solemnity.

411. *N* is mute when it ends a syllable, and is preceded by *l* or *m*, as *kiln*, *hymn*, *limn*, *solemn*, *column*, *autumn*, *condemn*, *contemn*. In *hymning*, and *limning*, the *n* is generally pronounced, and sometimes, in very solemn speaking, in *condemning* and *contemning*; but, in both cases, contrary to analogy, which forbids any sound in the participle that was not in the verb, 386.

* This omission of the letter *L*, I see, has been rectified in the last quarto edition of Johnson's Dictionary; and it would have been well if the Editors had acknowledged their obligations, and extended their emendations to the word *Codde*, and several others.

P.

41. This letter is mute before *s* and *t* at the beginning of words, *psalm*, *psalmist*, *psalmody*, *psalmography*, *psalter*, *psaltery*; the prefix *pseudo*, signifying false, as *pseudography*, *pseudology*, and the interjection *psaw*! To these we may add, *psion*, *psylism*, *psysmagogue*. It is mute in the middle of words between *m* and *t*, in *empty*, *impetress*, *peremptory*, *sumptuous*, *presumptuous*, *redemption*, *exemption*, and *raspberry*. In *cupboard* it coalesces with *and* and falls into its flat sound *h*, as if written *cubboard*. It is mute in a final syllable between the same letters, as *tempt*, *at-tempt*, *contempt*, *exempt*, *prompt*, *accompt*. In *script* it is mute between *t* and *t*; and in the military corps (a body of troops), both *p* and *s* are mute, as custom has acquiesced in the French pronunciation of most military terms.

PH.

42. *Ph* is generally pronounced like *f*, as in *philosophy*, *phantom*, &c. In *nephew* and *Stephen* has the sound of *v*. In *diphthong* and *triphthong* the sound of *p* only is heard; and the *h* is mute likewise in *naphtha*, *ophthalmick*, &c. In *epithym* both letters are dropped. The same may be observed of *phthisis*, *phthisic*, and *phthisical*. In *sapphire* the first *p* slides into *ph*, by an accidental coalition of similar letters very agreeable to analogy.—See *Exaggerate*.

Q.

43. *Q* has always the sound of *k*: it is constantly followed by *u*, pronounced like *w*; and its general sound is heard in *quack*, *quill*, *queen*, &c. pronounced *kwaek*, *kwill*, *kween*, &c. That the *u* subjoined to this letter has really the power of *r* may be observed in the generality of words where *s* succeeds; for we find the vowel go into the broad sound in *quart*, *quarrel*, *quantity*, &c. as much as in *war*, *warrant*, *want*, &c. 85. But it must be carefully noted that this broad sound is only heard under the accent; when the *a*, preceded by *qu*, is not accented, it has the sound of every other accented *a* in the language, 92. Thus the *a* in *quarter*, *quarrel*, *quadrant*, &c. because it has the accent, is broad: the same may be observed when the accent is secondary only, 522, 523, as in *quadregesimal*, *quadrisyllable*, &c.; but when the accent is on the succeeding syllable, as in *quadralick*, *quadrangular*, &c. the *a* goes into the obscure sound approaching to the Italian *a*, 92.

44. As a great number of words, derived from the French, have these letters in them, according to our usual complaisance for that language, we adopt the French pronunciation: thus in *coquet*, *decoquet*, *eliquette*, *masquerade*, *harlequin*, *oblique*, *antique*, *opague*, *pique*, *pliquant*, *pliquet*, *burlesque*, *grotesque*, *casque*, *maque*, *quadrille*, *quater-cousin*, the *qu* is pronounced like *k*. *Quoit* and *quoit* ought to be written and pronounced *coif*, *coif*. *Paquet*, *laquey*, *chequer*, and *riague*, have been very properly spelled by Johnson as they are pronounced, *packet*, *lackey*, *checker*, and *risk*. *Quoth* ought to be pronounced with the *u*, as if written *haruth*, and therefore is not irregular. *Liquor* and *harlequin* always lose the *u*; and *conquer*, *conquerable*, and *conquerer*, sometimes, particularly on the stage. This deviation, however, seems not to have gone beyond recovery; and *conquest* is still regularly pronounced *conkwest*. *Quote* and *quotation* are perfectly regular, and ought never to be pronounced, as some do, *cote* and *cotation*. *Cirque*, contracted from *circus*, and *cinqus*, *cinqus-fall*, *cinqus-ports*, *cinqus-spotted*, are pronounced *sirk* and *sink*; and *critique*, when we mean a criticism, to distinguish it from *critick*, is pronounced *critick*, rhyming with *speak*. See *Quoit* and *Quotation*.

R.

45. This letter is never silent, but its sound is sometimes transposed. In a final unaccented syllable, terminating with *re*, the *r* is pronounced after the *e*, as *acre*, *lucre*, *sabre*, *fibra*, *ochre*, *cagre*, *mougre*, *aspulchre*, *theatre*, *spectre*, *metre*, *poire*, *olive*, *olive*, *entre*, *metre*, *accouire*, *massacre*;

to which we may add, *centre* and *acceptre*; sometimes written *center* and *accepter*; but, in my opinion, very improperly, as this peculiarity is fixed, and easily understood; while reducing *meagre* to *meager* disturbs the rule, and adds another anomaly to our pronunciation, by making the *g* hard before *e*, 98.

417. The same transposition of *r* is always perceived in the pronunciation of *apron* and *iron*; and often in that of *citron* and *saffron*, as if written *apurn*, *lurn*, *citurn*, *saffurn*: nor do I think the two first can be pronounced otherwise without a disagreeable stiffness; but the two last may preserve the *r* before the vowel with great propriety. (*Children* and *hundred* have slid into this analogy, when used colloquially, but preserve the *r* before the *e* in solemn speaking.)

418. As this letter is but a jar of the tongue, sometimes against the roof of the mouth, and sometimes at the orifice of the throat, it is the most imperfect of all the consonants; and, as its formation is so indefinite, no wonder, when it is not under the accent, that the vowels which precede it should be so indefinite in their sounds, as we may perceive in the words *frtar*, *ltur*, *elitr*, *nadir*, *mayer*, *martyr*, which, with respect to sound, might be written *frtur*, *ltur*, *elitur*, *natur*, *matur*, *matur*, 98. These inaccuracies in pronunciation, says an ingenious writer, "we seem to have derived from our Saxon ancestors. Dr. Hicks observes, in the first chapter of his Saxon Grammar, that 'Comparativa apud eos (Anglo-Saxones) indifferenter exiunt in *ar*, *er*, *ir*, *or*, *ur*, *yr*; et Superlativa in *ast*, *est*, *ist*, *ost*, *ust*, *yst*; participia presentis temporis in *and*, *end*, *ind*, *ond*, *und*, *ynd*; preteriti verò in *ad*, *ed*, *id*, *od*, *ud*, *yd*; pro vario scilicet vel *avi* vel loci dialecto.' Upon various other occasions also they used two or more vowels and diphthongs indifferently; and this not always from difference of age or place, because these variations are frequently found in the same page. This will account for the difference between the spelling and pronunciation of such anomalous words as *busy* and *bury*, now pronounced as if written *bisy* and *bery* (the *i* and *e* having their common short sound), and formerly spelt indifferently with *e*, *u*, or *y*."—*Essay on the Harmony of Language*.—Robinson, 1774.

419. There is a distinction in the sound of this letter, scarcely ever noticed by any of our writers on the subject, which is, in my opinion, of no small importance; and that is, the rough and smooth *r*. Ben Jonson, in his Grammar, says it is sounded firm in the beginning of words, and more liquid in the middle and ends, as in *rarer*, *river*, and so in the Latin. The rough *r* is formed by jarring the tip of the tongue against the roof of the mouth near the fore teeth: the smooth *r* is a vibration of the lower part of the tongue, near the root, against the inward region of the palate, near the entrance of the throat. This latter *r* is that which marks the pronunciation of England, and the former that of Ireland. In England, and particularly in London, the *r* in *lord*, *bard*, *card*, *regard*, &c. is pronounced so much in the throat as to be little more than the middle or Italian *a*, lengthened into *laad*, *baad*, *caad*, *regaad*; while in Ireland the *r*, in these words, is pronounced with so strong a jar of the tongue against the forepart of the palate, and accompanied with such an aspiration or strong breathing at the beginning of the letter, as to produce that harshness we call the Irish accent. But if this letter is too forcibly pronounced in Ireland, it is often too feebly sounded in England, and particularly in London, where it is sometimes entirely sunk; and it may, perhaps, be worthy of observation, that, provided we avoid a too forcible pronunciation of the *r*, when it ends a word, or is followed by a consonant in the same syllable, we may give as much force as we please to this letter at the beginning of a word, without producing any harshness to the ear: thus *Rome*, *river*, *rage*, may have the *r* as forcible as in Ireland; but *bar*, *bard*, *card*, *hard*, &c. must have it nearly as soft as in London.

420. As the former letter was a jar, this is a hiss; but a hiss which forms a much more des-

nite and complete consonant than the other. This consonant, like the other mutes, has a sharp and a flat sound; the sharp sound is heard in the name of the letter, and in the words *same*, *sin*, *this*; the flat sound is that of *z*, heard in *is*, *his*, *was*; and these two sounds, accompanied by the aspirate, or *h*, form all the varieties found under this letter, 41.

421. *S* has always its sharp hissing sound at the beginning of words, as *soon*, *sin*, &c. and when it immediately follows any of the sharp mutes, *f*, *k*, *p*, *t*, as *scoffs*, *blocks*, *hips*, *pits*, or when it is added to the mute *e* after any of these letters, as *strikes*, *flakes*, *pipes*, *miles*.

422. *S* is sharp and hissing at the end of the monosyllables *yes*, *this*, *us*, *thus*, *gas*; and at the end of words of two or more syllables, if it be preceded by any of the vowels but *e*, and forms a distinct syllable: thus *es* in *pipes* and *miles* do not form a distinct syllable; and as they are preceded by a sharp mute, the *s* is sharp likewise; but in *prices* these letters form a syllable, and the *s* is pronounced like *z*, according to the general rule.

423. The only exception to this rule is, the words *as*, *whereas*, *has*, *his*, *was*; for *bias*, *dowlas*, *Atlas*, *metropolis*, *basis*, *chaos*, *trijos*, *pus*, *chorus*, *cyprus*, &c. have the final *s* pronounced sharp and hissing.

424. Agreeably to this rule, the numerous terminations in *ous*, as *plous*, *superfluous*, &c. have the *s* sharp, and are pronounced exactly like the pronoun *us*; and every double *s* in the language is pronounced in the same manner, except in the words *dissolve*, *possess*, and their compounds; *scissors*, *hussy*, and *hussar*.

425. *S* in the inseparable preposition *dis*, when either the primary or secondary accent is on it, 522, is always pronounced sharp and hissing: the word *dismal*, which seems to be an exception, is not so in reality; for, in this word, *dis* is not a preposition: thus *dissolute*, *dissonant*, &c. with the primary accent on *dis*; and *disability*, *disagree*, &c. with the secondary accent on the same letters, have the *s* sharp and hissing; but when the accent is on the second syllable, the *s* is either sharp or flat, as it is followed either by a vowel, or a sharp or flat consonant: thus *disable*, *disaster*, *disease*, *disinterested*, *dishonest*, *disorder*, *disuse*, have all of them the *s* in *dis* flat like *z*, because the accent is not on it, and a vowel begins the next syllable; but *discredit*, *disfavour*, *diskindness*, *dispense*, *distate*, have the *s* sharp and hissing, because a sharp consonant begins the succeeding accented syllable; and *disband*, *disdain*, *disgrace*, *disjoin*, *disvalue*, have the *s* flat like *z*, because they are succeeded by a flat consonant in the same situation, 425.

426. *S* in the inseparable preposition *mis* is always sharp and hissing, whether the accent be on it or not; or whether it be followed either by a vowel, or a sharp or flat consonant, as *miscreant*, *misaim*, *misapply*, *misorder*, *misuse*, *misbegot*, *misdeem*, *misgovern*, &c.—See the prefix *Mis*.

427. *S*, followed by *e* in the final syllable of adjectives, is always sharp and hissing, as *base*, *obese*, *precise*, *concise*, *globose*, *verbose*, *horbose*, *pullcose*, *tenebriose*, *corticose*, *jocose*, *olcose*, *rugose*, *desidiose*, *close*, *silliculose*, *calculose*, *tumulose*, *animose*, *venenose*, *arenose*, *siliginose*, *crinose*, *loose*, *operose*, *morose*, *edematose*, *comatose*, *acitose*, *agnose*, *siliquose*, *actuose*, *diffuse*, *profuse*, *occlude*, *recluse*, *abstruse*, *obtus*, except *rise* and *otherguise*, and the pronominal adjectives *these* and *those*.

428. *S*, in the adjective termination *sive*, is always sharp and hissing, as *suasive*, *persuasive*, *assuasive*, *dissuasive*, *adhesive*, *cohesive*, *decisive*, *precisive*, *incisive*, *derisive*, *recitrative*, *visive*, *plausive*, *abusive*, *diffusive*, *infusive*, *inclusive*, *conclusive*, *exclusive*, *clusive*, *delusive*, *prelusive*, *allusive*, *illusive*, *collusive*, *amusive*, *obtrusive*, &c.

429. *S*, in the adjectives ending in *sory*, is always sharp and hissing, as *suasory*, *persuasory*, *decisory*, *derisory*, *delusory*, &c.

430. The same may be observed of *s* in the adjectives ending in *sone*, as *troublesome*, &c. and substantives in *osity*, *generosity*, &c.

431. *Se*, preceded by the liquids *l*, *n*, or *r*, has the *s* sharp and hissing, as *pulse*, *appulse*, *dense*, *tense*, *intense*, *sense*, *verse*, *adverse*, &c. except *cleanse*.

S pronounced like *z*.

432. *S* has always its flat buzzing sound, as it may be called, when it immediately follows any of the flat mutes *b*, *d*, *g* hard, or *v*, as *ribs*, *heads*, *rags*, *staves*, 24.

433. *S* is pronounced like *z*, when it forms an additional syllable with *e* before it, in the plurals of nouns, and the third person singular of verbs; even though the singulars and first persons end in sharp hissing sounds, as *asses*, *riches*, *cages*, *boxes*, &c.: thus *prices* and *prizes* have both the final *s* flat, though the preceding mute in the first word is sharp, 422.

434. As *s* is hissing, when preceded by a liquid, and followed by *e* mute, as *transe*, *tense*, &c.; so, when it follows any of the liquids without the *e*, it is pronounced like *z*, as *morals*, *means*, *seems*, *hers*. In the same analogy, when *s* comes before any of the liquids, it has the sound of *z*, as *cosmetick*, *dismal*, *pismire*, *chasm*, *prism*, *theism*, *schism*, and all polysyllables ending in *asm*, *ism*, *osm*, or *ysm*, as *enthusiasm*, *judalism*, *microcosm*, *paroxysm*, &c.

435. *S*, in the preposition *dis*, is either sharp or flat, as it is accented or unaccented, as explained above; but it ought always to be pronounced like *z*, when it is not under the accent, and is followed by a flat mute, a liquid, or a vowel, as *disable*, *disease*, *disorder*, *disuse*, *disband*, *disdain*, *disgrace*, *disvalue*, *disjoin*, *dislike*, *dislodge*, *dismay*, *dismember*, *dismount*, *dismiss*, *disnatured*, *disrank*, *disrelish*, *disrobe*, 425. Mr. Sheridan, and those orthoëpists who have copied him, seem to have totally overlooked this tendency in the liquids to convert the *s* to *z* when this letter ends the first syllable without the accent, and the liquids begin the second syllable with it.

436. *S* is pronounced like *z*, in the monosyllables *as*, *is*, *his*, *was*, *these*, *those*, and in all plurals whose singulars end in a vowel, or a vowel followed by *e* mute, as *commas*, *operas*, *shoes*, *aloes*, *dues*, and consequently when it follows the *w* or *y*, in the plurals of nouns, or the third person singular of verbs, as *ways*, *betrays*, *news*, *views*, &c.

437. Some verbs ending in *se* have the *s* like *z*, to distinguish them from nouns or adjectives of the same form.

Nouns.	Verbs.	Nouns.	Verbs.
grease	to grease	excuse	to excuse
close	to close	refuse	to refuse
house	to house	diffuse	to diffuse
mouse	to mouse	use	to use
louse	to louse	rise	to rise
abuse	to abuse	premise	to premise.

438. *Sy* and *sey*, at the end of words, have the *s* pronounced like *z*, if it has a vowel before it, with the accent on it, as *easy*, *greasy*, *queasy*, *cheesy*, *daisy*, *misy*, *rosy*, *causy*, *noisy*; but if the accent is on the antepenultimate syllable the *s* is sharp, as *heresy*, *poesy*, &c.; if a sharp mute precede, the *s* is sharp, as *tricksy*, *tipsy*; if a liquid precede, and the accent is on the penultimate syllable, the *s* is flat, as *palsy*, *flimsy*, *clumsy*, *punsy*, *lansy*, *phrensy*, *quinsy*, *tolsey*, *whimsey*, *malmsey*, *jersey*, *kersey*. *Pursy* has the *s* sharp and hissing from its relation to *purse*, and *minstrelsy* and *controversy* have the antepenultimate and preantepenultimate accent: thus we see why *busy*, *bousy*, *lonsy*, and *drowsy*, have the *s* like *z*, and *jealousy* the sharp hissing *s*.

439. *S*, in the termination *sible*, when preceded by a vowel, is pronounced like *z*, as *persuasive*, *risible*, *visible*, *divisible*, *infusible*, *conclusible*; but if a liquid consonant precede the *s*, the *s* then becomes sharp and hissing, as *sensible*, *responsible*, *tensible*, *reversible*, &c.

440. *S*, in the terminations *sary* and *sory*, is sharp and hissing, as *dispensary*, *adversary*, *suasory*, *persuasory*, *decisory*, *incisory*, *derisory*, *depulsory*, *compulsory*, *incensory*, *compensory*, *suspensory*, *sensory*, *reponsory*, *cursor*, *discursory*, *lusory*, *clusory*, *delusory*, *illusory*, *collusory*. *Rusary* and *misery*, which have the *s* like *z*, are the only exceptions.

441. *S*, in the termination *ise*, is pronounced like *z*, except in the adjectives before mentioned, and a few substantives, such as *paradise*, *anise*, *rise*, *grise*, *verdigrise*, *mortise*, *travise*.

442. *S*, in the terminations *sal* and *sel*, when preceded by a vowel, is pronounced like *z*, as *nasal*, *ousel*, *housel*, *nousel*, *reprisal*, *proposel*, *refusal*, and sharp and hissing when preceded by a consonant, as *mensal*, *universal*, &c.

443. *S*, in the terminations *son*, *sen*, and *sin*, is pronounced like *z*, as *reason*, *season*, *treason*, *car-gason*, *diapason*, *orison*, *benison*, *venison*, *denison*, *foison*, *poison*, *prison*, *dunson*, *crimson*, *chosen*, *resin*, *rosin*, *raisin*, *cousin*. But the *s* in *masin*, *bason*, *garrison*, *cuparison*, *comparison*, *parson*, and *person*, is sharp and hissing, 170.

444. *S*, after the inseparable prepositions *pre* and *pro*, is sharp, as in *presage*, *preside*, *presidial*, *presence*, *presentation*, *prosecute*, *prosecution*, *pro-sody*, *prosopopeia*, but flat like *z* in *presence*, *pre-sident*, *presidency*, *presume*, *presumptive*, *pre-sumption*; but where the *pre* is prefixed to a word, which is significant when alone, the *s* is always sharp, as *pre-suppose*, *pre-surmise*, &c.

445. *S*, after the inseparable preposition *re*, is almost always pronounced like *z*, as *resemble*, *resent*, *resentment*, *reserve*, *reservation*, *reservoir*, *residue*, *resident*, *residential*, *reside*, *resign*, *resignment*, *resignation*, *resilience*, *resiliency*, *resilition*, *resin*, *resist*, *resistance*, *resolve*, *resolution*, *resolute*, *result*, *resume*, *resumption*, *resurrection*.

446. *S* is sharp after *re* in *resuscitation*, *resupination*, &c. and when the word added to it is significant by itself, as *research*, *resiege*, *rescat*, *resurvey*. Thus to *resign*, with the *s* like *z*, signifies to yield up; but to *re-sign*, to sign again, has the *s* sharp, as in *sign*: so to *resound*, to reverberate, has the *s* like *z*; but to *re-sound*, to sound again, has the *s* sharp and hissing.

447. Thus we see, after pursuing this letter through all its combinations, how difficult it often is to decide by analogy, when we are to pronounce it sharp and hissing, and when flat like *z*. In many cases it is of no great importance: in others, it is the distinctive mark of a vulgar or a polite pronunciation. Thus *design* is never heard with the *s* like *z* but among the lowest order of the people; and yet there is not the least reason from analogy why we should not pronounce it in this manner, as well as in *resign*: the same may be observed of *preside* and *desist*, which have the *s* sharp and hissing; and *reside* and *resist*, where the same letter is pronounced like *z*. It may, however, be remarked, that *re* has the *s* like *z* after it more regularly than any other of the prefixes.

448. It may, perhaps, be worthy of observation, that though *s* becomes sharp or flat, as it is followed by a sharp or flat consonant, or a liquid, as *cosmetick*, *dismal*, *disband*, *disturb*, &c. yet if it follows a liquid or a flat consonant, except in the same syllable, it is generally sharp. Thus the *s* in *tubs*, *suds*, &c. is like *z*; but in *subserre*, *sub-side*, *subsist*, it is sharp and hissing: and, though it is flat in *absolte*, it is sharp in *absolute* and *ab-solution*; but if a sharp consonant precede, the *s* is always sharp and hissing, as *tipsy*, *tricksy*: thus in the pronunciation of the word *Glasgow*, as the *s* is always sharp and hissing, we find the *g* invariably slide into its sharp sound *k*; and this word is always heard as if written *Glaskow*. We see, therefore, that a preceding sharp consonant makes the succeeding *s* sharp, but not inversely.

449. *S* is always sharp and hissing when followed by *c*, except in the word *discern*.

S aspirated, or sounding like sh, or zh.

450. *S*, like its fellow dental *t*, becomes aspirated, and goes either into the sharp sound *sh*, or the flat sound *zh*, when the accent is on the preceding vowel, and it is followed by a semi-consonant diphthong, as *nauseate*, or a diphthongal vowel, as *pleasure*, pronounced *nausheate* and *plezhure*, 193.

451. *S*, in the termination *slon*, preceded by a vowel, goes into the flat aspiration *zh*, as *evasion*, *evastion*, *decision*, *confusion*, pronounced *evazhion*, &c.; but when it is preceded by a liquid, or another *s*, it has the sharp aspiration *sh*, as *expulsion*, *dimension*, *reversion*, pronounced *expulshion*, &c.

452. The same may be observed of *s* before *u*: when a vowel precedes the *s*, with the accent on it, the *s* goes into the flat aspiration, as *pleasure*, *measure*, *treasure*, *rasure* pronounced *plezhure*,

&c.; but when preceded by a liquid, or another *s*, it is sounded *sh*, as *sensual*, *censure*, *tonsure*, *pressure*, pronounced *senshual*, *censhure*, &c.

453. From the clearness of this analogy, we may perceive the impropriety of pronouncing *Asia* with the sharp aspiration, as if written *Ashia*; when, by the foregoing rule, it ought undoubtedly to be pronounced *Azhia*, rhyming with *Arpasia*, *cuthanasia*, &c. with the flat aspiration of *z*. This is the Scotch pronunciation of this word, and unquestionably the true one: but if I mistake not, *Persia* is pronounced in Scotland with the same aspiration of *s*, and as if written *Perzhia*; which is as contrary to analogy as the other is agreeable to it.

454. The tendency of the *s* to aspiration before a diphthongal sound has produced several anomalies in the language, which can only be detected by recurring to first principles: for which purpose it may be necessary to observe, that the accent or stress naturally preserves the letters in their true sound; and as feebleness naturally succeeds force, so the letters, immediately after the stress, have a tendency to slide into different sounds, which require less exertion of the organs. Hence the omission of one of the vowels in the pronunciation of the last syllable of *fountain*, *mountain*, *captain*, &c. 208: hence the short sound of *i* in *respice*, *servile*, &c.; hence the *s* pronounced like *z* in *disable*, where the accent is on the second syllable; and like *s* sharp and hissing in *disability*, where there is a secondary stress on the first syllable; and hence the difference between the *x* in *exercise*, and that in *exert*; the former having the accent on it, being pronounced *eks*, as if the word were written *ecksercise*; and the latter without the accent, pronounced *gz*, as if the word were written *egzert*. This analogy leads us immediately to discover the irregularity of *sure*, *sugar*, and their compounds, which are pronounced *shure* and *shugar*, though the accent is on the first syllable, and ought to preserve the *s* without aspiration; and a want of attending to this analogy has betrayed Mr. Sheridan into a series of mistakes in the sound of *s* in the words *suicide*, *presume*, *resume*, &c. as if written *shoo-icide*, *pre-zhoom*, *re-zhoom*, &c.: but if this is the true pronunciation of these words, it may be asked, why is not *suit*, *suitable*, *pursue*, &c. to be pronounced *shoot*, *shoot-able*, *pur-shoo*? &c. If it be answered, Custom; I own this decides the question at once. Let us only be assured, that the best speakers pronounce *a* like *o*, and that is the true pronunciation: but those who see analogy so openly violated, ought to be assured of the certainty of the custom before they break through all the laws of language to conform to it, 60, 71.—See *Superable*.

455. We have seen, in a great variety of instances, the versatility of *s*, how frequently it slides into the sound of *z*: but my observation greatly fails me if it ever takes the aspiration, unless it immediately follows the accent, except in the words *sure*, *sugar*, and their compounds; and these irregularities are sufficient, without adding to the numerous catalogue we have already seen under this letter.

456. The analogy we have just been observing directs us in the pronunciation of *usury*, *usurer*, and *usurious*. The two first have the accent on the first syllable, which permits the *s* to go into aspiration, as if the words were written *uzhury* and *uzhurer*: but the accent being on the second *u* in the last word, the *s* is prevented from going into aspiration, and is pronounced *uzurious*, 479, 480.

457. Though the *ss* in *passion*, *mission*, &c. belong to separate syllables, as if spelt *pas-sion*, *mis-sion*, &c. yet the accent presses the first into the same aspiration as the last, and they are both pronounced with the sharp aspirated *hiss*, as if they were but one *s*.—See *Exaggerate*.

458. *S* is silent in *isle*, *island*, *aisle*, *demesne*, *pulsne*, *viscount*, and at the end of some words from the French, as *pas*, *sous*, *vis-à-vis*; and in *corps* the two last letters are silent, and the word pronounced *core*, 412.

T.

459. *T* is the sharp sound of *D*, 41; but though the latter is often changed into the former, the

former never goes into the latter. The sound to which this letter is extremely prone is that of *s*. This sound of *t* has greatly multiplied the hissing in our own language, and has not a little promoted it in most modern tongues. That *p* and *b*, *t* and *d*, *k* and *g* hard, *s* and *x*, should slide into each other, is not surprising, as they are distinguished only by a nice shade of sound; but that *t* should alter to *s* seems a most violent transition, till we consider the organick formation of these letters, and of those vowels which always occasion it. If we attend to the formation of *t*, we shall find that it is a stoppage of the breath by the application of the upper part of the tongue near the end, to the correspondent part of the palate; and that if we just detach the tongue from the palate, sufficiently to let the breath pass, a hiss is produced which forms the letter *s*. Now the vowel that occasions this transition of *t* to *s* is the squeezed sound of *e*, as heard in *y* consonant, 8: which squeezed sound is a species of hiss; and this hiss, from the absence of accent, easily slides into the *s*, and *s* as easily into *sh*: thus mechanically is generated that hissing termination *tion*, which forms but one syllable, as if written *shun*, 195.

400. But it must be carefully remarked, that this hissing sound, contracted by the *t* before certain diphthongs, is never heard but after the accent: when the accent falls on the vowel immediately after the *t*, this letter, like *s* or *c* in the same situation, preserves its simple sound: thus the *c* in *social* goes into *sh*, because the accent is on the preceding vowel; but it preserves the simple sound of *s* in *society*, because the accent is on the succeeding vowel. The same analogy is obvious in *satiare* and *satiety*; and is perfectly agreeable to that difference made by accent in the sound of other letters, 71.—See *Satiety*.

401. As the diphthongs *ia*, *ie*, *io*, or *iu*, when coming after the accent, have the power of drawing the *t* into *sh*, so the diphthongal vowel *u*, in the same situation, has a similar power. If we analyze the *u*, we shall find it commence with the squeezed sound of *e*, equivalent to the consonant *y*, 39. This letter produces the small hiss before taken notice of, 450, and which may be observed in the pronunciation of *nature*, and borders so closely on *natsur*, that it is no wonder Mr. Sheridan adopted this latter mode of spelling the word to express its sound. The only fault of Mr. Sheridan in depicting the sound of this word seems to be that of making the *u* short, as in *bur*, *cur*, &c. as every correct ear must perceive an elegance in lengthening the sound of the *u*, and a vulgarity in shortening it. The true pronunciation seems to lie between both.

402. But Mr. Sheridan's greatest fault seems to lie in not attending to the nature and influence of the accent: and because *nature*, *creature*, *feature*, *fortune*, *misfortune*, &c. have the *t* pronounced like *ch*, or *tsh*, as if written *crea-chure*, *fea-tshure*, &c. he has extended this change of *t* into *tch*, or *tsh*, to the word *tune*, and its compounds, *tutor*, *tutress*, *tutorage*, *tutelage*, *tutelar*, *tutulary*, &c. *tumult*, *tumour*, &c. which he spells *tshoon*, *tshoon-eble*, &c. *tshoo-tur*, *tshoo-triss*, *tshoo-tur-idzh*, *tshoo-tel-idzh*, *tshoo-tel-er*, *tshoo-tel-er-y*, &c. *tshoo-mult*, *tshoo-mur*, &c. Though it is evident, from the foregoing observations, that as the *u* is under the accent, the preceding *t* is preserved pure, and that the words ought to be pronounced as if written *teutor*, *teumult*, *teumour*, &c. and neither *tshootur*, *tshoomult*, *tshoomour*, as Mr. Sheridan writes them, nor *tootor*, *toomult*, *toomour*, as they are often pronounced by vulgar speakers.—See *Superable*.

403. Here, then, the line is drawn by analogy. Whenever *t* comes before these vowels, and the accent immediately follows it, the *t* preserves its simple sound, as in *Miltiades*, *elephantiasis*, *satiety*, &c.; but when the accent precedes the *t*, it then goes into *sh*, *tch*, or *tsh*, as *natsure* or *natchure*, *na-shion*, *utr-tshue* or *virtchue*, *patient*, &c. or *nashion*, *pashent*, &c. 404. In similar circumstances the same may be observed of *d*, as *arduous*, *hideous*, &c. 293, 294, 376. Nor is this tendency of *t* before long *u* found only when the accent immediately precedes; for we hear the same aspiration of this letter in *spiritual*, *spirituous*, *signature*, *ligature*, *forfeiture*, as if written

spiritchual, *spiritchuous*, *signatshure*, *ligatshure*, *forfeittshure*, &c. where the accent is two syllables before these letters; and the only termination which seems to refuse this tendency of the *t* to aspiration is that in *tude*, as *latitude*, *longitude*, *multitude*, &c.

404. This pronunciation of *t* extends to every word where the diphthong or diphthongal sound commences with *i* or *e*, except in the terminations of verbs and adjectives, which preserve the simple in the augment, without suffering the *t* to go into the hissing sound, as *I pity*, *thou pitiest*, *he pities*, or *pitied*, *mightier*, *worthier*, *twentieth*, *thirtieth*, &c. This is agreeable to the general rule, which forbids the adjectives or verbal terminations to alter the sound of the primitive verb or noun.—See No. 381. But in the words *bestial*, *celestial*, *frontier*, *admixture*, &c. where the *s*, *x*, or *n* precedes the *t*, this letter is pronounced like *tch* or *tsh*, instead of *sh*, 291, as *best-tchial*, *celes-tchial*, *front-tcheer*, *admix-tchion*, &c.; as also when the *t* is followed by *ou*, whatever letter precede, as *righteous*, *piteous*, *plenteous*, &c. pronounced *right-cheous*, *pit-cheous*, *plen-tchous*, &c. The same may be observed of *t* when succeeded by *ou*, as *unctuous*, *presumptuous*, &c. pronounced *ung-tchuous*, *presump-tchuous*, &c.—See the words.

TH.

405. This lisping sound, as it may be called, is almost peculiar to the English, 41, 50, 400. The Greek Θ was certainly not the sound we give it: like its principal letter, it has a sharp and a flat sound; but these are so little subject to rule, that a catalogue will, perhaps, be the best guide.

406. *Th*, at the beginning of words, is sharp, as in *thank*, *think*, &c. except in the following words: *This*, *that*, *than*, *the*, *thee*, *their*, *them*, *then*, *thence*, *there*, *these*, *they*, *thine*, *thither*, *those*, *thou*, *though*, *thus*, *thy*, and their compounds.

407. *Th*, at the end of words, is sharp, as *death*, *breath*, &c. except in *beneath*, *booth*, *with*; and the verbs *to wreath*, *to loath*, *to uncloath*, *to seeth*, *to smooth*, *to sooth*, *to mouth*: all which ought to be written with the *e* final; not only to distinguish some of them from the nouns, but to show that *th* is soft; for though *th*, when final, is sometimes pronounced soft, as in *to loath*, *to mouth*, &c. yet *the* at the end of words is never pronounced hard. There is as obvious an analogy for this sound of the *th* in these verbs as for the *s* sound of *s* in verbs ending in *se*, 437; and why we should write some verbs with *e*, and others without it, is inconceivable. The best way to show the absurdity of our orthography, in this particular, will be to draw out the nouns and verbs as they stand in Johnson's Dictionary.

Adjectives and Nouns.

Verbs.

<i>breath</i> ,	to breathe.
<i>wreath</i> ,	to wreath, to inwreath.
<i>loath</i> ,	to leathe.
<i>cloth</i> ,	to cloathe, to uncloath.
<i>bath</i> ,	to bathe.
<i>smooth</i> ,	to smooth.
<i>mouth</i> ,	to mouth.
<i>swath</i> ,	to swathe.
<i>sheath</i> ,	{ to sheath.
	{ to sheathe.
<i>sooth</i> ,	to sooth.

Surely nothing can be more evident than the analogy of the language in this case. Is it not absurd to hesitate a moment at writing all the verbs with the *e* final? This is a departure from our great lexicographer, which he himself would approve, as nothing but inadvertency could have led him into this unmeaning irregularity.—It may not be improper to observe here, that those substantives which in the singular end with *th* sharp, adopt the *th* flat in the plural, as *path*, *paths*; *bath*, *baths*, &c. Such a propensity is there to slide into the flat sound of *s*, that we frequently hear this sound in the genitive case, as *My wife's portion*, for *my wife's portion*. In the same manner we hear of paying so much for *house rent and taxes*, instead of *house-rent and taxes*, and shopkeepers tell us they have *goods of all prices*, *in*.

kind of all prices. Nay, some go so far as to pronounce the plural of *truth*, *truths*; but this must be carefully avoided.

46. *Th* is hard in the middle of words, either when it precedes or follows a consonant, as *panther*, *separate*, *orthodox*, *orthography*, *orthodoxy*, *smart*, *stewart*, *ethnick*, *misanthrope*, *philanthropy*, &c. except *brethren*, *farthing*, *further*, *northers*, *worthy*, *burthen*, *murder*, where the *th* is soft; but the two last words are better written *burden* and *murder*.

47. *Th* between two vowels is generally soft in words purely English, as *father*, *feather*, *heathen*, *hither*, *thither*, *whither*, *whether*, *either*, *neither*, *weather*, *whether*, *with*, *gather*, *together*, *poth*, *mother*.

48. *Th* between two vowels, in words from the learned languages, is generally hard, as *apathy*, *sympathy*, *antipathy*, *Athens*, *atheist*, *authentick*, *author*, *authority*, *athirst*, *cathartick*, *cathedral*, *catholick*, *catheter*, *ether*, *ethicks*, *lethargy*, *Lethe*, *lesithen*, *litharge*, *lithotomy*, *mathesis*, *mathematics*, *method*, *pathetick*, *plethora*, *polymathy*, *prothodary*, *anathema*, *amethyst*, *theatre*, *amphitheatre*, *apothecary*, *apothecosis*.

49. *Th* is sometimes pronounced like simple *t*, as *Thomas*, *thyme*, *Thames*, *asthma*, *phthisis*, *phthirick*, *phthisical*, and is silent in *twelfth*, pronounced *twelfthide*.

T silent.

50. *T* is silent when preceded by *s*, and followed by the abbreviated terminations *en* and *le*, as *hasten*, *chasten*, *fasten*, *listen*, *glisten*, *christen*, *moisten*, which are pronounced as if written *hac's*, *chac's*, &c.; in *bursten* the *t* is heard: so *castle*, *nestle*, *frestle*, *wrestle*, *thisle*, *whistle*, *epistle*, *bristle*, *gristle*, *jostle*, *apostle*, *throstle*, *bustle*, *jussle*, *russle*, are pronounced as if written *castle*, *nestle*, &c.; in *pestle* the *t* is pronounced; in *often*, *fasten*, and *soften*, the *t* is silent, and at the end of several words from the French, as *trait*, *goat* (*taste*), *eciat*. In the first of these words the *t* begins to be pronounced; in the last, it has been sometimes heard; but in the second, never. *Toupet* is more frequently written *toupee*, and is therefore not irregular. In *billet-doux* the *t* is silent, as well as in *harmony*. The same silence of *t* may be observed in the English words *Christmas*, *christnut*, *mortgage*, *ostler*, *bankruptcy*, and in the second syllable of *mistletoe*. In *current* and *currants* the *t* is always mute.—See Nos. 163, 164, 465.

V.

51. *V* is flat *f*, and bears the same relation to it as *b* does to *p*, *d* to *t*, hard *g* to *k*, and *x* to *s*, 41. It is never irregular; and if ever silent it is in the word *twelvemonth*, where both that letter and the *e* are, in colloquial pronunciation, generally dropped, as if written *twelf'month*.

W initial.

52. That *w* at the beginning of a word is a consonant has been proved already, 9, 59. It is always silent before *r*, as in *wrack*, *wrangle*, *wrap*, *wrath*, *wreak*, *wreath*, *wreck*, *wren*, *wrench*, *wrot*, *wrestle*, *wretch*, *wriggle*, *wright*, *wring*, *wrinkle*, *wrist*, *write*, *writhe*, *wrong*, *wrought*, *wry*, *wry*, *bewray*; and before *h* and the vowel *o*, when long, as *whole*, *who*, &c. pronounced *hole*, *ho*, &c.

53. *W* before *h* is pronounced as if it were after the *h*, as *hoo-y*, *why*, *hoo-en*, *when*, &c.; but in *whole*, *whoop*, &c. the single and double *o* coalescing with the same sound in *w*, this last letter is scarcely perceptible. In *swoon*, however, this letter is always heard; and pronouncing it soon is vulgar. In *sword* and *answer* it is always silent. In two it mingles with its kindred sound, and the number two is pronounced like the adverb *too*. In the prepositions *toward* and *towards*, the *w* is dropped, as if written *toard* and *toards*, rhyming with *board* and *boards*; but in the adjectives and adverbs *toward* and *towardsly*, *forward* and *forwardly*, the *w* is heard distinctly. It is sometimes dropped in the last syllable of *awkward*, as if written *awward*; but this pronunciation is vulgar.

X.

476. *X* is a letter composed of those which have been already considered, and therefore will need but little discussion, 48, 51. It is flat or sharp like its component letters, and is subject to the same laws.

477. *X* has a sharp sound like *ks*, when it ends a syllable with the accent upon it, as *exercise*, *excellence*, &c. or when the accent is on the next syllable, if it begin with a consonant, as *excuse*, *expense*, &c. 71.

478. *X* has its flat sound like *gz* when the accent is not on it, and the following syllable having the accent begins with a vowel, as *exert*, *example*, *exist*, &c. pronounced *egzert*, *egzample*, *egzist*, &c. The same sound may be observed if *h* follow, as in *exhibit*, *exhale*, &c. pronounced *egzhibit*, *egzhale*; but if the secondary accent be on the *x* in the polysyllable *exhibition*, *exhalation*, &c. this letter is then sharp, as in *exercise*, 71; but in compound words, where the primitive ends in *x*, this letter retains its primitive sound, as *fixation*, *taxation*, *veraxation*, *veraxious*, *relaxation*, &c.; to which we may add the simples in our language, *doxology* and *proximity*; so that this propensity of *x* to become *egz*, seems confined to the inseparable preposition.

479. *X*, like *s*, is aspirated, or takes the sound of *h* after it, only when the accent is before it; hence the difference between *luxury* and *luxurious*; *anxious* and *anxiety*: in the true pronunciation of which words nothing will direct us but recurring to first principles. It was observed that *s* is never aspirated, or pronounced like *sh*, but when the accent is on the preceding syllable, 450; and that when the accent is on the succeeding vowel, though the *s* frequently is pronounced like *s*, it is never sounded *sh*: from which premises we may conclude that *luxury* and *luxurious* ought to be pronounced *lackshury* and *lackshurious*, and not *lug-shu-ryus*, as Mr. Sheridan spells it. The same error runs through his pronunciation of all the compounds, *luxuriance*, *luxuriant*, *luxuriate*, &c. which unquestionably ought to be pronounced *lug-zu-ri-ance*, *lug-zu-ri-ant*, *lug-zu-ri-ate*, &c. in four syllables, and not in three only, as they are divided in his Dictionary.

480. The same principles will lead us to decide in the words *anxious* and *anxiety*: as the accent is before the *x* in the first word, it is naturally divisible into *ank-shous*, and as naturally pronounced *ank-shus*; but as the accent is after the *x* in the second word, and the hissing sound cannot be aspirated, 456, it must necessarily be pronounced *angxiety*. But Mr. Sheridan, without any regard to the component letters of these words, or the different position of the accent, has not only spelled them without aspiration, but without letting the *s*, in the composition of the last word, go into *s*; for thus they stand in his Dictionary: *ank-shus*, *ank-sie-ty*, 456.

481. The letter *x*, at the beginning of words, goes into *s*, as *Xerxes*, *Xenophon*, &c. pronounced *Serkses*, *Zenophon*, &c.; it is silent at the end of the French *billet-doux*, and pronounced like *e* in *beaux*; often and better written *beaus*.

Y initial.

482. *Y*, as a consonant, has always the same sound; and this has been sufficiently described in ascertaining its real character, 40; when it is a vowel at the end of a word or syllable with the accent upon it, it is sounded exactly like the first sound of *i*, as *cy-der*, *ty-rant*, *re-ly*, &c.; but at the end of a word or syllable, without the accent, it is pronounced like the first sound of *e*, *liberty*, *fury*, *tenderly*, &c.

Z.

483. *Z* is the flat *s*, and bears the same relation to it as *b* does to *p*, *d* to *t*, hard *g* to *k*, and *v* to *f*. Its common name is *izzard*, which Dr. Johnson explains into *s* hard; if, however, this be the meaning, it is a gross misnomer: for the *s* is not the hard, but the soft *s*; but as it has a less

* Professor Ward, speaking of the reason for doubling the *s* at the end of words, says, "s

sharp, and therefore not so audible a sound, it is not impossible but it may mean a *surd*. *Zed*, borrowed from the French, is the more fashionable name of this letter; but, in my opinion, not to be admitted, because the names of the letters ought to have no diversity.

484. *Z*, like *s*, goes into aspiration before a diphthong, or a diphthongal vowel after the accent, as is heard in *vizier*, *glazier*, *grazier*, &c. pronounced *vizh-ier*, *glash-ier*, *grazh-ier*, &c. The same may be observed of *azure*, *razure*, &c.

485. *Z* is silent in the French word *rendezvous*; and is pronounced in the Italian manner, as if *t* were before it, in *mexxotinto*, as if written *metxotinto*.

Thus have we endeavoured to exhibit a just idea of the principles of pronunciation, both with respect to single letters, and their various combinations into syllables and words. The attentive reader must have observed how much the sounds of the letters vary, as they are differently associated, and how much the pronunciation of these associations depends upon the position of the accent. This is a point of the utmost importance, and a want of attending to it has betrayed several ingenious men into the grossest absurdities. This will more fully appear in the observations on accent, which is the next point to be considered.

OF THE NATURE OF ACCENT.

486. The accent of the ancients is the opprobrium of modern criticism. Nothing can show more evidently the fallibility of the human faculties than the total ignorance we are in at present of the nature of the Latin and Greek accent*. This would be still more surprising if a phenomenon of a similar kind did not daily present itself to our view. The accent of the English language, which is constantly sounding in our ears, and every moment open to investigation, seems as much a mystery as that accent which is removed almost two thousand years from our view. Obscurity, perplexity, and confusion, run through every treatise on the subject, and nothing could be so hopeless as an attempt to explain it, did not a circumstance present itself, which at once accounts for the confusion, and affords a clew to lead us out of it.

487. Not one writer on accent has given us such a definition of the voice as acquaints us with its essential properties: they speak of high and low, loud and soft, quick and slow; but they never once mention that striking property which distinguishes speaking from singing sounds, and which, from its sliding from high to low, and from low to high, may not improperly be called the inflection of the voice. No wonder, when writers left this out of the account, that they should blunder about the nature of accent: it was impossible they should do otherwise; so partial an idea of the speaking voice must necessarily lead them into error. But let us once divide the voice into its rising and falling inflections, the obscurity vanishes, and accent becomes as intelligible as any other part of language.

488. Keeping this distinction in view, let us compare the accented syllable with others, and we shall find this general conclusion may be drawn: "The accented syllable is always louder than the rest; but when it has the rising inflection it is higher than the preceding; and lower than the succeeding syllable; and when it has

the falling inflection it is pronounced higher as well as louder than the other syllables, either preceding or succeeding." The only exception to this rule is "when the accent is on the last syllable of a word which has no emphasis, and which is the concluding word of a discourse." Those who wish to see this clearly demonstrated may consult *Elements of Elocution*, second edition, page 181. On the present occasion it will be sufficient to observe that the stress we call accent is as well understood as is necessary for the pronunciation of single words, which is the object of this treatise; and therefore, considering accent merely as stress, we shall proceed to make some remarks on its proper position in a word, and endeavour to detect some errors in the use and application of it.

The different Positions of the English Accent.

489. Accent, in its very nature, implies a comparison with other syllables less forcible; hence we may conclude that monosyllables, properly speaking, have no accent: when they are combined with other monosyllables, and form a phrase, the stress which is laid upon one, in preference to others, is called emphasis. As emphasis evidently points out the most significant word in a sentence, so, where other reasons do not forbid, the accent always dwells with greatest force on that part of the word which, from its importance, the hearer has always the greatest occasion to observe; and this is necessarily the root, or body of the word. But as harmony of termination frequently attracts the accent from the root to the branches of words, so the first and most natural law of accentuation seems to operate less in fixing the stress than any of the other. Our own Saxon terminations, indeed, with perfect uniformity, leave the principal part of the word in quiet possession of what seems its lawful property, 501; but Latin and Greek terminations, of which our language is full, assume a right of preserving their original accent, and subjecting many of the words they bestow upon us to their own classical laws.

490. Accent, therefore, seems to be regulated, in a great measure, by etymology. In words from the Saxon the accent is generally on the root; in words from the learned languages it is generally on the termination; and if to these we add the different accent we lay on some words, to distinguish them from others, we seem to have the three great principles of accentuation; namely, the radical, the terminational, and the disjunctive.

Accent on Dissyllables.

491. Every word of two syllables has necessarily one of them accented, and but one. It is true, for the sake of emphasis, we sometimes lay an equal stress upon two successive syllables, as *di-rect*, *some-times*; but when these words are pronounced alone they have never more than one accent. For want of attending to this distinction, some writers have roundly asserted that many dissyllables have two accents, such as *convoy*, *concourse*, *discord*, *shipwreck*: in which, and similar instances, they confound the distinctness, with which the latter syllables are necessarily pronounced, with accentual force; though nothing can be more different. Let us pronounce the last syllable of the noun *torment* as distinctly as we please, it will still be very different, with respect to force, from the same syllable in the verb *to torment*, where the accent is on it; and if we do but carefully watch our pronunciation, the same difference will appear in every word of two syllables throughout the language. The word *Amen* is the only word which is pronounced with two consecutive accents when alone.

492. There is a peculiarity of accentuation in certain words of two syllables, which are both nouns and verbs, that is not unworthy of notice; the nouns having the accent on the first syllable, and the verbs on the last. This seems an instinctive effort in the language (if the expression will be allowed me) to compensate in some measure for the want of different terminations for

doubled retains its proper force, which, when single at the end of words, is *softened* into *s*, as *his*, *Miss*." And Dr. Wallis tells us, that it is almost certain when a noun has *s* hard in the last syllable, and becomes a verb, that in the latter case the *s* becomes soft, as a *house* is pronounced with the hard *s*, and to *house* with the *s* soft.

three different parts of speech*. The words which admit of this diversity of accent are the following :

Nouns.	Verbs.	Nouns.	Verbs.
<i>object</i>	to <i>object</i>	<i>déscant</i>	to <i>descant</i>
<i>absent</i>	to <i>absent</i>	<i>digest</i>	to <i>digest</i>
<i>abstract</i>	to <i>abstract</i>	<i>essay</i>	to <i>essay</i>
<i>accent</i>	to <i>accent</i>	<i>export</i>	to <i>export</i>
<i>affix</i>	to <i>affix</i>	<i>extract</i>	to <i>extract</i>
<i>assign</i>	to <i>assign</i>	<i>exile</i>	to <i>exile</i>

<i>discount</i>	to <i>discount</i>	<i>attribute</i>	to <i>attribute</i>

493. To this analogy some speakers are endeavouring to reduce the word *contents*; which, when it signifies the matter contained in a book, is often heard with the accent on the first syllable; but though this pronunciation serves to distinguish words which are different in signification, and to give, in some measure, a difference of form to the noun and verb, in which our tongue is remarkably deficient, still it is doubtful whether this distinction be of any real advantage to the language.—See *Bowl*. This diversity of accentuation seems to have place in some compound verbs.—See *Counterbalance* and the subsequent words.

494. Sometimes words have a different accent, as they are adjectives or substantives.

Substantives.	Adjectives.
<i>August</i> , the month	<i>august</i> , noble
<i>compact</i>	<i>compact</i>
<i>champaign</i> , wine	<i>champaign</i> , open
<i>exile</i> , banishment	<i>exile</i> , small
<i>gallant</i> , a lover	<i>gallant</i> , bold
<i>instinct</i>	<i>instinct</i>
<i>invalid</i>	<i>invalid</i>
<i>Lévant</i> , a place	<i>lévant</i> , eastern
<i>minute</i> of time	<i>minute</i> , small
<i>supine</i> , in grammar	<i>supine</i> , indolent.

495. Sometimes the same parts of speech have a different accent to mark a difference of signification.

<i>buffet</i> , a blow	<i>buffet</i> , a cupboard
to <i>conjure</i> , to practise	<i>conjure</i> , to entreat
<i>magick</i>	
<i>désert</i> , a wilderness	<i>desert</i> , merit
<i>sinister</i> , insidious	<i>sinister</i> , the left side.

* It is not improbable that the verb, by receiving a participial termination, has inclined us to pronounce that part of speech with an accent nearer the end than we do the noun: for though we can without any difficulty pronounce the verb with the accent on the noun, we cannot so easily pronounce the participle and the adverb formed from it with that accent: thus we can pronounce to *transport* with the accent on the first syllable; but not so easily *transporting* and *transportingly*. This is a solid reason for the distinction, and ought to induce us where we can to observe it. A *spéculer* and to *spéculer* seem to require it.—See the word.

496. In this analogy some speakers pronounce the word *Concordance* with the accent on the first syllable, when it signifies a dictionary of the Bible; and with the accent on the second, when it signifies agreement: but, besides that there is not the same reason for distinguishing nouns from each other as there is nouns from verbs, the accent on the first syllable of the word *Concordance* gives a harshness and poverty to its sound which ought to be avoided.

497. But though the different accentuation of nouns and verbs of the same form does not extend so far as might be expected, it is certain that in words of two syllables, where the noun and verb are of different forms, there is an evident tendency in the language to place the accent upon the first syllable of the noun, and on the last of the verb. Hence the nouns *outrage*, *upstart*, and *uproar*, have the accent on the first syllable; and the verbs to *uplift*, to *uphold*, and to *outstrip*, on the last.

498. This analogy will appear still more evident if we attend to the accent of those nouns and verbs which are compounded of two words. Every dissyllable compounded of words which, taken separately, have a meaning, may be deemed a qualified substantive; and that word which qualifies or describes the other is that which most distinguishes it, and consequently is that which ought to have the accent: accordingly we find that *inkhorn*, *outrage*, *chairman*, *freehold*, *sand-box*, *book-case*, *pen-knife*, have the accent on the first syllable, which is the specifying part of the word; while *gainsay*, *foresee*, *overlook*, *undersell*, have the accent on the last syllable, which is the least distinguishing part of the word. This rule, however, is, either by the caprice of custom or the love of harmony, frequently violated, but is sufficiently extensive to mark the general tendency of the language. Akenside brings the verb to *comment* under this analogy:

“ ————— The sober zeal
“ Of age, *commenting* on prodigious things.”
Pleasures of the Imagination.

And Milton in the same manner the verb to *commerce*:

“ And looks *commérceing* with the skies,
“ Thy rapt soul sitting in thine eyes.”—*Il Penseroso*.

499. Something very analogous to this we find in the nouns we verbalize, by changing the *s* sharp of the noun into the *s* flat, or *s* of the verb, 437, as a *use*, and to *use*; where we may remark, that when the word in both parts of speech is a monosyllable, and so not under the laws of accent, the verb, however, claims the privilege of lengthening the sound of the consonant when it can, as well as when it cannot, prolong the accentuation: thus we not only find *grass* altered to *graze*, *brass* to *brass*, *glass* to *glaze*, *price* to *prize*, *breath* to *breathe*, &c. but the *c* or *s* sharp altered to the *s* flat in *advice* to *advise*, *excuse* to *excuse*, *device* to *devise*, &c. The noun adopting the sharp hissing sound, and the verb the soft buzzing one, without transferring the accent from one syllable to another. The vulgar extend this analogy to the noun *practice* and the verb to *practise*, pronouncing the first with the *i* short and the *c* like sharp *s*, as if written *practiss*, and the last with the *i* long and the *s* like *s*, as if written *practise*; but correct speakers pronounce the verb like the noun; that is, as if written *practiss*. The noun *prophecy* and the verb to *prophecy* follow this analogy, only by writing the noun with the *c* and the verb with the *s*, and without any difference of sound, except pronouncing the *y* in the first like *e*, and in the last like *i* long; where we may still discover a trace of the tendency to the barytone pronunciation in the noun, and the oxytone in the verb, 407.—See *Appendix*.

500. This seems to be the favourite tendency of English verbs; and where we find it crossed it is generally in those formed from nouns, rather than the contrary: agreeably to this, Dr. Johnson has observed that, though nouns have often the accent on the latter, yet verbs have it seldom on the former syllable; those nouns which, in the common order of language, must have preceded the verbs, often transmit this accent to the verbs.

they form, and inversely: thus the noun *water* must have preceded the verb *to water*, as the verb *to correspond* must have preceded the noun *correspondent*; and *to pursue* must claim priority to *pursuit*. So that we may conclude, whenever verbs deviate from this rule, it is seldom by chance, and generally in those words only where a superior law of accent takes place.

Accent on Trisyllables.

501. As words increase in syllables, the more easily is their accent known. Nouns sometimes acquire a syllable by becoming plural; adjectives increase a syllable by being compared; and verbs by altering their tense, or becoming participles: adjectives become adverbs by adding *ly* to them; and prepositions precede nouns or verbs without altering the accent of the word to which they are prefixed: so that, when once the accent of dissyllables is known, those polysyllables, whose terminations are perfectly English, have likewise their accent invariably settled. Thus *lion* becomes *lioness*; *poet*, *poetess*; *polite* becomes *politer*, or *politely*, or even *politally*; *mischief*, *mischievous*; *happy*, *happiness*; *may*, *lioness* becomes *lionesses*; *mischief*, *mischievousness*; and *service*, *serviceable*, *serviceableness*, *serviceably*, and *unserviceably*, without disturbing the accent, either on account of the prepositive *un*, or the subjunctives *able*, *ably*, and *ableness*.

502. Hence we may perceive the glaring absurdity which prevails even in the first circles; that of pronouncing the plural of *princess*, and even the singular, with the accent on the second syllable, like *success* and *successes*; for we might just as well say *dutchess* and *dutchesses* as *princesses* and *princesses*; nor would a correct ear be less hurt with the latter than with the former.

503. So few verbs of three syllables follow the analogy observable in those of two, that of protracting the accent to the last syllable, that this economy seems peculiar to dissyllables: many verbs, indeed, of three syllables, are compounded of a preposition of two syllables: and then, according to the primary law of formation, and not the secondary of distinction, we may esteem them radical, and not distinctive: such are *contradict*, *intercede*, *supersede*, *contraband*, *circumscribe*, *superscribe*, &c. while the generality of words ending in the verbal terminations *ise* and *ize* retain the accent of the simple, as *criticise*, *tyrannise*, *modernise*, &c.: and the whole tribe of trisyllable verbs in *ate*, very few excepted, refuse the accent on the last syllable: but words of three syllables often take their accent from the learned languages from which they are derived; and this makes it necessary to inquire how far English accent is regulated by that of the Greek and Latin.

On the Influence of the Greek and Latin Accent on the Accent of English Polysyllables.

(a) As our language borrows so largely from the learned languages, it is not wonderful that its pronunciation should be in some measure influenced by them. The rule for placing the Greek accent was, indeed, essentially different from that of the Latin; but words from the Greek, coming to us through the Latin, are often so much latinised as to lose their original accent, and to fall into that of the Latin; and it is the Latin accent which we must chiefly regard as that which influences our own.

(b) The first general rule that may be laid down is, that when words come to us whole from the Greek or Latin, the same accent ought to be preserved as in the original: thus *horizon*, *sonorous*, *decorum*, *dictator*, *gladiator*, *mediator*, *delator*, *spectator*, *adulator*, &c. preserve the penultimate accent of the original; and yet the antepenultimate tendency of our language has placed the accent on the first syllable of *orator*, *senator*, *auditor*, *cicatrix*, *plethora*, &c. in opposition to the Latin pronunciation of these words, and would have infallibly done the same by *abdomen*, *disumen*, and *acumen*, if the learned had not stepped in to rescue these classical words from the invasion of the Gothic accent, and to preserve the stress inviolably on the second syllable: nor has even the interposition of two consonants been

always able to keep the accent from mounting up to the antepenultimate syllable, as we may see in *minister*, *sinister*, *character*, &c.; and this may be said to be the favourite accent of our language.—See *Miscellany*.

(c) But, notwithstanding this prevalence of the antepenultimate accent, the general rule still holds good; and more particularly in words a little removed from common usage, such as terms in the arts and sciences: these are generally of Greek original; but, coming to us through the Latin, most commonly con- c-ct the Latin accent when adopted into our language. This will appear plainly by the following lists: and, first, let us select some where the Greek and Latin accents coincide:

<i>plethōra</i> ,	πλεθώρα,
<i>metabasis</i> ,	μετάβασις,
<i>emphasis</i> ,	ἐμφασις,
<i>antispasis</i> ,	ἀντίσπασις,
<i>antithesis</i> ,	ἀντίθεσις,
<i>antiphrasis</i> ,	ἀντίφρασις,
<i>protasis</i> ,	πρότασις,
<i>metathesis</i> ,	μετάθεσις,
<i>epenthesis</i> ,	ἐπένθεσις,
<i>aphæresis</i> ,	ἀφαίρεσις,

(d) Another list will show us where the accents of these languages differ:

<i>antanaclasis</i> ,	ἀντανάκλασις,
<i>catachresis</i> ,	κατάχρησις,
<i>paracentesis</i> ,	παράκέντησις,
<i>apostrophe</i> ,	ἀποστροφή,
<i>anastrophe</i> ,	ἀντίστροφος,
<i>anadiplosis</i> ,	ἀναδίπλωσις,
<i>auxesis</i> ,	αὐξήσις,
<i>malicesis</i> ,	μάθησις,
<i>exegesis</i> ,	ἐξηγησις,
<i>hydrophobia</i> ,	ὕδροφοβία,
<i>cyclopædia</i> ,	κυκλοπαίδεια,
<i>aporis</i> ,	ἀπορία,
<i>prosopopæia</i> ,	προσωποποιία,
<i>epiphonema</i> ,	ἐπιφώνημα,
<i>diaphoresis</i> ,	διαφύρησις,
<i>diploia</i> ,	δίπλωμα,
<i>paregoge</i> ,	παράγωγη,
<i>apostrophi</i> ,	ἀποστροφή,

In this list we perceive the peculiar tendency of the Latin language to accent the long penultimate vowel, and that of the Greek to pay no regard to it if the last vowel is short, but to place the accent on the antepenultimate. It will, however, be easily perceived that in this case we follow the Latin analogy: this analogy will appear more evident by a list of words ending in *osis*, where, though the *o* in the penultimate syllable is the omega, the Greek accent is on the antepenultimate:

<i>ἐπεσάρκωσις,</i>	<i>ἀναστέμωσις,</i>
<i>ἀποθνήσκωσις,</i>	<i>συνάρθρωσις,</i>
<i>γόμφωσις,</i>	<i>διόρθωσις,</i>
<i>ἀναμόρφωσις,</i>	<i>αἱμαίνωσις,</i>
<i>μεταμόρφωσις,</i>	<i>συνοικείωσις,</i>
<i>παράφωσις,</i>	<i>ἀποκείωσις,</i>

This analogy has led us to accent certain words formed from the Greek, where the omega was not in the penultimate of the original, in the same manner as those words where this long vowel was found: such as *Exostosis*, formed from *εξ* and *ὄστω*, *Synneurosis* from *σύν* and *νῆρον*, &c. This tendency therefore has sufficiently formed an analogy; and since rules, however absurdly formed at first, are better than no rules at all, it would, in my opinion, be advisable to consider every word of this form as subject to the penultimate accent, and to look upon *apostrophe* and *metamorphosis* as exceptions.

(e) The next rule we may venture to lay down as a pretty general one is, that if the words derived from the learned languages, though anglicised by altering the termination, contain the same number of syllables as in the original languages, they are generally to be pronounced with the same accent: that is, with the same accent as the first person present of the indicative mood, active voice; or as the present participle of the same verb. The reality of this rule will best appear by a selection of such classes of words as

have an equal number of syllables in both languages.

(f) Words which have *a* in the penultimate syllable :

<i>prévalent,</i>	<i>prevālēns,</i>
<i>équivalent,</i>	<i>equivālēns,</i>
<i>adjacent,</i>	<i>adjācens,</i>
<i>ligament,</i>	<i>ligāmēn,</i>
<i>infamous,</i>	<i>infāmīs,</i>
<i>propagate,</i>	<i>propāgo,</i>
<i>indagate,</i>	<i>indāgo,</i>
<i>suffragan,</i>	<i>suffragāns.</i>

In this small class of words we find all but the two first have a different accent in English from that of the Latin. The rule for placing the accent in that language being the simplest in the world : if the penultimate syllable is long, the accent is on it ; if short, the accent is on the antepenultimate.

(g) Words which have *e* in the penultimate syllable :

<i>pénétrate,</i>	<i>penētro,</i>
<i>discrepant,</i>	<i>discrepāns,</i>
<i>précédent,</i>	<i>præcēdēns,</i>
<i>élegant,</i>	<i>elēgāns,</i>
<i>exuberant,</i>	<i>exupērāns,</i>
<i>exuberant,</i>	<i>exubērāns,</i>
<i>eminent,</i>	<i>eminēns,</i>
<i>excellent,</i>	<i>excellēns,</i>
<i>alienate,</i>	<i>aliēno,</i>
<i>délegate,</i>	<i>delēgo.</i>

In this class we find the penultimate *e* accented in English as in Latin, except in the three last words. The word *alienate* departs from the Latin accentuation by placing the stress on the first syllable, as if derived from the English noun *alien*. The *e* in *penetro* is either long or short in Latin, and in this case we generally prefer the short sound to the long one.

(h) Words which have *i* in the penultimate syllable :

<i>acclivous,</i>	<i>acclīvus,</i>
<i>declivous,</i>	<i>declīvus,</i>
<i>proclivous,</i>	<i>proclīvus,</i>
<i>litigant,</i>	<i>litīgans,</i>
<i>mitigant,</i>	<i>mitīgans,</i>
<i>sibilant,</i>	<i>sibillēns,</i>
<i>vigilant,</i>	<i>vigillēns,</i>
<i>féliminant,</i>	<i>fulmināns,</i>
<i>discriminate,</i>	<i>discrimīnās,</i>
<i>habitant,</i>	<i>habitantēs,</i>
<i>benéficient,</i>	<i>beneficīus,</i>
<i>accident,</i>	<i>accidēns,</i>
<i>évident,</i>	<i>evīdēns,</i>
<i>indigent,</i>	<i>indīgēns,</i>
<i>diligent,</i>	<i>dilīgēns,</i>
<i>négligent,</i>	<i>neglīgēns,</i>
<i>éxigence,</i>	<i>exīgēns,</i>
<i>intélligence,</i>	<i>intelligēns,</i>
<i>deficiency,</i>	<i>deficiēns,</i>
<i>perspicience,</i>	<i>perspicīens,</i>
<i>conscience,</i>	<i>consciēns,</i>
<i>obédience,</i>	<i>obediēns,</i>
<i>pestilence,</i>	<i>pestilēns,</i>
<i>supplicate,</i>	<i>supplicāns,</i>
<i>éxplicate,</i>	<i>explicāns,</i>
<i>abdicate,</i>	<i>abdīcāns,</i>
<i>providence,</i>	<i>providēns,</i>
<i>féstinate,</i>	<i>festīno,</i>
<i>méndicant,</i>	<i>mendicāns,</i>
<i>résident,</i>	<i>residēns,</i>
<i>diffidence,</i>	<i>diffidēns,</i>
<i>confidence,</i>	<i>confidēns,</i>
<i>investigate,</i>	<i>investīgo,</i>
<i>castigate,</i>	<i>castīgo,</i>
<i>étricate,</i>	<i>extrīco,</i>
<i>irritate,</i>	<i>irritō,</i>
<i>préfligate,</i>	<i>proflīgo,</i>
<i>instigate,</i>	<i>instīgo.</i>

In the foregoing list of words we find a very general coincidence of the English and Latin accent, except in the last eleven words, where we depart from the Latin accent on the penultimate, and place it on our own favourite syllable the antepenultimate. These last words must therefore be ranked as exceptions.

(i) Words which have *e* in the penultimate syllable :

<i>intérrigate,</i>	<i>interrūgo,</i>
<i>érrogant,</i>	<i>errōgāns,</i>
<i>dissonant,</i>	<i>dissōnāns,</i>
<i>rédolent,</i>	<i>redōlēns,</i>
<i>insolent,</i>	<i>insōlēns,</i>
<i>benévolent,</i>	<i>benevōlus,</i>
<i>condolence,</i>	<i>condōlēns,</i>
<i>indolence,</i>	<i>indōlēns,</i>
<i>armipotent,</i>	<i>armipōtēns,</i>
<i>omnipotent,</i>	<i>omnipōtēns,</i>
<i>innocent,</i>	<i>innōcēns,</i>
<i>rénovate,</i>	<i>renōvo,</i>
<i>désolate,</i>	<i>desōlo,</i>
<i>décorate,</i>	<i>decōro,</i>
<i>élaborate,</i>	<i>elabōro,</i>
<i>lāborant,</i>	<i>labōrāns,</i>
<i>ignorant,</i>	<i>ignōrāns,</i>
<i>suffocate,</i>	<i>suffōco.</i>

In this list the difference of the English and Latin accent is considerable. The six last words desert the Latin penultimate for the English antepenultimate accent, and *condolence* falls into an accentuation diametrically opposite.

(k) Words which have *a* in the penultimate syllable :

<i>fábulate,</i>	<i>fabūlor,</i>
<i>máculate,</i>	<i>macūlo,</i>
<i>ádjuvate,</i>	<i>adjūro,</i>
<i>córrugate,</i>	<i>corrūgo,</i>
<i>pétulant,</i>	<i>petūlāns,</i>
<i>disputant,</i>	<i>disputāns,</i>
<i>impudent,</i>	<i>impūdēns,</i>
<i>spéculate,</i>	<i>specūlor,</i>
<i>púllulate,</i>	<i>pullūlo,</i>
<i>pópulate,</i>	<i>popūlo,</i>
<i>súbjugate,</i>	<i>subjūgo,</i>
<i>abúdcēnt,</i>	<i>abducēns,</i>
<i>relúcent,</i>	<i>relucēns,</i>
<i>imprúdent,</i>	<i>imprudēns,</i>
<i>ádjutant,</i>	<i>adjūtāns,</i>
<i>péculate,</i>	<i>pecūlor,</i>
<i>índurate,</i>	<i>indūro,</i>
<i>óbduerate,</i>	<i>obdūro.</i>

Here we find the general rule obtain, with, perhaps, fewer exceptions than in any other class. *Adjuvate*, *peculate*, and *indurate*, are the only absolute deviations ; for *obdurate* has the accent frequently on the second syllable.—See the word.

(l) To these lists, perhaps, might be added the English words ending in *tion*, *sion*, and *ity* : for, though *tion* and *sion* are really pronounced in one syllable, they are by almost all our orthoepists generally divided into two ; and consequently *nation*, *pronunciation*, *occasion*, *evasion*, &c. contain the same number of syllables as *natio*, *pronunciatio*, *occasio*, *evasio*, &c. and have the accent, in both English and Latin, on the antepenultimate syllable. The same may be observed of words ending in *ity*, as *diversity*, *variety*, &c. from *diversitas*, *varietas*, &c.

(m) By this selection (which, though not an exact enumeration of every particular, is yet a sufficient specimen of the correspondence of Latin and English accent) we may perceive that there is a general rule running through both languages, respecting the accent of polysyllables, which is, that when a single vowel in the penultimate is followed by a single consonant, the accent is on the antepenultimate. This is so agreeable to English analogy, that in words derived from the Latin, where the penultimate vowel, followed by a single consonant, is long, and consequently has the accent, we almost always neglect this exception, as it may be called, in the Latin language, and fall into our own general rule of accenting the antepenultimate. Nor is it unworthy of being remarked, that when we neglect the accent of the original, it is almost always to place it at least a syllable higher ; as *adjacent* and *condolence* are the only words in the whole selection, where the accent of the English word is placed lower than in the Latin.

(n) There is, indeed, a remarkable coincidence of accent between Latin verbs of three syllables, commencing with a preposition, and the English

words of two syllables, derived from them, by dropping a syllable*, as *excello, rebellō, inquirō, confino, confute, consumo, desiro, explōro, procedo, proclamō*, have the accent in Latin on the second syllable; and the English verbs *excel, rebel, inquire, confine, confute, consume, desire, explore, proceed, proclaim*, have the accent on the same syllable. This propensity of following the Latin accent in these words, perhaps, in this, as well as in other cases, formed a general rule, which, at last, neglected the Latin accent, in words of this kind; as we find *prefer, confer, defer, desert, compare, complete, congeal, divide, dispute, prepare*, have the accent on the second syllable, though *præfero, desêro, confêro, desêro, compârô, complêo, congêlo, dividô, dispûto, præpârô*, have the accent on the first: and this propensity, perhaps, laid the foundation of that distinction of accent which is so remarkable between dissyllable nouns and verbs of the same form. 492.

(o) But, when English polysyllables are derived from the Latin by dropping a syllable, scarcely any analogy is more apparent than the coincidence of the principal accent of the English word, and the secondary accent, 522, we give to the Latin word, in the English pronunciation of it. Thus *parsimony, ceremony, matrimony, melancholy, &c.* have the accent on the first syllable, because, in pronouncing the Latin words *parsimonia, ceremonia, matrimonia, melancholia, &c.* we are permitted, and prone in our English pronunciation of these words, to place a secondary accent on that syllable.—See *Academy, Irreparable, &c.*

(p) With respect to the quantity of the antepenultimate syllable in polysyllables, it may be observed, that; regardless of the quantity of the original, we almost, without exception, follow the analogy of our own language. This analogy uniformly shortens the vowel, unless it be *u*, followed by a single consonant, or any other vowel followed by a single consonant, succeeded by a semi-consonant diphthong: thus the first *u* in *dubious* is pronounced long, though short in the Latin word *dubius*: the same may be observed of the *e* and *o* in *medium* and *emporium*: and the first *i* in *delirium*, and the first *e* in *delicate*, are pronounced short in English, according to our own analogy, 507, though these letters are long in the Latin *delirium* and *delicatus*. For the quantity of English dissyllables derived from the Greek and Latin, see *Syllabication*, Nos. 543, 544, &c.

Terminational Accent.

504. We have seen that the Saxon terminations, regardless of harmony, always leave the accent where they found it, let the adventitious syllables be ever so numerous. The Saxons, attentive chiefly to sense, preserved the same simplicity in the accentuation as in the composition of their words; and, if sense were the only object of language, it must be confessed that our ancestors were, in this respect, superior to the Greeks and Romans. What method could so rigidly preserve and so strongly convey the sense of words, as that which always left the accent on the root, where the principal meaning of the word undoubtedly lies? But the necessities of human nature require that our thoughts should not only be conveyed with force, but with ease; to give language its due effect, it must be agreeable as well as forceful; and the ear must be addressed while we are informing the mind. Here, then, terminational accent, the musick of language, interposes; corrects the discordant, and strengthens the feeble sounds; removes the difficulty of pronunciation which arises from placing the accent on initial syllables, and brings the force

gently down to the latter part of the word, where a cadence is formed, on the principles of harmony and proportion.

505. To form an idea of the influence of termination upon accent, it will be sufficient to observe, that words which have *ei, ia, ie, io, eou*, in their termination, always have the accent on the preceding syllable: thus *atheist, alien, regalia, ambrosia, &c.* the numerous terminations in *ion, tan, &c.* as *gradation, promotion, confusion, logician, physician, &c.* those in *iou*, as *harmonious, abstemious, &c.* those in *eou*, as *outrageous, advantageous, &c.* These may not improperly be styled semi-consonant diphthongs, 196.

506. The only exceptions to this rule are one word in *iac*, as *elegiac*, which has the accent on the *i*, and the following words in *iacal*, as *prodialcal, cardialcal, hellacal, genethliacal, maniacal, demoniacal, ammoniacal, theriacal, paradisiacal, aphrodisiacal*, and *hypochochriacal*; all which have the accent on the antepenultimate *i*, and that long and open, as in *idle, title, &c.*

507. Nothing can be more uniform than the position of the accent in words of these terminations; and, with very few exceptions, the quantity of the accented vowel is as regular as the accent, for when these terminations are preceded by a single consonant, every accented vowel is long, except *i*; which, in this situation, is as uniformly short: thus *occasion, adhesion, erosion, and confusion*, have the *a, e, o*, and *u*, long; while *vision* and *decision* have the *i* short. The same may be observed of *probation, concretion, devotion, ablation, and exhibition*. The exceptions are, *impetuous, especial, perpetual, discretion, and battalion*, which last ought to be spelt with double *i*, as in the French, from which it is derived, and then it would follow the general rule. *National*, and *rational*, form two more exceptions; and these are almost the only irregularities to which these numerous classes of words are subject.

508. Nearly the same uniformity, both of accent and quantity, we find in words ending in *ic*. The accent immediately precedes this termination, and every vowel under this accent but *u* is short: thus *Satanic, pathetic, elliptic, harmonic, &c.* have the accent on the penultimate, and the vowel short; while *tunic, runic, and cubic*, have the accented vowel long.

509. The same may be observed of words ending in *ical*, as *fanatical, poetical, leitical, canonical, &c.* which have the accent on the antepenultimate syllable, and the vowels *e, i*, and *o*, short; but *cubical* and *musical*, with the accent on the same syllable, have the *u* long.

510. The only exceptions to this rule are *arsenic, choleric, ephemeric, turmeric, empiric, rhetoric, bishopric* (better written *bishoprick*, see No. 400), *lunatic, arithmetic, splenetic, heretic, politic*, and, perhaps, *phlegmatic*; which though more frequently heard with the accent on the antepenultimate syllable, ought, if possible, to be reduced to regularity. Words ending in *scence* have uniformly the accent on the penultimate syllable, as *quiescence, reminiscence, &c.*; *concupiscence*, which has the accent on the antepenultimate, is the only exception.

511. In the same manner, if we take a view of the words ending in *ity*, we find the accent invariably placed on the preceding syllable, as in *diversity, congruity, &c.* On a closer inspection we find every vowel in this antepenultimate syllable, when no consonant intervenes, pronounced long, as *deity, piety, &c.* A nearer inspection shows us, that, if a consonant precede this termination, the preceding accented vowel is short, except it be *u*, as *severity, curiosity, impunity, &c.*: we find, too, that even *u* contracts itself before two consonants, as in *curvity, taciturnity, &c.* and that *scarcity* and *rarity* (signifying uncommonness; for *rarity*, thinness, has the *a* short) are the only exceptions to this rule throughout the language. The same observations are applicable to words ending in *ify*, as *justify, clarify, &c.* The only words where the antepenultimate accent in words of this termination does not shorten the vowel are *glorify* and *notify*. The *y* in these words is always long, like the first sound of *i*; and both accent and quantity are the same when these words take the additional syllable *able*, as *justifiable, rarefiable, &c.* 183.

512. To these may be added the numerous class

* Ben Jonson seems to have had a faint idea of this coincidence, where he says, "all verbs coming from the Latin, either of the supine or otherwise, hold the accent as it is found in the first person present of those Latin verbs, as *ânimo, animate, cêlebro, cêlebrata*; except words compounded of *facio*, as *lique-facio, liquefy*; and of *statuo*, as *constituto, constitute*."—English Grammar. Of the extent and justness of these observations the critica reader will be the best judge.

of words ending in *arous*, *erous*, and *orons*, as *barbarous*, *sacriferous*, and *humorous*; all which have the accent on the antepenultimate syllable, except *canorous* and *sonorous*; which some unlucky scholar happening to pronounce with the accent on the penultimate syllable, in order to show their derivation from the Latin adjectives, *canorus* and *sonorus*, they stand like strangers amidst a crowd of similar words, and are sure to betray a mere English scholar into a wrong pronunciation.

To polysyllables in these terminations might be added those in *ative*, *atory*, *ctive*, &c.; words ending in *ative* can never have the accent on the penultimate syllable, if there is a higher syllable to place it on, except in the word *creative*; and when this is the case, as it is seldom otherwise, the accent seems to rest on the root of the word; or on that syllable which has the accent on the noun, adjective, or verb, with which the word in *ative* corresponds: thus *copulative*, *estimative*, *alterative*, &c. follow the verbs to *copulate*, to *estimate*, to *alter*, &c. When derivation does not operate to fix the accent, a double consonant will attract it to the antepenultimate syllable, as *appellative*; and two consonants have sometimes this power, in opposition to derivation, as *adversative* and *argumentative*, from *adverse* and *argument*. *Indicative* and *interrogative* are likewise exceptions, as they do not follow the verbs to *indicate* and *interrogate*: but, as they are grammatical terms, they seem to have taken their accent from the secondary accent we sometimes give to the Latin words *indicativus* and *interrogativus* (see the word *Academy*). Words ending in *ary*, *cry*, or *ory*, have generally the accent on the root of the word; which, if it consists of three syllables, must necessarily be accented on the first, as *contrary*, *treachery*, *factory*, &c.; if of four or five, the accent is generally on that syllable which has the accent in the related or kindred words; thus *expostulatory* has the accent on the same radical syllables as *expostulate*; and *congratulatory*, as *congratulate*: *interrogatory* and *decretory* are exceptions here, as in the termination *ative*; and if *pacificatory*, *sacrificatory**, *significatory*, *vesicatory*, &c. have not the accent on the first syllable, it seems to arise from the aversion we seem to have at placing even the secondary accent on the antepenultimate *a* (which we should be very apt to do if the principal accent were on the first syllable), and the difficulty there would be in pronouncing such long words with so many unaccented syllables at the end, if we were to lay the accent on the first. Words ending in *ctive* have the accent regularly on the penultimate syllable, except *adjective*, which, like *indicative*, being a grammatical word, seems to have taken its accent from the secondary stress of the Latin *adjectivus* (see *Academy*); and every word ending in *ctive*, preceded by a consonant, has the accent on the penultimate syllable likewise, except *substantive*; and, perhaps, for the reason just given. After all, it must be owned that words ending in *ative* and *atory* are the most irregular and desultory of any in the language; as they are generally accented very far from the end, they are the most difficult to pronounce; and therefore, whenever usage will permit, we should incline the stress as much as possible to the latter syllables: thus *refractory* ought never to have the accent on the first syllable; but *refectory*, with the accent on the first, is a school term, and, like *substantive*, *adjective*, *indicative*, and *interrogative*, must be left in quiet possession of their Latin secondary accent.

Enclitical Accent.

513. I have ventured to give the name of *enclit-*

* These words ought certainly to be accented alike; and accordingly we find Dr. Johnson, Mr. Sheridan, Mr. Barclay, and Mr. Smith, place the accent on the second syllable; but though Fenning accents *significatory* in the same manner, he places the accent on the antepenultimate of *pacificatory*; and Kenrick likewise accents the second syllable of *significatory*, but the first of *pacificatory*: the other orthoëpists who have not got these words have avoided these inconsistencies.

tical to the accent of certain words, whose terminations are formed of such words as seem to lose their own accent, and throw it back on the last syllable of the word with which they coalesce, such as *theology*, *orthography*, &c. The readiness with which these words take the antepenultimate accent, the agreeable flow of sound to the ear, and the unity it preserves in the sense, are sufficient proofs of the propriety of placing the accent on this syllable, if custom were ambiguous. I do not remember to have heard the accent disputed in any word ending in *ology*; but *orthography* is not unfrequently pronounced with the accent on the first syllable, like *orthodoxy*. The temptation we are under to discover our knowledge of the component parts of words is very apt to draw us into this pronunciation; but as those words which are derived from the Greek, and are compounded of *λόγος*, have universally given into this enclitical accentuation, no good reason appears for preventing a similar pronunciation in those compounded of *γραφω*, as by placing the accent on the antepenultimate syllable the word is much more fluent and agreeable to the ear. It is certain, however, that at first sight the most plausible reasoning in the world seems to lie against this accentuation. When we place the accent on the first syllable, say our opponents, we give a kind of subordinate stress to the third syllable *graph*: by which means the word is divided into its primitives *ortho* and *grapho*, and those distinct ideas it contains are preserved, which must necessarily be confounded by the contrary mode; and that pronunciation of compounds, say they, must certainly be the best which best preserves the import of the simples.

514. Nothing can be more specious than this reasoning, till we look a little higher than language, and consider its object; we shall then discover, that in uniting two words under one accent, so as to form one compound term, we do but imitate the superior operations of the mind, which, in order to collect and convey knowledge, unite several simple ideas into one complex one. "The end of language," says Mr. Locke, "is by short sounds to signify with ease and despatch general conceptions, wherein not only abundance of particulars are contained, but also a great variety of independent ideas are collected into one complex one, and that which holds these different parts together in the unity of one complex idea is the word we annex to it." For, as Mr. Locke continues, "Men, in framing ideas, seek more the convenience of language and quick despatch by short and comprehensive signs than the true and precise nature of things; and therefore he who has made a complex idea of a body with life, sense, and motion, with a faculty of reason joined to it, need but use the short monosyllable, *man*, to express all particulars that correspond to that complex idea." So it may be subjoined, that, in framing words for the purpose of immediate communication, the end of this communication is best answered by such a pronunciation as unites simples into one compound, and at the same time renders the compound as much a simple as possible: but it is evident that this is done by no mode of accentuation so well as that which places the accent on the antepenultimate syllable of the words *theology*, *orthography*; and therefore that this accentuation, without insisting on its superior harmony, must best answer the great end of language, 515.

515. This tendency in our language to simplify compounds is sufficiently evident in that numerous catalogue of words, where we find the long vowel of the simple changed into a short one in the compound, and by this means losing much of its original import to the ear: thus *breakfast*, *shepherd*, *vineyard*, *meadow*, *shadow*, *zealous*, *hearken*, *valley*, *cleansed*, *cleanly* (neat), *forehead*, *wilderness*, *bewilder*, *kindred*, *hinder*, *knowledge*, *darling*, *fearful*, *pleasant*, *pleasure*, *whitster*, *whit-leather*, *seamstress*, *stealth*, *wealth*, *health*, *wisdom*, *wizard*, *parentage*, *lineage*, *children*, *pasty gosling*, *collier*, *holiday*, *Christmas*, *Michaelmas*, *windlass*, *cripple*, *hinder*, *stripling*, *starling*, *house wife*, *husband*, *primer*, *peascod*, *fieldsfare*, *bird* from *bear*, *dearth* from *dear*, *weary* from *wear* and many others, entirely lose the sound of the simple in their compound or derivative.

516. The long *i* in *white*, when a simple, is al

most universally changed into a short one in proper names, as *Whitchurch*, *Whitefield*, *Whitbread*, *Whitlock*, *Whitaker*, &c. for compendiousness and despatch being next in importance to perspicuity, when there is no danger of mistake, it is no wonder that the organs should fall into the shortest and easiest sounds.

517. It must, however, be observed, that this tendency to unite simples into a compound, by placing an accent exactly where the two words coalesce, is still subservient to the laws of harmony. The Greek word *δοκω*, which signifies to *opine*, and from which the last syllables of *orthodoxy* are derived, was never a general subjunctive word like *λογος* and *γραφω*; and even if it had been so, the assemblage of consonants in the letter *x* would have prevented the ear from admitting an accent on the syllable immediately preceding, as the *x* would, by this means, become difficult to pronounce. Placing the accent, therefore, on the first syllable of *orthodoxy*, gives the organs an opportunity of laying a secondary stress upon the third, which enables them to pronounce the whole with distinctness and fluency: thus *Galaxy* and *Cachexy*, having the accent on the first syllable, are very difficult to pronounce; but this difficulty is removed by placing the accent a syllable higher in the words *apoplexy*, *ataxy*, and *anorexy*.

518. But the numerous classes of words that so readily adopt this enclitical accent sufficiently prove it to be agreeable to the genius of our pronunciation. This will more evidently appear by adducing examples. Words in the following terminations have always the accent on that syllable where the two parts unite, that is, on the antepenultimate syllable:

In *logy*, as *apology*, *amblogy*, *genealogy*, &c.
In *graphy*, as *geography*, *orthography*, *historiography*, &c.
In *phagus*, as *sarcophagus*, *ichthyophagus*, *androphagus*, &c.
In *loquy*, as *obloquy*, *soliloquy*, *ventriloquy*, &c.
In *strophe*, as *catastrophe*, *apostrophe*, *anastrophe*, &c.
In *meter*, as *geometer*, *barometer*, *thermometer*, &c.
In *gonal*, as *diagonal*, *octagonal*, *polygonal*, &c.
In *vorous*, as *carnivorous*, *granivorous*, *placivorous*, &c.
In *ferous*, as *bacciferous*, *cocciferous*, *somniferous*, &c.
In *fluens*, as *superfluens*, *mellifluens*, *fellifluens*, &c.
In *fluent*, as *mellifluent*, *circumfluent*, *interfluent*, &c.
In *vorous*, as *ignivorous*, *flamivorous*, &c.
In *parous*, as *viviparous*, *oviparous*, *deiparous*, &c.
In *cracy*, as *theocracy*, *aristocracy*, *democracy*, &c.
In *gony*, as *theogony*, *cosmogony*, *hexagony*, &c.
In *phony*, as *symphony*, *cacophony*, *colophony*, &c.
In *machy*, as *theomachy*, *logomachy*, *sciomachy*, &c.
In *nomy*, as *economy*, *astronomy*, *Deuteronomy*, &c.
In *tomy*, as *anatomy*, *lithotomy*, *arteriotomy*, &c.
In *scopy*, as *metoposcopy*, *deuteroscopy*, *aeroscopy*, &c.
In *pathy*, as *apathy*, *antipathy*, *idiopathy*, &c.
In *mathy*, as *opsimathy*, *polymathy*, &c. &c. &c.

519. Some of these Greek compounds seem to refuse the antepenultimate accent, for the same reason as *orthodoxy*; such as *necromancy*, *chiro-mancy*, *hydromancy*; and those terminating in *archy*, as *hierarchy*, *oligarchy*, *patriarchy*: all of which have the accent on the first syllable, which gives the organs time to recover their force upon the third, and to pronounce the two consonants with much more ease than if the accent immediately preceded them; but *periphrasis* and *antiphrasis*, besides their claim to the accent of their originals, readily admit of the accent on the second syllable, because the consonants in the two last syllables do not come together, and are therefore easily pronounced after the accent. Words of more than two syllables ending in *ague*, as *pedagogue*, *dialogue*, &c. have the accent on the antepenultimate. *Orthoëpy*, having no consonant in the antepenultimate syllable, naturally throws its accent on the first.—See *Monomachy*.

520. By this view of the enclitical terminations we may easily perceive how readily our language falls into the antepenultimate accent in these

compounded polysyllables; and that those terminations which seem to refuse this accent, do it rather from a regard to etymology than analogy: thus words ending in *asis*, as *periphrasis*, *apophrasis*, *hypostasis*, *antiperistasis*, &c. have the antepenultimate accent of their originals. The same may be observed of those ending in *esis*, as *hypothesis*, *antithesis*, *parenthesis*, &c.; but *ex-gesis*, *mathesis*, *auresis*, *catachresis*, *paracentesis*, *aposisopesis*, have the accent on the penultimate syllable, because the vowel in this syllable is long in Greek and Latin. But all words ending in *osis* have the accent on the penultimate, except *metamorphosis* and *apotheosis*, which desert the accent of their Latin originals, while those in *ysis* are accented regularly on the antepenultimate in Greek, Latin, and English, as *analysis*, *paralysis*, &c. We may note, too, that every *s* in all these terminations is sharp and hissing.—See the words *Exostosis* and *Apotheosis*.

521. Words of three syllables ending in *ator* have the accent on the penultimate, as *spectator*, *collator*, *delator*, &c. except *orator*, *senator*, *legator*, and *barrator*. But words in this termination, of more than three syllables, though they have generally the accent on the penultimate, are subject to a diversity not easily reduced to the rule: thus *navigator*, *propagator*, *dedicator*, &c. are sometimes pronounced with the accent on the first syllable, and sometimes on the third: but as these words may be pronounced with an accent on both these syllables, it is of less consequence on which syllable we place the accent when we use only one, 528. The general rule certainly inclines to the penultimate accent; but as all these words are verbal nouns, and, though generally derived from Latin words of the same terminations, have verbs corresponding to them in our own language, it is very natural to preserve the accent of the verb in these words, as it gives an emphasis to the most significant part of them: thus *equivocator*, *prevaricator*, *dedicator*, might be regularly formed from the verbs to *equivocate*, to *prevaricate*, and to *dedicate*; and, agreeably to analogy, would have been written *equivocater*, *prevaricater*, and *dedicater*; but an affectation of preferring every analogy to our own has given these words a Latin termination, which answers no purpose but to involve our language in absurdities: but the ear, in this case, is not quite so servile as the eye; and though we are obliged to write these words with *or*, and not *er*, we generally hear them pronounced as if they were formed from our own verbs, and not from Latin nouns in *ator*. But when the word has no verb in our own language to correspond to it, the accent is then placed with great propriety upon the *a*, as in Latin: thus *violator*, *instigator*, *navigator*, &c. ought to have the accent on the first syllable; and *emendator*, *gladiator*, *adulator*, &c. on the last but one.

SECONDARY ACCENT.

522. Hitherto we have considered that accent only which necessarily distinguishes one syllable in a word from the rest; and which, with very little diversity, is adopted by all who speak the English language.

523. The secondary accent is that stress we may occasionally place upon another syllable, besides that which has the principal accent, in order to pronounce every part of the word more distinctly, forcibly, and harmoniously. Thus this accent may be placed on the first syllable of *conversation*, *commendation*, &c.

524. There are few authors who have not taken notice of two accents upon some of the longer polysyllables, but none have once hinted that one of these is not essential to the sound of the word: they seem to have supposed both accents equally necessary, and without any other difference than that one was pronounced more forcibly than the other. This mistake arose from a want of studying the speaking voice. A knowledge of this would have told them that one accent only was essential to every word of more than one syllable, and that the secondary stress might, or might not, be adopted, as distinctness, force, or harmony, should require: thus *complaisant*, *con-*

buland, carousan, and violin, partisan, artisan, courtesan, metaphysick, have frequently an accent on the first as well as on the third syllable, though a somewhat less forcible one. The same may be observed of *repartee, referee, privateer, dominion, &c.*; but it must still be observed, that, though an accent be allowable on the first syllable of these words, it is by no means necessary; they may all be pronounced with one accent, and that on the last syllable, without the least deviation from propriety.

325. In order to give some idea of the nature of the secondary accent, let us suppose that, in giving our opinion of an astronomical argument, we say,

"It is a direct demonstration of the Copernican system."

In this sentence, as an accent is necessarily upon the last syllable of *direct*, we seldom lay a stress on the first syllable of *demonstration*, unless we mean to be uncommonly emphatical; but in the following sentence,

"It is a démonstration of the Copernican system,"

here, as no accented word precedes *demonstration*, the voice finds a rest, and the ear a force, in placing an accent on the first as well as on the third syllable.

326. But though we may, or may not, use the secondary accent at pleasure, it is by no means a matter of indifference on what syllable we place it: this is fixed with as much certainty as the place of the principal accent itself; and a wrong position of one would as much derange the sound of the word as a wrong position of the other: and it must be carefully noted that, though we lay no stress upon the syllable which may have the secondary accent, the consonants and vowels have exactly the same sound as if the doubtful syllable (as it may be called) were accented. Thus, though I lay no stress upon the second syllable of *negotiation, pronunciation, ecclesiastick, &c.* the *c* and *s* go into the sound of *sh* and *zh*, as if the secondary accent were on the preceding syllable, 357, 451, 459.

327. It may be observed, in the first place, that the secondary accent is always two syllables, at least, distant from the principal accent: thus in *demonstration, lamentation, provocation, &c.* the secondary accent is on the first syllable, and the principal on the third; and in *arteriotomy, meteorology, and hypochondriacal*, the secondary accent is on the first, and the principal on the fourth syllable; and in the word *indismissibility* we may place two secondary accents, one upon the first, and the other on the third.

328. In the next place it may be observed, that though the syllable on which the principal accent is placed is fixed and certain, yet we may, and do frequently, make the secondary principal, and the principal secondary: thus *carousan, compliments, violin, repartee, referee, privateer, dominion, courtesan, artisan, charlatan*, may all have the greatest stress on the first, and the least on the last syllable, without any violent offence to the ear: nay, it may be asserted, that the principal accent on the first syllable of these words, and none at all on the last, though certainly improper, has nothing in it grating or discordant; but placing an accent on the second syllable of these words would entirely derange them, and produce an intolerable harshness and dissonance. The same observations may be applied to *demonstration, lamentation, provocation, navigator, propagator, alligator*, and every similar word in the language. But, as we have observed, No. 326, the consonants *t, d, c,* and *s*, after the secondary accent, are exactly under the same predicament as after the primary; that is, if they are followed by a diphthong or diphthongal vowel, these consonants are pronounced like *sh, tsch, zh,* or *j*, as *sententiousness, partiality, &c.* 526.

QUANTITY.

329. In treating this part of pronunciation, it will not be necessary to enter into the nature of

that quantity which constitutes poetry; the quantity here considered will be that which relates to words taken singly; and this is nothing more than the length or shortness of the vowels, either as they stand alone, or as they are differently combined with vowels or consonants, 63.

330. Quantity, in this point of view, has already been fully considered under every vowel and diphthong in the language. What remains to be said on this subject is, the quantity of vowels under the secondary accent. We have seen that vowels, under the principal accent, before the diphthongs *ia, ie, eo, ion*, are all long, except *i*, 507; that all vowels are long before the terminations *ity* and *ety*, as *deity, plicity, &c.* 511; that if one or more consonants precede these terminations, every preceding accented vowel, except the *a* in *scarcity* and *rarity*, signifying uncommonness, is short but *u*: and that the same analogy of quantity is found before the terminations *ic* and *ical*, and the numerous enclitical terminations we have just been pointing out. Here we find custom conformable to analogy; and that the rules for the accent and quantity of these words admit of scarcely any exceptions. In other parts of the language, where custom is more capricious, we can still discover general rules; and there are but very few words in which the quantity of the vowel under the principal accent is not ascertained. Those who have but a common share of education, and are conversant with the pronunciation of the capital, are seldom at a loss for the quantity of the vowel under that accent which may be called principal; but the secondary accent in the longer polysyllables does not seem to decide the quantity of the vowels so invariably. Mr. Sheridan divides the words *deglutition, depravation, degradation, dereliction, and democratical*, into *de-glu-ti-tion, de-pra-va-tion, de-gra-da-tion, de-re-lic-tion, and de-mo-crat-i-cal*, while Dr. Kenrick more accurately divides them into *deg-lu-ti-tion, depr-a-va-tion, deg-ra-da-tion, and dem-o-crat-i-cal*; but makes not any distinction between the first *e* in *profanation* and *profane, prodigality* and *prodigious, prorogation* and *pro-rogue*, though he distinguishes this letter in the first syllable of *progress* and that in *progression*: and though Mr. Sheridan divides *retrograde* into *ret-ro-grade*, he divides *retrogradation, retrogression, retrospect, retrospection, and retrospective*, into *re-tro-gra-da-tion, re-tro-gres-sion, re-tro-spect, re-tro-spec-tion, and re-tro-spec-tive*. At the first sight of these words we are tempted to prefer the preposition in a distinct syllable, as supposing that mode to convey more distinctly each part of the word; but custom at large, the best interpreter of nature, soon lets us see that these prepositions coalesce with the word they are prefixed to for reasons greatly superior to those which present themselves at first, 514. If we observe the tendency of pronunciation, with respect to inseparable prepositions, we shall find, that those compound words which we adopt whole from other languages we consider as simples, and pronounce them without any respect to their component parts; but those compounds which we form ourselves retain the traces of their formation in the distinction which is observable between the prepositive and radical part of the word: thus *retrograde, retrogression, retrospect, and retrospective*, coming compounded to us from the Latin, ought, when the accent is on the preposition, to shorten the vowel, and unite it to the root, as in *re-sur-rec-tion, rec-ol-lec-tion, pre-a-sti-tion, &c.*; while *re-commit, re-convey, &c.* being compounds of our own, must preserve it separate.

331. From what has been observed arises this general rule: where the compound retains the primary sense of the simples, and the parts of the word are the same in every respect, both in and out of composition, then the preposition is pronounced in a distinct syllable; but when the compound departs ever so little from the literal sense of the simples, the same departure is observable in the pronunciation; hence the different syllabication and pronunciation of *re-commence* and *re-commend*; the former signifies a repetition of a commencement, but the latter does not imply a repetition of a commendation: thus *re-petition* would signify to petition again; while *re-petition* signifies only an iteration of the same act, be it what it will. The same may be observed

of the words *re-create* and *rec-reate*, *re-formation* and *ref-ormation*.

532. That this is perfectly agreeable to the nature of the language appears from the short pronunciation of the vowel in the first syllable of *preface*, *prelate*, *prelude*, *prologue*, &c. as if divided into *pref-ace*, *pre-late*, *pre-lude*, *pro-logue*, &c. It is much to be regretted, however, that this short sound of the penultimate vowel has so much obtained in our language, which abounds too much in these sounds; nor can etymology be always pleaded for this pronunciation; for in the foregoing words the first vowel is long in the Latin *prefatio*, *prælatus*, *prælium*, though short in *prologus*: for though in words from the Greek the preposition *pro* was short, in Latin it was generally long; and why we should shorten it in *progress*, *project*, &c. where it is long in Latin, can only be accounted for by the superficial application of a general rule, to the prejudice of the sound of our language, 543.

533. It will be necessary, however, to observe, that, in forming a judgement of the propriety of these observations, the nicest care must be taken not to confound those prepositions which are under the primary and secondary accent with those which immediately precede the stress; for *pre-clude*, *pre-tend*, &c. are under a very different predicament from *prologue*, *preposition*, &c.; and the very same law that obliges us to pronounce the vowel short in the first syllable of *pro-vi-dence*, *pro-voca-tion*, and *prof-a-nation*, obliges us to pronounce the vowel open, and with some degree of length, in *pro-vide*, *pro-voke*, and *pro-fane*. The same may be observed of the *e* in *re-pair* and *re-pa-ration*, *re-ly* and *rep-ll-cation*, *repeat* and *re-pe-tition*, the accent making the whole difference between the quantity of the vowel in one word and the other.

534. The only exception to the shortening power of the secondary accent is the same as that which prevents the shortening power of the primary accent, 503, namely, the vowel *u*, as in *lucubra-tion*, or when any other of the vowels are succeeded by a semi-consonant diphthong, 106: thus *mediator* and *mediatorial* have the *e* in the first syllable as long as in *mediate*; *deviation* has the *e* in the first syllable as long as in *deviate*, notwithstanding the secondary accent is on it, and which would infallibly have shortened it, if it had not been for the succeeding diphthong *ia*; and even this diphthong in *gladiator* has not the power of preserving the first syllable long, though Mr. Sheridan, by his marking it, has made it so.

535. From what has been seen of accent and quantity, it is easy to perceive how prone our language is to an antepenultimate accent, and how naturally this accent shortens the vowel it falls upon: nay, so great a propensity have vowels to shrink under this accent, that the diphthong itself, in some words, and analogy in others, are not sufficient to prevent it, as *valiant*, *retali-ate*. Thus, by the subjoining only of *al* to *na-tion*, with the *a* long, it becomes *national*, with the *a* short, though contrary to its relation with *occasion* and *congregation*, which do not shorten the *a* upon being made *occasional* and *congregational*: in like manner the acquisition of the same termination to the word *nature* makes it *natur-al*; but this, it may be presumed, is derived from the Latin *naturalis*, and not from adding *al* to the English word, as in the foregoing instances; and thus it comes under the shortening power of the antepenultimate accent, notwithstanding the semi-consonant diphthong *u*.

536. The same shortening power in the antepenultimate accent may be observed in *rational* and *ratiocinate*, where the first *a* in the first word, and the *o* in the second, are short. The first *a* in the second word is short also by the power of the secondary accent; though Mr. Sheridan has, in my opinion, very erroneously divided *ratiocination* into *ra-sho-sy-na-shum*; that is, into a syllable less than it ought to have, with the *o* long instead of short.

537. The accent on the Latin antepenultimate seemed to have something of a similar tendency: for though the great difference in the nature of the Latin and English accent will allow us to argue from one to the other but in very few circumstances, 503, yet we may perceive in that ac-

cent, so different from ours in general, a great coincidence in this particular; namely, its tendency to shorten an antepenultimate syllable. Bishop Hare tells us, that "Quæ acuantur in tertia ab extrema, interdum acuta corripunt, et positione sola longa sunt, ut *optime*, *servitus*, *pervellim*, *Pamphilus*, et pauca alia, quo Cretici mutantur, in Anapestos. Idem factum est in *neutiquam*, licet incipiat diphthongo."—*De Metr. Comic*, pag. 62. Those words which have the acute accent on the antepenultimate syllable have sometimes that syllable shortened, if it was only long by position, as *optime*, *servitus*, *pervellim*, *Pamphilus*, and a few others, which by this means are changed from Cretic to Anapestic feet: nay, *neutiquam* undergoes the same fate, though it begins with a diphthong.

SYLLABICATION.

538. Dividing words into syllables is a very different operation, according to the different ends proposed by it. The object of syllabication may be, either to enable children to discover the sound of words they are unacquainted with, or to show the etymology of a word, or to exhibit the exact pronunciation of it.

539. When a child has made certain advances in reading, but is ignorant of the sound of many of the longer words, it may not be improper to lay down the common general rule to him, that a consonant between two vowels must go to the latter; and that two consonants coming together must be divided. Farther than this it would be absurd to go with a child; for telling him that compounds must be divided into their simples, and that such consonants as may begin a word may begin a syllable, requires a previous knowledge of words, which children cannot be supposed to have; and which, if they have, makes the division of words into syllables unnecessary. Children, therefore, may be very usefully taught the general rule above mentioned, as, in many cases, it will lead them to the exact sound of the word, as in *pro-vi-ded*: and in others it will enable them to give a good guess at it, as in *de-li-cate*; and this is all that can be expected: for when we are to form an unknown compound sound out of several known simple sounds (which is the case with children, when we wish them to find out the sound of a word by spelling it), this, I say, is the only method that can be taken.

540. But an etymological division of words is a different operation: it is the division of a person acquainted with the whole word, and who wishes to convey, by this division, a knowledge of its constituent parts, as *ortho-graphy*, *theo-logy*, &c.

541. In the same manner a person who is pre-acquainted with the whole compound sound of a word, and wants to convey the sound of each part to one unacquainted with it, must divide it into such partial sounds as, when put together again, will exactly form the whole, as *or-thog-ra-phy*, *theo-lo-gy*, &c. This is the method adopted by those who would convey the whole sound, by giving distinctly every part; and, when this is the object of syllabication, Dr. Lowth's rule is certainly to be followed. "The best and easiest rule," says the learned bishop, "for dividing the syllables in spelling, is, to divide them as they are naturally divided in a right pronunciation, without regard to the derivation of words, or the possible combination of consonants at the beginning of a syllable."—*Introduction to Eng. Gram.* page 7.

542. In this view of syllabication we consider it only as the picture of actual pronunciation; but may we not consider it as directed likewise by some laws of its own? Laws, which arise out of the very nature of enunciation, and the specific qualities of the letters? These laws certainly direct us to separate double consonants, and such as are uncombinable from the incoalescence of their sounds: and if such a separation will not paint the true sound of the word, we may be certain that such sound is unnatural, and has arisen from caprice: thus the words *Chamber*, *Cambridge*, and *Cambrick*, must be divided

at the letter *m*; and as this letter, by terminating the syllable according to the settled rules of pronunciation, shortens the vowel, the general pronunciation given to these words must be absurd, and contrary to the first principles of the language. *Angel**, *ancient*, *danger*, *manger*, and *ranger*, are under the same predicament; but the paucity of words of this kind, so far from weakening the general rule, strengthens it.—See *Change*.

543. By an induction which demonstrates the shortening power of the antepenultimate accent has been shown the propriety of uniting the consonant to the vowel in the first syllable of *demonstration*, *lamentation*, *propagation*, &c.: we thus decide upon the quantity of these vowels, which are so uncertain in our best dictionaries; and may we not hope, by a similar induction, and with the first principles of language in view, to decide the true, genuine, and analogical sound of some words of another kind which waver between different pronunciations? The antepenultimate accent has unquestionably a shortening power; and I have not the smallest doubt that the penultimate accent has a lengthening power: that is, if our own words, and words borrowed from other languages of two syllables, with but one consonant in the middle, had been left to the general ear, the accent on the first syllable would have infallibly lengthened the first vowel. A strong presumption of this arises from our pronunciation of all Latin dissyllables in this manner, without any regard to the quantity of the original (see *Drama*), and the ancient practice of doubling the consonant when preceded by a single vowel in the participial terminations, as to *begin*; *beginning*, to *regret*, *regretted*: and I believe it may be confidently affirmed that words of two syllables from the Latin, with but one consonant in the middle, would always have had the first vowel long, if a pedantick imitation of Latin quantity had not prevented it (see *Drama*). Let an Englishman, with only an English education, be put to pronounce *sephyr*, and he will, without hesitation, pronounce the *e* long, as in *senith*: if you tell him the *e* is pronounced short in the Latin *sephyrus*, which makes it short in English, and he should happen to ask you the Latin quantity of the first syllable of *comick*, *mimick*, *solace*, &c. your answer would be a contradiction to your rule.—What irrefragably proves this to be the genuine analogy of English quantity is the different quantity we give a Latin word of two syllables when in the nominative and when in an oblique case: thus in the first syllable of *sidus* and *nomen*, which ought to be long, and of *miser* and *onus*, which ought to be short, we equally use the common long sound of the vowels: but in the oblique cases, *sideris*, *nominis*, *miseri*, *oneris*, &c. we use quite another sound, and that a short one: and this analogy runs through the whole English pronunciation of the learned languages, 533, 535.

544. But the small dependance of the English quantity on that of the Latin will be best seen by a selection of words of two syllables, with the accent on the first, and but one consonant in the middle, and comparing them with the Latin words from which they are derived.

English dissyllables which have but one consonant, or a mute and liquid in the middle, and have the first syllable accented, contrasted with the Latin words from which they are derived, marked with their respective quantities.

545. In this view of the Latin and English quantity we see how uncertain it is to argue from the former to the latter; for though the Latin *accent* is frequently a rule for placing the English accent, as in words derived whole from that language, as *abdomen*, *acumen*, &c. 508, or preserving the same number of syllables, as in *impudent*, *elegant*, from *impudens*, *elegans*, &c. 508, yet the *quantity* of the Latin seems to have no influence on that of the English. In words of two syllables, where one consonant comes between two vowels, as *focus*, *basis*, *local*, &c. though the vowel in the first syllable is short in Latin, it is long in English; and inversely, *florid*, *frigid*, *livid*, &c. have the vowels in the first syllable short, though these vowels are long in *floridus*, *frigidus*, *lividus*, &c.; so that, if any thing like a rule can be formed, it is, that when a word of three syllables in Latin, with the two first short, is anglicised by dropping the last syllable, we shorten the first syllable of the English dissyllable, unless it ends with the vowel *u* 535. Thus we see the shortening power of our English antepenultimate accent, which shortens every antepenultimate vowel but *u* in our pronunciation of Latin words; as in *mimicus*, *lividus*, &c. and continues its shortening power in the penultimate accent of these words when anglicised into *mimick* and *livid*; and hence it is that the short quantity of the first vowel in dissyllables is become so prevalent in our language, to the great detriment of its sound, and the disturbance of its simplicity.

It may be necessary, in the next place, to take a view of such words as are either of Saxon or French original, or not so immediately derived from the Latin as to be influenced by its quantity.

From the perusal of this selection we see a great majority of words where the first vowel is unaccented short, and therefore to some inspectors it may seem improbable that the original tendency of our Saxon language was to the long quantity of the penultimate vowel. But as Mr. Nares very judiciously observes, "the rule is sufficiently general to be admitted, and is undoubtedly founded in the nature of our pronunciation;" for which he quotes Dr. Wallis, who says, "Hæc videtur genuina lingue nostræ ratio antiqua."—*Elements of Orthoëpy*, p. 225.

546. Those who have made the progress of languages their study, will observe, it is presumed, that the broad sounds of vowels change to the slender, the difficult consonants to the easier, and the long vowels to short ones. This, it is imagined, will be found to be true in all languages, as well as our own; and such alteration seems founded in the nature of man and of society. The next object to understanding a language being despatch, it is no wonder that short sounds have been encroaching on us, and depriving us of the tune of our words for the sake of gaining time. This is apparent in the abbreviation of simple words when compounded, as in knowledge, shepherd, &c. 518: but as it is the business of art to correct and regulate the eccentricities of nature and the excesses of custom, it should be the care of every philosophic grammarian to keep his eye upon the original genius and general scope of his language, and to suffer custom to depart as little from them as possible. But although no inconsistency or want of analogy can alter any

pronunciation which is once acknowledged and settled, yet, when a pronunciation is wavering, consistency, analogy, and general principles, ought to decide against a great majority of mere fashion and caprice.

Thus have I endeavoured to give a distinct view of the correspondence between the accent and quantity of the learned languages and our own, and to rescue a plain Englishman (who, as Mr. Jonson says of Shakespeare, has little Latin and less Greek) from the supercilious criticism of those Greeklings and Latinasters, who are of remarkably ignorant of their own language, yet frequently decide upon its accent and quantity, because they have a smattering of Greek and Latin. If the question turns upon the accent of an English word, the Latin word it is derived from is immediately produced, and sentence passed without appeal; and yet, if the Englishman were to ask the rule on which this decision is founded, the scholar would, in all probability, be at a loss to tell him. Has every English word the same accent as the Latin word from which it is derived? This the scholar cannot answer in the affirmative, as the least reflection would tell him that *persimony*, *acrimony*, &c. cannot be accented after the Latin *persimonia*, *acrimonia*, &c. as the Latin is never accented higher than the antepenultimate. But perhaps the English word is adopted whole from Latin. Here is undoubtedly a fair pretence for pronouncing it with the Latin accent; and yet see how many exceptions there are to this rule. See No. 543, b. Or, perhaps, the English word, though anglicized, retains the same number of syllables. This, indeed, may be said to be a general rule for preserving the Latin accent, but general as to be neglected in a thousand instances. See No. 543, f, g, h, i, k. But if the scholar, instead of the case, huddles quantity and accent together, and infers the English quantity from Latin, the English scholar needs only to refer him to the selections here given, Nos. 544, 545, to show the inanity of such a plea. Upon the whole, therefore, I flatter myself that men of learning will be gratified to see the subject in a clear point of view than any in which it has ever been exhibited; and the plain English scholar will be indebted to me for giving him as clear and distinct an idea of the connexion between the Greek and Latin accent and quantity, and the accent and quantity of his native tongue, as if he had Homer and Horace by heart; and for placing out of the reach of those pert minor critics, who are constantly insulting him with their knowledge of the dead languages.

Of the Quantity of the Unaccented Vowels not in the same Syllable with Consonants.

547. Accented syllables, as we have before observed, 179, are so strongly marked as to be easily comprehended, when they are once settled by custom or analogy; but those immediately before or after the accent are in a state of uncertainty, which some of our best judges find themselves unable to remove. Some grammarians have called all the open vowels before or after the accent short, though the ear so evidently dictates the contrary in the *u* in *utility*, the *o* in *obedience*, &c. Some have saved themselves the trouble of farther search by comprehending these vowels under the epithet obscure: nay, so unfixed are the sounds of these vowels seem, that Dr. Johnson, whose *Rhetorical Dictionary* shows he is possessed of very great philological abilities, seems as much at a loss about them as the meanest grammarian in the kingdom; for when he comes to mark the sound of the vowel *o* in the first syllable of a series of words with the accent on the second, he makes the *o* in *promulge*, *pet*, and *prefix*, long, as they ought to be; the same letter in *proboresis*, *proceed*, and *produce*, short. *Domitian*, *domestick*, *donation*, *domain*, are marked as if pronounced *dom-in*, *dom-estick*, *don-ation*, and *dom-ain*, with the short; while the first of *decility*, *potential*, *monstony*, have the *o* marked long, as in *de-potent*, and *modish*; though it is certain to a demonstration, that the etymology, accent, and letters, being the same, the same sound must be produced, unless where custom has prece-

marked a difference; and that the first syllables of *promulge*, *propel*, and *prolix*, and those of *proboscis*, *proceed*, and *procedure*, have no such difference, seems too evident to need proof*.

548. I know it may be demanded, with great plausibility, how do I know that there is not this very inconsistency in custom itself? What right have I to suppose that custom is not as vague and capricious in these syllables as in those under the accent? To which I answer: if custom has determined the sound of these vowels, the dispute is at an end. I implicitly acquiesce in the decision; but if professors of the art disagree in their opinions, it is a shrewd sign that custom is not altogether so clear in its sentence; and I must insist on recurring to principles till custom has unequivocally decided.

549. Every vowel that is neither shortened by the accent, nor succeeded by a double consonant, naturally terminates a syllable; and this terminating vowel, though not so properly long as if the accent were on it, would be very improperly termed short, if by short, as is often the case, be meant shut, 65. According to this idea of syllabication, it is presumed that the word *opinion* would fall into three distinct parts, and every part be terminated by a consonant but the first; thus, *o-pin-ion*.

550. But it may be demanded, what reason is there in the nature of the thing for dividing the word in this manner, rather than into *op-in-ion*, where a consonant ends every syllable? In this, as in many other cases of delicacy, we may be allowed to prove what is right, by first proving what is wrong. Every ear would be hurt, if the first syllable of *opinion* and *opulence* were pronounced exactly alike, *op-in-ion* would be as different from *o-pin-ion* as *o-pu-lence* from *op-u-lence*, and consequently a different syllabication ought to be adopted; but as *opulence* is rightly divided into *op-u-lence*, *opinion* must be divided into *o-pin-ion*; that is, the *o* must be necessarily separated from the *p*, as in *open*; for, as was before observed, every vowel pronounced alone has its open sound, as nothing but its junction with a consonant can shut it, and consequently unaccented vowels not necessarily joined to a consonant are always open; therefore, without violating the fundamental laws of pronunciation, *opinion* must necessarily be divided into *o-pin-ion* and not *op-in-ion*, and the *o* pronounced as in the word *open*, and not as in *opulence*; which was the thing to be proved.

551. If these reasons are valid with respect to the vowel in question, they have the same force with respect to every other vowel not shut by a consonant throughout the language. That the vowels in this situation are actually open, we may easily perceive by observing *that* vowel, which, from its diphthongal and semi-consonant sound, is less liable to suffer by obscure pronunciation than any other. The letter *u*, in this situation, always preserves itself full and open, as we may observe in *utility*, *lucubration*, &c. The *e*, the most open of all the simple vowels, has the same tendency in *obedience*, *opaque*, *position*, &c. the *e* in the first syllable of *event*, in the second

of *delegate*, the first and third of *evangelist*, in the second of *gaiety*, *nicety*, &c. the *a* in the first of *abate*, and the second of *probable*, &c. and the *i* in *nullity*. This unaccented letter being no more than *e*, and this sound, when long, corresponding exactly with its short sound (which is not the case with any of the other vowels, 65, 66), the difference between the long and short, or, open and shut sound of this letter, is less perceptible than in any other: yet we may easily perceive that a delicate pronunciation evidently leaves it open when unaccented in *indivisibility*, as this word would not be justly pronounced if the *i* in every syllable were closed by a consonant, as if divided into *in-di-iv-is-i-bil-i-ty*; the first, third, and fifth syllables would, indeed, be justly pronounced according to this division, as these have all accentual force, which shuts this vowel, and joins it to the succeeding consonant; but in the second, fourth, and sixth syllables, there is no such force, and consequently it must remain open and unconnected with the consonant; though, as was before observed, the long and short sound of this vowel are so near each other, that the difference is less perceived than in the rest. Every ear would be displeased at such a pronunciation as is indicated by *ut-til-ill-y*, *luc-cub-bration*, *op-pin-ion*, *pos-ition*, *ev-vent*, *ev-an-gel-ist*, *ab-bate*, *prob-able*, &c.; but for exactly the same reasons that the vowels out of the stress ought to be kept open in these words, the slender *i* must be kept open in the same situation in the word *in-di-iv-is-i-bil-i-ty*, and every similar word in the language*.

552. From all this it will necessarily follow, that the custom adopted by the ancients and moderns of joining the single consonant to the latter vowel in syllabication, when investigating the unknown sound of a word, has its foundation in reason and good sense: that the only reason why vowels are short and shut, is their junction with a consonant; so those that are not joined to consonants, when we are not speaking metrically, cannot be said to be either short or shut: and that as all accented vowels, when final or pronounced alone, have their open sound, so those vowels that are alone or final in a syllable must necessarily retain their open sound likewise, as nothing but uniting instantaneously with the succeeding consonant can shut them: and though nothing but a delicate ear will direct us to the degree of openness with which we must pronounce the first unaccented *e* in *docility*, *domestick*, *potential*, *proceed*, *monastick*, *monotony*, &c. we may be assured that it is exactly under the same predicament, with respect to sound, in all these words: and as they can never be pronounced short and shut, as if written *dossility*, *dommestick*, &c. without hurting the dullest ear; so the *e* in *event*, *evangelist*, &c. and the *i* in the third syllable of *utility*, and in the second, fourth, and sixth of *indivisibility*, can never be sounded as if joined to the consonant without offending every delicate ear, and overturning the first principles of pronunciation.

553. The only considerable exception to this general rule of syllabication which determines the sound of the unaccented vowels, is when *e* succeeds the accent, and is followed by *r*, as in *lateral*, *general*, *misery*, &c. which can never be pronounced *lit-eral*, *gen-eral*, *mis-ery*, &c. without the appearance of affectation. In this situation we find the *r* corrupt the sound of the *e*, as it does that of every other vowel when in a final unaccented syllable. For this consonant being nothing more than a jar, it unavoidably mixes with the *e* in this situation, and reduces it to the obscure sound of short *u*, 418, a sound to which

* I am aware that this ingenious writer seems to avoid this inconsistency, by premising, in his *Rhetorical Grammar*, page 43, that he has sometimes marked the *e* in words beginning with a preposition with the oratorical, and sometimes with the colloquial pronunciation: thus, in *commune*, *communicate*, &c. the oratorical sound is given as in the first syllable of *common*, while the colloquial sound changes the *o* into *u*, as if the words were written *cum-mune*, *cum-municate*, &c.: but the distinction in these examples does not touch the point: here there is a change only of one short sound for another, and not any promiscuous use of a long and short, or open and shut sound of the same letter. Dr. Kenrick himself, when he marks the *e* in *proboscis*, *proceed*, and *procedure*, does not adopt the short *u*, as he does in *commune*, *communicate*, &c.; nor is he aware of the essential difference, with respect to the quantity of the vowel, in the double consonant in one set of words, and the single one in the other.

* It is plain that Mr. Sheridan considered the unaccented vowel *i*, whether ending a syllable, or joined to the succeeding consonant, as standing for the same sound; for we see him sometimes making use of one division, and sometimes of another: thus he divides the word *diversity* with the *i* terminating the penultimate syllable, and *u-ny-ver-sal-y* with the same *i* united to the consonant. The same variety takes place in the words *in-di-iv-is-i-bil-i-ty* and *in-di-iv-is-i-bil-it-y*, while Dr. Kenrick divides all words of this termination regularly in the former manner.

the other unaccented vowels before *r* have sometimes so evident a tendency.

554. An obscure idea of the principles of syllabication just laid down, and the contradiction to them perceived in this exception, has made most of our orthoëpists extremely wavering and uncertain in their division of words into syllables, when the unaccented *e* has preceded *r*, where we not only find them differing from each other, but sometimes even from themselves :

555. I have been the more copious in my collection of these varieties, that I might not appear to have taken the advantage of any oversight or mistake of the press : nor is it any wonder when the principles of syllabication so strongly incline us to leave the vowel *e*, like the other vowels, open before a single consonant ; and the ear so decidedly tells us, that this letter is not always open when preceded by the accent, and followed by *r*, it is no wonder, I say, that a writer should be perplexed, and that he should sometimes incline to one side, and sometimes to the other. I am conscious I have not always been free from this inconsistency myself. The examples therefore which I have selected, will, I hope, fully justify me in the syllabication I have adopted ; which is, that of sometimes separating the *e* from the *r* in this situation, and sometimes not. When solemn and deliberate speaking has seemed to admit of lengthening the *e*, I have sometimes made it end the syllable ; when this was not the case, I have sometimes joined it to the *r* : thus, as *e* in the penultimate syllable of *incarcerate*, *reverberate*, &c. seems, in solemn speaking, to admit of a small degree of length and distinctness, it ends a syllable ; but as no solemnity of pronunciation seems to admit of the same length and openness of the *e* in *tolerate*, *deliberate*, &c. it is united with *r*, and sounded in the notation by short *u*. It ought, however, to be carefully observed, that though the *e* in this situation is sometimes separated from the *r*, there

is no speaking, however deliberate and solemn, that will not admit of uniting it to *r*, and pronouncing it like short *u*, without offending the nicest and most critical ear.

556. It must also be noted, that this alteration of the sound of *e* before *r* is only when it follows the accent, either primary or secondary, 522, 520 ; for when it is in the first syllable of a word, though unaccented, it keeps its true sound : thus, though the *e* is pronounced like *u* in *alter*, *alteration*, &c. yet in *perfection*, *terrific*, &c. this letter is as pure as when the accent is on it in *perfect*, *terrible*, &c.

557. Something like the corruption of the sound of unaccented *e* before *r* we may perceive in the colloquial pronunciation of the vowel *o* in the same situation ; and accordingly we find our best orthoëpists differ in their notation of this letter : thus *memory*, *memorable*, *immemorable*, *memorably*, *memorize*, have the *o* pronounced like short *u* by Mr. Sheridan and Mr. Scott ; and *memorandum*, with the *o*, as in *open* ; while Dr. Kenrick gives the *o* in all these words the sound it has in the conjunction *or*. Mr. Sheridan marks the unaccented *o* in *corporal*, *corporate*, and *corporation*, like the *o* in *open* ; but Mr. Scott pronounces this *o* in *corporal*, *corporate*, and *corporation*, like short *u*, and the same letter in *incorporate* and *incorporation* like Mr. Sheridan ; and Dr. Kenrick, like the *o* in the former instances. Mr. Sheridan and Mr. Scott are uniform in their pronunciation of the same vowel like short *u* in *armor*, *armorer*, *armory*, *pillory*, *suasory*, *persuatory*, *allegory*, *compulsory*, *cursor*, and *predatory* ; while Dr. Kenrick pronounces the *o* in *armor* and *armory* like the *o* in *open*, and the same letter in *pillory*, *allegory*, and *cursor*, like the *o* in *or*, *nor*, &c. This diversity, among good judges, can arise from nothing but the same uncertainty of the sound of this letter that we have just observed of the *e* ; but if we narrowly watch our pronunciation, we shall find that the unaccented *o* may be opened and lengthened, in deliberate speaking, without hurting the ear, which is not always the case with *e* ; and this has induced me generally to separate the *o* from the succeeding *r* when immediately following the accent ; though I am sensible that the rapidity of colloquial speaking often reduces it to short *u* without offending the ear : but when the *o* is removed more than one syllable from the accent, the most deliberate speaking generally lets it slide into the other vowel : for which reason I have commonly marked it in this manner.—See *Command*.

558. It may, perhaps, appear to some of my readers, that too much time has been spent upon these nice distinctions of sound, in which judges themselves are found to disagree ; but when we consider how many syllables in the language are unaccented, and that these syllables are those in which the peculiar delicacy of the pronunciation of natives consists ; when we reflect on the necessity of having as distinct and permanent sounds as possible, to which we may refer these fleeting and evanescent ones, we shall not look upon an attempt to arrest and investigate them as a useless part of philology.

50. When *G* is printed in the Roman character, it has its hard sound in *get*, *gone*, &c. as *go*, *give*, *gun*, &c.; when it has its soft sound, it is spelled in the notation by the consonant *J*, as *giant*, *gi-ant*, *ji-ant*, *jin-ger*. The same may be observed of *S*: the Roman character denotes its hard sound in *sa*, *sun*, &c. as *so*, *sit*, *sense*, &c.; its soft sound is spelled by *x*, as *ress*, *xaise*, &c. *rose*, *razz*, &c.

In the course of a critical investigation of the powers of the letters in the foregoing Principles, there is scarcely a word of any difficulty or diversity of sound which has not been noticed, and the true pronunciation, with the reasons and authorities for it, pointed out; so that if the inspector should not meet with sufficient information in the Dictionary under the word, let him consult the Principles under the *vowel*, *diphthong*, or *consonant*, he wishes to be explained, and it is highly probable he will meet with the satisfaction he requires. Thus to know something more concerning the *g* in the word *supra*, which some speakers pronounce and others suppress, let him look into the Principles under the letter *G*, No. 306, and he will find additional observations to those in the Dictionary under the word. It is true that most of these doubtful, as well as other words, are referred to the Principles; but if this reference should by chance be omitted, it is hoped that this Advertisement will supply the deficiency.

N. B.—A word not found in the Dictionary may possibly be met with in the Appendix.

A CRITICAL PRONOUNCING DICTIONARY,

AND EXPOSITOR OF THE ENGLISH LANGUAGE.

The figures after the words refer to the numbers in the Principles of Pronunciation prefixed to this Dictionary, where the different sounds of the letters are explained at large. Thus, 73 refers to the first sound of the letter *A*; 93 to the first sound of the letter *E*; and so of the rest.

The figures over the letters refer to the vowels in the words at the top of the page; and the index \mathcal{L} before these words refers to the table of simple and diphthongal sounds, where the different sounds of the vowels are exhibited at one view. Thus, \mathcal{L} 559 refers to the table in the opposite page.

A.

\mathcal{L} 559. *Fâte* 73, *fâr* 77, *fâll* 83, *fât* 81—*mê* 93, *mêt* 95—*plne* 105, *pîn* 107—*nô* 162, *môve* 164, *nôr* 167, *nôt* 163—*tôbe* 171, *tûb* 172, *bûll* 173—*ôll* 299—*pôund* 313—*thin* 466, **THIS** 469.

A, THE first letter of the alphabet, 73. *A*, an article set before nouns of the singular number; a man, a tree. Before a word beginning with a vowel it is written *an*, as, *an ox*. *A* is sometimes a noun, as, *great A*. *A* is placed before a participle, or participial noun; gone *a* hunting, come *a* begging. *A* has a signification denoting proportion; the landlord hath a hundred *a* year.

\mathcal{L} The change of the letter *a* into *an* before a vowel or mute *h* for the sake of sound seems to deserve more attention than has generally been given to it by any of our grammarians, and will therefore be considered under the article *An*; which see.

Of the alphabetical Pronunciation of the Letter A.

So many profound and ingenious observations have been made upon this first step to literature, that volumes might be filled with the erudition that has been lavished on this letter alone. The priority of place it claims, in all alphabets, has made it so much the object of attention, that philologists suppose the foundation of learning but weakly laid, till the natural and civil history of the first letter be fully settled.

But, however deep have been their researches into the origin of this letter, we find no author in our language has hitherto attempted to settle the disputes that have arisen between the natives of England, Ireland, and Scotland, about the true sound of it, when called by its name. Instead, therefore, of tracing this character through the circles of Homer, the Egyptian Hieroglyphics, the mysterious Abraxas, or the Irish Ogam, I shall endeavour to obviate a difficulty that frequently arises when it is pronounced in the Horn-beek: or, in other words, to inquire what is the true name of the first letter of the English alphabet—whether we are to say, *Aye*, *B*, *C*; *Ah*, *B*, *C*; or *Aw*, *B*, *C*.

And first, it will be necessary to consider the nature of a vowel: which grammarians are generally agreed in defining to be “a simple articulate sound, formed by the impulse of the voice by the opening only of the mouth in a particular manner.” Now, as every vowel by itself is sounded long, as nothing but

its junction with a consonant can make it otherwise, it is natural, when pronouncing this vowel alone, to give it the long open sound; but as this long open sound is threefold, as heard in *face*, *father*, and *water*, a question arises, which of these long sounds shall we adopt as a common name to the whole species of this letter? The English make choice of the *a* in *face*, the Irish of that in *father*, and the Scotch of that in *water*. Each party produces words where the letter *a* is sounded in the manner they contend for; but when we demand why one should have the preference, the controversy is commonly at an end; any farther reasons are either too remote or too insignificant to be produced: and indeed, if a diversity of names to vowels did not confound us in our spelling, or declaring to each other the component letters of a word, it would be entirely needless to enter into so trifling a question as the mere name of a letter; but when we find ourselves unable to convey signs to each other on account of this diversity of names, and that words themselves are endangered by an improper utterance of their component parts, it seems highly incumbent on us to attempt an uniformity in this point, which, insignificant as it may seem, is undoubtedly the foundation of a just and regular pronunciation.

The first rule for naming a letter, when pronounced alone, seems to be this: Whatever sound we give to a letter when terminating a syllable, the same sound ought to be given to it when pronounced alone; because, in both cases, they have their primary, simple sound, uninfluenced by a succeeding vowel or consonant; and, therefore, when we pronounce a letter alone, it ought to have such a sound as does not suppose the existence of any other letter. But wherever *a* terminates a syllable with the accent upon it, (the only state in which it can be said to be pure,) it has always the English sound of that letter. The only exceptions to this rule are, the words *father*, *master*, and *water*; and that these are merely exceptions appears from the uniformity with which the *a* is pronounced otherwise in *parent*, *papal*, *layer*, *fatal*, &c. The other vowels have their names exactly similar to the sound they have in a similar situation, as the *e* like that in *megrim*, the *i* like the *i* in *title*; the *o* as the *o* in *noble*, and the *u* like the *u* in *father*.

539. Fâto 73, fâr 77, fâll 83, fâl 81—mê 93, mét 95—pline 105, pîn 107—nô 162, môve 164,

Thus, as it appears from the general analogy of pronunciation, that the sound of the *a*, which the English adopt, is the only one that does not necessarily suppose the existence of any other sound, it inevitably follows that theirs only is the proper appellation of that letter.

But there is another analogy by which we may determine the true sound of the vowels when pronounced singly; and that is, the sound they have when preserved long and open by the final *e*. Thus we call the letter *e* by the sound it has in *theme*, the letter *i* as it sounds in *time*, the letter *o* as heard in *tone*, and the *u* as in *tune*; and why the letter *a* should not be pronounced as heard in *face* cannot be conceived, as each of the other vowels has, like *a*, a variety of other sounds, as they are united with letters which, in some measure, alter their quality.

In consequence of entertaining a different idea of the *a*, when pronounced in the alphabet, we see the natives of Ireland very prone to a different pronunciation of the words where this letter occurs; and, indeed, this is quite consistent with their doctrine of the sound of *a*, that the words *parent*, *papal*, *taper*, and *fatal*, should be pronounced *pah-rent*, *pah-pal*, *tah-per*, and *fah-tal*. We find the Scotch likewise inclinable to the same pronunciation of *a*, when in words, as when alone. Thus we hear *Sawtan* for *Satan*, *saw-cred* for *sacred*, and *law-ity* for *laity*; and this is perfectly consistent with the manner in which they pronounce the letter *a*, when alone: there is no medium. If this be not the true pronunciation of these words, the *a* is certainly to be sounded as the English do: for, whenever the English give the Italian sound, as it may be called, to the *a*, except in the words *father* and *master*, it is always in consequence of its junction with some consonant, which determines it to that sound; as in monosyllables terminating in *r*, as *bar*, *car*, *far*: but where it is not affected by a succeeding consonant, as in the words *parent*, *papal*, *natal*, *fatal*, we then hear it pronounced as the slender English *a*, both in and out of composition.

It will, perhaps, be objected, that the most frequent short sound of *a*, as heard in *cat*, *rat*, *mat*, *carry*, *marry*, *parry*, is the short sound of the Italian *a* in *father*, *car*, *mar*, *par*, and not the short sound of the *a* in *care*, *mare*, and *pare*; but it may be answered, that this want of correspondence between the name of the letter, and the most frequent short sound, is common to the rest of the vowels: for the *e*, as heard in *col*, *not*, *rol*, is not the short sound of the *e* in *coat*, *note*, *wrote*, but of the *a* in *water*, or of the diphthongs in *caught*, *naught*, and *wrought*; and if we ought to call the *a*, *ah*, because its short sound corresponds to *ah* for the very same reason we ought to call the *e*, *au*; and a similar alteration must take place with the rest of the vowels. As therefore, from the variety of sounds the vowels have, it is impossible to avoid the inconvenience of sometimes sounding the letter one way in a syllable, and another way in a word, we must either adopt the simple long sound when we would pronounce the letter alone, or invent new names for every different sound in a different word, in order to obviate the difficulty.

It must not be dissembled, however, that the sound of *a*, when terminating a syllable not under the accent, seems more inclined to the Irish than the English *a*, and that the ear is less disgusted with the sound of *Ah-mer-l-cah* than of *A-mer-l-cay*: but to this it may be answered, that letters not under the accent, in a thousand instances, deviate from their true sound, that the vowel *a*, like several other vowels in a final syllable not accented, has an obscure sound, bordering on *u*; but if the *a*, in this situation, were pronounced ever so distinctly, and that this pronunciation were clearly the *a* in *father*, it would be nothing to the purpose: when the *a* is pronounced alone, it may be said not on *y* to be a letter, but a distinct character, and a noun substantive; and, as such, has the same force as the letters in an accented syllable. The letter *a*, therefore, as the first character in the alphabet, may always be said to have the accent, and ought to have the same long, open sound, as is given to that letter when accented in a syllable, and not influenced in its sound by any preceding or succeeding consonant.

We may therefore conclude, that if all vowels, when pronounced alone, are accented and long, if spelling be the pronunciation of letters alone, (as it would be absurd to suppose ourselves acquainted with the different consonants that determine the sound of the vowels before they are pronounced,) it follows, that in spelling, or repeating the component parts of a word, we ought to give those parts their simple and uncombined sound: but there is no uncombined sound of the vowel *a*, except the slender sound contained for, unless in the words *father* and *master*; and, therefore, when we repeat letters singly, in order to declare the sound of a word, we must undoubtedly give the first letter of the alphabet the sound we ever give it in the first syllable of the numerous class *la-dy*, *pugan*, *ma-son*, *ba-sin*, &c.

Thus, after placing every objection in its strongest light, and deducing our arguments from the simplest and clearest principles, this important question seems at last decided in favour of the English; who, independent of the arguments in their favour, may be presumed to have a natural right to determine the name of the letter in question, though it has been so often litigated by their formidable and learned, though junior, relations. For though, in some cases, the natives of Ireland and Scotland adhere rather more closely to analogy than the English themselves, yet in this we find the English pronounce perfectly agreeable to rule; and that the slender pronunciation of the letter *a*, as they pronounce it in the alphabet, is no more than giving it that simple sound, it ever has, when unconnected with vowels or consonants that alter its power.

ABACUS, áb'ákús, *s.* [Latin.] A counting table; the uppermost member of a column.

ABAFT, á-báft', *ad.* 545. From the fore part of the ship, towards the stern.

To ABROGATE, áb-rò-gáte, *v. a.* To take away from a law in force; to repeal, to annul. 91.

ABROGATION, áb-rò-gá'shún, *s.* The act of abrogating, the repeal of a law.

ABRUPT, áb-rúpt, *a.* Broken, craggy; sudden, without the customary or proper preparatives.

ABRUPTION, áb-rúp'shún, *s.* Violent and sudden separation.

ABRUPTLY, áb-rúpt'lě, *ad.* Hastily, without the due forms of preparation.

ABRUPTNESS, áb-rúpt'něss, *s.* An abrupt manner, haste, suddenness.

ABSCISS, áb'sěss, *s.* A morbid cavity in the body.

To ABSCIND, áb-sínd', *v. a.* To cut off.

ABSCISSION, áb-sízh'ún, *s.* The act of cutting off; the state of being cut off.

✎ I have differed from Mr. Sheridan in marking the *ss* in this word, and, I think, with the best usage on my side. Though double *s* is almost always pronounced sharp and hissing, yet, when a sharp *s* precedes, it seems more agreeable to the ear to pronounce the succeeding *s* flat. Thus, though the termination *tion* is always sharp, yet, because the *s* in *transition* is necessarily sharp, the *t* goes into the flat sound, as if written *transizhion*, which see.

To ABSCOND, áb-skónd', *v. a.* To hide one's self.

ABSCONDER, áb-scón'dúr, *s.* The person that absconds.

ABSENCE, áb'sěns, *s.* The state of being absent, opposed to presence; inattention, heedlessness, neglect of the present object.

ABSENT, áb'sěnt, *a.* 492. Not present; absent in mind, inattentive.

To ABSENT, áb-sěnt', *v. a.* To withdraw, to forbear to come into presence.

ABSENTEE, áb-sěn-lě, *s.* A word used commonly with regard to Irishmen living out of their country.

ABSINTHIATED, áb-sín'thě-á-těd, *part.* Impregnated with wormwood.

To ABSIST, áb-síst', *v. a.* To stand off, to leave off.

To ABSOLVE, áb-zólv', *v. a.* 448. To clear, to acquit of a crime in a judicial sense; to set free from an engagement or promise; to pronounce a sin remitted, in the ecclesiastical sense.

ABSOLUTE, áb'só-lúte, *a.* 448. Complete, applied as well to persons as things; unconditional, as an absolute promise; not relative, as absolute space; not limited, as absolute power.—See *Domestic*.

plenness; freedom from dependence, or limits; despotism.

ABSOLUTION, ăb-sô-lũ'shũn, *s.* Acquittal; the remission of sins, or of penance.

ABSOLUTORY, ăb-sô-lũ-tũr-rẽ, *a.* That which absolves.

¶ In the first edition of this Dictionary I followed the accentuation of Johnson and Ash in this word, and placed the stress upon the first syllable, contrary to what I had done some years before in the Rhyming Dictionary, where I had placed the accent on the second, and which was the accentuation adopted by Mr. Sheridan. Upon a nearer inspection of the analogies of the language, I find this the preferable mode of marking it, as words in this termination, though very irregular, generally follow the stress of the corresponding noun or verb; and consequently this word ought to have the same accent as *absolve*, which is the more immediate relation of the word in question, and not the accent of *absolute*, which is the most distant. 512. Kenrick, W. Johnston, Entick, and Nares, have not inserted this word; and Mr. Perry very improperly accents it upon the third syllable.

ABSONANT, ăb sô-nănt, *a.* 544. Contrary to reason.

ABSONOUS, ăb-sô-nũs, *a.* Absurd, contrary to reason.

To ABSORB, ăb-sôrb', *v. a.* To swallow up; to suck up.

ABSORBENT, ăb-sôrb'ẽnt, *s.* A medicine that sucks up humours.

ABSORPT, ăb-sôrpt', *part.* Swallowed up.

ABSORPTION, ăb-sôrp shũn, *s.* The act of swallowing up.

To ABSTAIN, ăb-stăne', *v. n.* To forbear, to deny one's self any gratification.

ABSTEMIOUS, ăb-stẽmẽ-ũs, *a.* Temperate, sober, abstinent.

ABSTEMIOUSLY, ăb-stẽmẽ-ũs-lẽ, *ad.* Temperately, soberly, without indulgence.

ABSTEMIOUSNESS, ăb-stẽmẽ-ũs-nẽss, *s.* 534 The quality of being abstemious.

ABSTENTION, ăb-stẽn'shũn, *s.* The act of holding off.

To ABSTERGE, ăb-stẽrjẽ, *v. a.* To cleanse, by wiping.

ABSTERGENT, ăb-stẽrjẽnt, *a.* Cleansing; having a cleansing quality.

To ABSTERSE, ăb-stẽrse, *v. a.* To cleanse, to purify.

ABSTERTION, ăb-stẽr shũn, *s.* The act of cleansing.

ABSTERSIVE, ăb-stẽrsĩv, *a.* 428. That has the quality of absterging or cleansing.

ABSTINENCE, ăb'stẽ-nẽsse, *s.* Forbearance of any thing; fasting, or forbearance of necessary food.

ABSTINENT, ăb stẽ-nẽnt, *a.* That uses abstinence.

To ABSTRACT, ăb-străkt', *v. a.* To take one thing from another; to separate ideas; to reduce to an epitome.

ABSTRACT, ăb-străkt', *a.* Separated from something else, generally used with relation to mental perceptions.

ABSTRACT, ăb străkt, *s.* 492. A smaller quantity, containing the virtue or power of a greater; an epitome made by taking out the principal parts.

ABSTRACTED, ăb-străkt'ẽd, *p. a.* Separated; refined, abstruse; absent of mind.

ABSTRACTEDLY, ăb-străkt'ẽd-lẽ, *ad.* With abstraction, simply, separate from all contingent circumstances.

ABSTRACTION, ăb-străkt'shũn, *s.* The act of abstracting, the state of being abstracted.

ABSTRACTIVE, ăb-străkt'ĩv, *a.* Having the power or quality of abstracting.

An assembly or society of men, uniting for the promotion of some art; the place where sciences are taught; a place of education, in contradistinction to the universities or public schools.

Dr. Johnson tells us, that this word was anciently and properly accented on the first syllable, though now frequently on the second. That it was accented on the first syllable till within these few years, is pretty generally remembered; and if Shakespeare did not, by poetical license, violate the accentuation of his time, it was certainly pronounced so two centuries ago, as appears by Dr. Johnson's quotation of him:

"Our court shall be a little *academy*,
"Still and contemplative in living arts."

Love's Labour's Lost.

And in Ben Jonson's *New Inn* we find the same accentuation:

—————"Every house became
"An *academy* of honour, and those parts
"We see departed."

But the accentuation of this word formerly, on the first syllable, is so generally acknowledged, as not to stand in need of poetic authority. The question is, whether this accentuation, or that which places the stress on the second syllable, is the most proper? To wave, therefore, the authority of custom, which precludes all reasoning on language, and reduces the dispute to a mere matter of fact, it may be presumed, that whatever is agreeable to the most general usage of the language in similar words, is the most proper in this; and if it appears that general usage, in similar words, is in favour of the old pronunciation, it must certainly, for that reason, be allowed to be the best. And first it may be observed, that as our language is almost as averse to the accent on the last syllable as the Latin, it is a general custom with us, when we adopt a word from the Latin, and abridge it of one or two of its syllables, to remove the accent at least a syllable higher than it was in the original language, that the accent, when the word is naturalized, may not rest on the last. Thus, of *Homerus* we make *Homer*; of *Virgilius*, *Virgil*; and of *Horatius*, *Horace*. *Hyacinthus*, altered to *Hyacinth*, removes the accent two syllables higher; and *cereponia*, become *cereponia*, does the same; and no law, that I know of, forbids us to accent *academia*, or if you will *Academy*, when turned into *academy*, on the first syllable, as it was constantly accented by our ancestors, who, receiving Greek through the medium of Latin, generally pronounced Greek words according to the Latin analogy, and therefore necessarily placed the accent of *academia* on the third syllable, which, when reduced to *academy*, required the accent to be removed higher.

But how, it will be said, does this account for placing the accent on the first syllable of the English word *academy*, rather than the second? To this it may be answered, that the numberless instances of preference given by the accent to the first syllable in similar words, such as *melancholy*, *parsimony*, *dilatatory*, &c. might be a sufficient authority without any other reason. But perhaps it will be pardoned me if I go farther, and hazard a supposition that seems to account for the very common practice of placing the accent of so many of the longer polysyllables from the Latin on the first or second syllable. Though in the Latin there never was more than one accent upon a word, yet, in our pronunciation of Latin, we commonly place an accent on alternate syllables, as in our own words; and when the Latin word, by being anglicised, becomes shorter, the alternate accent becomes the principal. Thus, in pronouncing the Latin word *academia*, the English naturally place an accent on the first and third syllable, as if divided into *a-ca-de-mi-a*; so that when the word becomes anglicised into *a-ca-de-my*, the first syllable retains the accent it had when the word was Latin. On the other hand, it may be conjectured, with some probability, that a fondness for pronouncing like the French has been the occasion of the alteration. As the English ever suppose the French place the accent on the last syllable, in endeavouring to pronounce this word after

their manner, the stress must naturally fall on the second and last syllables, as if divided into *a-ca-d-mie*; and from an imitation of this, it is probable, the present pronunciation of the word was produced. Thus we have a very probable reason why so many of our longer words from the Latin are accented so near the beginning; as, in this mode of pronouncing them, they seem to retain one of the accents of the original. Hence the long train of words, *voluntary*, *comparable*, *disputable*, *admirable*, &c. have the accent on the first syllable; because, in pronouncing the words *voluntarius*, *comparabilis*, *disputabilis*, *admirabilis*, &c. we commonly lay a stress upon the first, as well as the third syllable. As to the analogy, as Mr. Sheridan pretends, of pronouncing this word with the accent on the second syllable, because words ending in *my* have the accent on the antepenultimate, nothing can be more ill founded. True it is, that words of this termination never have the accent on the penultimate; but that, for this reason, they must necessarily have the accent on the antepenultimate, I cannot well comprehend. If *polygamy*, *economy*, *astronomy*, &c. 513, have their accent on the antepenultimate, it arises from the nature of the terminations; which being, as it were, a species, and applicable to a thousand other words, have, like *logy* and *graphy*, the accent always on the preceding syllable; which seems best to unite the compound into one word: but *academy* being a simple, is subject to no such rule, and seems naturally to incline to a different analogy of pronunciation. Thus Dr. Johnson seems to have decided justly in saying the word *academy* ought to have the accent on the first syllable; though present usage, it must be confessed, seems to lead to the contrary pronunciation.

ACANTHUS, á-kán-thús, s. 470. The herb bear-foot.

ACATALECTIC, á-kát-á-lék'tík, s. A verse which has the complete number of syllables.

To **ACCEDE**, ák-sède', v. n. To be added to, to come to.

ACCENT, ák-sént, s. 486. The manner of speaking or pronouncing; the marks made upon syllables to regulate their pronunciation; a modification of the voice, expressive of the passions or sentiments.

To **ACCENT**, ák-sént', v. a. 492. To pronounce, to speak words with particular regard to the grammatical marks or rules; to write or note the accents.

ACCENTUAL, ák-sén'tshú-ál, a. Relating to accents. 463.

This word is in no English Dictionary I have met with; but, conceiving its formation to be perfectly agreeable to the analogy of English adjectives, and finding it used by several very respectable authors, I have ventured to insert it. Mr. Foster, in his Essay on Accent and Quantity, says, "When a high note succeeds a low one, or rises above the grave tone of voice, the perception of it is sudden and instantaneous, before the continuance of the note is determined one way or the other for long or short. This I more clearly conceive than I can perhaps express. I can however engage to make it perceptible to a common English ear in any Greek word, according to its present accentual mark." And Dr. Galley, in his Dissertation against Greek Accents, makes use of the same word, where he says, "For if ΠΟΞΩΙ means, according to Mr. Foster, that oratorical or common discourse differs from music only in the number of

and, i. e. that the former has only four or five notes, but that the latter has many more, then the correct pronunciation of a Greek sentence will not differ from the singing of the same sentence, when it is four or five corresponding notes in music, i. e. it will in both cases be a song."

To **ACCENTUATE**, âk-sên'tshû-âte, v. a. 461 To place the accent properly.

ACCENTUATION, âk-sên-tshû-â'shûn, s. The act of placing the accent in pronunciation, or writing.

To **ACCEPT**, âk-sêpt', v. a. To take with pleasure, to receive kindly.

ACCEPTABILITY, âk-sêp-tâ-bîl'le-tê, s. The quality of being acceptable.

ACCEPTABLE, âk-sêp-tâ-bl, a. Grateful; pleasing.

Within these twenty years this word has shifted its accent from the second to the first syllable. There are now few polite speakers who do not pronounce it *acceptable*; and it is much to be regretted that this pronunciation is become so general; for where consonants of so different an organ as *p* and *t* are near the end of a word, the word is pronounced with much more difficulty when the accent is removed higher than when it is arrested by these letters; for, in this case, the force which accompanies the accent facilitates the organs in their transition from the formation of the one letter to the other. As nature, therefore, directs us to place these consonants in all words ending in *active*, *reflex*, *active*, *active*, and *active*; *actible*, *ectible*, *actible*, and *uctible*; so we ought to listen to the same voice in pronouncing *acceptable*, *susceptible*, *corruptible*, with the accent on the second syllable. See *Commendable*.

ACCEPTABLENESS, âk-sêp-tâ-bl-nêss, s. The quality of being acceptable.

ACCEPTABLY, âk-sêp-tâ-blê, ad. In an acceptable manner.

ACCEPTANCE, âk-sêp'tânse, s. Reception with approbation.

ACCEPTOR, âk-sêp'tûr, s. 98. The person that accepts.

ACCEPTION, âk-sêp'shûn, s. The received sense of a word; the meaning.

ACCESS, âk-sêss', s. The way by which any thing may be approached; the means, or liberty, of approaching either to things or men; increase, enlargement, addition; the returns or fits of a distemper.

This word is sometimes heard with the accent on the first syllable:—

"Hail, water-gruel, healing power,
"Of easy access to the poor!"

But this pronunciation ought to be avoided, as contrary to analogy, and the general usage of the language; as may be seen in Johnson, under the word.

ACCESSARINESS, âk-sêss-sâ-rê-nêss, s. The state of being accessory.

ACCESSARY, âk-sêss-sâ-rê, s. He that, not being the chief agent in a crime, contributes to it.

ADVERTISEMENT, { ád-vért'íz-mént, }
 { ád-vér-tíze'mént, }
s. Intelligence, information; notice of any thing published in a paper of intelligence.

✧ As nouns ending in *ment*, always follow the accentuation of the verbs from which they are formed, we frequently hear *advertisement* taxed with the grossest irregularity for having the accent on a different syllable from *advertise*. The origin of this irregularity seems to have arisen from a change which has taken place in the pronunciation of the verb since the noun has been formed; *advertise* and *chastise* were, in Shakespeare's time, both accented on the penultimate, and therefore *advertisement* and *chastisement* were formed regularly from them.

"Wherein he did the King his lord *advertise*."

Hen. VIII.

"My grief cries louder than *advertisement*."

Much Ado, &c.

"Oh, then how quickly should this arm of mine

"Now prisoner to the palsy, *chastise* thee."

Richard II.

"And *chastisement* doth therefore hide its head."

Jul. Cesar.

But since that time the verbs *advertise* and *chastise* have fallen into an analogy more agreeable to verbs of the same form—for the verbs to *promise*, *practise*, *franchise*, *mortise*, and *divertise*, are the only words where the termination *ise* has not the accent either primary or secondary; and if an alteration must be made to reconcile the pronunciation of the simple with that of the compound, we should find it much easier to change *advertisement* and *chastisement* into *advertisement* and *chastisement* than *advertise* and *chastise* into *advértise* and *chústise*; but the irregularity seems too inveterate to admit of any alteration.

To **ALIENATE**, ále'yén-áte, v. a. To transfer the property of any thing to another; to withdraw the heart or affections.

† There is a strong propensity in undisciplined speakers to pronounce this word with the accent on e.

in the penultimate; but this cannot be too carefully avoided, as all the compounds of *alien* have invariably the accent on the first syllable. But whether the *a* in this syllable be long or short is a dispute among our best Orthoepists. Mr. Perry, Mr. Buchanan, W. Johnston, Dr. Kenrick, and Mr. Elphinstone, join it with the consonant, and make it short; but Mr. Sheridan separates it from the *l*, and makes it long and slender: and, though Mr. Elphinstone's opinion has great weight with me, yet I here join with Mr. Sheridan against them all; not only because I judge his pronunciation of this word the most agreeable to the best usage, but because it is agreeable to an evident rule which lengthens every vowel with the accent on it, except *i* when followed by a single consonant and a diphthong. See Principles, Nos. 505, 534.

"O! *alienate* from Heav'n, O spir't accurst!"

✧ A few years ago there was an affectation of pronouncing this word, when a noun, with the accent on the first syllable; and this had an appearance of precision from the general custom of accenting nouns in this manner, when the same word, as a verb, had the accent on the last, 492: but a closer inspection into the analogies of the language shewed this pronunciation to be improper, as it interfered with an universal rule, which was, to pronounce the y like e in a final unaccented syllable. But, whatever was the reason of this novelty, it now seems to have subsided; and this word is now generally pronounced with the accent on the second syllable, as it is uniformly marked by all the Orthoëpists in our language.

✧ This word is divided into three syllables by Mr. Sheridan, and but into two by Dr. Kenrick, Mr. Perry, Mr. Scott, and W. Johnston. The latter is, in my opinion, preferable. My reason is, that though this plural word is perfectly Latin, and in that language is pronounced in three syllables; yet, as we have the singular *aloe* in two syllables, we ought to form the plural according to our own analogy, and pronounce it in two syllables likewise.—See *Antipodes*.

ALOETICAL, ăl-ô-êt'-ê-kăl, a. Consisting chiefly of aloes.
ALOFT, ăl-lôft', ad. On high, in the air.
ALOFT, ăl-lôft', prep. Above.

ALTERCATION, ăl-tûr-kă'shûn, *s.* Debate, controversy, 84.

✠ The first syllable of this word, and of the sixteen that follow it, except *although*, are subject to a double pronunciation, between which it is not very easy to decide. There is a general rule in the language, that *l*, followed by another consonant, gives the preceding *a* its broad sound, as in *saft*. This rule is subject to several exceptions, 84; and if we take in these words into the exceptions, there is some doubt of the exceptions becoming the general rule. But the *a* in question is now so generally pronounced, as in the first syllable of *alley*, *valley*, &c. that we should risk the imputation of inaccuracy to sound it otherwise. Mr. Sheridan, Dr. Kenrick, and Mr. Scott, are uniformly for this latter sound of *a*. Mr. Perry marks all in the same manner, except *altercate* and *altercation*, and W. Johnston has only the words *altercation* and *alternative*, which he pronounces in the former manner. It is certain that the former was the true Anglo-Saxon sound, and it is highly probable that the latter has only obtained within these few years, in words obviously derived from the Latin as these are; but there seems to be a grossness in one sound, and a neatness in the other, which has so decidedly given one of them the preference.

✧ This indefinite, and, as it may be called, the euphonic article, is said by all our Grammarians to be used before a vowel or *h* mate; but no notice is taken of using *a* instead of it before what is called a vowel, as *a useful book, a usual ceremony, a usurer, &c.*; nor is any mention made of its constant usage before *h* when it is not mute, if the accent of the word be on the second syllable, as *an heroic action, an historical account, &c.* This want of accuracy arises from a want of analyzing the vowels, and not attending sufficiently to the influence of accent on pronunciation. A proper investigation of the power of the vowels would have informed our Grammarians that the letter *a*, when long, is not so properly a vowel as a semi-consonant, and perfectly equivalent to commencing *y, h*; and that a feeling of this has insensibly influenced the best speakers to prefix *a* to it in their conversation, while a confused idea of the general rule arising from an ignorance of the nature of the letters has generally induced them to prefix *an* to it in writing. The same observations are applicable to the *h*. The ear alone tells us, that before *heroic, historical, &c.* the *an* ought invariably to be used; but by not discovering that it is the absence of accent on the *h* that makes *an* admissible in these words, we are apt to prefix *an* to words where the *h* is sounded, as *an hour, an house, &c.* and thus set our spoken and written language at variance. This seems better to account for the want of accuracy in this article than a conjecture I once heard from Dr. Johnson, that our ancestors, particularly in the time of the Spectator, where this misapplication of the article frequently occurs, did not pronounce the *h* at the beginning of words so often as we do. However this may be, it seems necessary to a correctness of language to make our orthography and pronunciation as consistent as possible: for which purpose it may not be useless to attend to the following general rules. The article *a* must be used before all words beginning with a consonant, and before the vowel *a* when long: and the article *an* must be used before all words beginning with a vowel, except long *u*; before words beginning with *h* mate, as *an hour, an heir, &c.* or before words where the *h* is not mute, if the accent be on the second syllable, as *an heroic action, an historical account, &c.* For the few words in our language where the *h* is mute, see this letter in the Principles, No. 294; and for a just idea of the letter *a*, and the reason why it admits of *an* before it when long, see Principles, No. 8, and the Notes upon it.

ANTIPODES, ănt-tîp'ô-dêz, *s.* Those people who, living on the other side of the globe, have their feet directly opposite to ours.

We frequently hear disputes whether this word should be pronounced in four syllables, as it is here, with the accent on the second, or in three, as if divided into *an-ti-podes*, with the accent on the first syllable, and the last rhyming with *abodes*. To solve the difficulty it must be observed, that the word is pure Latin; and that, when we adopt such words into our own language, we seldom alter the accent. If, indeed, the singular of this word were in use like *satellite*, 155, then we ought to form the plural regularly, and pronounce it in three syllables only; but as it is always used in the plural, and is perfect Latin we ought to pronounce it in four.

APOSTLE, á-pós-sl, *s.* 472, 405. A person sent with mandates, particularly applied to them whom our Saviour deputed to preach the Gospel.

✧ This word is sometimes heard in the pulpit, as if divided into *a-po-stle*, the second syllable like the first of *po-et*. If the long quantity of the *o*, in the Latin *apostolus*, is urged for a similar length of the English *apostle*, let us only turn to No. 537 of the Principles, and we shall see the futility of arguing from the Latin quantity to ours. If these reasons are not satisfactory, it is hoped that those who are abettors of this singular pronunciation will alter *e-pis-tle* into *e-pl-stle*, the second syllable like *pie*, and then their reasoning and practice will be uniform.

APOSTLESHIP, á-pós-sl-shíp, *s.* The office or dignity of an apostle.

APOSTOLICAL, áp-pós-tól-tè-kál, *a.* Deli-ivered by the apostles.

APOTHECARY, á-pòth-è-ká-rè, *s.* A man whose employment it is to keep medicines for sale. 470.

✧ There is a corrupt pronunciation of this word, not confined to the vulgar, as if it were written *Apo-tecary*.

APOTHEGM, áp-ò-thém, *s.* 503. A remark-able saying.

APOTHEOSIS, áp-ò-thè-ò-sís, *s.* Deification.

✧ This word, like *Metamorphosis*, has deserted its Latin accentuation on the penultimate syllable, and returned to its original Greek accent on the ante-penultimate. See Principles, No. 503. The other words of this termination, as *Anadiplosis*, *Antip-tosis*, &c. retain the Latin accent, though all these words in Greek have the accent on the antepenulti-mate. This accentuation on the antepenultimate is so agreeable to the genius of our own tongue, that it is no wonder it is so prevalent. Johnson, Sheridan, Ken-rick, Ash, Scott, Buchanan, Bailey, and Perry, have adopted it as I have done; and only Smith, Barclay, and Entick, accent the penultimate. So eminent a poet as Garth approves of the choice I have made, where he says,

"Allots the prince of his celestial line
 "An *apothecosis*, and rites divine."

APOTOME, â-pôt'ô-mê, *s.* The remainder or difference of two incommensurable quantities.

APOSEM, âp'ô-zêm, *s.* 503. A decoction.

TO APPAL, âp-pâll', *v. a.* 406. To fright, to depress.

✧ Dr. Johnson tells us, that this word might more properly have been written *Appalc*; and we find Bacon, in his History of Henry VII. actually writes the compound *Appalement*. Whether Johnson founds his opinion upon the *pale* colour which fear generally produces, or upon the derivation of the word from the French *Appaître*, it cannot be certainly known; but this is certain, that this word has been so often rhymed with *all*, *ball*, *fall*, &c. that such a change as Dr. Johnson recommends would be attended with no small inconvenience. It may be observed too, that spelling this word with single *l*, as he has done, is at variance with its general pronunciation: for one *l*, when final, does not broaden the *a* like that in *all*, but leaves it in the sound of that vowel in *fallow*, *tailow*, &c. Considering therefore that the pronunciation of this word is so irrevocably fixed, it is but borrowing an *l* from the Latin *Palles* to make the sound and the spelling exactly correspond. We are often fond of neglecting the French for the Latin etymology when there is no necessity,—in the present case such a preference would be commendable.

To APPRECIATE, ăp-prê'shê-âte, v. a.

⚡ This word is not in Johnson; and Bailey, who

has it, seems not to have given its present signification, for he explains it, "to set a high value or esteem upon any thing;" for my recollection fails me if it has not been generally used in the sense of the French word it comes from, *Apprécier*, to appraise, to rate, to value, to declare the just price of any thing, as nearly synonymous to the English word to estimate.

APPRECIABLE, ăp-prê'shê-ă-bl, a.

⚡ This word is the genuine offspring of the former; and if we admit the parent, we cannot refuse the child, especially as the latter seems of more use than the former; for, though we may pretty well supply the place of *appreciate* by *estimate*, we have not so good a word as *appreciable* to express the capability of being estimated.

To APPREHEND, ăp-prê-hênd', v. a. To lay hold on; to seize, in order for trial or punishment; to conceive by the mind; to think on with terror, to fear.

✧ This word is vulgarly pronounced *Sparrow-
grass*. It may be observed that such words as the
vulgar do not know how to spell, and which convey
no definite idea of the thing, are frequently changed
by them into such words as they do know how to
spell, and which do convey some definite idea. The
word in question is an instance of it; and the corrup-
tion of this word into *Sparrowgrass* is so general,
that *asparagus* has an air of stiffness and pedantry.
See *Lantern*.

ASPECT, ʔs'pēkt, s. Look, air, appear-
ance; countenance; glance, view, act of be-
holding; direction towards any point, position;
disposition of any thing to something else,
relation; disposition of a planet to other
planets.

✧ This word, as a noun, was universally pro-
nounced with the accent on the last syllable till about
the middle of the seventeenth century. It grew anti-
quated in Milton's time, and is now entirely obso-
lete. Dr. Farmer's observations on this word, in his
no less solid than ingenious *Essay on The Learning
of Shakespeare*, are so curious, as well as just, that
the reader will, I doubt not, be obliged to me for
quoting them:

"Sometimes a very little matter detects a forgery."
"You may remember a play called the Double False-
hood, which Mr. Theobald was desirous of palming
upon the world for a posthumous one of Shakespeare;
and I see it is classed as such in the last edition of
the Bodleian catalogue. Mr. Pope himself, after
all the strictures of Scriblerus, in a letter to Aaron
Hill, supposes it of that age; but a mistaken accent
determines it to have been written since the middle
of the last century:

—————"This late example
"Of base Henriques, bleeding in me now,
"From each good aspect takes away my trust."

And in another place,

"You have an aspect, Sir, of wondrous wisdom."

"The word *aspect*, you perceive, is here accented
on the first syllable, which, I am confident, in any
sense of it, was never the case in the time of
Shakespeare; though it may sometimes appear to be
so, when we do not observe a preceding elision.

"Some of the professed imitators of our old poets
have not attended to this and many other minutiae:
I could point out to you several performances in
the respective styles of Chaucer, Spenser, and
Shakespeare, which the imitated bard could not
possibly have either read or construed.

"This very accent hath troubled the annotators on
Milton. Dr. Bentley observes it to be 'a tone dif-
ferent from the present use.' Mr. Manwaring, in
his *Treatise of Harmony and Numbers*, very so-
lemnly informs us that this verse is defective both
in accent and quantity.

"His words here ended; but his meek aspect,
"Silent, yet spake."————

"Here, says he, a syllable is *acuted* and *long*,
"whereas it should be *short* and *graved*!"

"And a still more extraordinary gentleman, one
Green, who published a specimen of a *new version*
of the *Paradise Lost*, into blank verse, 'by which
that amazing work is brought somewhat nearer the
summit of perfection,' begins with correcting a
blunder in the fourth book,

—————"The setting sun
"Slowly descended, and with right aspect—
"Levell'd his evening rays."

"Not so in the *new version*:

"Meanwhile the setting sun descending slow—
"Levell'd with *aspect* right his evening rays."

"Enough of such commentators.—The celebrated
Dr. Dee had a *spirit*, who would sometimes con-
descend to correct him, when peccant in *quantity*;
and it had been kind of him to have a little assisted
the *weights* above mention'd.—Milton affected the
antique; but it may seem more extraordinary that
the old accent should be adopted in *Fladbragg*."

Nothing can shew more plainly the tendency of our language to an antepenultimate accent than the vulgar pronunciation of this word, which generally places the accent on the first syllable. This is, however, an unpardonable offence to a Latin ear, which insists on preserving the accent of the original whenever we adopt a Latin word into our own language without alteration.—See Principles, No. 503.

AUTHORITATIVENESS, áw-thôr'è-tâ-tív-nés, *s.* Authoritative appearance.

AUTHORITY, áw-thôr'è-té, *s.* Legal power; influence, credit; power, rule; support, countenance; testimony; credibility.

This word is sometimes pronounced as if written *authority*. This affected pronunciation is traced to a gentleman who was one of the greatest ornaments of the law, as well as one of the politest scholars of the age, and whose authority has been sufficient to sway the bench and the bar, though *author*, *authentic*, *theatre*, *theory*, &c. and a thousand similar words where the *th* is heard, are constantly staring them in the face.

The public ear, however, is not so far vitiated as to acknowledge this innovation: for though it may with security, and even approbation, be pronounced in Westminster Hall, it would not be quite so safe for an actor to adopt it on the stage.

I know it will be said, that *auctoritas* is better Latin; that the pure Latin never had the *h*; and that our word, which is derived from it, ought, on that ar-

count, to omit it. But it may be observed, that, according to the best Latin critics, the word ought to be written *auctoritas*, and that, according to this reasoning, we ought to write and pronounce *aucturity* and *auctor*: but this, I presume, is farther than these innovators would choose to go. The truth is, such singularities of pronunciation should be left to the lower critics; who, like coxcombs in dress, would be utterly unnoticed if they were not distinguished by petty deviations from the rest of the world.

BARRIER, bâr-rê-ûr, *s.* 98. A barricade, an entrenchment; a fortification, or strong place; a stop, an obstruction; a bar to mark the limits of any place; a boundary.

✠ Pope, by the license of his art, pronounced this word in two syllables, with the accent on the last, as if written *bar-rê'er*.

"Twixt that and reason what a nice *barrier*!

"For ever separate, yet for ever near."

Essay on Man, Ep. I. v. 215.

And yet in another part of his works he places the accent on the first syllable, as we always hear it in prose.

"Safe in the love of Heav'n an ocean flows

"Around our realm, a *barrier* from the foes."

BARRISTER, bâr-rîs-tûr, *s.* A person qualified to plead the causes of clients in the courts of justice.

BARROW, bâr-rôw, *s.* Any carriage moved by the hand, as a hand-barrow.

BARTERY, bâr-tûr-rê, *s.* 555. Exchange of commodities.

BARTRAM, bâr-trâm, *s.* A plant, pellitory.

BARYTONE, bâr-ê-tône, *s.*

✠ A word with the grave accent on the last syllable. If the inspector does not know what is meant by the grave accent, it may be necessary to inform him, that writers on the Greek accent tell us that every syllable which has not the acute accent has the grave; and as there could but be one syllable accented in that language, the rest must necessarily be grave. What these accents are has puzzled the learned so much that they seem neither to understand each other nor themselves; but it were to be wished they had kept this distinction into acute and grave out of our own language, as it is impossible to annex any clear ideas to it, except we consider the grave accent merely as the absence of the acute, which reduces it to no accent at all. If we divide the voice into its two leading inflections, the rising and falling, and call the former the acute and the latter the grave, we can annex distinct ideas to these words; and perhaps it is an ignorance of this distinction of speaking sounds, and confounding them with high and low, or loud and soft, that occasions the confusion we meet with in writers on this subject.—See *Elements of Elocution*, page 60. Also Observations on the Greek and Latin Accent and Quantity, at the end of the *Key to the Classical Pronunciation of Greek and Latin Proper Names*.

BEARD, bêerd', *s.* 228. The hair that grows on the lips and chin; sharp prickles growing upon the ears of corn; a barb on an arrow.

✠ This word, as Dr. Kenrick observes, is frequently pronounced so as to rhyme with *herd*; but I am of his opinion that this pronunciation is improper. Mr. Scott and Mr. Perry give it both ways. Buchanan sounds it short, like Mr. Sheridan. W. Johnston makes it rhyme with *laird*, a Scotch lord: but Mr. Elphinstone, who is the most accurate observer of pronunciation I ever met with, gives it as I have done. The stage has, in my opinion, adopted the short sound of the diphthong without good reason, and in this instance ought not to be followed; as the long sound is not only more agreeable to analogy, but to general usage. I am glad to find my opinion confirmed by so good a judge as Mr. Smith; and though the poets so often sacrifice pronunciation to rhyme, that their authority, in these cases, is not always decisive, yet, as Shakespeare says on another occasion,

"They still may help to thicken other proofs
That do demonstrate thinly."

Othello.

"Rail'd at their covenant, and jeer'd
Their reverend persons to my beard."

Hamlet.

"Some thin remains of chastity appear'd
Ev'n under Jove, but Jove without a beard."

Dryden.

The impropriety of pronouncing this word as it is heard on the stage will perhaps appear more perceptible by carrying this pronunciation into the compounds, as the false sound of *great* may be detected by the phrase *Alexander the Great*. 241.

"Old prophecies foretell our fall at hand,
"When bearded men in floating castles land."
"And as young striplings whip the top for sport,
"On the smooth pavement of an empty court,
"The wooden engine flies and whirls about,
"Admir'd with clamours of the beardless rout."

Dryden.

TO BEARD, bêerd, *v. a.* To take or pluck by the beard; to oppose to the face.

TO BEAT, bête, *v. a.* 227, 233. To strike, to knock; to punish with stripes; to mark the time in music; to give repeated blows; to strike ground; to rouse game; to mix things by long and frequent agitation; to batter with engines of war; to make a path by treading it; to conquer, to subdue, to vanquish; to harass, to over-labour; to depress; to deprive by violence; to move with fluttering agitation; to beat down, to lessen the price demanded; to beat up, to attack suddenly; to beat the hoof, to walk, to go on foot.

✠ The past time of this verb is by the English uniformly pronounced like the present. Nay, except in solemn language, the present, preterit, and participle, are exactly the same; while the Irish, more agreeably to analogy, as well as utility, pronounce the preterit as the noun *bet*, a wager; and this pronunciation, though contrary to English usage, is quite conformable to that general tendency observable in the preterits of irregular verbs, which is to shorten the vowel that is long in the present, as *eat*, *ate* (often pronounced *et*); *hear*, *heard*; *deal*, *dealt*; *mean*, *meant*; *dream*, *dreamt*; &c.

TO BEAT, bête, *v. n.* To move in a pulsatory manner; to dash, as a flood or storm; to knock at a door; to throb, to be in agitation; to fluctuate, to be in motion; to try in different ways, to search; to act upon with violence; to enforce by repetition.

bar 167, not 163—tube 171, tub 172, ball 173—oll 299—pound 313—thin 406, thin 409.

French word *Beaufetier*, one who attends at the sideboard, which was anciently placed in a *Beaufet*.

BEEN, *bēn*. The participle preterit of *To Be*.

⚠ This word, in the solemn, as well as the familiar style, has shared the fate of most of those words, which, from their nature, are in the most frequent use. It is scarcely ever heard otherwise than as the *been* *been*, a repository for corn or wine, and must be placed among those deviations which language is always liable to in such words as are auxiliary or subordinate to others; for, as those parts of bodies which are the most frequently handled grow the soonest smooth by constant friction, so such words as are in continual use seem to wear off their articulations, and become more irregular than others. So low as the age of James the First, I have seen this word spelled *Byn*.

BIGOT, bîg'gût, *s.* 166. A man devoted to a certain party.

BIGOTED, bîg'gût-êd, *a.* Blindly prepossessed in favour of something.

♣ From what oddity I know not, this word is frequently pronounced as if accented on the last syllable but one, and is generally found written as if it ought to be so pronounced, the *t* being doubled, as is usual when a participle is formed from a verb that has its accent on the last syllable. Dr. Johnson, indeed, has very judiciously set both orthography and pronunciation to rights, and spells the word with one *t*, though he finds it with two in the quotations he gives us from Garth and Swift. That the former thought it might be pronounced with the accent on the second syllable is highly presumable from the use he makes of it, where he says :

" Bigotted to this idol, we disclaim

" Rest, health, and ease, for nothing but a name."

For if we do not lay the accent on the second syllable here, the verse will be unpardonably rugged. This mistake must certainly take its rise from supposing a verb which does not exist, namely, to *bigot* ; but as

this word is derived from a substantive, it ought to have the same accent ; thus though the words *balloet* and *billet* are verbs as well as nouns, yet, as they have the accent on the first syllable, the participial adjectives derived from them have only one *t*, and both are pronounced with the accent on the first syllable, as *balloted*, *billeted*. *Bigoted* therefore ought to have but one *t*, and to preserve the accent on the first syllable.

BIGOTRY, bîg'gût-trê, *s.* 555. Blind zeal, prejudice ; the practice of a bigot.

BIGSWOLN, bîg'swôln, *a.* Turgid.

BILANDER, bîl'ân-dâr, *s.* 503. A small vessel used for the carriage of goods.

BILBERRY, bîl'bêr-rê, *s.* Whortleberry.

To BILL, bîll, *v. a.* To publish by an advertisement.

BILLET, bîl'lît, *s.* 99, 472, 481. A small paper, a note.—*Billet-doux*, or a soft Billet, a love-letter.

BILLET, bîl'lît, *s.* 99. A small log of wood for the chimney.

To BILLET, bîl'lît, *v. a.* To direct a soldier where he is to lodge ; to quarter soldiers.

BILLIARDS, bîl'yârdz, *s.* 113. A kind of play.

♣ Mr. Nares has very judiciously corrected a false etymology of Dr. Johnson in this word, which might eventually lead to a false pronunciation. Dr. Johnson derives it from *ball* and *yard*, or stick, to push it with. So Spenser—

" With dice, with cards, with *balliards* far and fit,

" With shuttle-cocks, unseeming manly wit."

Spenser, says Mr. Nares, was probably misled, as well as the Lexicographer, by a false notion of the etymology. The word, as well as the game, is French, *billiard* ; and made by the addition of a common termination, from *bille*, the term for the ball used in playing.

BILLOW, bîl'îd, *s.* A wave swollen.

BILLOWY, bîl'îd-ê, *a.* Swelling, turgid.

BIN, bîn, *s.* A place where bread or wine is reposit.

To BIND, bind, v. a. To confine with bonds, to enchain; to gird; to enwrap; to fasten to any thing; to fasten together; to cover a wound with dressings; to compel, to constrain; to oblige by stipulation; to confine, to hinder; to make costive; to restrain.—To Bind to, to oblige to serve some one.—To Bind over, to oblige to make appearance.

To BIND, bind, v. n. To contract, to grow stiff; to be obligatory.

BINDER, bind'úr, s. 98. A man whose trade it is to bind books; a man that binds sheaves; a fillet, a shred cut to bind with.

BINDING, bind'ing, s. 410. A bandage.

BINDWEED, bind'wéed, s. A plant.

BINNACLE, bin'a-kl. A sea term, meaning the compass box.

✧ This word is not in Johnson; and Dr. Ash and Mr. Smith, who have it, pronounce the *i* in the first syllable short. It is probably only a corruption of the word *Bittacle*.

BINOCLE, bin'nò-kl, s. 405. A telescope fitted so with two tubes, as that a distant object may be seen with both eyes.

✧ The same reason appears for pronouncing the *i* in the first syllable of this word short as in *Bigamy*. 505.

BINOCULAR, bi-nòk'ù-lúr, a. 118. Having two eyes. 88, 98.

BIOGRAPHER, bi-òg'grá-fúr, s. 116. A writer of lives.

BIOGRAPHY, bi-òg'grá-fè, s. 116. An historical account of the lives of particular men. 518.

BIPAROUS, bip'pá-rús, a. 503. Bringing forth two at a birth.

✧ This word and *Bipedal* have the *i* long in Dr. Ash and Mr. Sheridan; but Mr. Perry makes the *i* in the first long, and in the last short; analogy, however, seems to decide in favour of the sound *i* have given it. For though the penultimate accent has a tendency to lengthen the vowel when followed by a single consonant, as in *biped*, *tripod*, &c. the antepenultimate accent has a greater tendency to shorten the vowel it falls upon.—See *Bigamy* and *Tripod*, 503.

BIPARTITE, bip'pár-títe, a. 155. Having two correspondent parts.

✧ Every Orthoëpist has the accent on the first syllable of this word but Entick, who places it on the second; but a considerable difference is found in the quantity of the first and last *i*. Sheridan and Scott have them both long. Nares the last long, Perry both short, and Buchanan and W. Johnston as I have done it. The varieties of quantity on this word are the more surprising, as all these writers that give the sound of the vowels make the first *i* in *tripartite* short, and the last long; and this uniformity in the pronunciation of one word ought to have led them to the same pronunciation of the other, so perfectly similar. The shortening power of the antepenultimate accent is evident in both. 503.

BIRCH, búrtsh, s. 108. A tree.

BIRCHEN, búrtshn, a. 108, 405. Made of birch.

✧ An Englishman may blush at this cluster of consonants for a syllable; and yet this is unquestionably the exact pronunciation of the word; and that our language is full of these syllables without vowels.—See *Principles*, No. 103, 405.

BISSEXTILE, bls-séks'tíl, *s.* 140. Leap-year.

Mr. Scott places the accent on the first syllable of this word; Dr. Kenrick on the first and last; Mr. Sheridan, Dr. Johnson, W. Johnston, Dr. Ash, Buchanan, Perry, Entick, and Bayley, on the second; Mr. Scott, Dr. Kenrick, and W. Johnston, pronounce the last *i* long, as in *file*. But as the accent is on the second syllable by so great a majority, analogy determines the last *i* to be short.

BISSON, bls'sún, *a.* 166. Blind. Obsolete.

BISTORT, bls'tórt, *s.* A plant called snake-weed.

BISTOURY, bls'túr-è, *s.* 314. A surgeon's instrument used in making incisions.

BIT, blt, *s.* The iron part of the bridle which is put into the horse's mouth.

BIT, blt, *s.* As much meat as is put into the mouth at once; a small piece of any thing; a Spanish West-India silver coin, valued at seven-pence halfpenny.

BITTACLE, blt'tá-kl, *s.* 405. A frame of timber in the steerage, where the compass is placed. More commonly *Binnacle*.

BITTER, blt'túr, *a.* 98. Having a hot, acrid, biting taste, like wormwood; sharp, cruel, severe; calamitous, miserable; reproachful, satirical; unpleasing or hurtful.

BITTERGROUND, blt'túr-gróund, *s.* A plant.

BITTERLY, blt'túr-lè, *ad.* With a bitter taste; in a biting manner, sorrowfully, calamitously; sharply, severely.

BITTERN, blt'túr, *s.* 98. A bird with long legs, which feeds upon fish.

BITTERNESS, blt'túr-nés, *s.* A bitter taste; malice, grudge, hatred, implacability; sharpness, severity of temper; satire, piquancy, keenness of reproach; sorrow, vexation, affliction.

BITTERSWEET, blt'túr-swèet, *s.* An apple which has a compounded taste.

BITUMEN, bè-tù'mén, *s.* 118, 503. A fat unctuous matter dug out of the earth, or scummed off lakes.

This word, from the propensity of our language to the antepenultimate accent, is often pronounced with the stress on the first syllable, as if written *blt'u-men*; and this last mode of sounding the word may

be considered as the most common, though not the most learned pronunciation. For Dr. Ash is the only Orthoëpist who places the accent on the first syllable; but every one who gives the sound of the unaccented vowels, except Buchanan, very improperly makes the *i* long, as in *idle*; but if this sound be long, it ought to be slender, as in the second syllable of *visible*, *terrible*, &c. 117, 551.

BITUMINOUS, bè-tù'mè-nús, *a.* 118. Compounded of bitumen.

BIVALVE, bl'válv, *a.* 118. Having two valves or shutters, used of those fish that have two shells, as oysters.

BIVALVULAR, bl-vál'vú-lár, *a.* Having two valves.

BIXWORT, blks'wúrt, *s.* An herb.

BIZANTINE, blz'an-tíne, *s.* 149. A great piece of gold valued at fifteen pounds, which the king offers upon high festival days.

Perry is the only Orthoëpist who pronounces the last *i* in this word short, and Dr. Johnson remarks, that the first syllable ought to be spelled with *y*, as the word arises from the custom established among the emperors of Constantinople, anciently called *Byzantium*.

BLASPHEMER, blás-fé'múr, *s.* A wretch that speaks of God in impious and irreverent terms.
BLASPHEMOUS, blás-fé-mús, *a.* Impiously irreverent with regard to God.

We sometimes hear this word pronounced with the accent on the second syllable, like *blaspheme*; and as the word *blasphemus* in Latin has the second syllable long, and the English word has the same number of syllables, it has as good a right to the accent on the second syllable, as *Sonorous*, *Bitumen*, *Acumen*, &c.; but placing the accent on the first syllable of blasphemous is by much the most polite; as, unfortunately for the other pronunciation, though the learned one, it has been adopted by the vulgar. 503.
BLASPHEMOUSLY, blás-fé-mús-lé, *ad.* Impiously, with wicked irreverence.
BLASPHEMY, blás-fé-mé, *s.* Blasphemy is an offering of some indignity unto God himself.

BLINDWORM, blīnd'wūrm, *s.* A small viper, venomous.

To **BLINK**, blīnk, *v. n.* To wink; to see obscurely.

✠ This word has been used for some years, chiefly in Parliament, as a verb active; as when a speaker has omitted to take notice of some material point in question, he is said to *blink* the question. It were to be wished that every word which finds its way into that house had as good a title to remain there as the present word. It combines in its signification an omission and an artful intention to omit; and as this cannot be so handsomely or so comprehensively expressed by any other word, this word, in this sense, ought to be received.

BLINKARD, blīnk'ārd, *s.* 98. One that has bad eyes; something twinkling.

BLISS, blīs, *s.* The highest degree of happiness; the happiness of blessed souls; felicity in general.

BLISSFUL, blīs'fūl, *a.* Happy in the highest degree.

BLUEBOTTLE, blü'böt-tl, *s.* A flower of the bell shape; a fly with a large blue belly.

BLUELY, blü'le, *ad.* With a blue colour.

There is an inconsistency in spelling this and similar words with the silent *e*, and leaving it out in *July* and *fruly*, which shows how much our orthography still wants regulating, notwithstanding the labour and attention of Dr. Johnson. My opinion is, that the servile *e* ought to be omitted in these words: for my reasons I must refer the Inspector to the Introduction to the Rhyming Dictionary, Aphorism the 8th.

BLUENESS, blü'nēs, *s.* The quality of being blue.

BLUFF, blüf, *a.* Big, surly, blustering.

✧ This word is universally pronounced in com-
mon conversation as it is here marked: but in read-
ing it would savour somewhat of vulgarity to contract
it to a sound so very unlike the orthography. It
would be advisable, therefore, in those who are not
of the naval profession, where it is technical, to pro-
nounce this word, when they read it, distinctly as it is
written.

low iron ball, or shell, filled with gunpowder,
and furnished with a vent for a fuse, or wooden
tube, filled with combustible matter; to be
thrown out from a mortar.

✧ I do not hesitate to follow Dr. Kenrick and
Mr. Nares in this word, and all its compounds, in
giving the o its fourth sound, equivalent to the second
sound of u, though contrary to Mr. Sheridan's pronun-
ciation, which makes it rhyme with *Tom*, from &c.
Dr. Johnson's derivation of the verb to *bump*, from
the same origin as *bomb*, makes the pronunciation I
have given more agreeable to analogy.

BOMBAST, bôm'bâst, *s.* Fustian, big words.

BOMBAST, bôm'bâst', *a.* High-sounding.

BOMBASTICK, bôm-bâst'tik, *a.* High-sounding, pompous.

Dr. Ash is the only Lexicographer who has inserted this word; but I think its general usage entitles it to a place in the language, especially as it has the true adjective termination, and relieves us from the inconvenience to which our language is so subject, that of having the substantive and adjective of the same form; and though, as *bombast* stands in Dr. Johnson, the substantive has the accent on the last syllable, and the adjective on the first, contrary, I think, to the analogy of accentuation, 494; yet this is but a bungling way of supplying the want of different words for different parts of speech.—See *Bowl*.

BOMBULATION, bôm-bû-lâ'shûn, *s.* Sound, noise.

BONARROBA, bônâ-rô'bâ, *s.* A whore.

BONASUS, bônâ'sûs, *s.* A kind of buffalo.

BONESETTER, bône'sêt-tûr, *s.* One who makes a practice of setting bones.

BONFIRE, bôn'fire, *s.* A fire made for triumph.

Mr. Sheridan pronounces this word *bonfire*;

Dr. Kenrick, Mr. Scott, Mr. Perry, and W. Johnston, make the first syllable rhyme with *don*; and though in the first edition of this Dictionary I made it rhyme with *tan*, I now prefer the sound rhyming with *don*.

BONGRACE, bôn'grâs, *s.* A covering for the forehead.

BONNET, bôn'nêt, *s.* 99. A hat, a cap

BONNETS, bôn'nêts, *s.* Small sails set on the courses of the mizzen, mainsail, and foresail.

✧ This word is pronounced four ways, *Borum*, *Buzum*, and *Boozum*, the *oo* like *u* in *bull*; and *boozum*, as *ou* in *house*. Sheridan and Scott adopt the third sound; Perry seems to mark the fourth; Dr. Kenrick has the second and fourth, but seems to prefer the former; and W. Johnston has the second; and that is, in my opinion, the most general: but the stage seems to have adopted the fourth sound, which has given it a currency among polite speakers, and makes it the most fashionable. Mr. Elphinston, a nice observer, as well as a deep investigator, announces the second, but tells us that the third was the original pronunciation.

To BOURGEON, bûr'jûn, v. n. 313, 259. To sprout, to shoot into branches.

BOURN, bôrne, s. A bound, a limit; a brook, a torrent.

I have differed from Mr. Sheridan and Dr. Kenrick in the pronunciation of this word. They make it sound as if written *boorn*; but, if my memory fail me not, it is a rhyme to *mourn* upon the stage; and Mr. Garrick so pronounced it.

"That undiscover'd country, from whose *boorn*
"No traveller returns."—*Shakespeare's Hamlet*.

I am fortified in this pronunciation by the suffrages of Mr. Elphinston, Mr. Nares, and Mr. Smith.

To BOUSE, bôoze, v. n. To drink lavishly.

BOUSY, bôô'zê, a. Drunken.

BOUT, bôût, s. A turn, as much of an action as is performed at one time.

To BOW, bôû, v. a. To bend, or inflect; to bend the body in token of respect or submission; to bend, or incline, in condescension; to depress, to crush.

To BOW, bôû, v. a. To bend, to suffer flexure; to make a reverence; to stoop; to sink under a pressure.

BOW, bôû, s. An act of reverence or submission.

BOW, bô, s. An instrument of war; a rainbow; the instrument with which stringed instruments are played upon; the doubling of a string in a slip knot.—Bow of a ship, that part of her which begins at the loof, and ends at the sternmost part of the fore-castle.

To BOW, bô. To bend sideways.

While some words are narrowing and contracting their original signification, others are dividing and subdividing into a thousand different acceptations. The verb to *bow* rhyming with *cow* might originally signify flexure every way, and to serve for that action which made any thing crooked, let its direction be what it would: but it appears certain that at present it only means that flexure which is vertical, and which may be called a *bowing down*, but is by no means so applicable to that flexure which is sideways or horizontal, and for which necessity seems insensibly to have brought the verb I have inserted into use. This verb seems accompanied by the word *out* as the other is by *down*, and we may say such a thing *bows down*, but another thing *bows out*, or swells sideways: the first verb is pronounced so as to rhyme with *cow*, *now*, &c. and the last with *go*, *no*, &c. Milton seems to have used the word with this sound, where in his *Penseroso* he says—

"And love the high *embowed* roof,
"With antique pillar's massy proof."

But as nothing can tend more to the ambiguity of language than to have the words spelled in the same manner sounded differently in order to distinguish their meaning by their pronunciation, I would humbly advise to spell the word *bow* (to shoot with), and the verb to *bow* (to bend sideways), with the final *e*; this slight addition will relieve a reader from the embarrassment he is under at first sight, where he is not thoroughly acquainted with the circumstances of a relation, and does not know how to pronounce the word till he has read the context. For the propriety of this additional *e*, see the words *Bowl* and *Form*.

I cannot refrain from quoting Mr. Nares on this word, as his opinion has great authority:—"A bow for arrows, and to bow, when it signifies merely to bend any thing, have *ow* like *o* long. This distinction I believe to be right, though our great Lexicographer has not noticed it. He gives to *bow*, in every sense, the regular sound of *ow*. (that is, rhyming with *cow*.) But of this instance the first and fourth appear to be erroneous; the third is doubtful; and in the second the word is used to express an inclination of the body, but metaphorically applied to trees. See the four instances from Shakespeare, Dryden, and Locke, under *To bow*, v. a. No. 1."

A want of attending to the different ideas the word *bow* conveys, as it is differently sounded, has occasioned the inconsistent sea terms; the *bow* of a ship rhyming with *cow*; and an anchor, called the best *bower*, rhyming with *hour*; and *bow*, in the word *bowsprit*, rhyming with *go*, *no*, &c.

BOW-BENT, bô'bênt, a. Crooked.

BOW-HAND, bô'hând, s. The hand that draws the bow.

BOW-LEGGED, bô'lêgd, a. 359. Having crooked legs.

BOWELS, bôû'êls, s. Intestines, the vessels and organs within the body; the inner parts of any thing; tenderness, compassion.

BOWER, bôû'ûr, s. 98. An arbour; it seems to signify, in Spenser, a blow, a stroke.

BOWER, bôû'ûr, s. An anchor so called.

BOWERY, bôd'ûr-rê, *a.* Full of bowers.

BOWL, bôle, *s.* A vessel to hold liquids; the hollow part of any thing; a basin, a fountain.—See the next word.

BOWL, bôle, *s.* Round mass rolled along the ground.

♣ Many respectable speakers pronounce this word so as to rhyme with *howl*, the noise made by a dog. Dr. Johnson, Mr. Elphinstone, and Mr. Perry, declare for it; but Mr. Sheridan, Mr. Scott, Dr. Kenrick, and Mr. Smith, pronounce it as the vessel to hold liquor, rhyming with *hole*. I remember having been corrected by Mr. Garrick for pronouncing it like *howl*: and am upon the whole of opinion that pronouncing it as I have marked it is the preferable mode, though the least analogical. But as the vessel has indisputably this sound, it is rendering the language still more irregular to give the ball a different one. The inconvenience of this irregularity is often perceived in the word *bow*. To have the same word signify different things, is the fate of all languages; but pronouncing the same word differently, to signify different things is multiplying difficulties without necessity: for though it may be alleged that a different pronunciation of the same word to signify a different thing is in some measure remedying the poverty and ambiguity of language, it may be answered, that it is in reality increasing the ambiguity by setting the eye and ear at variance, and obliging the reader to understand the context before he can pronounce the word. It may be urged that the Greek and Latin languages had these ambiguities in words which were only distinguishable by their quantity or accent. But it is highly probable that the Greek language had a written accent to distinguish such words as were pronounced differently to signify different things, and this is equivalent to a different spelling; and though the Latin word *lego* signified either *to read* or *to send*, according to the quantity with which the first syllable was pronounced, it was certainly an imperfection in that language which ought not to be imitated. Ideas and combinations of ideas will always be more numerous than words; and therefore the same word will often stand for very different ideas: but altering the sound of a word, without altering the spelling, is forming an unwritten language.

To **BOWL**, bôle, *v. a.* To play at bowls; to throw bowls at any thing.

BOWLER, bô'lûr, *s.* He that plays at bowls.

BOWLINE, bôd'îln, *s.* A rope fastened to the middle part of the outside of a sail.

BOWLING-GREEN, bô'ling-green, *s.* A level piece of ground, kept smooth for bowlers.

BOWMAN, bô'mân, *s.* 88. An archer.

BOWSPRIT, bô'sprît, *s.* Boltsprit; which see.

BOWSTRING, bô'string, *s.* The string by which the bow is kept bent.

BOW-WINDOW, bô'wîn'dô.

♣ Dr. Johnson derives this word, and, perhaps justly, from *Bay-window*, or a window forming a bay in the internal part of the room; but present custom has universally agreed to call these windows *bow-windows*, from the curve, like a bow, which they form by jutting outwards. However original and just, therefore, Dr. Johnson's derivation may be, there is little hope of a conformity to it, either in writing or pronunciation, while there is apparently so good an etymology, both for sense and sound, to support the present practice.—See *To Bow*.

BOWYER, bô'yûr, *s.* 98. An archer; one whose trade is to make bows.

BOX, bôks, *s.* A tree; the wood of it.

BOX, bôks, *s.* A case made of wood, or other matter, to hold any thing; the case of the mariner's compass; the chest into which money given is put; sent in the play-house.

BRACE, brâse, *s.* A pair, a couple.

BRACELET, brâse'lêt, *s.* An ornament for the arms.

♣ I have, in the pronunciation of this word, made the *a* long and slender, as in *brace*, as I find it in Dr. Kenrick, W. Johnston, Mr. Perry, and Mr. Scott; and not short, as in *brass*, as Mr. Sheridan has marked it; and which, I believe, is the prevailing pronunciation in Ireland: for though many compounds shorten the vowel in the simple, as is shown at large in the Principles of Pronunciation, 308, 315; yet I think such words are exceptions as are only diminutives, plurals and feminines.—See *Patroness*.

BRACER, brâ'sûr, *s.* 98. A cincture, a bandage.

BUMP, bump, s. A swelling, a protuberance.

To BUMP, bump, v. a.—See *Bomb*. To make a loud noise.

BUMPER, bump'-ur, s. 98. A cup filled.

☞ There is a plausible derivation of this word from the French *Bon Pere*, which, say the anti-clerical critics, was the toast which the Monks gave to the Pope in a full glass. The farther a derivation is traced the better it is liked by the common crowd of critics; but Mr. Elphinstone, who saw farther into English and French etymology than any other author I have met with, contents himself with deriving this word from the word *Bump*, which, as a verb, signifies the action of some heavy body that makes a dense noise, and, as a noun, implies the general effect of such an action on the animal frame,

BUR

which is a protuberance or swelling; and the swelling out of the liquor when a glass is full seems the natural offspring of the substantive *Bump*.

Dr. Ash, whose etymological knowledge seems very extensive, gives this word the same derivation, but tells us that the word *Bumpkin* is of uncertain etymology: a little attention, however, would, I think, have led him to the same origin of this word as the former; for the heavy and protuberant form of the rusticks, to whom this word is generally applied, might very naturally generate the appellation.

BY, { bl, } *prep.* It notes the agent; it notes the instrument; it notes the cause; it notes the means by which any thing is performed; at, or in, noting place; it notes the sum of the difference between two things compared; not later than, noting time; beside, noting passage; near to, in presence, noting proximity; before Himself, it notes the absence of all others; it is the solemn form of swearing; at hand; it is used in forms of obtesting; by proxy of, noting substitution.

✎ The general sound of this word is like the verb to buy; but we not unfrequently hear it pronounced like the verb to be. This latter sound, however, is only tolerable in colloquial pronunciation, and then only when used as a preposition; as when we say, Do you travel *by* land or *by* water? But in reading these lines of Pope:—

“ By land, by water, they renew the charge;

“ They stop the chariot, and they board the barge.

Here we ought to give the word *by* the sound of the verb to buy; so that pronouncing this word like *be*, is, if the word will be pardoned me, a *colloquialism*.

BY, bl, *ad.* Near, at a small distance; beside, passing; in presence.

BY AND BY, bl'ând-bl', *ad.* In a short time.

BY, bl, *s.* Something not the direct and immediate object of regard, as *by* the *by*.

C.

CAB, kâb, s. A Hebrew measure, containing about three pints English.

CABAL, kâ-bâl', s. The secret science of the Hebrew rabbins; a body of men united in some close design; intrigue.

The political signification of this word owes its original to the five Cabinet Ministers in Charles the Second's reign; Clifford, Ashley, Buckingham, Arlington, and Lauderdale: this Junto were known by the name of the *Cabal*; a word which the initial letters of their names happened to compose.

To CABAL, kâ-bâl', v. n. To form close intrigues.

CABALIST, kâb'â-lîst, s. One skilled in the traditions of the Hebrews.

CABALISTICAL, kâb-âl-lîst'è-kâl, } a.

CACHEXY, kâk'tèk-sè, s. 517. Such a distemperature of the humours as hinders nutrition, and weakens the vital and animal functions.

Mr. Sheridan is the only Orthoëpist who accents this word on the first syllable as I have done; and yet every other Lexicographer, who has the word, accents *inorexy*, *Atary*, and *Ataraxy*, on the first syllable, except Mr. Sheridan, who accents *Anorexy*, and Bailey

Atary, on the penultimate. Whence this variety and inconsistency should arise, it is not easy to determine. *Orthodoxy* and *Apoplexy* had sufficiently chalked out the analogy of accentuation in these words. The terminations in *ery* and *oxy* do not form a species of words which may be called enclitical, like *logy* and *graphy*, 517; but seem to be exactly under the predicament of these Latin and Greek words, which, when adopted into English by dropping their last syllable, remove the accent at least two syllables higher.—See *Academy*.

CACHINNATION, kâk-kîn-nâ'shûn, s. A loud laughter. 353.

CKEREL, kâk'ûr-îl, s. 555, 99. A fish.

CACOCHEMICAL, kâk-kô-kîm'è-kâl, } a.

CACOCHEMICK, kâk-kô-kîm'îk, 353, 509 } Having the humours corrupted.

CACOCHEMY, kâk'kô-kîm-mê, s. A depravation of the humours from a sound state.

Johnson and Bailey accent this word *Cacochym'y*, Sheridan and Buchanan *Cacoch'ymy*, and Dr. Ash *Cac'ochymy*; and this last accentuation I have adopted for reasons given under the word *Cachery*—which see.

CACOPHONY, kâ-kôf'è-nè, s. 518. A bad sound of words.

To CACUMINATE, kâ-kû'mè-nâte, v. a. To make sharp or pyramidal.

CANT, kánt, *s.* A corrupt dialect used by beggars and vagabonds; a form of speaking peculiar to some certain class or body of men; a whining pretension to goodness; barbarous jargon; auction.
 It is scarcely to be credited, that the writer in the Spectator signed T. should adopt a derivation of this word from one Andrew Cant, a Scotch Presbyterian Minister, when the Latin *cantus*, so expressive of the singing or whining tone of certain preachers, is so obvious an etymology. The Cant of particular professions is an easy derivation from the same origin, as it means the set phrases, the routine of professional language, resembling the chime of a song. *Quaint*, from which some derive this word, is a much less probable etymology.
To CANT, kánt, *v. n.* To talk in the jargon of particular professions; to speak with a particular tone.
To CANT, kánt, *v. a.* To toss or fling away.

CARICATURE, kàr-ìk-à-tshùr', 461.

✠ This word, though not in Johnson, I have not scrupled to insert, from its frequent and legitimate usage. Baretti tells us that the literal sense of this word is *certa quantita di munizione che si mette nell' archibuso o altro*, which, in English, signifies the charge of a gun; but its metaphorical signification, and the only one in which the English use it, is, as he tells us, *dichesi anche di ritratto ridicolo in cui sensi grandemente accresciuti i difetti*, when applied to paintings, chiefly portraits, that heightening of some features, and lowering others, which we call in English overcharging, and which will make a very ugly picture, not unlike a handsome person: whence any exaggerated character, which is redundant in some of its parts, and defective in others, is called a Caricature.

CERUMEN, sê-rû-mên, *s.* The wax of the ear.—See *Bitumen*.

CERUSE, sê-rûse, *s.* White lead.

✧ I prefer Dr. Kenrick's, Mr. Perry's, and, as far as I can guess by their accentuation, Dr. Ash's and Bailey's pronunciation of this word, who make the first syllable long, to Mr. Sheridan's, Scott's, and Entick's, who make it short.—See *Principles*, 529.

CESARIAN, sê-zâ-rê-ân, *a.* The Cæsarian section is cutting a child out of the womb.

CESS, sês, *s.* A levy made upon the inhabitants of a place, rated according to their property; an assessment; the act of laying rates.

CHAIRMAN, tshâre-mân, *s.* 88. The president of an assembly; one whose trade it is to carry a chair.

CHAISE, shâze, *s.* A carriage either of pleasure or expedition.

✧ The vulgar, who are unacquainted with the spelling of this word, and ignorant of its French derivation, are apt to suppose it a plural, and call a single carriage a *shay*; and the polite seem sometimes at a loss whether they should not consider it as both singular and plural; but the best usage seems to have determined it to be, in this respect, regular, and to make the plural *chaises*.

CHALCOGRAPHER, kâl-kôg-grâ-fûr, *s.* 353. An engraver in brass.

CHALCOGRAPHY, kâl-kôg-grâ-fê, *s.* Engraving in brass.

To CHALLENGE, tshá'lénje, v. a. To call
another to answer for an offence by combat;
to call to a contest; to accuse; in law, to ob-
ject to the impartiality of any one; to claim
as due; to call one to the performance of con-
ditions.

CHALLENGE, tshá'lénje, s. A summons
to combat; a demand of something as due;
in law, an exception taken either against per-
sons or things.

CHALLENGER, tshá'lén-jûr, s. One that
desires or summons another to combat; one
that claims superiority; a claimant.

CHALYBEATE, ká-lîb'bè-ét, a. 91. Im-
pregnated with iron or steel.

CHAMADÉ, shá-máde', s. The beat of the
drum which declares a surrender.

CHAMBER, tshám'bûr, s. 542. An apart-
ment in a house generally used for those ap-
propriated to lodging; any retired room; any
cavity or hollow; a court of justice; the hol-
low part of a gun where the charge is lodged;
the cavity where the powder is lodged in a
mine.

I have in this word departed from Mr. Sheridan
and Dr. Kenrick, because I think the best usage has
entirely departed from them. About thirty years ago
the first syllable of *Chamber* was universally pro-
nounced so as to rhyme with *Palm*, *Psalm*, &c.; but
since that time it has been gradually narrowing to the
slender sound of *a* in *came*, *fame*, &c. and seems now
to be fully established in this sound. This, however,
is to be regretted, as it militates with the laws of syl-
labication: there are few words in the language which
we cannot so divide into parts as to show by this di-
vision the quantity of the vowels; this word forms an
exception; for *mb* being uncombinable consonants,
we cannot end the first syllable with *a*; and if we
join *a* to it, the *a* becomes short, and requires another
sound. But if two such words as *Cam* and *Bridge*
could not resist the blind force of custom, which has
for so many years reduced them to *Camebridge*, why
should we wonder that *Chamber* and *Cambrick*, *Thim-
mouth* and *Yarmouth*, should yield to the same unre-
lenting tyrant?

To CHAMBER, tshám'bûr, v. n. To be
wanton, to intrigue; to reside as in a chamber.

CHAMBERER, tshám'bûr-ûr, s. A man of
intrigue.

CHAMBER-FELLOW, tshám'bûr-fêl-lô,

thing in the place of another; to resign any
thing for the sake of another; to discount a
larger piece of money into several smaller; to
give and take reciprocally; to alter; to mend
the disposition or mind.

♣ 559. Fâte 73, fâr 77, fâll 83, fât 81—mê 98, mêt 95—pline 105, pln 107—nô 102, môve 164,

♣ This word, with others of the same form, such as *range, strange, munge, &c.* are, in the west of England, pronounced with the short sound of *a* in *ran, man, &c.* The same may be observed of the *a* in the first syllable of *angel, ancient, &c.* which, in that part of the kingdom, sounds like the article *an*; and this, though disagreeable to a London ear, and contrary to the best usage, which forms the only rule, is more analogical than pronouncing them as if written *change, strange, ancient, angel, &c.* for we find every other vowel in this situation short, as *revenge, kinge, sponge, &c.*

To **CHANGE**, tshânje, v. n. To undergo change, to suffer alteration.

CHANGE, tshânje, s. An alteration of the state of any thing; a succession of one thing in the place of another; the time of the moon in which it begins a new monthly revolution; novelty; an alteration of the order in which a set of bells is sounded; that which makes a variety; small money.

CHAOTICK, kâ-ô'tik, a. Resembling chaos, confused.

To **CHAP**, tshôp, v. a. To divide the surface of the ground by excessive heat; to divide the skin of the face or hands by excessive cold.

♣ The etymology of this word will not suffer us to write it *chop*; and universal usage will not permit us to pronounce it *chop*: so that it must be classed among those incorrigible words, the pronunciation and orthography of which must ever be at variance.

CHAP, tshôp, s. A cleft, a gaping, a chink.

CHAP, tshôp, s. The upper or under part of a beast's mouth.

CHAPE, tshâpe, s. The catch of any thing, by which it is held in its place.

To **CHAR**, tshâr, v. a. To burn wood to a black cinder.

CHAR, tshâre, s. Work done by the day.

To **CHAR**, tshâre, v. n. To work at others' houses by the day.

♣ "As the maid that milks,
"And does the meanest *chars*."

Shakespeare.

In Ireland they seem to have retained the genuine pronunciation of this, as well as many other old English words; I mean that which is agreeable to the orthography, and rhyming with *far*. In English it is generally heard like *chair* to sit on, and its compound, *char-woman*, like *chair-woman*. Skinner, I know, admits that the word may be derived from the Dutch *keeren*, to sweep; and Junius spells the word *chers*, and tells us the Saxons have the same word spelled *cyrr*, signifying business or charge; but be its derivation what it will, either the orthography, or the pronunciation, ought to be altered; for, as it stands at present, it is a singular and disgraceful anomaly.

CHAR-WOMAN, tshâre'wûm-ûn, s. A woman hired accidentally for odd work.

CHARACTER, kâr'âk-tûr, s. 353. A mark, a stamp, a representation; a letter used in writing or printing; the hand or manner of writing; a representation of any man as to his personal qualities; an account of any thing as good or bad; the person with his assemblage of qualities.

CHARINESS, tshâ'rè-nès, *s.* Caution, nicety.

CHARIOT, tshâr'rè-út, *s.* 543. A carriage of pleasure or state; a car in which men of arms were anciently placed.

⚠ If this word is ever heard as if written *Charrot*, it is only tolerable in the most familiar pronunciation: the least solemnity, or even precision, must necessarily retain the sound of *i*, and give it three syllables.

CHARIOTEER, tshâr-rè-út-tèer', *s.* He that drives the chariot.

CHARIOT RACE, tshâr'rè-út-râse, *s.* A sport where chariots were driven for the prize.

CHARITABLE, tshâr'è-tâ-bl, *a.* Kind in giving alms; kind in judging of others.

CHARITABLY, tshâr'è-tâ-blè, *ad.* Kindly liberally; benevolently.

CHARITY, tshâr'è-tè, *s.* 160. Tenderness, kindness, love; good will, benevolence; the theological virtue of universal love; liberality to the poor; alms, relief given to the poor.

CHARLES'S WAIN, tshâr'lîz-wâne', *s.* The northern constellation called the Bear.

CHARLOCK, tshâr'lòk, *s.* A weed growing among the corn with a yellow flower.

CHARM, tshârm, *s.* Words or philtres, imagined to have some occult power; something of power to gain the affections.

To CHARM, tshârm, *v. a.* To fortify with charms against evil; to make powerful by charms; to subdue by some secret power; to subdue by pleasure.

CHARMER, tshâr'mûr, *s.* One that has the power of charms, or enchantments; one that captivates the heart.

CHARMING, tshâr'mîng, *part. a.* Pleasing in the highest degree.

CHARMINGLY, tshâr'mîng-lè, *ad.* In such a manner as to please exceedingly.

CHARMINGNESS, tshâr'mîng-nès, *s.* The power of pleasing.

CHARNEL, tshâr'nèl, *a.* Containing flesh or carcases.

CHARNEL-HOUSE, tshâr'nèl-hòuse, *s.* The place where the bones of the dead are reposed.

CHART, kârt, or tshârt, *s.* A delineation of coasts.

⚠ As this word is perfectly anglicised, by cutting off the *a* in the Latin *Charta*, and *ch* in the Greek *χαρτ*, we ought certainly to naturalize the initial letters by pronouncing them as in *charter*, *charity*, &c.: but such is our fondness for Latin and Greek originals, that we catch at the shadow of a reason for pronouncing after these languages, though in direct opposition to the laws of our own. Thus we most frequently, if not universally, hear this word pronounced as *Cart*, a carriage, and perfectly like the French *Carte*.

CHARTER, tshâr'tûr, *s.* A charter is a written evidence; any writing bestowing privileges or rights; privilege, immunity, exemption.

CHARTER-PARTY, tshâr'tûr-pâr-tè, *s.* A paper relating to a contract, of which each party has a copy.

CHARY, tshâ'rè, *a.* Careful, cautious.

To CHASE, tshâse, *v. a.* To hunt; to pursue as an enemy; to drive.

CHASE, tshâse, *s.* Hunting, pursuit of any thing as game; fitness to be hunted; pursuit of an enemy; pursuit of something as desirable; hunting match; the game hunted; open ground stored with such beasts as are hunted; the Chase of a gun is the whole bore or length of a piece.

CHASE-GUN, tshâse'gûn, *s.* Guns in the fore-part of the ship, fired upon those that are pursued.

CHASER, tshâ'sûr, *s.* Hunter, pursuer, driver.

CHASM, kâzm, *s.* 353. A cleft, a gap, an opening; a place unfilled; a vacuity.

CHASTE, tshâste, *a.* Pure from all commerce of sexes; pure, uncorrupt; not mixed with barbarous phrases; without obscenity; true to the marriage bed.

To CHASTEN, tshâse'tn, *v. a.* 405. To correct, to punish.

⚠ This word is sometimes falsely pronounced with the *a* short, so as to rhyme with *fasten*; but it is exactly under the same predicament as the verb to *haste*, which, when formed into what is called an inchoative verb, becomes *hasten*, and with which *chasten* is a perfect rhyme.

♣ 559. Fâte 73, fâr 77, fâll 83, fât 81—mê 93, mêt 95—pline 105, phn 107—nô 162, môve 164,

To CHASTISE, tshâs-tîze', v. a. To punish, to correct by punishment; to reduce to order or obedience.

CHASTISEMENT, tshâs'tîz-mênt, s. Correction, punishment.—See *Advertise*.

CHASTISER, tshâs-tî'zûr, s. A punisher, a corrector.

CHASTITY, tshâs'tê-tê, s. 511. Purity of the body; freedom from obscenity; freedom from bad mixture of any kind.

♣ I have in this word departed from Mr. Sheridan, and several other speakers, in the sound of the *a* in the first syllable, as no analogy can be clearer than that which prevails in words of this termination, where the antepenultimate accent always shortens the vowel. Thus, though the *a*, *e*, and *i*, are long in *humane*, *serene*, and *divine*, they are short in *humanity*, *serenity*, and *divinity*; and unless custom clearly forbids, which I do not believe is the case, *chastity* ought certainly to have the *a* as I have marked it.

CHASTLY, tshâste'lê, ad. Without incontinence, purely, without contamination.

♣ In these words Dr. Johnson has very improperly omitted the silent *e*; they ought to be written *chastely* and *chasteness*.—See Introduction to Rhyming Dictionary, Orthographical Aphorism the 8th.

CHASTNESS, tshâste'nês, s. Chastity, purity.

To CHEER, tshêér, v. n. To grow gay or gladsome.

CHEERER, tshêér'rûr, s. Gladdener, giver of gayety.

CHEERFUL, tshêér'fûl, or tshêr'fûl, a. Gay, full of life, full of mirth; having an appearance of gayety.

♣ This word, like *fearful*, has contracted an irregular pronunciation that seems more expressive of the turn of mind it indicates than the long open *e*, which languishes on the ear, and is not akin to the smartness and vivacity of the idea. We regret these irregularities, but they are not to be entirely prevented; and as they sometimes arise from an effort of the mind to express the idea more forcibly, they should not be too studiously avoided; especially when custom has given them considerable currency; which I take to be the case with the short pronunciation of the present word. Mr. Sheridan and some other Orthoëpists seem to adopt the latter pronunciation; and W. Johnston, Dr. Kenrick, and Mr. Perry, the former; and as this is agreeable to the orthography, and, it may be added, to the etymology (which indicates that state of mind which arises from being full of good cheer), it ought, unless the other has an evident preference in custom, to be looked upon as the most accurate. 241, 242.

CHEERFULLY, tshêér'fûl-lê, ad. Without dejection, with gayety.

CHEERFULNESS, tshêér'fûl-nês, s. Freedom from dejection, alacrity; freedom from gloominess.

CHEERLESS, tshêér'lês, a. Without gayety, comfort, or gladness.

CHEERLY, tshêér'lê, a. Gay, cheerful, not gloomy.

CHEERLY, tshêér'lê, ad. Cheerfully.

CHEERY, tshêér'ê, a. Gay, sprightly.

CHEESE, tshêêze, s. A kind of food made by pressing the curd of milk.

CHEESECAKE, tshêêze'kake, s. 247. A cake made of soft curds, sugar, and butter.

CHEESEMONGER, tshêêze'mâng-gûr, s. One who deals in cheese.

CHEESEVAT, tshêêze'vât, s. The wooden case in which the curds are pressed into cheese.

CHERUBICK, tshér-rú'bík, *a.* Angelick, relating to the Cherubim.

CHERUBIM, tshér'ú-bím, *s.* The Hebrew plural of Cherub.

Those who understand no language but their own are apt to commit an unpardonable fault with critics, by mistaking this word for a singular, and writing the plural *Cherubims*. Others are apt to commit a much greater fault in speaking, which is that of forming an adjective from this word, as if written *Cherubimical*, or *Cherubical*, instead of *Cherubick*. How hard is the fate of an Englishman, who, to write and speak his own language properly, must not only understand French, Latin, and Greek, but Hebrew also!

CHERUBIN, tshér'ú-bín, *a.* Angelical.

CHERVIL, tshér'vîl, *s.* An umbelliferous plant.

To CHERUP, tshér'úp, *v. n.* To chirp, to use a cheerful voice.

CHEVALIER, shév-á-léér', *s.* 352. A knight.

CHEVAUX-DE-FRISE, shév-ó-dé-fríeze', *s.* 368. A piece of timber traversed with wooden spikes, pointed with iron, five or six feet long, used in defending a passage, a rampike, or tourniquet.

CHEVEN, tshév'vn, *s.* 108. A river fish, the same with chub.

CHEVERTIL, tshév'er-íl, *s.* A kid, kidleather.

CHEYRON, tshév'rún. In heraldry it represents two rafters of a house as they ought to stand.

To CHEW, tshóó, tsháw, *v. a.* To grind with the teeth, to masticate; to meditate, or ruminate in the thoughts; to taste without swallowing.

The latter pronunciation is grown vulgar.

To CHEW, tshóó, *v. n.* To champ upon, to ruminate.

CHIEFRIE, tshééf'ré, *s.* A small rent paid to the lord paramount.

CHIEFTAIN, tshééf'tín, *s.* 208. A leader; a commander; the head of a clan.

This word ought undoubtedly to follow *captain*, *captain*, *captain*, &c. in the pronunciation of the last syllable; though, from its being less in use, we are not so well reconciled to it.

CHIEVANCE, tshé'vânse, *s.* Traffick in which money is extorted, as discount.

CHILBLAIN, tshíl'blane, *s.* Sores made by frost.

CHILD, tshíld, *s.* An infant, or very young person; one in the line of filiation, opposed to the parent; any thing the product or effect of another — *To be with Child*, to be pregnant.

♫ 559. Fâte 73, fâr 77, fâll 83, fât 81—mê 93, mêt 95—plne 103, pln 107—nô 102, môve 104,

CHILDISHNESS, tshld'ish-nês, *s.* Puerility, triflingness; harmlessness.

CHILDLESS, tshld'lês, *a.* Without children.

CHILDLIKE, tshld'lîke, *a.* Becoming or becoming a child.

CHILIAEDRON, kîl-ê-â-ê'drôn, *s.* 553. A figure of a thousand sides.

♫ This word ought to have the accented *e* long; not on account of the quantity in the Greek word, but because, where no rule forbids, we ought to make vowels accented on the penultimate long. 542.

CHILIFACTORY, kîl-ê-fâk'tô-rê, *ad.* Making chyle.—See *Chylifactory*.

CHILIFACTIVE, kîl-ê-fâk'tîv, *ad.* Making chyle.—See *Chylifactive*.

CHIN, tshîn, *s.* The part of the face beneath the under lip.

CHINA, tshâ'nê, or tshî'nâ, *s.* China ware, porcelain, a species of vessels made in China dimly transparent.

♫ What could induce us to so irregular a pronunciation of this word is scarcely to be conceived. One would be apt to suppose that the French first imported this porcelain, and that when we purchased it of them we called it by their pronunciation of China (*Shên*); but being unwilling to drop the *a*, and desirous of preserving the French sound of *i*, we awkwardly transposed these sounds, and turned *Chîns* into *Chînes*. This absurd pronunciation seems only to

lerable when we apply it to the porcelain of China, or the oranges, which are improperly called China oranges; but even in these cases it seems a pardonable pedantry to reduce the word to its true sound.

CHINA-ORANGE, tshâ'nê-ôr'înje, *s.* The sweet orange.

CHINA-ROOT, tshî'nâ-rôôt, *s.* A medicinal root brought originally from China.

CHINCOUGH, tshîn'kôf, *s.* A violent and convulsive cough.

To **CHOOSE**, tshòoze, *v. a.* I chose, I have chosen. To take by way of preference of several things offered; to select, to pick out of a number; to elect for eternal happiness; a term of theologians.

⚡ This word is sometimes improperly written *chose*, which is a needless departure from its French etymology in *choisir*, as well as from our own analogy in the preterit *chose*.

To **CHOOSE**, tshòoze, *v. n.* To have the power of choice.

CHOOSE, tshòò'zúr, *s.* He that has the power of choosing, elector.

To **CHOP**, tshóp, *v. a.* To cut with a quick blow; to devour eagerly; to menace, to cut into small pieces; to break into chinks.

CHOP, tshóp, *s.* A piece chopped off; a small piece of meat; a crack, or cleft.

CHOP-HOUSE, tshóp'hòuse, *s.* A mean house of entertainment.

⚡ Dr. Johnson, in this definition, seems to have rated a chop-house too low, and to have had a *Cook's-shop* or an *Eating-house* in his mind. Since coffee-houses are become eating-houses and taverns, chop-houses are, perhaps, a little depreciated; but this was not the case till long after Dr. Johnson's Dictionary was published; and I think they may still, without any impropriety, be called *Reputable houses of ready entertainment*.

CHOPIN, tshò-pèen', *s.* 112. A French liquid measure, containing nearly a pint of Winchester; a term used in Scotland for a quart of wine measure.

CHYMIIST, kîm'mîst, *s.* A professor of chymistry.

✠ Scholars have lately discovered that all the nations of Europe have, for many centuries past, been erroneous in spelling this word with a *y* instead of an *e*; that is, *Chymist* instead of *Chemist*: and if we crave their reasons, they very gravely tell us, that instead of deriving the word from *χυμός*, juice, or from *χάω*, *χάω*, or *χάω*, to melt, it is more justly derived from the Arabic *kama*, black. But Dr. Johnson, who very well understood every thing that could be urged in favour of the new orthography, has very judiciously continued the old; and indeed, till we see better reasons than have yet appeared, it seems rather to savour of an affectation of Oriental learning than a liberal desire to rectify and improve our language. But let the word originate in the East or West, among the Greeks or Arabians, we certainly received it from our common *Linguaducts*, (if the word will be pardoned me,) the Latin and French, which still retain either the *y*, or its substitute *i*.

Besides, the alteration produced a change in the pronunciation, which, from its being but slight, is the less likely to be attended to; and therefore the probability is, that, let us write the word as we will, we shall still continue to pronounce the old way; for in no English word throughout the language does the *e* sound like *y*, or *i* short, when the accent is on it.

This improvement, therefore, in our spelling, would, in all probability, add a new irregularity to our pronunciation, already incumbered with too many. Warburton, in his edition of Pope's works, seems to have been the first writer of note who adopted this mode of spelling from Boerhaave, and the German critics; and he seems to have been followed by all the inscriptions on the chymists' shops in the kingdom. But, till the voice of the people has more decidedly declared itself, it is certainly the most eligible to follow Dr. Johnson and our established writers in the old orthography.—See Mr. Nares's *English Orthoepey*, p. 285, where the reader will see judiciously exposed the folly of altering settled modes of spelling for the sake of far-fetched and fanciful etymologies.

CIRCUMFLEX, sêr'kûm-fleks, s. An accent used to regulate the pronunciation of syllables.

✱ All our prosodists tell us that the circumflex accent is a composition of the grave and the acute; or that it is a raising or falling of the voice upon the same syllable. If they are desired to exemplify this by actual pronunciation, we find they cannot do it, and only pay us with words. This accent, therefore, in the ancient as well as modern languages, with respect to sound, has no specific utility. The French, who make use of this circumflex in writing, appear, in the usual pronunciation of it, to mean nothing more than long quantity.—See *Barytone*. If the inspector would wish to see a rational account of this accent, as well as of the grave and acute, let him consult a work lately published by the Author of this Dictionary, called *A Rhetorical Grammar*, the third edition; or, *A Key to the Classical Pronunciation of Greek and Latin Proper Names*.

CLOTHES, klôze, *s.* Garment, raiment; those coverings of the body that are made of cloth.

✧ This word is not in Johnson's Vocabulary, though he has taken notice of it under the word *Cloth*, and says it is the plural of that word. With great deference to his authority, I think it is rather derived from the verb *To clothe* than from the noun *cloth*, as this word has its regular plural, *cloths*, which plural regularly sounds the *th*, as in *this*, 469, and not as *s* which is a corruption that, in my opinion, is not incurable. I see no reason why we may not as easily pronounce the *th* in this word as in the third person of the verb *To clothe*.

How Dr. Johnson could be guilty of so gross an oversight as to spell this word and its compounds with one *d* is inconceivable. By the general rule of English pronunciation, as the word stands here, it ought to be pronounced with the *o* long, the first syllable rhyming with *go*, *no*, and *so*. False and absurd, however, as this spelling is, the veneration I have for Dr. Johnson's authority forbids me to alter it in this Dictionary, though I shall never follow it in practice. Perhaps the same veneration induced Mr. Sheridan to let this word stand as he found it in Johnson. Dr. Kenrick has ventured to insert another *d* in the verb; but in the substantive, derived from the present participle *Codling*, lets it stand with one *d*. Some will be apt to think that when *d* ends a syllable, and a consonant follows the *d*, which begins another, that the business is done, and that the quantity of the vowel is sufficiently secured: but this is a mistake; for unless we previously understand the simple, the *o* in the compound, by the general rule, must be long. Now the first principle of orthography is, that, if possible, the letters should of themselves point out the sound of the word, without the necessity of recurring to etymology to find out the sound of the letters; and that we should never have recourse to etymology but where fixing the sound would unsettle the sense. Thus *Codling*, a kind of apple, ought to be written with double *d*, both because it determines the sound of the *o*, and shows its derivation from the verb *To Coddle*. And *Codling*, a small codfish, ought to have but one *d*, because putting two, in order to fix the sound of *o*, would confound it with another word. To write *Saddler*, therefore, with one *d*, as we frequently see it on shops, is an error against the first principles of spelling; as, without necessity, it obliges us to understand the derivation of the word before we are sure of its sound. The word *Stabling* and *Stabler*, for stable-keeper, in

Scotland, with the word *Fabled* in Milton, all present their true sound to the eye without knowing their primitives; and this essential rule has generated the double consonant in the participles and verbal nouns, *beginning*, *regretted*, *complotter*, &c. But this rule, rational and useful as it is, is a thousand times violated by an affectation of a knowledge of the learned languages, and an ignorant prejudice against clusters of consonants, as they are called. Thus *couple*, *trouble*, *double*, *treble*, and *triple*, have single consonants, because their originals in Latin and French have no more, though double consonants would fix the sound of the preceding vowels, and be merely double to the eye.

CODLING, kôd'îng, *s.* An apple generally codled; a small codfish.

COEFFICACY, kô-êf-fê-kâ-sê, *s.* The power of several things acting together.

COFFEE-POT, kôf'fê-pôt, *s.* The covered pot in which coffee is boiled.

COFFER, kôf'fûr, *s.* A chest generally for keeping money; in fortification, a hollow lodgment across a dry moat.

I have in this word followed the general pronunciation, which I see is confirmed by Dr. Kenrick, W. Johnston, Messrs. Perry, Scott, and Buchanan; for as it stands in Mr. Sheridan with the *o* long, though not without respectable usage on its side, it is a gross irregularity, which ought, if possible, to be reduced to rule.

To COFFER, kôf'fûr, *v. a.* To treasure up in chests.

COFFERER, kôf'fûr-ûr, *s.* 555. A principal officer of his majesty's court, next under the comptroller.

✱ In scarcely any part of the language does the influence of accent on the sound of the vowels appear more perceptibly than in the prepositional syllables, *Col*, *Com*, *Con*, and *Cor*. When the accent is on these syllables, in *college*, *commissary*, *conclave*, *corrigible*, &c. &c. the *o* has distinctly its short sound. The same may be observed of this *o* when the principal accent is on the third syllable, and the secondary accent on the first, 523; as in *colonnade*, *commensation*, *condescension*, *correspondent*, &c. &c.; for in this case there is a secondary accent on the first syllable, which preserves the *o* in its true sound, 522; but when the accent is on the second syllable this vowel slides into a sound like short *u*, and the words *To collect*, *To commit*, *To convince*, *To corrupt*, &c. &c. are heard as if written *cullect*, *cummit*, *convince*, *currupt*, &c. &c. It is true that when these words are pronounced alone, with deliberation, energy, and precision, the *o* in the first syllable preserves nearly its true sound; but this seems to slide insensibly into short *u* the moment we unite these words with others, and pronounce them without premeditation. The deliberate and solemn sound is that which I have given in this Dictionary; nor have I made any difference between words where the accent is on the second syllable; and why Mr. Sheridan, and those who have followed him, should in *combust*, *commute*, *complete*, &c. &c. give the sound of short *o* in *from*, and in *command*, *commit*, *commence*, &c. &c. give the same letter the sound of short *u* in *drum*, I cannot conceive; they are all susceptible of this sound or none, and therefore should all be marked alike. If custom be pleaded for this distinction, it may be observed that this plea is the best in the world when it is evident, and the worst when obscure. No such custom ever fell under my observation: I have always heard the first syllable of *compare* and *compel*, of *commence* and *compose*, pronounced alike, and have therefore made no distinction between them in this Dictionary. I have given them all the sound of the *o* in *comma*, though I am sensible that, in colloquial pronunciation, they all approach nearer to the short *u*, and are similar to the same syllables in *comfort*, *combat*, &c. And it may be laid down as a general rule, without an exception, "that *o* in an initial syllable, immediately before the accent, and succeeded by two uncombined consonants, may, in familiar conversation, be pronounced like the same letter in *come*, *done*, &c."

COLLECT, kól'lékt, s. 492. Any short prayer.

To COMMAND, kóm-mánd', v. n. To have
the supreme authority.

COMMAND, kóm-mánd', s. The right of
commanding, power, supreme authority; co-
gent authority, despotism; the act of com-
manding, order.—See *To Collect*.

✧ The propensity of the unaccented *o* to fall into
the sound of short *u* is nowhere more perceptible
than in the first syllables of words beginning with
col, *com*, *con*, or *cor*, when the accent is on the se-
cond syllable. Thus the *o* in *to collect* and *college*;
in *commend* and *comment*; in *connect* and *consul*;
in *correct* and *corner*, cannot be considered as ex-
actly the same in all; the *o* in the first word of each
of these pairs has certainly a different sound from the
same letter in the second; and if we appreciate this
sound, we shall find it coincide with that which is the
most nearly related to it, namely, the short *u*. I have
not, however, ventured to substitute this *u*: not that
I think it incompatible with the most correct and so-

lemn pronunciation, but because, where there is a
possibility of reducing letters to their radical sound
without hurting the ear, this radical sound ought to be
the model, and the greater or less departure from it
left to the solemnity or familiarity of the occasion.
To foreigners, however, it may not be improper to
remark, that it would be always better for them to
adopt the *u* instead of *o*: this will secure them from
the smallest impropriety, for natives only can seize
such nice distinctions as sometimes divide even judges
themselves. Mr. Sheridan was certainly of opinion
that this unaccented *o* might be pronounced like *u*, as
he has so marked it in *command*, *commence*, *commis-
sion*, and *commend*, though not in *commander*; and
in *compare*, though not in *comparative*: but in almost
every other word where this *o* occurs he has given it
the sound it has in *constant*. Mr. Scott has exactly
followed Mr. Sheridan in these words, and Dr. Ken-
rick has uniformly marked them all with the short
sound of *o*. Why Mr. Sheridan and Mr. Scott should
make any difference in the first syllables of these
words, where the letters and accents are exactly the
same, I cannot conceive: these syllables may be
called a species; and, if the occasion were not too
trifling for such a comparison, it might be observed,
that as Nature varies in individuals, but is uniform in
the species, so custom is sometimes various in accen-
ted syllables, which are definitely and strongly marked,
but commonly more regular in unaccented syllables,
by being left, as it were, to the common operation of
the organs of pronunciation.—See the words *Collect*
and *Domestic*.

COMMANDER, kóm-mán'dúr, s. He that
has the supreme authority, a chief; a paving

COMMENDABLE, { kóm-mén-dá-bl, } a.
{ kóm-mén'dá-bl, }

Laudable, worthy of praise.

✧ This word, like *Acceptable*, has, since John-
son wrote his Dictionary, shifted its accent from the
second to the first syllable. The sound of the language

AT 559. Fête 78, fêr 77, fêll 88, fêst 81—mê 93, mêt 95—pline 105, pîn 107—nô 102, môve 104,

certainly suffers by these transitions of accent. However, when custom has once decided, we may complain, but must still acquiesce. The accent on the second syllable of this word is grown vulgar, and there needs no other reason for banishing it from polite pronunciation.

COMMENDABLY, kôm'mên-dâ-blê, *ad.* Laudably, in a manner worthy of commendation.

COMMENDAM, kôm'mên-dâm, *s.* Commendam is a benefice, which, being void, is commended to the charge of some sufficient clerk to be supplied.

COMMENTITIOUS, kôm'mên-tîsh'ûs, *s.* Invented, imaginary.

COMMERCE, kôm'mêrse, *s.* Exchange of one thing for another, trade, traffick.

To COMMERCE, kôm'mêrse', *v. n.* To hold intercourse.

✧ Milton has, by the license of his art, accented this verb according to the analogy of disyllable nouns and verbs of the same form. 492.

"And looks *commérce*ing with the skies,

"Thy rapt soul sitting in thy eyes."—*Penseroso*.

But this verb, like *To Comment*, would, in prose, require the accent on the first syllable, as in the noun. Though Akenside has taken the same liberty with this word as Milton had done with that:—

"—the sober zeal

"Of age, *commencing* on prodigious things."

Pleasures of Imag.

COMMERCIAL, kôm-mêr'shâ-l, *a.* Relating to commerce or traffick.

CONCORDANCE, kón-kỏrd'ẻnẻsẻ, *s.* 496. Agreement; a book which shows in how many texts of Scripture any word occurs.

Johnson, Sheridan, Ash, Scott, Nares, Perry, Bailey, Entick, W. Johnston, Buchanan, and Kenrick, all concur in placing the accent on the second syllable of this word in both its senses; and every plea of distinction is trifling against all these authorities, and the discordance of the accent on the first syllable. See *To Bow*.

CONCORDANT, kón-kỏrd'ẻnt, *a.* Agreeable, agreeing.

CONCORDATE, kón-kỏrd'ẻtẻ, *s.* 91. A compact, a convention.

CONFESSIONARY, kôn-fesh'ôn-â-rê, s. The seat where the priest sits to hear confessions.

CONFESSOR, kôn-fes-sûr, s. One who makes profession of his faith in the face of danger; he that hears confessions, and prescribes penance; he who confesses his crimes.

Dr. Kenrick says this word is sometimes, but improperly, accented on the first syllable; but it may be observed that this impropriety is become so universal, that not one who has the least pretension to politeness dares to pronounce it otherwise. It is, indeed, to be regretted that we are so fond of Latin origin as entirely to neglect our own; for this word can now have the accent on the second syllable, only when it means one who confesses his crimes: a sense in which it is scarcely ever used. Mr. Sheridan and Eutick have the accent on the first syllable of this word, Mr. Scott on the first and second; Dr. Johnson, Mr. Perry, Buchanan, W. Johnston, Ash, Bailey, and Smith, on the second: but, notwithstanding this weight of authority, the best usage is certainly on the other side.

CONFEST, kôn-fest', a. Open, known, not concealed.

Dr. Kenrick tells us that this is a poetical word for *Confessed*: and, indeed, we frequently find it so written by Pope and others:

"This clue thus found unravels all the rest;

"The prospect clears, and Clodio stands confest."

But that this is a mere compliance with the prejudices of the eye, and that there is not the least necessity for departing from the common spelling.—See Principles of English Pronunciation, No. 360.

CONFESTLY, kôn-fest'le, ad. Indisputably, properly *Confessedly*. 364.

CONFIDANT, kôn-fê-dânt', s. A person trusted with private affairs.

This word, very unlike most others from the same source, has been made to alter its French orthography, in order to approach a little nearer to the English pronunciation of it. Some affected speakers on the stage pronounce the first syllable like *cone*, as it is marked in the first edition of Mr. Sheridan's Dictionary; and this is perfectly of a piece with the affectation which has altered the spelling of the last. By Dryden and South, as quoted by Dr. Johnson, we find this word spelled like the adjective *confident*; and it is more than probable that its French pronunciation is but of late date; but so universal is its use at present, that a greater mark of rusticity cannot be given than to place the accent on the first syllable, and to pronounce the last *dant* instead of *dânt*.

CONFIDE, kôn-fide', v. n. To trust in.

CONFIDENCE, kôn-fê-dênse, s. Firm belief of another; trust in his own abilities or fortune; vitious boldness, opposed to modesty; honest boldness, firmness of integrity; trust in the goodness of another.

CONFIDENT, kôn-fê-dênt, a. Assured beyond doubt; positive, dogmatical, secure of success; without suspicion, trusting without limits; bold to a vice, impudent.

CONFIDENTLY, kôn-fê-dênt-lê, ad. Without doubt, without fear; with firm trust; positively, dogmatically.

CONFIDENTNESS, kôn-fê-dênt-nês, s. Assurance.

CONFIGURATION, kôn-fîg-û-râ'shûn, s. The form of the various parts, adapted to each other; the face of the horoscope.

To **CONFIGURE**, kôn-fîg'ûre, v. a. To dispose into any form.

CONFINE, kôn-fîne, s. 140, 492. Common boundary, border, edge.

Dr. Johnson tells us that the substantive *confine* was formerly pronounced with the accent on the first

syllable. The examples, however, which he gives us from the poets, prove only that it was accented both ways. But, indeed, it is highly probable that this was the case; for instances are numerous of the propensity of latter pronunciation to place the accent higher than formerly; and when by this accentuation a noun is distinguished from a verb, it is supposed to have its *ue*.—See *Bowl*.

To **CONFINE**, kôn-fîne', v. n. To border upon, to touch on different territories.

To **CONFINE**, kôn-fîne', v. a. To limit; to imprison; to restrain, to tie up to.

CONFINELESS, kôn-fîne'lês, a. Boundless, unlimited.

CONFINEMENT, kôn-fîne'mênt, s. Imprisonment, restraint of liberty.

CONFINER, kôn-fî'nûr, s. A borderer, one that lives upon confines; one that touches upon two different regions.

CONFINITY, kôn-fîn'ê-tê, s. Nearness.

To **CONFIRM**, kôn-fêrm', v. a. 108. To put past doubt by new evidence; to settle, to establish; to strengthen by new solemnities or ties; to admit to the full privileges of a Christian, by imposition of hands.

CONFIRMABLE, kôn-fêrm'â-bl, a. That which is capable of incontestable evidence.

CONFIRMATION, kôn-fêrm'â'shûn, s. The act of establishing any thing or person, evidence, additional proof; an ecclesiastical rite.

CONFIRMATOR, kôn-fêrm'â-tûr, s. An attestor, he that puts a matter past doubt.

CONFIRMATORY, kôn-fêrm'â-tûr-ê, a. Giving additional testimony.—See *Domestic*, 512.

CONFIRMEDNESS, kôn-fêrm'êd-nês, s. Confirmed state.

This word ought to be added to those taken notice of.—Prin. No. 365.

To **CONFISCATE**, kôn-fîs'kâte, v. a. To transfer private property to the publick, by way of penalty.

CONFISCATE, kôn-fîs'kâte, a. Transferred to the publick as forfeit.

Dr. Kenrick blames Dr. Johnson for accenting this word on the second syllable, when the example he brings from Shakespeare accents it on the first; but it may be observed, that as the verb ought to have the accent on the second syllable, the adjective, which is derived from it, ought to have the accent on the same syllable likewise; and the example from Shakespeare must be looked upon as a poetical license.

CONFISCATION, kôn-fîs'kâ'shûn, s. The act of transferring the forfeited goods of criminals to publick use.

CONFITENT, kôn-fê-tênt, s. One confessing.

CONFITURE, kôn-fê-tshûre, s. 461. A sweetmeat, a confection.

To **CONQUER**, kôn'k'ûr, or kôn'kwûr, v. a. 415. To gain by conquest, to win; to overcome, to subdue; to surmount.

✠ Mr. Sheridan, Mr. Elphinston, Mr. Nares, and W. Johnston, have adopted the first pronunciation of this word; but as it is a wanton departure from our own analogy to that of the French, and is a much harsher sound than the second, it were to be wished it could be reclaimed; but, as it is in full possession of the stage, there is but little hope of a change.

To **CONQUER**, kôn'k'ûr, v. n. To get the victory, to overcome.

CONSOLATOR, kôn-sô-lâ-tûr, *s.* 521. A comforter.

CONSOLATORY, kôn-sô-lâ-tûr-ê, *s.* 512. A speech or writing containing topics of comfort.

✱ I have given the *o* in the second syllable of this word the short sound, as heard in *solid*; as it seems more agreeable to the analogy of words in this termination than the long *o*, which Mr. Sheridan has given: for by inspecting the Rhyming Dictionary we shall see that every vowel, but *u* in the preantepenultimate syllable in these words, is short. Dr. Kenrick and W. Johnston give the *o* the same sound as I have done.

CONSOLATORY, kôn-sô-lâ-tûr-rê, *a.* Tending to give comfort.

To **CONSOLE**, kôn-sô-lê', *v. a.* To comfort, to cheer.

CONSTRUCTURE, kôn-strũk'tshũr, s. 461. Pile, edifice, fabrick.

To CONSTRUE, kôn'strũ, or kôn'stũr, v. a. To interpret, to explain.

It is a scandal to seminaries of learning that the latter pronunciation of this word should prevail there. Those who ought to be the guardians of propriety are often the perverters of it. Hence *Accidence* for *Accidents*, *Preceptor* for *Prepositior*, and *Constur* for *Constructur*; for it must be carefully noted that this last word is under a different predicament from those which end with *r* and mute *e*: here the vowel *u* must have its long sound, as in the word *true*; this letter cannot be sunk or transposed like *e* in *Centre*, *Sceptre*, &c.

To CONSTUPRATE, kôn'stũ-prãte, v. a. To violate, to debauch, to defile.

CONSTUPRATION, kôn'stũ-prã'shũn, s. Violation, defilement.

CONSULT, kôn'sũlt, or kôn-sũlt', s. The act of consulting; the effect of consulting, determination; a council, a number of persons assembled in deliberation.

I am much mistaken if this word does not incline to the general analogy of accent in dissyllable nouns and verbs, like *insult*. Poets have used it both ways; but the accent on the first syllable seems the most usual, as well as the most legitimate pronunciation. 492.

CONSULTATION, kôn-sũl-tã'shũn, s. The act of consulting, secret deliberation; number of persons consulted together.

CONSULTER, kôn-sũl'tũr, s. 98. One that consults or asks counsel.

CONSUMABLE, kôn-sũmã-bl, a. Susceptible of destruction.

To CONSUME, kôn-sũme', v. a. 454. To waste, to spend, to destroy.

The reason why the *s* in this word is pure, and in *Consular* it takes the aspiration, is, that in one the accent is on the syllable beginning with this letter; and, in the other, on the preceding syllable. 450.

To CONSUME, kôn-sũme', v. n. To waste away, to be exhausted.

CONSUMER, kôn-sũmũr, s. One that spends, wastes, or destroys any thing.

To CONSUMMATE, kôn-sũm'mãte, v. a. 91. To complete, to perfect.

CONSUMMATE, kôn-sũm'mãte, a. Complete, perfect.

The propensity of our language to an antepenultimate accentuation of simple words of three syllables makes us sometimes hear the accent on the first syllable of this word; but by no correct speakers.

CONSUMMATION, kôn-sũm-mã'shũn, s. Completion, perfection, end; the end of the present system of things; death, end of life.

CONSUMPTION, kôn-sũm'shũn, s. 412. The act of consuming, waste; the state of wasting or perishing; a waste of muscular flesh, attended with a hectic fever.

CONTORTION, kón-tẻ'ỏ'shủn, *s.* Twist, wry motion, flexure.

CONTOUR, kón-tẻ'ỏr', *s.* French. The outline, the line by which any figure is defined or terminated.

CONTRABAND, kón-trẻ-bẻnd, *a.* 524. Prohibited, illegal, unlawful.

To **CONTRACT**, kón-trẻkt', *v. a.* To draw together, to shorten; to bring two parties together, to make a bargain; to betroth, to affiancé; to get a habit of; to abridge, to epitomise.

To **CONTRACT**, kón-trẻkt', *v. n.* To shrink up, to grow short; to bargain, as, to contract for a quantity of provisions.

CONTRACT, kón-trẻkt, *s.* 492. A bargain, a compact; an act whereby a man and woman are betrothed to one another; a writing in which the terms of a bargain are included.

Mr. Nares, in his English Orthoepy, page 338, has very properly criticised Dr. Johnson's observation on this word, where he says, 'Dr. Johnson has accented this word on the last syllable, and has subjoined this remark,' "anciently accented on the first." It is evident that the whole article should be reversed: the word should stand with the accent on the first, and the remark should be, "anciently accented on the last." The justness of these observations will appear from the quotations:

"This is the band which, with a vow'd contract,
Was fast belock'd in thine." *Shakespeare.*

"I did; and his contract with Lady Lucy,

"And his contract by deputy in France." *Ibid.*

But that the accent should now be placed on the first syllable needs no proof but the general ear, and the general analogy of dissyllable nouns and verbs of the same form. 492.

CONTRACTEDNESS, kón-trẻkt'ẻd-nẻs, *s.* The state of being contracted.

CONTRACTIBILITY, kón-trẻkt-tẻ-bẻ'ẻ-tẻ, *s.* Possibility of being contracted.

CONTRACTIBLE, kón-trẻkt'ẻ-bl, *a.* Capable of contraction.

CONTRACTIBLENESS, kón-trẻkt'ẻ-bl-nẻs, *s.* The quality of suffering contraction.

CONTRACTILE, kón-trẻkt'ẻl, *a.* 145, 140. Having the power of shortening itself.

CONTRACTION, kón-trẻkt'shủn, *s.* The act of contracting or shortening; the act of shrinking or shrivelling; the state of being contracted, drawn into a narrow compass; in grammar, the reduction of two vowels or syllables to one; abbreviation, as, the writing is full of contractions.

CONTRACTOR, kón-trẻkt'tử, *s.* One of the parties to a contract or bargain.

To **CONTRADICT**, kón-trẻ-dẻkt', *v. a.* To oppose verbally, to deny; to be contrary to.

CONTRADICTER, kón-trẻ-dẻkt'tử, *s.* One that contradicts, an opposer.

CONTRADICTION, kón-trẻ-dẻkt'shủn, *s.* Verbal opposition, controversial assertion; opposition; inconsistency, incongruity; contrariety, in thought or effect.

CONTRADICTIONOUS, kón-trẻ-dẻkt'shủs, *a.* Filled with contradictions, inconsistent; inclined to contradict.

CONTRANITENCY, kôn-trá-nítên-sê, *s.* Reaction, resistance against pressure.

CONTRAPOSITION, kôn-trá-pô-zítsh'ún, *s.* A placing over against.

CONTRAREGULARITY, kôn-trá-rêg-ù-lá-rê-tê, *s.* Contrariety to rule.

CONTRARIANT, kôn-trá-rê-ánt, *a.* Inconsistent, contradictory.

CONTRARIES, kôn-trá-ríz, *s.* 99. Things of opposite natures or qualities; in logick, propositions which destroy each other.

CONTRARIETY, kôn-trá-ríê-tê, *s.* Repugnance, opposition; inconsistency, quality or position destructive of its opposite.

CONTRARILY, kôn-trá-rê-lê, *ad.* In a manner contrary; different ways, in opposite directions. Little used.

✠ This and the following word are by Dr. Johnson accented on the second syllable; no doubt from the harshness that must necessarily arise from placing the accent on the first, when so many unaccented syllables are to succeed. But, if harmony were to take place, we should never suffer the stress on the first syllable of *Contrary*, from which these words are formed; but that once admitted, as it invariably is by the best speakers, we should cross the most uniform analogy of our language if we accented the adverb differently from the substantive and the adjective; and therefore, however harsh they may sound, these words must necessarily have the accent on the first syllable.—See *Contrary*.

CONTRARINESS, kôn-trá-rê-nês, *s.* Contrariety, opposition.

CONTRARIOUS, kôn-trá-rê-ús, *a.* Opposite, repugnant.

CONTRARIOUSLY, kôn-trá-rê-ús-lê, *ad.* Oppositely.

CONTRARIWISE, kôn-trá-rê-wíse, *ad.* Conversely; on the contrary.

CONTRARY, kôn-trá-rê, *a.* Opposite, contradictory; inconsistent, disagreeing; adverse, in an opposite direction.

✠ The accent is invariably placed on the first syllable of this word by all correct speakers, and as constantly removed to the second by the illiterate and vulgar. When common ears refuse a sound, it is a strong presumption *that* sound is not agreeable to the general harmony of the language. The learned often vitiate the natural taste for their own language by an affected veneration for others; while the illiterate, by a kind of vernacular instinct, fall into the most analogical pronunciation, and such as is most suitable to the general turn of the language. Anciently this word was most commonly pronounced by the learned, as it is now by the vulgar, with the accent on the second syllable; but nothing can be now more firmly established than the accent on the first syllable, and the other pronunciation must be scrupulously avoided.—See *Contrarily*.

CONTRARY, kôn-trá-rê, *s.* A thing of opposite qualities; a proposition contrary to some other; in opposition, on the other side; to a contrary purpose.

CONTRAST, kôn-trást, *s.* Opposition and dissimilitude of figures, by which one contributes to the visibility or effect of another.

To CONTRAST, kôn-trást', *v. a.* To place in opposition; to show another figure to advantage.

CONTRAVALLATION, kôn-trá-vál-lá-shún, *s.* The fortification thrown up, to hinder the sallies of the garrison.

CONTRAVENE, kôn-trá-vêne', *v. a.* To oppose, to obstruct, to baffle.

CONTRAVENER, kôn-trá-vê'nêr, *a.* He who opposes another.

CONTRAVENTION, kôn-trá-vên'shún, *s.* Opposition.

CONTRACTATION, kôn-trêk-tá'shún, *s.* A touching.

CONTRIBUTARY, kôn-tríb'ù-tá-rê, *a.* Paying tribute to the same sovereign.

To CONTRIBUTE, kôn-tríb'ùte, *v. a.* To give to some common stock.

To CONTRIBUTE, kôn-tríb'ùte, *v. n.* To bear a part, to have a share in any act or effect.

CONTRIBUTION, kôn-trê-bù'shún, *s.* The act of promoting some design in conjunction with other persons; that which is given by several hands for some common purpose; that which is paid for the support of an army lying in a country.

CONTRIBUTIVE, kôn-tríb'ù-tív, *a.* That which has the power or quality of promoting any purpose in concurrence with other motives.

CONTRIBUTOR, kôn-tríb'ù-túr, *s.* 166. One that bears a part in some common design.

CONTRIBUTORY, kôn-tríb'ù-túr-ê, *a.* Promoting the same end, bringing assistance to some joint design. 512.

To CONTRISTATE, kôn-trís'táte, *v. a.* To sadden, to make sorrowful. Not used.

CONTRISTATION, kôn-trís-tá'shún, *s.* The act of making sad, the state of being made sad. Not used.

CONTRITE, kôn'tríte, *a.* 140. Bruised, much worn; worn with sorrow, harassed with the sense of guilt, penitent.

✠ This word ought to have the accent on the last syllable, both as it is an adjective, from which is formed the abstract substantive *contriteness*, and as the accent on the first syllable has a tendency to shorten the *i* in the last, 140. Accordingly Dr. Johnson, Mr. Scott, and Bailey, place the accent on the last syllable; but Mr. Sheridan, Mr. Nares, Mr. Elphinstone, Dr. Ash, W. Johnston, Perry, Buchanan, and Entick place it on the first, with unquestionably the best usage on their side.

CONTRITELY, kôn'tríte-lê, *ad.* Penitently.

✠ As the adjective *contrite*, though contrary to analogy, seems to prefer the accent on the first syllable, *contritely* and *contriteness* must necessarily have the accent on the same syllable.—See *Contrarily*.

CONTRITENESS, kôn'tríte-nês, *s.* Contrition, repentance.

CONTRITION, kôn-trísh'ún, *s.* The act of grinding or rubbing to powder; penitence, sorrow for sin.

CONTRIVABLE, kôn-trí'váb-l, *a.* Possible to be planned by the mind.

To CONTRIVE, kôn-tríve', *v. a.* To plan out; to find out means.

To CONTRIVE, kôn-tríve', *v. n.* To form or design, to plan.

CONTRIVEMENT, kôn-tríve'mênt, *s.* Invention.

CONTRIVER, kôn-trí'vúr, *s.* 98. An inventor.

CONTROL, kôn-tróll', *s.* 406. A register or account kept by another officer, that each may be examined by the other; check, restraint; power, authority, superintendence.

To CONTROL, kôn-tróll', *v. a.* 406. To keep under check by a counter-reckoning; to govern, to restrain; to confute.

CONTROLLABLE, kôn-tróll'áb-l, *a.* Subject to control, subject to be over-ruled.

CONTROLLER, kôn-tróll'úr, *s.* One that has the power of governing or restraining.

CONTROLLERSHIP, kôn-trôl-l'ur-shíp, *s.*
The office of a controller.

CONTROLMENT, kôn-trôl-l'mént, *s.* The power or act of superintending or restraining, restraint; opposition, confutation.

CONTROVERSIAL, kôn-trô-vêr-shál, *a.* Relating to disputes, disputations.

CONTROVERSY, kôn-trô-vêr-sê, *s.* Dispute, debate; a suit in law; a quarrel.

To CONTROVERT, kôn-trô-vêrt, *v. a.* To debate, to dispute any thing in writing.

CONTROVERTIBLE, kôn-trô-vêrt'ê-bl, *a.* Disputable.

CONTROVERTIST, kôn-trô-vêr-tíst, *s.* Disputant, chiefly on religious subjects.

It is with some surprise I have frequently observed those profound philologists, the Monthly Reviewers, write this word *Controversialist*. "He appears to be a sensible, ingenious, and candid Controversialist: one who writes from a regard to truth, and with the full conviction of his own mind."—*M. R.* November 1794, p. 346. But nothing is more evident than that every verbal noun ought to be formed from the verb, and consequently that *To controvert* ought to form *controvertist*. Dr. Johnson has only produced the authority of Tillotson; to which I will beg leave to add a much better from the *Idler*, No. 12. "It is common for controvertists, in the heat of disputation, to add one position to another till they reach the extremities of knowledge, where truth and falsehood lose their distinction."

CONTUMACIOUS, kôn-tù-má-shùs, *a.* Obstinate, perverse, stubborn.

CONTUMACIOUSLY, kôn-tù-má-shùs-lê, *ad.* Obstinately, inflexibly, perversely.

CONTUMACIOUSNESS, kôn-tù-má-shùs-nêss, *s.* Obstinacy, perverseness.

CONTUMACY, kôn-tù-má-sê, *s.* Obstinacy, perverseness; in law, a wilful contempt and disobedience to any lawful summons or judicial order.

CONTUMELIOUS, kôn-tù-mê-lê-ùs, *a.* Reproachful, sarcastic; inclined to utter reproach; productive of reproach, shameful.

CONTUMELIOUSLY, kôn-tù-mê-lê-ùs-lê, *ad.* Reproachfully, contemptuously.

CONTUMELIOUSNESS, kôn-tù-mê-lê-ùs-nêss, *s.* Rudeness, reproach.

CONTUMELY, kôn-tù-mê-lê, *s.* Contemptuousness, bitterness of language, reproach.

To CONTUSE, kôn-tù-zê, *v. a.* 487. To beat together, to bruise; to bruise the flesh without a breach of the continuity.

CONTUSION, kôn-tù-zhún, *s.* The act of beating or bruising; the state of being beaten or bruised; a bruise.

CONVENIENT, kôn-vê-nê-ênt, *a.* Fit, suitable, proper.

CONVENIENTLY, kôn-vê-nê-ênt-lê, *ad.* Commodiously; fitly.

CONVENT, kôn-vênt, *s.* An assembly of religious persons; a religious house, a monastery, a nunnery.

To CONVENT, kôn-vênt', *v. a.* 492. To call before a judge or judicature. Not in use.

CONVENTICLE, kôn-vênt'ê-kl, *s.* An assembly, a meeting; an assembly for worship; a secret assembly.

In the first edition of this Dictionary I followed Mr. Sheridan's accentuation of this word upon the first syllable, as I apprehended it was more agreeable to polite usage, though less agreeable to the ear than the accent on the second; but from a farther inquiry, and a review of the authorities for both, I am strongly persuaded in favour of the latter accentuation. For the former we have Sheridan, Ash, W. Johnston, and Entick; and for the latter Dr. Johnson, Kenrick, Nares, Scott, Perry, Buchanan, and Bailey. The other accentuation seems chiefly adopted by the poets; who should not be deprived of their privilege of altering the accents of some words to accommodate them to the verse:

"For 'twere a sin to rob them of their mite." *Pope.*
CONVENTICLER, kôn-vênt'ík-lûr, *s.* One that supports or frequents private and unlawful assemblies.

CONVENTION, kôn-vênt'shún, *s.* The act of coming together, union, coalition; an assembly; a contract, agreement for a time.

CONVENTIONAL, kôn-vênt'shún-ál, *a.* Stipulated, agreed on by compact.

CONVENTIONARY, kôn-vênt'shún-á-rê, *a.* Acting upon contract.

CONVENTUAL, kôn-vênt'tshún-ál, *a.* Belonging to a convent, monastick.

CONVENTUAL, kôn-vênt'tshún-ál, *s.* A monk, a nun, one that lives in a convent.

To CONVERGE, kôn-vêr-jê', *v. n.* To tend to one point from different places.

CONVERGENT, kôn-vêr-jênt, } *a.* Tending

CONVERGING, kôn-vêr-jíng, } to one point from different places.

CONVERSABLE, kôn-vêr'sá-bl, *a.* Qualified for conversation, fit for company.

CONVERSABLENESS, kôn-vêr'sá-bl-nêss, *s.* The quality of being a pleasing companion

CONVERSABLY, kôn-vêr'sá-blê, *ad.* In conversable manner.

CONVERSANT, kôn-vêr-sánt, kôn-vêr'sánt, *a.* Acquainted with; familiar; having intercourse with any, acquainted; relating to, concerning.

There are such considerable authorities for each of these pronunciations as render a decision on that ground somewhat difficult. Dr. Johnson, Dr. Ash, Dr. Kenrick, Mr. Perry, Buchanan, and Bailey, place the accent on the second syllable; and Mr. Nares, W. Johnston, and Entick, accent the first. Mr. Sheridan and Mr. Scott place it on both, and consequently leave it undecided. Analogy seems to demand the stress on the second syllable; perhaps not so much from the relation the word bears to the verb *converse*, since it may possibly be derived from the noun *converse*, 498, as from the very general rule of accenting words of three syllables, that are not simples in our language, on the second syllable, when two consonants occur in the middle. This rule, however, is frequently violated in favour of the antepenultimate accent (the favourite accent of our language), as in *aggrandize*, *amnesty*, *character*, *convertite*, *ancestor*, *magistrate*, *protestant*, &c.; and where there is but one consonant in the middle, nothing is more common than to find the accent of the dissyllable verb neglected, and the trisyllable noun adopting the antepenultimate accent. Thus the words *Confident*, *President*, *Provident*, &c. are not accented like the verbs *Confide*, *Preside*, &c. &c. but are considered as simples, and follow the general rule; which is, that all simples of three syllables, with but one consonant in the middle, have the accent on the first, and that the vowel in this syllable is short, 503. Upon the whole, there

Here, these authorities are so equal and analogy so precarious, usage must be the umpire; and my observation tells me that which may be called the best usage does not decide in favour of the accent on the first syllable.

CONVERSATION, kón-vẻ-shún, s. Familiar discourse, chat, easy talk, a particular act of discoursing upon any subject; commerce, intercourse; familiarity; behaviour, manner of acting in common life.

CONVERSE, kón'vẻse, s. 592. Manner of discoursing in familiar life; acquaintance, cohabitation, familiarity; with geometers it means the contrary.

It is highly probable that this substantive was anciently pronounced like the verb, with the accent on the second syllable; but nothing is now better established than the accent on the first. Even the line of Pope—

"Generous converse; a soul exempt from pride," however rugged with the accent on the first syllable of this word, cannot with propriety be read otherwise.

CONUSANCE, kón'ủ-sẻnẻnẻ, s. Cognizance, notice. A law term.—See *Cognizance*.

Perhaps it may be pleaded by the gentlemen of the law that this is the word they use instead of *Cognizance*, and consequently that the charge against them of mutilating that word falls to the ground. But it may be answered that the second syllable of these words are so different as to leave us in no doubt which they make use of; and that the words *Cognizable*, *Cognizor*, and *Cognizee*, being pronounced by them without the *g*, are sufficient proofs of the justness of the accusation.

To CONVULSE, kón-vỏẻ'ẻnẻ', v. a. To give an irregular and involuntary motion to the parts of any body.

CORDIAL, kôr-jê-âl, *s.* 294, 376. A medicine that increases the force of the heart, or quickens the circulation; any medicine that increases strength; any thing that comforts, gladdens, and exhilarates.

✂ There is certainly a tendency in the *d* as well as in the *t* to slide into a soft hissing sound when preceded by the accent, and followed by a diphthong or a diphthongal vowel, commencing with the sound of *e*. This is evicent by the current pronunciation of *imme-*

diate, verdure, &c. as if written *immediate, verdure, &c.* 294; and this pronunciation is agreeable to the genius of our language, that the organs slide into it insensibly. Mr. Sheridan, in order to mark this sound, has adopted the *y*, and spelled the word *Cor-dyal*. and if *y* is here articulated as a consonant, as is intended, its connexion with *d* produces a sound so near the hiss in *Cor-jê-âl*, as to be with difficulty distinguished from it.

CORDIAL, kôr-jê-âl, *a.* Reviving, invigorating; sincere, hearty.

COROLLARY, kôr'ô-lâr-ê, s. 168. The conclusion; an inference.

Dr. Johnson, Mr. Sheridan, Dr. Ash, W. Johnston, Buchanan, Entick, and Smith, accent this word on the first; and Dr. Kenrick, Scott, Perry, and Bailey, on the second syllable. The weight of authority is certainly for the accentuation I have adopted, and analogy seems to confirm this authority. For as the word is derived from *Corollarium*, with the accent on the antepenultimate, our pronunciation of this word generally lays an additional accent on the first syllable, which, when the word is shortened by dropping a syllable in *Corollary*, becomes the principal accent, as in a thousand other instances.—See *Academy*.

CORONAL, kôr'ô-nâl, s. 168. A crown, a garland.

CORONAL, kôr'ô-nâl, a. Belonging to the top of the head.

CORRUPTIBILITY, kôr-rúpt-tê-blí'ê-tê, s. Possibility to be corrupted.

CORRUPTIBLE, kôr-rúpt-tê-bl, a. 405. Susceptibility of corruption; possible to be vitiated.

Some affected speakers have done all in their power to remove the accent of this word from the second to the first syllable; thanks to the difficulty of pronouncing it in this manner, they have not yet effected their purpose. Those who have the least regard for the sound of their language, ought to resist this novelty with all their might; for if it once gain ground, it is sure to triumph. The difficulty of pronouncing it, and the ill sound it produces, will recommend it to the fashionable world, who are as proud to distinguish themselves by an oddity in language as in dress.—See *Incomparable*.

COVETOUS, kûv'ê-tûs, *a.* Inordinately desirous; inordinately eager of money, avaricious.

¶ In the pronunciation of this word and its compounds Mr. Sheridan has adopted a vulgarity, of which one could scarcely have suspected him: but pronouncing *covetshus* for *covetous* is not only a vulgarity, but contrary to analogy. All these diphthongs and diphthongal vowels which draw the preceding consonants to aspiration are such as commence with the sound of *e*; which, from its nearness to the sound of double *e*, and the nearness of this sound to the commencing sound of *y*, approaches to the hissing sound of *s*, *x*, and soft *c*, and in the absence of accent coalesces with them. *T* and *D* being formed in the same seat of sound as the *s*, *x*, and soft *c*, when the accent is before them, easily slide into the same sound before similar vowels, but never before any other; for we might with as much propriety pronounce *calamitshus* and *necessitshus*, *calamitshus* and *necessitshus*, as *covetous*, *covetshus*. 459.

Dr. Johnson tells us this word is of uncertain etymology. It is certain, however, that it comes from the French; and Menage tells us it arose among them from the Croats, who, being in alliance with France against the Emperor, came to Paris, and were remarked for the linen they wore about their necks. This soon became a fashion, and was called, after the original wearers, *Croat*, which, by a small alteration, became *Cravat*. This word is sometimes, but improperly, pronounced with the accent on the first syllable. This pronunciation is adopted only by Dr. Ash and Buchanan, while Dr. Johnson, Mr. Elphinstone, Mr. Sheridan, Mr. Nares, Mr. Scott, W. Johnston, Kenrick, Eatock, and Bailey, are uniformly for the accent on the last syllable.

CUCUMBER, kûk'kûm-bûr, s. 152. The name of a plant, and fruit of that plant.

In some counties of England, especially in the West, this word is pronounced as if written *Cocumber*: this, though rather nearer to the orthography than *Cowcumber*, is yet faulty, in adopting the obtuse *w* heard in *bull*, rather than the open *a* heard in *Cucum*, the Latin word whence *Cucumber* is derived, though, from the adoption of the *b*, I should rather suppose we took it from the French *Cocumtre*. But, however this may be, it seems too firmly fixed in its sound of *Cowcumber* to be altered, and must be classed with its irregular fellow-eculent *Asparagus*, which see.

CUCURBITACEOUS, kû-kûr-bê-tâ'shûs, a. Cucurbitaceous plants are those which resemble a gourd, such as the pumpkin and melon.

CUCURBITE, kû'kûr-bît, s. 156. A chymical vessel, commonly called a Body.

CUIRASSIER, kwê-râs-sêér', s. 275. A man of arms, a soldier in armour.

CUISH, kwîs, s. 340. The armour that covers the thighs.

I have followed Dr. Johnson's spelling in this word, though I think it not so correct as *cuisse*, the original French, and which he has himself followed in his Edition of Shakespeare, and his notes upon the word in the first part of Henry the Fourth. But, whatever may be the spelling, the pronunciation is certainly that which I have given.

CUMFREY, k̄m'frē, s. A medicinal plant. See *Comfrey*.
CUMIN, k̄m'mīn, s. A plant.
This word, before Dr. Johnson's Dictionary altered it, was, I believe, universally spelled with double m. Our ancestors were homebred enough to think that, if we received a word from the Latin, and conformed to the quantity of that language, it was necessary to show that conformity by a specific orthography of our own. Thus, the first u in *Cuminum* being short, they doubled the m to indicate that shortness; as the analogy of our language would infallibly pronounce the u long, if the consonant were single, in the same manner as in *Cubic*, *Cupid*, &c.—See *Drama*.
To **CUMULATE**, k̄m'ū-lāte, v. a. To heap together.
CUMULATION, k̄m'ū-lā'shūn, s. The act of heaping together.

CURVILINEAR, kũr-vẻ-lĩn'yẻr, *a.* Consisting of a crooked line; composed of crooked lines.

CURVITY, kũr-vẻ-tẻ, *s.* Crookedness.

CUSHION, kũsh'ĩn, or kũsh'ũn, *s.* 289. A pillow for the seat, a soft pad placed upon a chair.

✧ I have given this word two sounds; not that I think they are equally in use; I am convinced the first is the more general; but because the other is but a trifling departure from it, and does not contradict the universal rule of pronouncing words of this termination.

CUSHIONED, kũsh'ĩnd, *a.* 359. Seated on a cushion.

CUSP, kũsp, *s.* A term used to express the points or horns of the moon, or other luminary.

officer in the exchequer that provides wood for the tallies, and cuts the sum paid upon them.

CUT-THROAT, kút'thrõte, s. A ruffian, a murderer, an assassin.

CUT-THROAT, kút'thrõte, a. Cruel, inhuman, barbarous.

✧ This adjective is frequently used very absurdly, (and not always by the lowest of the people,) when it is applied to a house of entertainment that charges an exorbitant price; such a house is not uncommonly, though very improperly, called a *Cut-throat-house*. This sense, I see, has been adopted by Entick; though it ought not to have a place in any Dictionary.

CUTTING, kút'ting, s. A piece cut off, a chop.

CUTTLE, kút'tl, s. 405. A fish, which, when he is pursued by a fish of prey, throws out a black liquor.

CUTTLE, kút'tl, s. A foul-mouthed fellow.

CYCLE, sl'kl, s. 405. A circle; a round of time, a space in which the same revolution begins again, a periodical space of time; a method, or account of a method, continued till the same course begins again; imaginary orbs, a circle in the heavens.

CYCLOID, sl'klôid, s. A geometrical curve.

✧ Sheridan and Buchanan pronounce the y in this word short; and Ash, Kenrick, and W. Johnston, long.

CYCLOIDAL, sê-klôid'ál, a. 180. Relating to a cycloid.

CYCLOPÆDIA, sl-klô-pê-dê-á, s. A circle of knowledge, a course of the sciences.

✧ I have in this word differed from Mr. Sheridan and Dr. Johnson, by placing the accent on the antepenultimate syllable instead of the penultimate. I know that Greek words of this termination have the accent on the penultimate syllable; but the antepenultimate accentuation is more agreeable to the genius of our tongue, and seems to have prevailed. For though Dr. Johnson has given this word the penultimate accent, he has placed the accent on the antepenultimate syllable of *Ambrosia*, *Euthanasia*, and *Hydrophobia*, though these have all the accent on the penultimate in the Greek. It is true the i in the last syllable but one of *Cyclopedia* is a diphthong in the original; and this will induce those who are fond of showing their Greek learning to lay the accent on the penultimate, as its opposition to general usage will be an additional reason with them for preferring it. The pronunciation I have adopted I see is supported by Dr. Kenrick, Entick, Scott, Perry, and Buchanan, which abundantly shows the general current of custom.

To these observations may be added, that if the i be accented, it must necessarily have the long open sound, as in *Elegiac*, and not the sound of e, as Mr. Sheridan has marked it.

CYGNET, sl'gnét, s. A young swan.

CYLINDER, sl'ln-dúr, s. A body having two flat surfaces and one circular.

CYLINDRICAL, sê-lín'drê-kál, } a. Par-

CYNEGETICKS, sln-nê-jét'iks, s. The art of hunting.

CYNICAL, sln'ík-ál, } a. Having the quali-
CYNICK, sln'ík, } ties of a dog, churlish, brutal, snarling, satirical.

CYNICK, sln'ník, s. A philosopher of the snarling or curish sort, a follower of Diogenes; a snarler, a misanthrope.

CYNOSURE, sín'ô-sûre, or sl'nô-shûre, s. The star near the north pole by which sailors steer.

✧ I have, in the first syllable of this word, contrary to Mr. Sheridan, preferred the short to the long sound of y. My first reason is, that this letter, in Greek, is the same as in *Cynic* and *Cylinder*; both which have the y short. The next reason is, the very general rule in our language of pronouncing the vowel short in all simples which have the accent on the antepenultimate syllable, 535, 537, 503. I am not certain, however, that the best usage is not against me. Scott has the first sound, and Sheridan and Entick the second; the rest of the Dictionaries either have not the word, or do not mark the quantity of the vowels.

CYPRESS-TREE, sl'près-trêe, s. A tall straight tree; its fruit is of no use, its leaves are bitter, and the very smell and shade of it are dangerous; it is the emblem of mourning.

DAMNED, dâmmd, or dâm'néd, part. a. Hatelul, detestable.

☆ This word, in familiar language, is scarcely ever used as an adjective, and pronounced in one syllable, but by the lowest vulgar and profane; in serious speaking it ought always, like *curled*, to be pronounced in two, 362. Thus in Shakespeare—
 "But oh what *darned* minutes tells he o'er,
 "Who dotes, yet doubts—suspects, yet strongly loves."
 There is a very singular usage of this word, as a verb or participle, when it signifies the condemnation of a play; but this application of it, though authorized by the politest speakers, has an unhallowed harshness in it to pious ears, and an affectation of force to judicious ones. It is, at least, the figure called *Catachresis*.

DAMNIFICK, dâm-nî'fik, a. Procuring loss, mischievous.
To DAMNIFY, dâm'nè-fl, v. a. To endamage, to injure; to hurt, to impair.

To **DARE**, dâre, v. n.; pret. I durst; part. I have dared. To have courage for any purpose, to be adventurous.

✠ If I am not mistaken, there is a prevailing pronunciation of this word in Ireland, which makes it a perfect rhyme to *far*, *bar*, &c. That this is contrary to universal usage in England, and to the most general rule in the language, needs not to be insisted on; the only word of a similar form which is so pronounced is the first person plural of the verb *To be*. But this, it must be remembered, is an auxiliary verb; and the auxiliary verbs, being as irregular in their pronunciation as in their form, are but indifferent models by which to regulate the rest of the language.

To **DARE**, dâre, v. a. To challenge, to defy.

✠ In this sense this verb is regular.

To **DARE LARKS**, dâre'lârks, v. n. To catch them by means of a looking-glass.

To DECOMPOSE, dẻ-kẻm-pẻze', *v. a.* (*Decomposer*, French.) To dissolve or resolve a mixed body.

✧ This word is neither in Johnson's Dictionary, nor any other I have seen, but is of such frequent use as to deserve a place in all. To *Decompose* is frequently used in this sense, but improperly; for that word signifies to mix compounded things together, while to *Decompose* means to unmix or analyze things.

DECOMPOSITE, dẻ-kẻm-pẻzẻt, *a.* 154. Compounded a second time.

DECOMPOSITION, dẻ-kẻm-pẻ-zẻshủn, *s.* The act of compounding things already compounded.

DECORATOR, dèk'kô-râ-tûr, s. 521. An adorer.

DECOROUS, dè-kô'rûs, a. 503. Decent, suitable to a character.

♣ An uneducated English speaker is very apt to pronounce this word with the accent on the first syllable, according to the analogy of his own language; but a learned ear would be as much shocked at such a departure from classical propriety, as in the words *sonorous* and *canorous*, 512. When once the mere English scholar is set right in this word, he will be sure to pronounce *Decorous* with the accent on the penultimate likewise; and when he is told that this is wrong, because that syllable in the Latin word is short, he will not fail to pronounce *Indecorous* with the antepenultimate accent; but what will be his surprise when he is informed that this too is wrong, because the penultimate syllable in Latin is long?—See *Indecorous*.

TO DECORTICATE, dè-kôr'tè-kâte, v. a. The act of stripping the bark or husk.

DECRETAL, dè-krè'tâl, or dèk'rè-tâl. A book of decrees or edicts; the collection of the pope's decrees.

♣ All our lexicographers, except Dr. Johnson, place the accent on the second syllable of this word; and

this accentuation, it must be confessed, is agreeable to the best usage. But Dr. Johnson's accentuation on the first syllable is unquestionably the most agreeable to English analogy; first, because it is a trisyllable and a simple, 503; next, because it is derived from the latter Latin *Decretalis*; which, in our pronunciation of it, has an accent on the first and third syllable; and therefore, when adopted into our language, by dropping the last syllable, takes the accent on the first.—See *Academy*. That this is the general analogy of accenting words from the Latin, which drop the last syllable, is evident from the words *Decrement*, *Increment*, *Interval*, &c.

To **DEFILE**, dè-fîlè', v. n. To go off, file by file.

DEFILE, dè-fîlè', s. A narrow passage.

Some military coxcombs have endeavoured to introduce the French pronunciation of this word *Défilé*, as if written *Deff-se-lay*: others have endeavoured to bring it nearer to our own analogy, by pronouncing it in three syllables, as if written *Deff-se-le*. I am sorry to find Mr. Sheridan has adopted this pronunciation: he is followed only by Bailey and Ash; the first of whom has it both ways, and the last gives it only as an uncommon pronunciation. Dr. Johnson and the rest are decidedly for the general pronunciation, which is the same as the verb to *defile*: and if this were urged as a reason to alter the pronunciation of the substantive, it may be answered, that the remedy would be worse than the disease.—See *Bowl*.

To these observations it may be added; that if we pronounce this word exactly like the French, because it is a military term, we ought to pronounce a *File* of musqueteers, a *File* of musqueteers.

DENIER, dẻ-nẻẻ', s. A small denomination of French money.
To DENIGRATE, dẻn'ẻ-grẻtẻ, or dẻ-nẻ'ẻ-grẻtẻ, v. a. To blacken.

⚡ All our Lexicographers, except Dr. Johnson, accent this word on the second syllable. Placing the accent on the first is undoubtedly conformable to a very prevailing analogy of our language. 503. But all words derived from Latin words, retaining the same number of syllables, seem to retain the accent of their original. 503, e. Thus *To Denigrate* has the accent on the *i*, because that letter is long, and has the accent in *Denigro*; and to *Emigrate* has the accent on the first syllable, because in *Emigro* the same letter is short, and the accent is on the antepenultimate.—See *Arietate* and *Coacervate*.

In the last edition of this Dictionary I followed the general voice of all our Orthoepists, except Dr. Johnson, without recollecting that the *i* in the Latin *Denigro* might be pronounced either long or short; and that when this is the case, we generally adopt the short sound in words derived from that language: and as this short sound is more agreeable to the analogy of our own language, Dr. Johnson's accentuation seems to be preferable. 503, 545.

To DESPATCH, dè-spâtch, v. a. To send away hastily; to send out of the world, to put to death; to perform a business quickly; to conclude an affair with another.

✠ There is a general rule in pronunciation, viz. when a vowel ends a syllable immediately before the accent, that vowel has a tendency to lengthen, and is often, particularly in solemn speaking, pronounced as open as if the accent were on it.—See *To Collect*, 444.—This general tendency inclines us to divide words in such a manner as to make the vowel and the unaccented syllable; and, if the two succeeding consonants are combinable, to carry them both to that syllable which has the accent. When the *s* is thus left to finish

the syllable before the accent in *de-spair*, *de-spateh*, &c. it inclines to its open slender sound, which, being rapidly pronounced, falls into the short *i*, which is exactly its short sound, 105, 107; for when the *s* is short by being closed by a consonant, like other vowels, it goes into a different sound from the long one, 514. Thus the word *despatch*, till Dr. Johnson corrected it, was always written with an *i*; and, now it is corrected, we do not find the least difference in the pronunciation.

DESPATCH, dè-spâtsh, s. Hasty execution; express, hasty messenger or message.

DIASTYLE, dî-âs-tîle, *s.* An intercolumniation of three diameters.

✧ The reason why this word is pronounced in three syllables, and *Diastole* in four, is, that the latter is perfect Greek, διαστολή, and the former is a compound of our own, formed from *dia* and *style*, a pillar. The same reason holds good for pronouncing *Apocope*, as divided into *A-poc-o-pe*; and *Osteoscope* into *Os-te-o-scope*. And though Johnson, Ash, Buchanan, and Barclay, accent *Diastyle* on the second syllable, I have no hesitation to differ from them by placing the accent on the first.—See *Academy*.

DIATESSERON, dî-â-têss-è-rôn, *s.* An interval in musick.

DIBBLE, dîb-bl, *s.* 405. A small spade.

DICTION, dîk'shûn, *s.* Style, language, expression.

DICTIONARY, dîk'shûn-â-rê, *s.* A book containing the words of any language, a vocabulary, a word-book.

✧ A few years ago this word was universally pronounced as if written *Diary*, and a person would have been thought a pedant if he had pronounced it according to its orthography; but such has been the taste for improvement in speaking, that now a person would risk the imputation of vulgarity should he pronounce it otherwise than it is written.

To DIFFUSE, dîf'fûze', v. a. To pour out upon a plane; to spread, to scatter.
DIFFUSE, dîf'fûze', a. Scattered, widely spread; copious, not concise.
 This adjective is distinguished from the verb in the pronunciation of *s*, in the same manner as the noun *use* is from the verb *to use*, and *abuse* from *to abuse*, &c. 499. This analogy is very prevalent, and seems the reason why adjectives ending in *s* have the *s* pure, 498.

DIRUPTION, di-rup'shôn, *s.* 125. The act of bursting or breaking; the state of bursting or breaking.

DIS, dîs, or dîz, 425, 435. An inseparable particle used in composition, implying commonly a privative or negative signification of the word to which it is joined; as, to *arm*, to *disarm*; to *join*, to *disjoin*; &c.

When the accent, either primary or secondary, is on this inseparable preposition, the *s* is always sharp and hissing; but when the accent is on the second syllable the *s* will be either hissing or buzzing, according to the nature of the consecutive letter. That is, if a sharp mute, as *p, t, &c.* succeed, the preceding *s* must be pronounced sharp and hissing, as *dispose, distaste, &c.*; but if a flat mute, as *b, d, &c.* or a vowel or a liquid, begin the next syllable, the foregoing *s* must be sounded like *z*, as *disburse, disdain, &c.*; but if the secondary accent be on this inseparable preposition, 523, as in *disbelieve, &c.* the *s* retains its pure hissing sound. *Dismal*, which seems to be an objection to the first part of this rule, is in reality a confirmation of it; for the first syllable in this word is not a preposition, but a contraction of the Latin word *dies*; and *dismal* is evidently derived from *dies malus*. For want of this clue Mr. Sheridan has given the *s* pure to *disgrace, disguise, &c.*

DISABILITY, dîs-â-bîl'ê-tê, *s.* 454. Want of power to do any thing, weakness; want of proper qualifications for any purpose, legal impediment.

¶ This word, and its companion *Concrete*, one would have supposed should have the same accentuation in all our Pronouncing Dictionaries, and yet scarcely any two words are more differently accented. The accent is placed on the last syllable of *Concrete* by Dr. Ash, Buchanan, Perry, Entick, and Bailey; and on the first by Sheridan, Dr. Johnson, Smith, W. Johnston, and Dr. Kenrick. Scott accents the last syllable of this word when an adjective, and the first when a substantive; a distinction very agreeable to analogy, 494: but Entick, directly contrary to this analogy, reverses this order. *Discrete* is always used as an adjective, but has scarcely less diversity of accentuation than *Concrete*. Dr. Johnson, Dr. Kenrick, Mr. Nares, Mr. Scott, Perry, and Entick, accent it on the last syllable; and Dr. Ash, Mr. Sheridan, and Bailey, on the first. When I wrote the Rhyming Dictionary I accented both these words on the first syllable; but this accentuation, I imagine, arose from contrasting them, which often places the accent on the opposing parts, as in *internal* and *external*; but, upon maturer consideration, I apprehend the accent ought to be placed on the first syllable of *Concrete* when a substantive, and on the last of both words when adjectives.

Dr. Johnson, Dr. Ash, Dr. Kenrick, W. Johnson, Mr. Smith, Perry, and Bailey, are for the second pronunciation of this word; and Mr. Sheridan, Mr. Nares, Buchanan, and Entick, for the first; and this, notwithstanding the majority of suffrages against it, is, in my opinion, decidedly most agreeable to the best usage. It were undoubtedly to be wished that words of this form preserved the accent of the verb to which they correspond; but this correspondence we find entirely set aside in *lamentable*, *comparable*, *admirable*, and many others with which *Disputable* must certainly class. Mr. Scott gives both modes of accenting this word; but by his placing the word with the accent on the first syllable first, we may presume he prefers this pronunciation.—See *Indisputable*.

DISSOLVABLE, dîz-zôl'vâ-bl, a. Capable of dissolution.

DISSOLUBLE, dîz-zô-lû-bl, a. Capable of separation of one part from another.

The accent is invariably placed on the first syllable of this word, as it comes from the Latin *dissolubilis*, which seems to confirm the observation on the word *Incomparable*. *Dissolvable* is a compound of our own, and therefore retains the accent of the verb from which it is formed. 301.—See *Academy*, *Disputable*, and *Resolvable*.

DISSOLUBILITY, dîs-pôl-lû-blî'ê-tê, s. Liableness to suffer a disunion of parts.

To DISSOLVE, dîz-zôlv', v. a. 424. To destroy the form of any thing by disuniting the parts; to loose, to break the ties of any thing; to break up assemblies; to break an enchantment; to be relaxed by pleasure.

DISSOLVER, dîz-zôl'vûr, s. That which has the power of dissolving.

DISSOLVIBLE, dîz-zôl've-bl, a. Liable to perish by dissolution.

If this word and its etymon must be written *Dissoluble* and *Soluble*, and not *Dissolvable* and *Solvable*, because *Solve* and its compounds in Latin are of the third conjugation, and form their personal and temporal variations by assuming *i*, there is no reason why *Resolvable* should be written with *a*, as it stands in Johnson, who, notwithstanding he writes *Dissoluble* here with an *i*, yet, in his explanation of the etymology of *Indissoluble*, tells us it is formed from *ta*, and *Dissoluble* with an *a*.

DISSOLUTE, dîs-sô-lûte, a. Loose, wanton, debauched.

DISSOLUTELY, dîs-sô-lûte-lê, ad. Loosely, in debauchery.

To **DISVALUE**, dîz-vâl'û, v. a. To undervalue.

DISUNION, dîs-û'nê-ûn, s. Separation, disjunction; breach of concord.

Some curious Inspector may, perhaps, wonder why I have given *disunion*, *disuse*, &c. the pure *s*, and not the *z*, since I have laid it down as a general rule, under the prepositive particle *Dis*, that the *s* immediately before the accent, when a vowel begins the next syllable, is always flat; but it must be remembered that long *u* in these words is not a pure vowel, &: not that I think the *z*, in this case, would be palpably wrong; for, though long *u* may be called a semi-consonant, it is sufficiently vocal to make the *s*, or *z*, sound, in these words, perfectly indifferent.—See *Dis*.

To **DIVERTISE**, *dè-vér'tíz*, *v. n.* To sport, to amuse, to divert.

Dr. Johnson seems to have accented this word on the last syllable, in compliance with the verb *advertise*, which is exactly of the same form, and therefore he thought ought to be accented in the same manner. But by making *divertise* conform in accentuation to *advertise* we make the general rule stoop to the exception, rather than the exception to the general rule. For in all verbs of three or four syllables, where the termination *ise* is only the verbal formation, and does not belong to the root, we never find the accent on it; as *criticise*, *exercise*, *epitomise*, &c. —See *Advertisement*.

DOLL, dól, *s.* A little girl's puppet.

✧ This word ought to be written with one *l* only : for the reasons, see Principles, 406.

DOLLAR, dól'lúr, *s.* 418. A Dutch and German coin of different value, from about two shillings and sixpence to four and sixpence.

DOLORIFICK, dól-b-rí'fík, *a.* 530. That which causes grief or pain.

DOLOROUS, dól'b-rús, *a.* 503. Sorrowful, doleful, dismal ; painful.

DOLOUR, dól'úr, *s.* 314. Grief, sorrow ; lamentation, complaint.

✧ Mr. Nares, W. Johnston, Buchanan, Elphinston, and Entick, make the first *o* in this word short, as in *Dollar* ; and Mr. Sheridan, Mr. Scott, Mr. Perry, and Dr. Ash, long, as in *Donor* : the latter is, in my opinion, the most analogical. 542.

DOLPHIN, dól'fín, *s.* A fish.

DOLT, dolt, *s.* A heavy stupid fellow.

DOLTISH, dolt'ish, *a.* Stupid, blockish.

DOMAIN, dō-māne', *s.* Dominion, empire ; possession, estate.

DOME, dōme, *s.* A building, a house, a fabrick ; an hemispherical arch, a cupola.

✧ There is a strong propensity, particularly in the people of London, to pronounce this word so as to rhyme with room ; but this is contrary to all our Dictionaries which give the sound of the vowels, and ought not to be suffered to add to the already too numerous exceptions to the general sound of *o*.

DOMESTICAL, dō-mēs'tè-kál, } *a.* Belong-
DOMESTICK, dō-mēs'tík, } ing to the

house, not relating to things publick ; private, not open ; inhabiting the house, not wild ; not foreign, intestine.

✧ Dr. Johnson observes, that of English, as of all living tongues, there is a double pronunciation, one cursory and colloquial, the other regular and solemn. He gives no instances of this double pronunciation ; and it is at first a little difficult to conceive what are the words in which this observation is verified. Solemn speaking seems to have no effect upon the accented vowels ; for, let us pronounce them as rapidly or as solemnly as we will, we certainly do not make any change in the quantity or quality of them. The only part of the language in which Dr. Johnson's observation seems true is some of the vowels when unaccented ; and of these the *e* seems to undergo the greatest change in consequence of solemnity or rapidity. Thus the *e* in *obey* is, in solemn speaking, pronounced as long and full as in the first syllable of *open* ; but, in rapid and cursory speaking, as short as the *o* in *oven*. This latter sound, however, must not be given as a model ; for, let the pronunciation be ever so rapid and familiar, there is a certain elegance in giving the *e*, in this situation, its full, open sound, approaching to that which it has when under the accent ; and though nothing but a delicacy of ear will direct us to the degree of openness with which we must pronounce the unaccented *e* in *Domestick*, *Docility*, *Potential*, *Proceed*, *Monastick*, *Monastery*, &c. we may be assured that these vowels are exactly under the same predicament ; and can never be pronounced short and shut, as if written *Domestick*, *Dossility*, *Pottential*, &c. without hurting the ears of every good speaker, and overturning the first principles of pronunciation. 547, 548.

The same observations seem to hold good of the unaccented *o* in every word ending in *ory* ; as *transitory*, *dilatary*, &c. The *o* in rapid speaking certainly goes into short *u*, as if written *transitory*, *dilatary*, &c. ; but in solemn pronunciation approaches to the accented open sound of *e* in *glory*, *story*, &c. ; but as the *o* in these terminations never admits of being pronounced quite so open as when ending a syllable before the accent, I have, like Mr. Sheridan, given it the colloquial sound of short *u*. 512.—See *Command*.

TO DOMESTICATE, dō-mēs'tè-kāte, *v. a.*
To make domestick, to withdraw from the publick.

DOMINANT, dóm'è-nānt, *a.* Predominant, presiding, ascendant.

DONATIVE, dōn'ā-tív, *s.* 503. A gift, a largess, a present ; in law, a benefice, merely given and collated by the patron to a man, without institution or induction.

✧ I have differed from Mr. Sheridan, Mr. Scott, W. Johnston, and Entick, in the quantity of the vowel in the first syllable of this word, not only as I think it contrary to the best usage, but as it is at variance with the analogy of words in this termination. Let not the long quantity of the Latin *o* in *Donatio* be pleaded in favour of my opponents ; for (waving the utter uncertainty of arguing from the Latin quantity to ours) this would prove that the *a* and *e* in the first syllable of *Sanative* and *Lentive* ought to be long likewise. Dr. Kenrick, Dr. Ash, and Mr. Perry, are on my side.

DONE, dón. Part. pass. of the verb *Do*.

DONE, dón, *interject.* The word by which a wager is concluded ; when a wager is offered, he that accepts says it is Done.

DONOR, dō'nór, *s.* A giver, a bestower.

✎ The last mode of pronouncing this word is that which was universally current till within these few years; but the first has insensibly stolen into use, as we may observe from the several Dictionaries which have adopted it. Mr. Sheridan, W. Johnston, Mr. Nares, and, as far as we can judge by the position of the accent, Entick and Bailey, pronounce it with the first *a* long; and Dr. Kenrick, Buchanan, and, if we may guess at Dr. Ash by his accent, with the same letter short. Mr. Scott gives both ways; but, by placing the sound of the long *a* first, seems to prefer it. The authorities are certainly on the side I have adopted; but I wish also to establish it by analogy.

And first it may be observed, that, if any argument can be drawn from the Latin quantity to the English, it is certainly in favour of the first pronunciation: for in a Latin word of two syllables, where a consonant comes between two vowels, the consonant always goes to the last, and the first vowel is pronounced long, without the least regard to the quantity. Thus *Crîtes*, the philosopher, and *crîtes*, a hurdle; *dêcus*, honour, and *dêdo*, to give; *ôvo*, to triumph, and *ôvum*, an egg; *Nûma*, the legislator, and *Nûmen*, the divinity, have the first vowels always sounded long by an English speaker, although in the Latin the first vowel in the first word of each of these pairs is short. From this universal manner of pronouncing Latin words, though contrary to Latin quantity, it is no wonder, when we adopt words from that language without any alteration, we should pronounce them in the same manner; and it may be fairly concluded that this uniform pronunciation of the Latin arises from the genius of our own tongue; which always inclines us to lengthen the accented vowel before a single consonant in words of two syllables; otherwise, what reason can we assign for the rule laid down by our ancestors for doubling the consonant in verbs, verbal nouns, and participles, where a single vowel was preceded by a single consonant? But an affectation of Latinity seems to have disturbed the general pronunciation of our own language, as much as our own pronunciation has disturbed the Latin quantity: for, though we neglect the quantity of Latin dissyllables, when we are pronouncing that language, yet in dissyllables of our own, formed from the Latin, and anglicised, we seem to be, in some measure, guided by the Latin quantity. To what else can we attribute the short sound of the first vowel in *magick*, *placid*, *tepid*, *vigil*, *novel*, &c.? and to what but the genuine force of vernacular pronunciation can we ascribe the long sound of *u* in this situation, let the quantity of the Latin original be what it will? Thus, though *epick*, *topick*, *cynick*, and *tonick*, have the first vowel short, *lunick*, *stupid*, *Cupid*, *humid*, &c. have the *u* long, though always short in the Latin words from whence they are derived. But however this may be in words anglicised from the Latin, and ending in a consonant, perhaps in nothing is our pronunciation more regular than in the quantity of the first vowel in a word of two syllables ending with a vowel: in this case the first vowel is invariably long; and why the word in question should be the only exception cannot easily be accounted for. We have no words originally English of this form; but those we adopt from other languages sufficiently show the analogy of pronunciation: thus *Gola*, *Coma*, *China*, *Era*, *Strata*, *Quota*, *Fico*, *Dado*, *Sago*, *Bravo*, *Tyro*, *Hero*, *Negro*, &c. &c. have all the first syllable long; and why *Drama* should not fall into the same analogy I cannot conceive. A corroboration of this is the pronunciation of *Lama*, *Brama*, *Zama*, and *Zara*, and all proper names of the same form from the Greek and Latin, as *Cato*, *Plato*, *Strato*, *Crito*, *Draco*, &c.; and I think it may be with confidence asserted that an Englishman, who had never heard the word *Drama* pronounced, would naturally place the accent upon the first syllable, and pronounce the vowel in that syllable long and slender. 544.

DRIZZLY, drîz'zl-ê, *a.* Shedding small rain.

DROLL, drôle, *s.* 406. One whose business is to raise mirth by petty tricks, a jester, a huffoon; a farce, something exhibited to raise mirth.

When this word is used to signify a farce, it is pronounced so as to rhyme with *doll*, *loll*, &c. If this wanted proof, we might quote Swift, who was too scrupulous to rhyme it with *extol*, if it had not been so pronounced:

"Some as justly fame extols.

"For lofty lines in Smithfield drolls."

DROLL, drôle, *a.* Comic, farcical, merry.

To DROLL, drôle, *v. n.* To jest, to play the buffoon.

DROLLERY, drô'lûr-ê, *s.* Idle jokes; buffoonery.

DUG, dūg. Pret. and part. pass. of Dig.

DUKE, dūke, s. 376. One of the highest order of nobility in England.

There is a slight deviation often heard in the pronunciation of this word, as if written *Dook*; but this borders on vulgarity; the true sound of the *u* must be carefully preserved, as if written *Dewk*. There is another impropriety in pronouncing this word, as if written *Jook*; this is not so vulgar as the former, and arises from an ignorance of the influence of accent.—See Principles, 462.

DUKEDOM, dūke'dūm, s. The possession of a duke; the title or quality of duke.

DULBRAINED, dūl'brand, a. Stupid, doltish, foolish.

DUNGHIL, dūng'hîl, s. A heap or accumulation of dung; any mean or vile abode; any situation of meanness; a term of reproach for a man meanly born.

Leaving out one *l* in the last syllable of this word is, perhaps, agreeable to the laws printers have laid down to themselves; but there is no eye that is not hurt at the different appearance of *hill* when alone, and when joined to another word. That double letters may be, in some cases, spared, is not to be denied; but where either the sense or sound is endangered by the omission of a letter, there to spare the letter is to injure the language. A secret conviction of this has made all our lexicographers waver greatly in spelling these words, as may be seen at large in the Preliminary Observations to the Rhyming Dictionary.

DUNGHIL, dūng'hîl, a. 406. Sprung from the dunghil, mean, low.

DUNGY, dūng'ê, a. 409. Full of dung, mean, vile, base.

DYING, dī'īng, the participle of Die. Expiring, giving up the ghost; tinging, giving a new colour.
DYNASTY, dī-nās'tè, or dīn'ās-tè, *s.* Government, sovereignty.

☞ All our Orthoëpists, except Mr. Elphinstone and Entick, adopt the first pronunciation; but analogy is, in my opinion, clearly for the last. 503.

DYSCRASy, dīs'krā-sè, *s.* An unequal mixture of elements in the blood or nervous juice, a distemperature.
DYSENTERY, dīs'sèn-tèr-è, *s.* A looseness, wherein very ill humours flow off by stool, and are also sometimes attended with blood.

☞ Dr. Johnson, Dr. Ash, Dr. Kenrick, and Buchanan, accent this word on the second syllable; and Mr. Sheridan, Mr. Nares, Mr. Scott, W. Johnston, Perry, Entick, and Bailey, on the first. That this is in possession of the best usage I have not the least doubt; and that it is agreeable to the analogy of accenting words from the learned languages, which we naturalise by dropping a syllable, is evident from the numerous class of words of the same kind.—See *Academy*, *Incomparable*, &c. A collateral proof too that this is the true pronunciation is, that *Mesentery*, a word of the same form, is by all the above-mentioned Lexicographers who have the word, except Bailey, accented on the first syllable.

DYSPEPSY, dīs'pép-sè, *s.* A difficulty of digestion.
DYSPHONY, dīs'fò-nè, *s.* A difficulty in speaking.
DYSPNOEA, dīsp-nè'ā, *s.* 92. A difficulty of breathing.
DYSURY, dīzh'ū-rè, *s.* 450, 451, 452. A difficulty in making urine.

☞ The *s* in this word has the flat aspiration, for the same reason as the *s* in *Treasury*.—See *Disunion*.

- EARNESTLY**, êr'nêst-lê, *ad.* Warmly, affectionately, zealously, importunately; eagerly, desirously.

EARNESTNESS, êr'nêst-nês, *s.* Eagerness, warmth, vehemence; solicitude.

EARTH, êrth, *s.* 234, 237. The element distinct from air, fire, or water; the terraqueous globe, the world.

✚ This word is liable to a coarse vulgar pronunciation, as if written *Urth*; there is, indeed, but a delicate difference between this and the true sound, but quite sufficient to distinguish a common from a polite speaker.

To **EARTH**, êrth, *v. a.* To hide in earth; to cover with earth.

To **EARTH**, êrth, *v. n.* To retire under ground.

EARTHBOARD, êrth'bôrd, *s.* The board of the plough that shakes off the earth.

ECCHYMOSIS, êk-kê-mô'sîs, *s.* 520. Livid spots or blotches in the skin.

ECCLESIASTICAL, êk-klê-zhê-âs'tê-kâl, }
ECCLESIASTICK, êk-klê-zhê-âs'tîk, }

a. Relating to the church, not civil.

ECCLESIASTICK, êk-klê-zhê-âs'tîk, *s.* A person dedicated to the ministries of religion.

✧ I have given these words the flat *s* aspirated, as I am convinced it is quite agreeable to the analogy of pronunciation; for the third syllable coming after the secondary accent is exactly under the same predicament as the penultimate syllable in *Ambrosial*, *Ephesian*, *Geodesian*, &c.—See Principles, No. 451.

" And pulpit drum ecclesiastick

" Was beat with fist instead of a stick.—*Hudibras*.

ECHINUS, ê-kî'nûs, *s.* 503. A hedgehog; a shell-fish set with prickles; with botanists, the prickly head of any plant; in architecture, a member or ornament taking its name from the roughness of the carving.

ECHO, êk'kô, *s.* The return or repercussion of any sound; the sound returned.

To **ECHO**, êk'kô, *v. n.* To resound, to give the repercussion of a voice; to be sounded back.

To **ECHO**, êk'kô, *v. a.* To send back a voice.

ECLAIRCISSEMENT, êk-klâre'sîz-mênt, *s.* Explanation, the act of clearing up an affair.

✧ This word, though long in use, is not yet naturalized. Every syllable but the last may be perfectly pronounced by an Englishman who does not speak French; but this syllable having a nasal vowel, not followed by hard *c* or *g*, (see *Encore*,) is an insuperable difficulty: the nearest sound to it would perhaps be to make it rhyme with *long* and *strong*. But a speaker would, perhaps, risk less by pronouncing it like an English word at once, than to imitate the French sound awkwardly.

ECLAT, ê-klâw', *s.* 472. French. Splendour, show, lustre.

ECLECTICK, êk-lêk'tîk, *a.* Selecting, choosing at will.

ECLIPSE, ê-klîps', *s.* An obscuration of the luminaries of heaven; darkness, obscuration.

EDIBLE, êd'ê-bl, *a.* 503. Fit to be eaten.

EDICT, ê'dikt, *s.* A proclamation of command or prohibition.

✠ Good speakers seem divided about the quantity of the vowel in the first syllable of this word. Kenrick, Perry, and Buchanan, make it short; and Sheridan, Nares, Entick, Ash, Scott, and W. Johnston, long. This majority has induced me to make it long likewise, and not any length of the same letter in the Latin *edictum*; for though the Latin accent is frequently a rule for the placing of ours, the quantity of Latin has almost as little to do with our quantity as it has with that of the Chinese or Hebrew.—See Introduction to Rhyming Dictionary.

EDIFICATION, êd-ê-fê-câ'shûn, *s.* The act of building up man in the faith, improvement in holiness; improvement, instruction.

EDIFICE, êd'ê-fîs, *s.* 142. A fabrick, a building.

EDIFIER, êd'ê-fî-ûr, *s.* One that improves or instructs another.

To EDIFY, êd'ê-fî, *v. a.* To build; to instruct, to improve; to teach, to persuade.

EDITION, ê-dîsh'ûn, *s.* Publication of any thing, particularly of a book; republication, with revisal.

EDITOR, êd'ê-tûr, *s.* 166. Publisher, he that revises or prepares any work for publication.

To EDUCATE, êd'jû-kâte, *v. a.* 91. To breed, to bring up.

✠ This pronunciation may seem odd to those who are not acquainted with the nature of the letters; but it is not only the most polite, but, in reality, the most agreeable to rule.—See Principles, No. 294, 376.

EDUCATION, êd-jû-kâ'shûn, *s.* Formation of manners in youth.

To EDUCE, ê-dûse', *v. a.* To bring out, to extract.

EDUCTION, ê-dûk'shûn, *s.* The act of bringing any thing into view.

To EDULCORATE, ê-dûl'kô-râte, *v. a.* To sweeten.

EDULCORATION, ê-dûl-kô-râ'shûn, *s.* The act of sweetening.

To EEK, êek, *v. a.*—See *Eke*. To make bigger by the addition of another piece; to supply any deficiency.

EEL, êêl, *s.* A serpentine slimy fish, that lurks in mud.

E'EN, êên, *ad.* Contracted from Even.

EFFABLE, êffâ-bl, *a.* 405. Expressive, utterable.

To EFFACE, êf-fâse', *v. a.* To destroy any form painted or carved; to blot out; to destroy, to wear away.

✠ The strong tendency of the vowel to open, when it terminates a syllable, immediately before the accent, makes us frequently hear the *e* in these words, when the accent is on the second syllable, pronounced as open as if there were but one *f*. The same may be observed of the *o* in *occasion*, *offence*, *official*, &c. This is certainly a deviation from rule; but it is so general,

EFF

and so agreeable to the ear, as to be a distinguishing mark of elegant pronunciation.

EFFECT, êf-fêkt', *s.* 98. That which is produced by an operating cause; consequence, event; reality, not mere appearance; in the plural, goods, moveables.

To EFFECT, êf-fêkt', *v. a.* To bring to pass, to attempt with success, to achieve; to produce as a cause.

EGLANTINE, ɛg-lân-tîn, *s.* 159. A species of rose; sweetbriar.

EGOTISM, ɛ-gô-tîzm, *s.* Too frequent mention of a man's self.

✎ Contrary to my own judgement I have made the *e* in the first syllable of this word long, because I see it is uniformly so marked by all the Dictionaries I have seen: but I am much mistaken if Analogy does not in time recover her rights, and shorten this vowel by joining it to the *g*, as if written *eg-o-tism*; not because this vowel is short in the Latin *ego*, (for the English quantity has very little to do with the Latin,) but because the word may be looked upon as a simple in our language, and the accent is on the antepenultimate syllable. Mr. Elphinston, whose opinion in this point is of the greatest weight, makes the first vowel short.—See Principles, No. 511, 530, 536.

EGOTIST, ɛ-gô-tîst, *s.* One that is always talking of himself.

To EGOTIZE, ɛ-gô-tîzo, *v. n.* To talk much of one's self.

To EJACULATE, ɛ-jâk'û-lâte, *v. a.* To throw, to shoot out.

EJACULATION, ɛ-jâk'û-lâ'shûn, *s.* A short prayer darted out occasionally; the act of darting or throwing out.

EJACULATORY, ɛ-jâk'û-lâ-tûr-ê, *a.* Suddenly darted out, sudden, hasty.

To EJECT, ɛ-jêkt', *v. a.* To throw out, to cast forth, to avoid; to throw out or expel from an office or possession.

EJECTION, ɛ-jêk'shûn, *s.* The act of casting out, expulsion.

EJECTMENT, ɛ-jêkt'mênt, *s.* A legal writ by which any inhabitant of a house, or tenant of an estate, is commanded to depart.

EIGHT, ɛyt, *a.* Twice four. A word of number.

✎ The genuine sound of the diphthong in this word and its compounds does not seem to be that of the first sound of *a*, which Mr. Sheridan has given it under the second sound of *e*, but a combination of the first sound of *a* and *e* pronounced as closely together as possible. But as this distinction is very delicate, and may not be more easily apprehended than that between *meet* and *meat*, 246, I have given the diphthong the same sound as Mr. Sheridan has done.

EIGHTH, ɛytt̃h, *a.* Next in order to the seventh.

✎ This word, as it is written, by no means conveys the sound annexed to it in speaking: for the abstract termination *th* being a perfect lisp, is quite distinct from the final *t* of *eight*, and can never coalesce with it without depriving the word of one of its letters. The only sound conveyed by the letter of this word, as now spelt, is as if written *ayth*: and if we would spell this sound as we pronounce it, and as the analogy of formation certainly requires, we must necessarily write *ɛightth*. This would have an unusual appearance to the eye; and this would be a sufficient reason with the multitude for opposing it: but men of sense ought to consider that the credit of the language is concerned in rectifying this radical fault in its orthography.

EIGHTEEN, ɛy'têen, *a.* Twice nine.

EIGHTEENTH, ɛy'têenth, *a.* The next in order to the seventeenth.

EIGHTFOLD, ɛytfôld, *a.* Eight times the number or quantity.

EIGHTHLY, ɛytt̃hlê, *ad.* In the eighth place.

ELDEST, êl'dêst, a. The oldest that has the right of primogeniture; that has lived most years.

ELECAMPANE, êl-ê-kâm-pânê', s. A plant named also starwort.

To ELECT, ê-lêkt', v. a. To choose for any office or use; in theology, to select as an object of eternal mercy.

ELECT, ê-lêkt', a. Chosen, taken by preference from among others; chosen to an office, not yet in possession; chosen as an object of eternal mercy.

ELECTARY, ê-lêk'tê-rê, s. A form of medicine made of conserves and powders, of the consistence of honey.

✱ This is an alteration of the word *Electuary*, which has taken place within these few years; and, it must be owned, is an alteration for the better; for, as there is no *s* in the Latin *Electarium*, there can be no reason for inserting it in our English word, which is derived from it.

ELECTION, ê-lêk'shôn, s. The act of choosing one or more from a greater number; the power of choice; voluntary preference; the determination of God, by which any were selected for eternal life; the ceremony of a publick choice.

ELECTIVE, ê-lêk'tîv, a. Exerting the power of choice.

ELECTIVELY, ê-lêk'tîv-lê, ad. By choice, with preference of one to another.

netism; produced by an electric body.

ELECTRICITY, ê-lêk-trîs'ê-tê, s. A property in bodies, whereby, when rubbed, they draw substances, and emit fire, may be filled with such a quantity of the electrical vapour, as, if discharged at once upon the human body, would endanger life.

ELECTUARY, ê-lêk'tshû-âr-ê, s. — See *Electary*.

ELEEMOSYNARY, êl-ê-môx'ê-nâr-ê, a. Living upon alms, depending upon charity; given in charity.

ELEGANCE, êl'ê-gânse, } s. Beauty of
ELEGANCY, êl'ê-gân-sê, } heart, beauty
without grandeur.

ELEGANT, êl'ê-gânt, a. Pleasing with minuter beauties; nice, not coarse, not gross.

ELEGANTLY, êl'ê-gânt-lê, ad. In such a manner as to please without elevation

ELEGIACK, êl-ê-jl'âk, a. Used in elegies; mournful, sorrowful.

✱ Our own analogy would lead us to place the accent upon the second syllable of this word; but its derivation from the Latin *elegiacus*, and the Greek *ελεγιακός*, (in both which the antepenultimate is long,) obliges us, under pain of appearing grossly illiterate, to place the accent on the same letter. But in

nh 107, nh 163—tập 171, tập 172, tập 173—nh 299—phần 313—chín 466, tris 409.

may be observed, that we have scarcely an instance in the whole language of adopting a Latin or Greek word, and curtailing it of a syllable, without removing the accent higher on the English word.—See *Academy*.

ELEGY, ɛl-ɛ-jɛ, *s.* A mournful song; a funeral song; a short poem, without points or turns.

ELEMENT, ɛl-ɛ-mɛnt, *s.* The first or constituent principle of any thing; the four elements, usually so called, are earth, air, fire, water, of which our world is composed; the proper habitation or sphere of any thing; an ingredient, a constituent part; the letters of any language; the lowest or first rudiments of literature or science.

ELEMENTAL, ɛl-ɛ-mɛn'tɔl, *a.* Produced by some of the four elements; arising from first principles.

ELEMENTARITY, ɛl-ɛ-mɛn-tɔr'ɛ-tɛ, *s.* Simplicity of nature, absence of composition.

ELEMENTARY, ɛl-ɛ-mɛn'tɔr-ɛ, *a.* Uncompounded, having only one principle.

ELEPHANT, ɛl-ɛ-fɔnt, *s.* The largest of all quadrupeds, of whose sagacity, faithfulness, and understanding, many surprising relations are given. This animal feeds on hay, herbs, and pulse; he is naturally very gentle; he is supplied with a trunk, or long hollow cartilage, which serves him for hands; his teeth are the ivory so well known in Europe.—Ivory, the teeth of Elephants.

ELEPHANTIASIS, ɛl-ɛ-fɔnt-tɔr'sis, *s.* A species of leprosy so called from incrustations like those on the hide of an elephant.

ELEPHANTINE, ɛl-ɛ-fɔnt'in, *a.* 140. Pertaining to the elephant.

To ELEVATE, ɛl-ɛ-vɛtɛ, *v. a.* 91. To raise up aloft; to exalt, to dignify; to raise the mind with great conceptions; to elate the mind with vicious pride, to lessen by destruction.

ELEVATE, ɛl-ɛ-vɛtɛ, *part. a.* 91. Exalted, raised aloft.

ELIXIR, ɛ-lɛk'sɔr, *s.* 418. A medicine made by strong infusion, where the ingredients are almost dissolved in the menstruum; the liquor with which chymists transmute metals; the extract or quintessence of any thing; any cordial.

There is a corrupt pronunciation of this word, even among the upper ranks of people, which changes the *i* in the second syllable into *e*, as if written *Elaxir*. The *i* is never pronounced in this manner when the accent is on it, except when followed by *r* and another consonant, 108.

ELK, ɛlk, *s.* The elk is a large and stately animal of the stag kind.

ELL, ɛl, *s.* A measure containing a yard and a quarter.

ELLIPSIS, ɛl-lip'sis, *s.*—See *Efface*. A figure of rhetoric, by which something is left out; in geometry, an oval figure generated from the section of a cone, by a plane cutting both sides of the cone, but not parallel to the base, and meeting with the base when produced.

ELLIPTICAL, ɛl-lip'tɛ-kɔl, } *a.* Having the form of an
ELLIPTICK, ɛl-lip'tik, } ellipse.

ELM, ɛlm, *s.* The name of a tree.

ELOCUTION, ɛl-ɔ-kɔ'shɔn, *s.* The power of fluent speech; eloquence, flow of language; the power of expression or diction.

This word originally, both among the Greeks and Romans, signified the choice and order of words; and Dryden and other moderns have used it in the same sense; it is now scarcely ever used but to signify pronunciation. The French seem to have been the first who used it in this sense; Addison has followed them; and as it is perfectly agreeable to the Latin original *e* and *loquer*, and serves to distinguish oratorical pronunciation from pronunciation in general, the alteration is not without its use.

ELOGY, ɛl'ɔ jɛ, *s.* 503. Praise, panegyric.

To ELONGATE, ɛ-lɔng'gɛtɛ, *v. a.* To lengthen, to draw out.

To ELONGATE, ɛ-lɔng'gɛtɛ, *v. n.* To go off to a distance from any thing.

To EMBALM, êm-bâm', *v. a.* 403. To im-

pregnate a body with aromatics, that it may resist putrefaction.

The affinity between the long e and the short ê, when immediately followed by the accent, has been observed under the word *Despatch*. But this affinity is no where more remarkable than in those words where the e is followed by m or n. This has induced Mr. Sheridan to spell *embrace*, *endow*, &c. *imbrace*, *indow*, &c. and this spelling may, perhaps, sufficiently convey the caryory or colloquial pronunciation; but my observation greatly falls me if correct public speaking does not preserve the e in its true sound, when followed by m or n. The difference is delicate, but, in my opinion, real.

EMBALMER, êm-bâm'êr, *s.* 409. One that practises the art of embalming and preserving bodies.

To EMBAR, êm-bâr', *v. a.* To shut, to enclose; to stop, to hinder by prohibition, to block up.

EMPIRE, êm-pîr-e, s. 140. Imperial power, supreme dominion; the region over which dominion is extended; command over any thing.

✎ I have differed from Mr. Sheridan and Buchanan in the pronunciation of the last syllable of this word, as I think the long sound of *i* is more agreeable to the ear, as well as to the best usage, though I confess not so analogical as the short *i*. Dr. Kenrick, Scott, W. Johnston, and Perry, pronounce the *i* long as I have done.—See *Umpire*.

EMPIRICK, êm-pê-rîk, or êm-pîr'îk, s. A trier or experimenter, such persons as venture upon observation only; a quack.

✎ Dr. Johnson tells us the first accentuation is adopted by Dryden, and the last by Milton; and this he prefers. There is indeed a strong analogy for the last, as the word ends in *ic*, 509; but this analogy is sometimes violated in favour of the substantives, as in *Lunatic*, *Heretic*, &c.; and that this is the case in the word in question may be gathered from the majority of votes in its favour; for though Dr. Johnson, Mr. Sheridan, Mr. Nares, and W. Johnston, are for the latter; Dr. Kenrick, Dr. Ash, Mr. Scott, Mr. Perry, Buchanan, Entick, Bailey, and Barclay, are for the former. This word classes too with those that almost always adopt the antepenultimate accent, 503; but the adjective has more properly the accent on the second syllable.

EMPIRICAL, êm-pîr'ê-kâl, } a. Versed in
EMPIRICK, êm-pîr'îk, } experiments, practised only by rote.

EMPIRICALLY, êm-pîr'ê-kâl-lê, ad. Experimentally, without rational grounds; in the manner of a quack.

EMPIRICISM, êm-pîr'ê-sîzm, s. Dependence on experience without knowledge or art, quackery.

EMPLASTER, êm-plâs'tûr, s. An application to a sore of an oleaginous or viscous substance spread upon cloth.

To **EMPLASTER**, êm-plâs'tûr, v. a. To cover with a plaster.

EMPLASTICK, êm-plâs'tîk, a. Viscous, glutinous.

To **EMPLEAD**, êm-plêd-e', v. a. To indict, to prefer a charge against.

To **EMPLOY**, êm-plôe', v. a. To busy, to

keep at work, to exercise; to use as an instrument; to commission, to intrust with the management of any affairs; to fill up with business, or to spend in business.

EMPLOY, êm-plôe', s. Business, object of industry; publick office.

EMPLOYABLE, êm-plôe'-â-bl, a. Capable to be used, proper for use.

EMPLOYER, êm-plôe'ûr, s. One that uses, or causes to be used.

EMPLOYMENT, êm-plôe'mênt, s. Business, object of industry; the state of being employed; office, post, of business.

To **EMPOISON**, êm-pôe'zn, v. a. To destroy by poison, to destroy by venomous food or drugs; to envenom.

EMPOISONER, êm-pôe'zn-ûr, s. One who destroys another by poison.

EMPOISONMENT, êm-pôe'zn-mênt, s. The practice of destroying by poison.

EMPORETICK, êm-pô-rêt'îk, a. That which is used at markets, or in merchandise.

EMPORIUM, êm-pô-rê-ûm, s. A place of merchandise, a commercial city.

To **EMPOVERISH**, êm-pôv'êr-îsh, v. a. To make poor; to lessen fertility.

✎ This word, before Dr. Johnson's Dictionary was published, was always written *impoverish*; nor since he has reformed the orthography do we find any considerable difference in the sound of the first syllable, except in solemn speaking; in this case we must undoubtedly preserve the *s* in its true sound.—See *Am-balm*.

EMPOVERISHER, êm-pôv'êr-îsh-ûr, s. One that makes others poor; that which impairs fertility.

EMPOVERISHMENT, êm-pôv'êr-îsh-mênt, s. Diminution, waste.

To **EMPOWER**, êm-pôu'ûr, v. a. To authorize, to commission; to enable.

EMPRESS, êm-prês, s. The queen of an emperor; a female invested with imperial dignity, a female sovereign; properly *Emperess*.

EMPRISE, êm-prîze, s. Attempt of danger, undertaking of hazard, enterprise.

EMPTIER, êm-tê-ûr, s. One that empties, one that makes void.

EMPTINESS, êm-tê-nês, s. The state of being empty; a void space, vacuity; unsatisfactoriness, inability to fill the desires; vacuity of head, want of knowledge.

EMPTION, êm'shûn, s. A purchasing.

EMPTY, êm-tê, a. 412. Void, having nothing in it, not full; unsatisfactory, unable to fill the mind or desires; without any thing to carry, unburdened; vacant of head, ignorant, unskilful; without substance, without solidity, vain.

To **EMPTY**, êm-tê, v. a. To evacuate, to exhaust.

To **EMPURPLE**, êm-pûrp'pl, v. a. To make of a purple colour.

To **EMPUZZLE**, êm-pûz'zl, v. a. To perplex, to put to a stand.

EMPYEMA, êm-pl-ê-mâ, s. 92. A collection of purulent matter in any part whatsoever, generally used to signify that in the cavity of the breast only.

✎ I have differed from Mr. Sheridan in the sound of the *y* in the second syllable of this word, merely from the disagreeable effect it has on the ear to pronounce two vowels of exactly the same sound in immediate succession. This sameness is, in some measure, avoided by giving *y* the long diphthongal sound of *i*; and the same reason has induced me to the same notation in the word *Empyema*. If good usage is against me, I submit.

EMPYREAL, êm-pîr'ê-âl, *a.* Formed of fire, refused beyond aerial.

EMPYREAN, êm-pîr'ê-ân, or êm-pîr'ê-ân, *a.* The highest heaven, where the pure element of fire is supposed to subsist.—See *Empyrea*.

⚡ This word has the accent on the penultimate syllable in Sheridan, Kenrick, Barclay, Nares, and Bailey; and on the antepenultimate in Ash, Buchanan, Perry, and Entick; and this last accentuation is, in my opinion, the most correct; for, as the penultimate is short, there is the same reason for placing the accent on the antepenultimate as in *Cerulean*; though poets, with their usual license, generally accent the penultimate.—See *European*.

EMPYREUM, êm-pîr'ê-ûm, } *s.* The burn-

ENCOMIUM, ên-kô'mê-ûm, *s.* Panegyrick, praise, elegy.

⚡ Though in cursory speaking we frequently bear the *e* confounded with the short *i* in the first syllables of *encamp*, *enchant*, &c. without any great offence to the ear, yet such an interchange in *encomium*, *encomiast*, &c. is not only a departure from propriety, but from politeness; and it is not a little surprising that Mr. Sheridan should have adopted it. The truth

To ENCOMPASS, ên-kûm'pâs, v. a. To enclose, to encircle; to go round any place.

ENCOMPASSMENT, ên-kûm'pâs-mênt, s. Circumlocution, remote tendency to talk.

ENCORE, ông-kôre', ad. Again, once more.

✠ This word is perfectly French, and, as usual, we have adopted it with the original pronunciation. In other words which we have received from the French, where the nasal vowel has occurred, we have substituted an awkward pronunciation in imitation of it, which has at once shown our fondness for foreign modes of speaking, and our incapacity of acquiring them: thus *Calisson* has been turned into *Cassoon*, *Ballon* into *Balloon*, *Dragon* into *Dragoon*, and *Chamont* (a character in the Orphan) into *Shamoon*; but in the word before us this nasal sound is followed by *c* hard, which after *n* always involves hard *g*, 408; and this is precisely an English sound. An Englishman, therefore, does not find the difficulty in pronouncing the nasal sound in this word which he would in another that does not admit of the succeeding hard *c* or *g*; as *entendement*, *attentif*, &c.; for if in pronouncing the *en* in these words the tongue should once touch the roof of the mouth, the French nasal sound would be ruined. No wonder then that a mere English speaker should pronounce this French word so well, and the rest of the nasal vowels so ill. It does not arise from the habit they contract at theatres (where it would be the most barbarous and ill-bred pronunciation in the world to call for the repetition of an English song in plain English). It does not, I say, arise from custom, but from coincidence. The sound, in the word before us, is common to both nations; and though the French may give it a somewhat lighter sound than the English, they are both radically the same. Adopting this word, however, in the theatre, does the English no manner of credit. Every language ought to be sufficient for all its purposes. A foreigner who understood our language, but who had never been present at our dramatic performances, would suppose we had no equivalents in English, should he hear us cry out *Encore*, *Bravo*, and *Bravissimo*, when we only wish to have a song repeated, or to applaud the agility of a dancer.

To ENDICT, } ên-dîte', v. a. To charge any

To ENDITE, } man by a written accusation before a court of justice, as, he was indicted for felony; to draw up, to compose; to dilate.

✠ Before Johnson published his Dictionary these words were universally spelt *indict* and *indite*. That great reformer of our language seems to have considered, that, as the Latin *indicare* came to us through the French *enditer*, we ought to adopt the French rather than the Latin preposition, especially as we have conformed to the French in the sound of the latter part of this word. But, notwithstanding his authority, to *indict*, signifying to charge, stands its ground, and to *indite* is used only when we mean to draw up or compose; in this sense, perhaps, it may not be improper to spell it *endite*, as it may serve to distinguish it from the other word, so different in signification.

To ENGENDER, ên-jên'dûr, v. n. 98. To be caused, to be produced.
ENGINE, ên'jîn, s. Any mathematical complication, in which various movements and parts concur to one effect; a military machine; an instrument to throw water upon burning houses; any means used to bring to pass; an agent for another.
*✱ Pronouncing this word as if written *ingine*, though very common, is very improper, and savours strongly of vulgarity.*
ENGINEER, ên-jè-nèer', s. One who manages engines; one who directs the artillery of an army.
ENGINEERY, ên'jîn-rè, s. The art of managing artillery; engines of war, artillery.
To ENGIRD, ên-gîrd', v. a. 382. To encircle, to surround.

To **ENLINK**, *én-link'*, *v. a.* To chain to, to bind.

To **ENLIST**, *én-list'*, *v. a.* To enter into military service.

✎ This word is not in Johnson's Vocabulary, but he has used it to explain the word to *list*; Ash has the word to *inlist*, which, as the word is derived from the French *liste*, a catalogue, is not so properly compounded as with the inseparable preposition *en*.

To **ENLIVEN**, *én-liv'n*, *v. a.* 103. To make quick, to make alive, to animate; to make vigorous or active; to make sprightly; to make gay.

ENLIVENER, *én-liv'n-ür*, *s.* That which animates, that which invigorates.

ENORMOUS, *é-nörmüs*, *a.* 314. Irregular, out of rule; wicked beyond the common measure; exceeding in bulk the common measure.

ENORMOUSLY, *é-nörmüs-lè*, *ad.* Beyond measure.

ENORMOUSNESS, *é-nörmüs-nès*, *s.* Immeasurable wickedness.

ENOUGH, *é-nüf'*, *a.* 314, 391. Being in a sufficient measure, such as may satisfy.

ENOUGH, *é-nüf'*, *s.* Something sufficient in greatness or excellence.

ENOUGH, *é-nüf'*, *ad.* In a sufficient degree, in a degree that gives satisfaction; an exclamation noting fulness or satiety.

ENOW, *é-nöü*, *a.* 322. The plural of *Enough*. A sufficient number.

✎ This word is growing obsolete, but it is not quite so much out of date as the word *hoo*, signifying a greater number. We still hear some speakers talk of having *ink enough* and *pens enow*; but the greater part seem now to use *enough* both for quantity and number; as *more* has been so used for some centuries.

To **ENRAGE**, *én-raje'*, *v. a.* To irritate, to provoke, to make furious.

To **ENRANGE**, *én-rånje'*, *v. a.* To place regularly, to put into order.

To **ENRANK**, *én-rånk'*, *v. a.* To place in orderly ranks.

ENRICHMENT, ẽn-rítah'mént, *s.* Augmentation of wealth; improvement by addition.
To ENRIDGE, ẽn-rídje', *v. a.* To form with longitudinal protuberances or ridges.
To ENRING, ẽn-ríng', *v. a.* To bind round, to encircle.
To ENRIPEN, ẽn-ríp'n, *v. a.* 103. To ripen, to mature.
To ENROBE, ẽn-ròbe', *v. a.* To dress, to clothe.
To ENROL, ẽn-ròle', *v. a.* 406. To insert in a roll or register; to record; to involve, to inwrap.
ENROLLER, ẽn-ròl'lór, *s.* He that enrolls, he that registers.
ENROLMENT, ẽn-ròl'mént, *s.* Register, writing in which any thing is recorded.
To ENROOT, ẽn-ròót', *v. a.* 306. To fix by the root.
To ENROUND, ẽn-ròund', *v. a.* 312. To environ, to surround, to enclose.
ENS, ẽnz, *s.* Any being or existence.

To ENSEAR, ẽn-sẻre', *v. a.* 227. To cauterize, to stanch or stop with fire.
To ENSHIELD, ẽn-sẻẻld', *v. a.* 275. To cover.
To ENSHRINE, ẽn-shrine', *v. a.* To enclose in a chest or cabinet, to preserve as a thing sacred.
ENSIFORM, ẽn'sẻ-fẻorm, *a.* Having the shape of a sword.
ENSIGN, ẽn'sẻne, *s.* 385. The flag or standard of a regiment; badge, or mark of distinction; the officer of foot who carries the flag.

✧ I have given the last syllable of this word the long sound, as I am convinced it is the most correct, though I am of opinion that, in the military profession, it is oftener pronounced short, as if written *ensin*. Some reasons from analogy might be produced in favour of this latter pronunciation, 144; but they do not seem sufficient to outweigh the more general usage which declares for the former.

ENSIGNBEARER, ẽn'sẻne-bẻ-rẻr, *s.* He that carries the flag.
ENSIGNCY, ẽn'sẻm-sẻẻ, *s.* The office of an ensign.

✧ I have not met with this word in any of our Dictionaries, but, from its very frequent use in the polite world, am persuaded it deserves a place there, and particularly in a Pronouncing Dictionary; as it must be remarked that, though the second syllable of *Ensign* is generally and more correctly pronounced with the *i* long, the same letter in the same syllable of *Ensigncy* is always short.

To ENSLAVE, ẽn-slẻve', *v. a.* To reduce to servitude, to deprive of liberty; to make over to another as his slave.
ENSLAVEMENT, ẽn-slẻve'mént, *s.* The state of servitude, slavery.
ENSLAVER, ẽn-slẻvẻr, *s.* He that reduces others to a state of servitude.
To ENSUE, ẽn-sẻẻ', *v. a.* To follow, to pursue.
To ENSUE, ẽn-sẻẻ', *v. a.* To follow as a consequence to premises; to succeed in a train of events, or course of time.
ENSURANCE, ẽn-shẻẻ-rẻnse, *s.* Exemption from hazard, obtained by the payment of a certain sum; the sum paid for security.

ENSURANCER, ẽn-shẻẻ-rẻn-sẻr, *s.* He who undertakes to exempt from hazard.
To ENSURE, ẽn-shẻẻre', *v. a.* To ascertain, to make certain, to secure; to exempt any thing from hazard by paying a certain sum, on condition of being reimbursed for miscarriage.

✧ As this word and its compounds come from the word *sure*, they all retain the aspirated pronunciation of the *s* in that word, 454; and it is not a little surprising that Mr. Sheridan has omitted to mark it.

ENSURER, ẽn-shẻẻ-rẻr, *s.* One who makes contracts of ensurance.
ENTABLATURE, ẽn-tẻb'ẻlẻ-tẻrẻ, *s.* In
ENTABLEMENT, ẽn-tẻb'ẻlẻ-mént, *s.* architecture, the architrave, frieze, and cornice of a pillar.

To ENUBILATE, ɛ-nū'bē-lāte, *v. a.* To clear from clouds.

To ENUCLEATE, ɛ-nū'klē-āte, *v. a.* To solve, to clear.

To ENVELOP, ɛn-vēl'up, *v. a.* To inwrap, to cover; to hide, to surround; to line, to cover on the inside.

ENVELOPE, ɛn-vē-lōpe', *s.* A wrapper, an outward case.

This word, signifying the outward case of a letter, is always pronounced in the French manner by those who can pronounce French, and by those who cannot the *e* is changed into an *a*. Sometimes a mere Englishman attempts to give the nasal vowel the French sound, and exposes himself to laughter by pronouncing *g* after it, as if written *ongvelope*. This is as ridiculous to a polite ear as if he pronounced it, as it ought to be pronounced, like the verb *To envelop*.

To ENVENOM, ɛn-vēn'um, *v. a.* 166. To poison; to make odious; to enrage.

ENVIABLE, ɛn've ā-bl, *a.* 405. Deserving envy.

ENVIER, ɛn've-ūr, *s.* 98. One that envies another, a maligier.

ENVIOUS, ɛn've-ūs, *a.* 314. Infected with envy.

To ENVIRON, ɛn-vl'rūn, *v. a.* 166. To surround; to envelop; to besiege, to hem in; to enclose, to invest.

ENVIRONS, ɛn-vē-rōnz', or ɛn-vl'rūns, *s.* 166. The neighbourhood or neighbouring places round about the country.

This word is in general use, and ought to be pronounced like the English verb *to environ*: but the vanity of appearing polite keeps it still in the French pronunciation; and as the nasal vowels in the first and last syllable are not followed by hard *c* or *g*, it is impossible for a mere Englishman to pronounce it fashionably.—See *Encore*.

To ENUMERATE, ɛ-nū'mē-rāte, *v. a.* To reckon up singly, to count over distinctly.

ENUMERATION, ɛ-nū-mē-rā'shūn, *s.* The act of numbering or counting over.

EPHEMERA, è-fém'è-rá, s. 92. A fever that terminates in one day; an insect that lives only one day.

✎ I was much surprised when I found Mr. Sheridan had given the long open sound of e to the second syllable of *Ephemera*, *Ephemeris*, &c. If it was in compliment to the Greek *eta*, the same reason should have induced him to give the sound of long e to the first syllable of *Hemistick*, *Demagogue*, and *Rhetorick*.

EPOCH, ép'ók, or é'pók, } s. The time at

EPOCHA, ép'ò-ká, } which a new computation is begun, from which dates are numbered.

✎ As the last of these words is Latin, from the Greek *ἐποχή*, the Latin accent and quantity on the antepenultimate syllable is preserved by polite speakers; and the first being anglicised, and containing only two syllables, falls into the quantity of the original. Buchanan, Nares, and Ash, make the first syllable of *Epoch* short; but Perry and Kenrick, in my opinion, make it more properly long.

EPODE, ép'óde, or é'póde, s. The stanza after the strophe and antistrophe.

✎ Entick, Scott, Perry, W. Johnston, Nares, and Ash, make the first e short; but Kenrick makes it long, as, in my opinion, it ought to be.

EQUIPMENT, ê-kwîp'mênt, *s.* The act of equipping or accoutering; accoutrement, equipage.

EQUIPOISE, ê-kwê-pôize, *s.* Equality of weight, equilibration.

EQUIPOLLENCE, ê-kwê-pôll'ênsê, *s.* Equality of force or power.

The strong tendency of our language to an enclitical pronounciation, 513, would induce me to give the antepenultimate accent to this and the following word, in opposition to Mr. Sheridan and others; as no good reason can be given to the ear why they should not have this accent as well as *equivalent*, *equivocal*, &c. But as *Æquivalens* and *Æquivocus* have the accent on the antepenultimate in Latin, and *Equipollens* on the penultimate, and the number of syllables being the same in both languages, the accent is generally on the same syllable, 503.

EQUIPOLLENT, ê-kwê-pôll'ênt, *a.* Having equal power or force.

EQUIPONDERANCE, ê-kwê-pôn'dêr-ânse, *s.* Equality of weight.

which blows between East and North, very
dangerous in the Mediterranean.

EUROPEAN, yû-rô-pê-ân, a. Belonging to
Europe.

✧ This word, according to the analogy of our own
language, ought certainly to have the accent on the se-
cond syllable; and this is the pronunciation which un-
lettered speakers constantly adopt; but the learned,
ashamed of the analogies of their own tongue, always
place the accent on the third syllable, because *Euro-
pus* has the penultimate long, and is therefore ac-
cented in Latin. *Epixrean* has the accent on the
same syllable by the same rule; while *Herculeus* and
Cerulean submit to English analogy, and have the
accent on the second syllable, because their penulti-
mate in Latin is short.

EURUS, yû-rûs, s. The East wind.

EURYTHMY, yû-rîth-mê, s. Harmony, re-
gular and symmetrical measure.

EUTHANASIA, yû-thân-â-zhê-â, s. 453.

EUTHANASY, yû-thân-â-sê, 92. } An easy
death.

✧ Of the accent of the first of these words there
can be no dispute; but the last is the first anglicised,
and therefore admits of some diversity. Mr. Sheri-
dan, Dr. Kenrick, Dr. Ash, Entick, Barclay, Bailey,
and the first editions of Dr. Johnson, accent the last
of these words on the antepenultimate, but the quarto
edition of Johnson on the penultimate: I suspect,
however, if we were strictly to follow our own ana-
logy, that we ought to place the accent on the first syl-
lable; for as this termination is not enclitical, 513, it
seems to be under the same predicament as *Academy*,
Irreparable, &c. which see.

EVULGATION, êv-ûl-gâ'shûn, s. The act
of divulging.

EVULSION, ê-vûl'shûn, s. The act of pluck-
ing out.

EWE, yû, s. 268. The she sheep.

✧ There is a vulgar pronunciation of this word, as
if written *gog*, which must be carefully avoided.

ter is brought for washing the hands.

EWRY, yû-rê, s. An office in the king's
household, where they take care of the linen
for the king's table.

EX, êks, or êgz. A Latin preposition often
prefixed to compounded words; sometimes
meaning out, as *exhaust*, to draw out.

✧ The *x* in this inseparable preposition is, with
respect to sound, under the same predicament as the *s*
in *Dis*; which see, 425.

To EXACERBATE, êgz-âs-êr-bâte, v. a. To
imbitter, to exasperate.

EXACTNESS, êgz-âkt'nês, s. Accuracy,
nicety, regularity of conduct, strictness of
manners.

To EXAGGERATE, êgz-âdje-ê-râte, v. a.
To heighten by representation.

✧ This word is sometimes heard with the double
g hard, as in *dagger*; but every one who has a scrap
of Latin knows that *exaggerate* comes from *exaggers*,
and that all words from that language have the *g* soft
before *s* and *t*; the third syllable, therefore, must
have the *s* soft. But it will be said, that, according to
the laws of pronunciation, the first *g* ought to be hard,
as the first *c* is in *flaccid*, *sticity*, &c. To which it
may be answered, that, strictly speaking, it ought to
be so; but polite usage has so fixed the first as well as
the last *g* in the soft sound, that none but a confirmed
pedant would have the boldness to pronounce them
differently.

This usage too we find is not without all foundation
in analogy. Wherever there is a considerable diffi-
culty in keeping sounds separate, they will infallibly
run into each other. This is observable in the sound
of *s*, which, when final, always adopts the sound of *x*
when a flat consonant precedes, 434; the first *s* like-
wise in the terminations *session*, *mission*, &c. neces-
sarily runs into the sound of *sh* like the last *s*: but it
may be said that the first *g* in *exaggerate* has no such
relation to the second as *s* has to *sh*; and that this very
difference between the two consonants makes us pre-
serve the first *c* in *flaccid* and *sticity* in its hard sound
of *k*, which is perfectly distinct from the other sound
of *c*, which is nothing more than *s*. To this it can
only be replied, by way of mitigation, that hard *g* and
soft *g* or *j* are formed nearer together in the mouth
than hard *c* or *k* and soft *c* or *s*; and, therefore, as
they are more liable to coalesce, their coalescence is
more excusable.

EXAGGERATION, êgz-âdje-ê-râ'shûn, s.
The act of keeping together; hyperbolical am-
plification.

EXHALABLE, êgz-hâ'lâ-bl, a. 405. That which may be evaporated.

EXHALATION, êks-hâ-lâ'shûn, s. The act of exhaling or sending out in vapours; the state of evaporating or flying out in vapours; that which rises in vapours.

To EXHALE, êgz-hâle', v. a. 478. To send or draw out vapours or fumes.

Though the ablest grammarians (Beauzée Grammaire Générale, tom. i. p. 66) have determined *H* to be a consonant, they have not decided whether it belongs to the flat or sharp class. If we consult our ear when we place an unaccented *x* before it, we shall judge it belongs to the former, as the *x* in this situation generally slides into *gz*.

EXHALEMENT, êgz-hâle'mênt, s. Matter exhaled, vapour.

To EXHAUST, êgz-hâwst', v. a. 425. To drain, to diminish; to draw out totally, to draw out till nothing is left.

EXHAUSTION, êgz-hâws'tshûn, 464. The act of drawing.

EXHAUSTLESS, êgz-hâwst'lêss, a. Not to be emptied, inexhaustible.

To EXHIBIT, êgz-hîb'ît, v. a. 478. To offer to view or use, to offer or propose; to show, to display.

EXHIBITER, êgz-hîb'ît-ûr, s. He that offers any thing.

EXHIBITION, êks-hê-bîsh'ûn, s. The act

of exhibiting, display, setting forth; allowance, salary, pension.

To EXHILARATE, êgz-hîl'â-râte, v. a. To make cheerful, to fill with mirth.

EXHILARATION, êgz-hîl'â-râ'shûn, s. The act of giving gayety; the state of being enlivened.

To EXHORT, êgz-hôrt', v. a. To incite by words to any good action.

EXHORTATION, êks-hôrt-tâ'shûn, s. The act of exhorting, incitement to good; the form of words by which one is exhorted.

EXHORTATORY, êgz-hôrtâ-tôr-ê, a. Tending to exhort. For the last *o*, see *Domestick*, 512.

EXHORTER, êgz-hôrt'ûr, s. One who exhorts

To EXICCATE, êk-sîk'kâte, v. a. To dry.

The first syllable of this word (strictly speaking) ought to be pronounced according to the rule laid down under the preposition *Ex*: but in this pronunciation we totally lose the sharp *s* which commences the Latin word *siccus*, to dry; of which this word is compounded; and thus the sound of the word is radically injured, and its etymology lost. But it will be said the Latins made the same excision of the radical *s* on account of the coincidence with the *s* contained in the *x* of the preposition, and wrote the word *exiccus*. It is allowed these corruptions obtained amongst them as amongst us; though it is doubtful whether the same inconvenience arose amongst them in this word as with us: for Vossius makes it highly probable that the Latins never gave the flat sound *egz* to the letter *x*; and the best manuscripts inform us that writing this word with an *x*, as *exsicco*, and thus preserving the composition distinct and perfect, is the most accurate orthography.

EXICCATION, êk-sîk-kâ'shûn, s. Act of drying up, state of being dried up.

EXICCATIVE, êk-sîk'kâ-tîv, a. 512. Drying in quality.

EXIGENCE, êk'sê-jênsê, } s. Demand, want,

EXIGENT, êk'sê-jênt, s. Pressing business occasion that requires immediate help.

EXIGUITY, êks-ê-gû'ê-tê, s. Smallness, diminutiveness.

EXIGUOUS, êgz-îg'û-ûs, a. Small, diminutive, little.

EXILE, êks'île, s. Banishment, state of being banished; the person banished.

This word, as a substantive, has the accent always on the first syllable; as a verb, it was formerly accented on either syllable; but it is now, as Mr. Nares observes, universally accented as the noun.

EXILE, êg-zîle', a. 478. Small, slender, not full.

This word, as an adjective derived from the Latin *exilis*, is by Nares, Sheridan, Ash, and Baskin accented on the last syllable. The third edition of Johnson's folio edition has the accent on the last also; but the quarto edition has it on the first. Authority is certainly on the side of the ultimate accent; but it may be questioned whether it is not contrary to analogy, for the penultimate *i* being long in Latin has no necessary influence on the English word, any more than it has on *hostile*, *servile*, &c.

To EXILE, êg-zîle', v. a. 492. To banish, to drive from a country.

EXILEMENT, êg-zîle'mênt, s. Banishment.

EXILITION, êks-ê-lîsh'ûn, a. Slenderness, smallness.

EXPLICATIVE, êks'plê-kâ-tiv, a. Having a tendency to explain.

✎ I have differed from Mr. Sheridan in the accentuation of this word. He has placed the accent on the second syllable, with the authority of every Dictionary, and of every good speaker, against him. In the first edition of this Dictionary, when I supposed Mr. Sheridan's accentuation of this word agreeable to analogy, I did not recollect the verb *To explicate*, whence it is derived, and which, in my opinion, ought to determine its accentuation.—See *Principles*, No. 512. Dr. Johnson, Mr. Scott, Mr. Perry, Dr. Kenrick, Dr. Ash, Entick, and Barclay, place the accent on the first syllable, as I have done.

EXPLICATOR, êks'plê-kâ-tûr, s. Expounder, interpreter, explainer.

EXPLORATOR, êks-plô-râ-tûr, s. One who searches; an examiner.

EXPLORATORY, êks-plô-râ-tûr-ê, a. Searching, examining.

✎ In this word, as in *Declaratory*, we may perceive the shortening power of the pre-antepenultimate accent; which, like the antepenultimate, when not followed by a diphthong, shortens every vowel but u. 511, 535.

To EXPLORE, êks-plôrê', v. a. 503, n. To try, to search into, to examine by trial.

♫ The *a* in this word seems floating between long and short quantity, as it was in the Latin *Fabrica*. I have, like Mr. Sheridan, made it short; for though Latin words of two syllables, when adopted into English, always have the accent on the first, and the vowel generally long, as *basis*, *focus*, *quota*, &c.; when words of three syllables in Latin, with but one consonant in the middle, are anglicised by reducing them to two syllables, as the penultimate in such Latin words is generally short, and the accent of consequence ante penultimate, the first vowel in the English word is generally short, from the shortening power of the antepenultimate accent in our pronunciation of the Latin word from whence it is derived: thus the Latin *Mimus*, reduced to the English *Mimick*, has the first vowel short, though long in Latin, because we think it short in our pronunciation of Latin: the same may be observed of the words *florid*, *vioid*, and *lioid*, from

FAC

the Latin *floridus*, *vioidus*, and *lioidus*. Thus, though *Fabrica* might have the first vowel long in Latin, yet as we always pronounce it short in the English pronunciation of that language, so, when it is reduced to the English *Fabrick*, it seems agreeable to this usage to make the first syllable short.

Authority seems likewise to favour this pronunciation; for Mr. Sheridan, Mr. Elphinston, Mr. Nares, Mr. Scott, Mr. Perry, and, as far as we can judge by the position of the accent, Bailey, are for the *a* short; and Buchanan, W. Johnston, and, if we can guess by accent, Dr. Ash and Entick, for the long *a*.—See Principles, No. 544.

FACUND, fâk'ûnd, *a.* 544. Eloquent.

Dr. Johnson has placed the accent on the last syllable both of this word and *Jocund*; in which he is consistent, but contrary both to custom and to English analogy. Mr. Sheridan places the accent on the first syllable of *Jocund*, and on the last of this word. The reasons are the same for accenting both; they both come from the Latin *facundus* and *jocundus*; and there is scarcely a more invariable rule in our language than that of removing the accent higher when we adopt a word from the Latin, and abridge it of its latter syllables.—See *Academy*.

FALSEHOOD, false'hūd, *s.* Want of truth, want of veracity; want of honesty, treachery; a lie, a false assertion.

This word, by the parsimony of Printers, is often spelt without the *e*. They may allege that spelling the word with *e* makes it liable to be pronounced in three syllables by those who do not know the composition of the word; and it may be answered that spelling it without the *e* makes it liable to a mispronunciation, by joining the *f* and *h* together; it. Therefore, the composition must be understood before the word can be pronounced with decency, for it, at least, be presented to the eye, and the chance of a mistake will be less.—See *Household and Hugshead*.

FALSELY, false'lē, *ad.* Contrarily to truth, not truly; professedly, by mistake, perjuriously, treacherously.

FAREWELL, { fôr'wêl, or fâre-wêl', } s.
{ fôr'wêl, or fâre-wêl', }

The parting compliment, adieu; it is sometimes used only as an expression of separation without kindness.

To all these different pronunciations is this word subject. The accentuation, either on the first or last syllable, depends much on the rhythm of the sentence.—See *Commodore* and *Commonwealth*.

When it is used as a substantive, without an adjective before it, the accent is generally on the first syllable; as,

" See how the morning opens her golden gates,
" And takes her *farewell* of the glorious sun."

Shakespeare.

Or if the adjective follow the substantive, as,

" If chance the radiant sun with *farewell* sweet
" Extend his ev'ning beam, the fields revive,
" The birds their notes renew, and bleating herds
" Attest their joy, that hill and valley ring."

Milton.

But, if the adjective precede the substantive, the accent is generally placed on the last syllable; as,

" Treading the path to nobler ends,
" A long *farewell* to love I gave."

Waller.

" As in this grove I took my last *farewell*."

Dryden.

Or when it is governed by a verb, as, "I bade him *farewell*," or, "I bade *farewell* to him."

When it is used as an adjective the accent is always on the first syllable; as, "A *farewell* Sermon."

But when it is used as an interjection, (for, with great deference to Dr. Johnson, I cannot think it an adverb,) the accent is either on the first or second syllable, as the rhythm of pronunciation seems to require.

" But *farewell*, king; with thus thou wilt appear,
" Freedom lives hence, and Banishment is here."

Shakespeare.

" — O queen, *farewell*; be still possess
" Of dear remembrance, blessing still and blest."

Pope.

With respect to the pronunciation of *a* in the first syllable of this word, Mr. Sheridan says, that in England the first syllable is pronounced like *far*, and in Ireland like *fare*. But, if this be really the case, the two nations seem to have changed dialects; for nothing can be more evident to the most superficial observer than the tendency in Ireland to pronounce the *a* like that in *far*, and in England like that in *fare*. Not that I think the pronunciation of the first syllable of *farewell*, like *far*, either vicious or vulgar: I am convinced many good speakers so pronounce it; but the other pronunciation I think the more eligible, as well as more general; Dr. Kenrick and Mr. Scott pronounce it with the second sound of *a*, and W. Johnston and Mr. Perry with the first.

FAULCON, fâw'kn, s.—See *Falcon*.

FAULT, fâlt, s. 404. Offence, slight crime, somewhat liable to censure; defect, want; puzzle, difficulty.

Dr. Johnson tells us that the *f* in this word is sometimes sounded and sometimes mute, and that in conversation it is generally suppressed. To this Dr. Kenrick adds, that it is needlessly suppressed. None of our lexicographers have marked this letter mute but Mr. Sheridan. Mr. Nares says the word is pronounced both ways, and leaves it undetermined; but Mr. Kipbington decides positively against retaining the *f* even in writing: his reasons are, that as the French have left out the *f* in their antiquated *faulte*, we ought to leave it out in our English word, which was derived from their ancient one. This reasoning, however, I think is not conclusive. If after deriving words from the living languages, and using them for centuries, we were to alter them as the parent language happens to alter, our own language would have no stability. The truth is, the French language is much more altered within the last two centuries than the English, and is greatly enfeebled by dropping its consonants. Its nasal vowels too have added to its weakness, by rendering both vowels and consonants less distinct. The *f* in question has nothing harsh or uncommon in its sound, and, if it were mute, would desert its relation to the Latin *faustus*, and form a disgraceful exception; and if poets have sometimes dispensed it to rhyme the word with *thought*, *sought*, &c. they have as readily admitted it to rhyme with *malt*, *salt*, and *assault*.

“Which of our thrum-capp'd ancestors found *fault*,
“For want of sugar-tongs or spoons for salt”—*King*.

FEALTY, fêl-î, s. Duty due to a superior lord.

Dr. Kenrick, Mr. Sheridan, Mr. Scott, Buchanan, W. Johnston, and, if we may judge by the position of the accent, *Emilek*, make only two syllables of this word; Mr. Perry, Mr. Nares, and, by the position of the accent, Dr. Ash, three. I do not hesitate a moment to pronounce the last division the best; not only as it is immediately derived from a French word of three syllables, *feauté*, but as this is generally its quantity in Milton and Shakespeare.

“I am in parliament pledge for his truth.

“And lasting *fealty* to the new-made king.”

Shakespeare

“—————Let my sovereign

“Command my eldest son, say, all my sons,

“As pledges of my *fealty* and love.”—*Ibid.*

“—————Man disloyal,

“Disloyal, breaks his *fealty*, and sins

“Against the high supremacy of heav'n.”—*Milton*.

“—————Each bird and beast behold

“After their kinds; I bring them to receive

“From thee their names; and pay thee *fealty*

“With low subjection.”—*Ibid.*

“Whether his first design be to withdraw

“Our *fealty* to God, or to himself

“Conjugal love.”—*Ibid.*

In these quotations from Johnson we see the first only makes *fealty* two syllables; and even here it may be presumed there is a poetical license exactly like that which Young uses in the word *really*:

“Why *really* sixty-five is somewhat old.”

To FEOFF, fêf, v. a. 256. To put in possession, to invest with right.

I had always supposed that the diphthong in this word and its compound *enfesoff* was pronounced like the long open *e*, but, upon inquiry into its actual pronunciation by the gentlemen of the law, found I had been in an error; and though Mr. Sheridan and Mr. Scott mark *fesoff* with the short *e*, they are in the same error respecting *enfesoff*, which they mark with the long *e*. Dr. Kenrick and Mr. Barclay are under the same mistake in *fesoff*, by pronouncing the diphthong long; and Mr. Nares is wrong also in pronouncing *enfesoff* in the same manner. Mr. Perry is the only one who is right in pronouncing the diphthong short in both. So much, however, had my ear been used to the long sound of this diphthong, that it escaped me in the words *enfesoff* and *enfesoffment*; which, to be consistent, I ought certainly to have marked with the short sound, as in *fesoff* and *fesoffes*.

To FETTER, fét'tl, v. n. 405. To do trifling business.

FETUS, fét'ús, s. 296, 480. Any animal in embryo, any thing yet in the womb.

¶ Whence can arise the different quantity of the e in *Fetus* and *Fetid*? Till a better reason appear, let us suppose the following: *Fetus*, except the diphthong, retains the Latin form, and therefore is naturally pronounced with its first syllable long. *Fetid* is anglicised; and as most of these anglicised words of two syllables are derived from Latin words of three, where the first, be it short or long, is in our English-Latin pronounced short, the same syllable in the English words is generally short likewise. This has established something like a rule; and this rule has shortened the first syllable of *Fetid*, though long in the Latin *Fetidus*.—See *Drama*.

✧ This word, spelled in this manner, is not in Johnson, though nothing seems better settled by custom than this distinction in the spelling between this word and the *flower* of a plant. That words written alike ought not to be sounded differently, in order to signify different things, has been proved, it is presumed, under the word *Bowl*: but that words signifying different things, though sounded alike, ought to be written differently, seems evident from the necessity there is of making words which are the signs of ideas as different as the ideas themselves. In the former case we do not know how to pronounce the word *Bowl* till we have its meaning fixed by what follows; in the latter, though the ear is not sure of the idea till it has heard the context, the eye in reading is at no loss for the meaning of the word, nor are the organs in suspense how to pronounce it. The want of a different sound to express a different idea is an imperfection of the language in both cases; but the want of a different mark to express difference of idea to the eye would be a double imperfection.

To FORGE, fōrje, *v. a.* To form by the hammer; to make by any means; to counterfeit, to falsify.

FORGER, fōrjēr, *s.* One who makes or forges; one who counterfeits any thing.

✧ This word is sometimes, but without the least foundation in analogy, written *forgerer*. If it should be argued that the word comes from the French verb *forger*, and therefore, like *frustrer* from *frustrer*, we add an *er* to make it a verbal noun; it may be answered, that we have the word to *forge* in the same sense as the French, but we have no verb to *frustr*, and therefore there is an excuse for adding *er* in the last word which has no place in the former.

FORGERY, fōrjēr-ē, *s.* The crime of falsification; smith's work, the art of the forge.

To FORGET, fōr-gēt', *v. a.*; *preter.* Forgot; *part.* Forgotten or Forgot. To lose memory of, to let go from the remembrance; not to attend, to neglect.

✧ The *e* in this and similar words is like that in *forbear*—which see.

FORLORN, fōr-lōrn', *a.* Deserted, desti-

tute, forsaken, wretched, helpless; lost, desperate, small, despicable.

✧ This word is sometimes, but improperly, pronounced so as to rhyme with *mourn*. Mr. Sheridan, Dr. Kenrick, Mr. Scott, Mr. Perry, and W. Johnston, make it rhyme with *Corn*.

FORLORNNESS, fōr-lōrn'nēs, *s.* Misery, solitude.

FORM, fōrm, or fōrm, *s.* The external appearance of any thing, shape; particular model or modification; beauty, elegance of appearance; ceremony, formality, order; external appearance without the essential qualities, empty show; external rites; stated method, established practice; a long seat; a class, a rank of students; the seat or bed of a hare.

✧ When this word signifies a long seat, or a class of students, it is universally pronounced with the *e*, as in *four*, *more*, &c. It is not a little surprising that none of our Dictionaries, except Mr. Smith's and Mr. Nare's, take any notice of this distinction in the sound of the *e* when the word signifies a seat or class. It were to be wished, indeed, that we had fewer of these ambiguously sounding words, which, while they distinguish to the ear, confuse and puzzle the eye.—See *Bowl*.

To FORM, fōrm, *v. a.* To make; to model; to scheme, to plan; to arrange; to adjust; to contrive, to join; to model by education.

FORMAL, fōr'māl, *a.* 88. Ceremonious, solemn, precise; regular, methodical, external, having the appearance, but not the essence; depending upon establishment or custom.

FRENZY, frēnzē, *s.* Madness, distraction of mind.

FREQUENCE, frē'kwēns, *s.* 844. Crowd, concourse, assembly.

Some speakers, and those not vulgar ones, pronounce the *e* in the first syllable of this and the following words, when the accent is on it, short; as if written *frēk-wēns*, *frēk-wēntly*, &c. They have undoubtedly the short *e* in the Latin *Frequens* to plead; and the Latin quantity is often found to operate in anglicised words of two syllables, with the accent on the first: but usage, in these words, seems decidedly against this pronunciation. Mr. Sheridan, Dr. Kenrick, Mr. Elphinston, Mr. Scott, Mr. Perry, Mr. Smith, W. Johnston, and, if we may judge by the position of the accent, Dr. Ash and Entick, are for the *e* long in the first syllable; and Buchanan only marks it with the short *e*. The verb *To frequent*, having the accent on the second syllable, is under a different predicament.—See *Drone*.

↗ Mr. Sheridan marks this word in the second manner only; but I am much mistaken if custom does not almost universally adopt the first. If the second is ever used, it seems to be in poetry, and that of the most solemn kind. Dr. Kenrick, W. Johnston, and Mr. Perry, pronounce it in the first manner; and Mr. Sheridan and Mr. Smith in the last. Mr. Scott gives it both ways, but seems to prefer the last; Mr. Nares gives it the first manner, but says it is sometimes pronounced regularly.

FURRY, fûr'rê, *a.* Covered with fur, dressed in fur; consisting of fur.

FURTHER, fûr'thûr, *a.* 98. Forth, Further, Furthest. At a great distance; beyond this.

✠ Dr. Johnson has proved beyond dispute that *farther* and *farthest* are not the comparative and superlative of *far*, but corruptions of the comparative and superlative of *forth*. However true this discovery may be, it does not seem a sufficient reason for altering the beaten path which custom had formed in the usage of *farther* and *farthest*. It is probable, indeed, that *far*, *fore*, and *forth*, arise from the same original root: *extending beyond some other object* seems to be the leading idea in all. *Far* seems to intimate extension beyond an indefinite object; *fore*, only such extension as gives priority to the extended object; and *forth*, from its form, seems to relate to the abstract of such priority of extension, or the very act of extending or issuing out. If, therefore, *forth* and *far* have different ideas annexed to them, the same comparative and superlative cannot possibly suit with both; and as almost immemorial usage has borrowed the comparative and superlative of *forth* to form the comparative and superlative of *far*, their sense is now fixed to the latter adverb; and *forth*, inasmuch as it differs from *far*, seems entirely to have lost its comparison. Notwithstanding, therefore, that *farther* and *farthest* are very irregular branches of *far*, they are grafted on it by use, and cannot be altered without diverting the *permanence* tendency of the language. Such, however, has been the force of Dr. Johnson's criticism, that, since his time, every writer and painter, unless by mistake, has used *further* and *furthest* for *farther* and *farthest*; by which means we have revived the comparative and superlative of an adverb which has lost its comparison, and have lost the comparative and superlative of an adverb which has been compared for these two hundred years. But though *further* passes very well for *farther*, when *far* is out of sight, we feel the utmost repugnance at saying.—“Thus far shalt thou go, and no further.”

“Some dream that they can silence when they will
“The storm of passion, and say, *Peace, be still*;
“But, ‘*Thus far and no farther*,’ when addressed
“To the wild wave, or wilder human breast,
“Implies authority, that never can,
“That never ought to be the lot of man.”

FUTURE, fû'tshûre, *s.* Time to come.

FUTURELY, fû'tshûre-lê, *ad.* In time to come.

FUTURITION, fû-tshû-rîsh'ûn, *s.* The state of being to be.

FUTURITY, fû-tû'rê-tê, *s.* Time to come; events to come; the state of being to be, futuration.—See *Fortuitous*.

✠ The reason why *future* has the *t* aspirated, and *futurity* preserves that letter pure, is, that the accent is before the *t* in the former word, and after it in the latter. 461.

To FUZZ, fûz, *v. n.* To fly out in small particles.

FUZZBALL, fûz'bâll, *s.* A kind of fungus, which, when pressed, bursts and scatters dust in the eyes.

GEESE, gêese, *s.* 560. The plural of Goose.
GELABLE, jêl'â-bl, *a.* What may be congealed.

✠ I have differed from Mr. Sheridan in the quantity of the first syllable of this word, not so much from the short *e* in the Latin *gelabilis*, whence it is derived, as from the analogy of English pronunciation. The antepenultimate accent generally shortens every vowel but *u*, unless followed by a diphthong.—See Principles, Nos. 503, 535, 536.

GELATINE, jêl'â-tîne, 149. } *a.* Formed
GELATINOUS, jê-lât'în-ûs, } into a jelly.

To GIRD, gêrd, *v. a.* 382; *pret.* Girded or Girt. To bind round; to invest; to cover round as with a garment; to enclose, to encircle. 560.

✎ We may observe that the *g* in this and similar words has the same liquid sound as in those where it is followed by *a* and *i* long, and it may be accounted for in the same manner, 98, 160. The short *e*, which is the true sound of *i* in these words, it has been frequently observed, is not really the short sound of that letter, but of *a* slender, 66; and as *r* followed by another consonant has a tendency to lengthen the *e* as it does the *a*, 77, 81, we find the same effect produced; that of interposing the sound of *e* nearly as if written *eggurd*, &c.—See *Guard*.

✎ Dr. Johnson, Mr. Sheridan, Mr. Scott, W. Johnston, Dr. Ash, Dr. Kenrick, Mr. Barclay, and Bailey, place the accent on the first syllable of this word; and Mr. Nares and Entick only on the second. Mr. Sheridan and Mr. Scott give the *a* the sound it has in *glaze*, and Dr. Kenrick gives it the sound of *a* in *glass*. The great majority of suffrages for the accent on the first syllable, which is the most agreeable to the analogy of our own language, is certainly sufficient to keep a plain Englishman in countenance for pronouncing the word in this manner; but as it is a French word, and a military term, a military man would blush not to pronounce it *à la Française*; and, notwithstanding the numbers for the other manner, I cannot but think this the most fashionable.

GLAD, glâd, *a.* Cheerful, gay; pleased, elevated with joy; pleasing, exhilarating; expressing gladness.

GOLA, gô'la, s. The same with Cymatium.

✧ That is a term in architecture signifying a member or moulding, one half of which is convex and the other concave.

GOLD, gôld, or gôôld, s. 164. The purest, heaviest, and most precious of all metals; money.

✧ It is much to be regretted that the second sound of this word is grown much more frequent than the first. It is not easy to guess at the cause of this unmeaning deviation from the general rule, but the effect is to impoverish the sound of the language, and to add to its irregularities. It has not, however, like some other words, irrevocably lost its true pronunciation. Rhyme still claims its right to the long open o, as in *beld, cold, fold*, &c.

"Judges and Senates have been bought for gold;
"Esteem and Love were never to be sold."
"Now Europe's laurels on their brows behold,
"But stain'd with blood, or ill exchanged for gold."
Pope.

And solemn speaking, particularly the language of Scripture, indispensably requires the same sound. With these established authorities in its favour, it is a disgrace to the language to suffer indolence and vulgarity to corrupt it into the second sound.—See *Wind*. But, since it is generally corrupted, we ought to keep this corruption from spreading, by confining it as much as possible to familiar objects and familiar occasions; thus *Goldbeater, Goldfinch, Goldfinder, Golding*, and *Goldsmith*, especially when a proper name, as *Dr. Goldsmith*, may admit of the second sound of o, but not *Golden*, as the *Golden Age*.

GOUGE, gôôdje, *s.* A chisel having a round edge.

GOURD, gôrd, or gôôrd, *s.* 318. A plant, a bottle.

Mr. Elphinston, Mr. Nares, W. Johnston, and Buchanan, pronounce this word in the first manner; and Mr. Sheridan, Mr. Scott, Dr. Kenrick, and Mr. Perry, in the last. The first is, in my opinion, the most agreeable to English analogy.

GOURDINESS, gôr'dê-nês, *s.* A swelling in a horse's leg.

GOURNET, gûr'nêt, *s.* 314. A fish.

GOUT, gôût, *s.* 313. A periodical disease attended with great pain.

GROCER, grô'sûr, *s.* 98. A man who buys and sells tea, sugar, plums, and spices.

Mr. Nares observes that this word ought to be written *Grosser*, as originally being one who dealt by the gross or wholesale. There is not, however, he observes, much chance that *Grocer* will give place to *Grosser*; especially as they no longer engross merchandise of all kinds, nor insist upon dealing in the gross alone. The other derivation of this word, from *grossus*, a fig, is not worth notice.

GROCERY, grô'sûr-ê, *a.* Grocers' ware.

GROGERUM, } grôg'râm, } *s.* Stuff woven

GROGRAM, } with a large

wool and a rough pile.

GROIN, grôîn, *s.* The part next the thigh.

GROOM, grôôm, *s.* A servant that takes care of the stable.

GROOVE, grôôv, *s.* A deep cavern or hollow; a channel or hollow cut with a tool.

To GROOVE, grôôv, *v. a.* To cut hollow.

To GROPE, grôpe, *v. n.* To feel where one cannot see.

To GROPE, grôpe, *v. a.* To search by feeling in the dark.

GROSS, grôse, *a.* 162. Thick, corpulent; shameful, unseemly; intellectually coarse; inelegant; thick, not refined; stupid, dull; coarse, rough, opposite to delicate.

This word is irregular from a vanity of imitating the French. In Scotland they pronounce this word regularly so as to rhyme with *mass*. Pope also rhymes it with this word.

"Shall only man be taken in the gross?"

"Grant but as many sorts of minds as *mass*."

This, however, must be looked upon as a poetical license; for the sound seems now irrevocably fixed as it is marked, rhyming with *jocose*, *verbose*, &c.

GROSS, grôse, *s.* The main body, the main force; the bulk the whole not divided into its several parts; the chief part, the main mass; the number of twelve dozen.

GROSSLY, grôse'lê, *ad.* Bulkily, in bulky parts, coarsely; without subtilty, without art; without delicacy.

GROSSNESS, grôse'nês, *s.* Coarseness, not subtilty, thickness; inelegant fatness, unwieldy corpulence; want of refinement, want of delicacy.

GUARD, gyârd, s. 92. A man or body of men, whose business is to watch; a state of caution, a state of vigilance; limitation, anticipation of objection; an ornamental hem, lace, or border; part of the hilt of a sword.

This word is pronounced exactly like the noun *yard*, preceded by hard *g*, nearly as *egg-yard*. The same sound of *y* consonant is observable between hard *g* and *a* in other words. Nor is this a fanciful peculiarity, but a pronunciation arising from euphony and the analogy of the language. 160.

GUARDAGE, gyârdâge, s. 90. State of wardship.

GUARDER, gyâr'dûr, s. 98. One who guards.

GUARDIAN, gyâr'dê-ân, or gyâr'jê-ân, s. 293, 294, 376. One that has the care of an orphan; one to whom the care and preservation of any thing is committed.

GUDGEON, gûdjûn, s. 200. A small fish found in brooks and rivers; a person easily imposed on; something to be caught to a man's own disadvantage.

GUERDON, gêr'dân, s. 166, 560. A reward, a recompense.

I have differed from Mr. Sheridan in the first syllable of this word, which he spells *gwer*. I have made the *a* mute; as in *guess*, not only as agreeable to the French *guerdon*, but to our own analogy. The authority of Mr. Nares confirms me in my opinion.

To GUESS, gês, v. n. 336. To conjecture, to judge without any certain principles of judgment; to conjecture rightly.

To GUESS, gês, v. a. To hit upon by accident.

GUESS, gês, s. 560. Conjecture, judgment without any positive or certain grounds.

GUIDANCE, gy'dânse, s. Direction, government.

To GUIDE, gyldê, v. a. 160. To direct; to govern by counsel, to instruct; to regulate, to superintend.

GUIDE, gyldê, s. One who directs another in his way; one who directs another in his conduct; director, regulator.

As they is hard in this word and its compounds it is not easy to spell them as they are pronounced; *y* must be considered as double *e*, and must articulate the succeeding vowel as much as in *yield*.—See *Guard*.

GUIDELESS, gyldê'lês, a. Without a guide.

GUIDER, gyldûr, s. 98. Director, regulator, guide.

GUILD, gûld, s. 341. A society, corporation, fraternity.

we may pronounce these two letters without the intervention of *e*, but that this pronunciation is not the most elegant. The same may be observed of the *g* hard, and the long and short *i*. We may pronounce *guide* and *guile* nearly as if written *egg-ide* and *egg-ile*, though not so properly as *egg-yide* and *egg-yile*, but that *gild* and *guilt* must necessarily admit of the *e* sound between hard *g* and *i*, or we cannot pronounce them.

GUILTYLY, gîl'tê-lê, *ad.* Without innocence.

GUILTINESS, gîl'tê-nês, *s.* The state of being guilty, consciousness of crime.

GYMNASTICALLY, jĩm-nũs'tũ-kũl-ũ, ad. Athletically, fitly for strong exercise.
GYMNASTICK, jĩm-nũs'tĩk, a. Relating to athletic exercises.

✧ In this word and its relatives we not unfrequently hear the g hard, as in *Gimlet*, for this learned reason, because they are derived from the Greek. For the very same reason we ought to pronounce the g in *Genesis*, *Geography*, *Geometry*, and a thousand other words, hard, which would essentially alter the sound of our language. Mr. Sheridan has very properly given the soft g to these words; and Mr. Nares is of the same opinion with respect to the propriety of this pronunciation, but doubts of the usage; there can be no doubt, however, of the absurdity of this usage, and of the necessity of curbing it as much as possible.—See *Principles*, No. 350.

GYMNICK, jĩm'nĩk, a. Such as practise the athletick or gymnastick exercises.
GYMNOSPERMOUS, jĩm-nũ-spũr'mũs, a. Having the seeds naked.

GYRE, jĩre, s. A circle described by any thing going in an orbit.
GYVES, jĩvz, s. Fetters, chains for the legs.

✧ Mr. Sheridan and Mr. Scott make the g in this word hard; but Mr. Elphinstone, Dr. Kenrick, and Mr. Perry, with more propriety, make it soft as I have marked it. Mr. Nares makes the sound doubtful: but this majority of authorities and agreeableness to analogy have removed my doubts, and made me alter my former opinion.

To **GYVE**, jĩve, v. a. To fetter, to shackle.

 To HALLOW, hâllô, v. a. To consecrate, to make holy; to reverence as holy, as, Hallowed by thy name!
 ♣ In pronouncing the Lord's Prayer, we sometimes hear the participle of this word pronounced like that of the word to *Hollow*. This arises from not attending to the distinction made by syllabication between the single and double *l*: the double *l* in the same syllable deepens the *a* to the broadest sound, as in *fall*; but when one of the liquids is carried off to the next syllable, the *a* has its short and slender sound, as *fall-low*: the same may be observed of *hall* and *hal-low*, &c.—See Principles, No. 85.
 HALLUCINATION, hâll-lâ-sê-nâ'shôn, s. Errour, blunder, mistake.
 HALM, hâwm, s. Straw.

HAMMERCLOTH, hãm'mur-clóth, s. The cloth upon the seat of the coach-box.

☞ A critick in the Gentleman's Magazine gives the following etymology of this word, which we do not find in any of our Dictionaries:

"When coaches and chariots were first introduced, our frugal ancestors used to load the carriage with provisions for the family when they came to London. The hamper, covered with a cloth, was a convenient repository, and a seat for the coachman. This was afterwards converted into a box. Hammercloth is therefore very probably a corruption of hamper-cloth."

If the derivation of this word were worth spending a thought upon, I should think, that as the seat of the coachman is not boarded, but slung like a hammock, the word is rather a corruption of hammock-cloth.

To **HAMMER**, hãm'mur, v. a. To beat with a hammer; to forge or form with a hammer; to work in the mind, to contrive by intellectual labour.

HARESEAR, hărz'êr, *s.* A plant.

HARIER, hăr'rê-îr, *s.* A dog for hunting hares.

✎ Either the spelling or the pronunciation of this word should be altered. The spelling necessarily requires the *a* long, as in *hare* ; and the pronunciation demands the *r* to be doubled. The most rational alteration would be to pronounce it with the *a* long, and to let the other pronunciation be considered as the language of the stable and the field.—See *Leash*.

HARVESTER, hă'văt-tôr, s. One who works at the harvest.
HARVESTMAN, hă'văt-mân, s. A labourer in harvest.
HAS, hă, s. The third person singular of the verb To Have.

There is some reason in the custom adopted by the profound and ingenious author of the Philosophy of Rhetoric, where he makes the third person of verbs end in *hă*, when the succeeding word begins with *s*, to avoid the want of distinction between the final and initial *s*, and he gives several examples of this; but this is only avoiding in one instance what cannot be avoided in a thousand; and as the living speech is not the most respectable part of our language, and requires more effort than the simple list, it may, except in very solemn language, be very well laid aside.

To **HASH**, hăsh, v. g. To mince, to chop into small pieces, and mingle.
